HOME EDITION

Frigerio is a family-run business, with its roots in an area of Lombardy called "Brianza", renowned for furniture manufacturing. Even today, all over the world "Brianza" stands for manual expertise and technical prowess. Now in its third generation, the Company has been a well-established, successful business in the interior furnishings sector for many decades. It is known and esteemed for its wide range of products and furnishing solutions, and the high quality of the materials and workmanship that go into making them. Frigerio started out as a "carpentry workshop", and boasts a longstanding artisan tradition; it interprets that tradition, however, using state-of-the art technologies and facilities, with highly specialist workers who have years of experience and expertise in producing every furniture design with the utmost efficiency and organizational capability. The Company is growing and developing constantly; the frequent logistical moves made over the years are one such example of this. Recently, the entire operation was transferred to a new site, providing it with larger, more prestigious premises.

Frigerio è un'azienda familiare che affonda le proprie radici in un territorio noto per la produzione di elementi d'arredo, la Brianza, luogo che ancora oggi nel mondo è sinonimo di sapienza manuale e abilità tecnica. Giunta ormai alla terza generazione, l'Azienda è da decenni una realtà affermata e consolidata nel settore dell'arredamento d'interni, conosciuta ed apprezzata per la varietà di proposte e di soluzioni d'arredo e per l'alta qualità di materiali e lavorazioni che le contraddistingue. Nata come "laboratorio di falegnameria" Frigerio si caratterizza per la lunga tradizione artigianale, interpretata però attraverso tecnologie e strutture all'avanguardia da personale altamente specializzato che vanta anni di esperienza e competenza per realizzare ogni progetto d'arredo con grande efficienza e capacità organizzativa. Un'Azienda in continua evoluzione e in costante crescita: ne sono conferma anche i continui spostamenti logistici avvenuti negli anni. Recentemente l'intera produzione è stata trasferita in una nuova sede, uno spazio di maggior estensione e di grande rappresentanza.
