From the simplicity of the lines, the subtlety of the curves and their interaction on White, ingenuity emerges in endless possibilities that, together with the variety of finishes, allow the imagination to run free. Thus, inspired by the Mediterranean Sea, our product is born.

SALINAS

SALINAS modular sofa is inspired by the borders of the Mediterranean coast. Located in Alicante, Salinas de Santa Pola natural park is a place full of contrasts. The shapes of this sofa take as reference the changing landscape. The seat emphasizes the tranquility and linearity of the water, giving a feeling of stillness, spaciousness and rest, while the backrest breaks with this homogeneity, like sudden mountains of salt in the landscape. The shape of its profile is inspired by the sinuosity of the beautiful animal that inhabits these places, the flamingo.

Design . **Santiago Sevillano**

NAO

The "Cabo de la Nao" is probably the most recognizable cape Alicante's coast. Precisely there, the last lines of this comfortable and light lounge were drawn by the hand of its designer, Javier Herrero. Its fresh and simple appearance make Nao an elegant and timeless piece, capable of transmitting that Mediterranean style which distinguishes us. Although if we go a little beyond aesthetics and inspiration we realize that Nao is also designed to be a highly functional product, easy to move and stack; its legs which can be fitted with wheels and its independent cushion solidly underpin this idea.

Design . **Javier Herrero**

NANSA

An essentially Mediterranean concept which is flexible and informal, reminiscent of the sunsets, the colour of our festivities, the cheerful atmosphere and the pleasant climate. The main thread of the collection is the curvature of the seat itself, which is part of the action of attracting the user, giving it a certain weight and comfort, and a progressive reflection of the collection. Relaxing compositions evoking moments of spring and warm summers.

CANASTA

Canasta is a multipurpose collection of chairs and stools for interior and exterior use. Made from steel bars, forming the squares that generates the perfect ergonomically perfect seat shell. The chair has pyramid shaped legs attached to the shell with specially designed fittings. In addition the Canasta chair offers the option of adding a seat cushion or alternatively a fully upholstered seat shell.

TECHNICAL DETAILS

SOFA

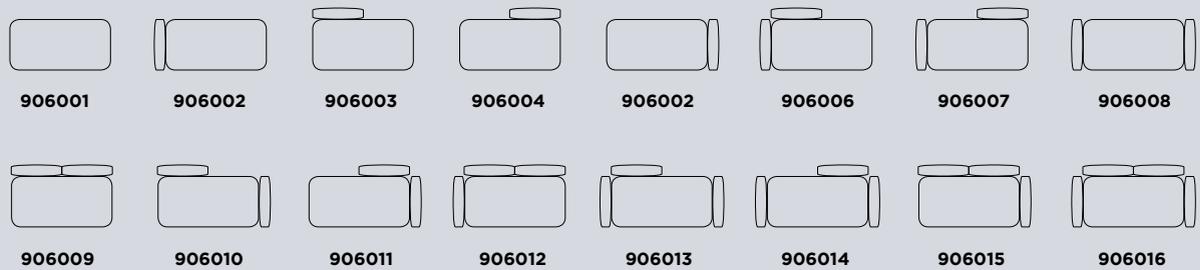

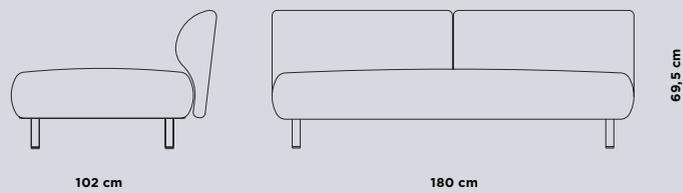

SALINAS

This collection of modular sofas has been designed by Santiago Sevillano, its structure is completely made of stainless steel. Its main feature is its flexible system of modules in three sizes, which can be configured with or without backrests and allow a wide range of combinations. The upholstery is removable and the interiors are protected by a water-repellent polyester covering.
