La filosofia del benessere
Wellness philosophy

Crescere, guardare lontano con professionalità e senso della competizione: questa è la filosofia che caratterizza la storia della Bossini. Bossini produce docce ed accessori dal 1960. Qualità, design, ricerca ed innovazione sono i principi fondamentali su cui si basa tutta la progettazione e la produzione. Bossini si è conquistata un ruolo di prestigio nella vetrina internazionale ove il design italiano è da sempre considerato il top del buon gusto e dell'eleganza. Grazie a quasi sessant'anni di esperienza, Bossini è riuscita a conferire alla doccia quella personalità, quel carattere che lo spazio intimo si merita, dato che il bagno è il nuovo teatro del home wellness.

Rispetto per l’ambiente
Respect for the environmen

I nostri tre impianti per la metallizzazione della plastica e dell’ottone, conformi ai requisiti per la gestione dei Sistemi Ambientali ISO 14001, sono quanto di più moderno e razionale possa essere realizzato oggi a tale scopo. Con gli accorgimenti in essi adottati, non solo si garantisce il pieno rispetto dell’ambiente, ottenuto grazie ad un sofisticato impianto di depurazione delle acque a circuito chiuso, ma si risponde ad un’esigenza di costante qualità del trattamento. Inoltre il fabbisogno energetico di tutti e tre gli impianti è interamente soddisfatto da un impianto di cogenerazione.

Respect For The Environment Our plastic and brass metallization plants conform to the requirements for Environmental Management Systems ISO 14001, being the most up-to-date and rational development in this field of application. The measures taken make it possible not only to guarantee total respect for the environment, thanks to a sophisticated closed circuit water treatment plant, but also to satisfy a need for constant quality in the treatment. The energy requirements in all three plants, moreover, are supplied entirely by a cogeneration plant.

Vollständigen Umweltschutz Die 3 erst kürzlich in Betrieb genommenen Anlagen für die Kunststoffmetallisierung und Verchromung der Messingkomponenten, die die Anforderungen für das Umweltsystemmanagement ISO 14001 erfüllen, sind die modernsten und rationellsten Anlagen, die im Augenblick für diesen Zweck gebaut werden. Die in ihnen implementierten Systeme garantieren nicht nur einen vollständigen Umweltschutz dank einer hochentwickelten Abwasserreinigungsanlage mit geschlossenem Kreis, sondern treten auch den Anforderungen für eine konstante Produktionsqualität entgegen. Der Energiebedarf der 3 Werke wird vollständig von einer Wärmekraftkopplungsanlage abgedeckt.

Respect de l’environnement Nos 3 unités pour la métallisation des matières plastiques et du laiton sont conformes aux conditions requises pour la gestion des Systèmes Environnementaux ISO 14001 et est ce que l’on peut réaliser de mieux à ce niveau à l’heure actuelle. Les méthodes adoptées garantissent le respect total de l’environnement grâce à une unité de dépuration des eaux à circuit fermé très sophistiquée, mais satisfont aussi les exigences de qualité constante du traitement. Les besoins énergétiques des trois unités sont également couverts par une unité de cogénération.

Respeto por el medioambiente Nuestras 3 plantas de metalización de Plástico y Latón operan conforme a los requisitos de los Sistemas de Gestión Ambiental ISO 14001, de la manera más moderna y racional actualmente posible. Con los procedimientos adoptados en estas plantas, no sólo se garantiza el pleno respeto por el medioambiente, obtenido gracias a un sofisticado equipo de depuración de agua en circuito cerrado, sino que también se responde a una exigencia constante de calidad en el tratamiento. Además, los requerimientos energéticos de las tres plantas están completamente cubiertos por un equipo de cogeneración.

Наше оборудование для латуни и металлизации пластика, соответствует требованиям, предъявляемым Системой Экологического Менеджмента ISO 14001; они настолько рациональны и современны, насколько это может быть реализовано в настоящее время и в данной цели. Установленные специальные устройства, гарантируют не только полную сохранность окружающей среды, в которых вода проходит через сверхсовременную очистку закрытого цикла, но также отвечают требованиям определённого качества переработки. Кроме того, энергетически все оборудование целиком работает за счет одного устройства подачи электроэнергии и тепла.

Syncro Renovation set

Installation 1 water inlet

Il soffione Syncro prevede un'unica alimentazione con acqua già miscelata che ne semplifica di molto l'installazione e consente di utilizzare gli attacchi a parete già esistenti, rendendo ancora più facile rinnovare l'ambiente doccia

The Syncro shower head is featured by single supply with ready mixed water that greatly simplifies installation and allows you to use the wall mounts already in place, making it even easier to restore the shower space

La douche de tête Syncro prévoit également une unique alimentation avec de l'eau déjà mélangée, ce qui en simplifie considérablement l'installation et permet d'utiliser les raccordements muraux déjà existants et rend encore plus facile la rénovation de lespace de la douche

El rociador Syncro prevé una única alimentación con agua ya mezclada que simplifica mucho la instalación y permite utilizar los empalmes a la pared ya existentes, facilitando todavía más la renovación del ambiente de la ducha

Colonne doccia con alimentazione da terra
Shower columns with ground inlet

Per la corretta installazione delle Colonna Doccia da esterno (con alimentazione da terra) dovete verificare preventivamente con i vostri progettisti/installatori dove volete sia orientato il getto della colonna, poiché la direzione di installazione della colonna è determinata dall'orientamento del connettore da incasso

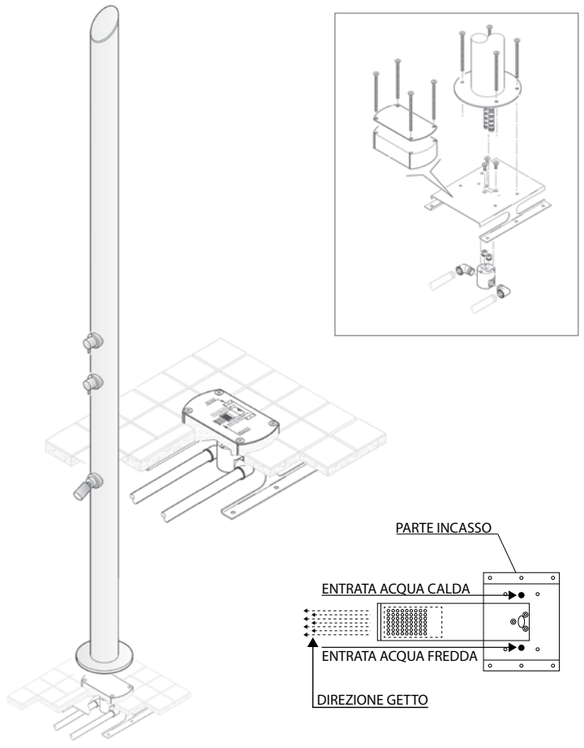

In order to install the outdoor shower column correctly (grounded in the earth), you must first check that your designers/installers know which direction you want the water spray to come from. This is because the direction in which the shower column is facing at installation is determined by the direction of the fixing connector

Für die korrekte Installation der Duschsäule für Außenbereich (mit Bodenspeisung), muss vorher zusammen mit Ihren Planern/Installateuren überprüft werden, in welche Richtung der Wasserstrahl der Säule gerichtet werden soll, denn die Richtung für die Installation der Duschsäule wird dadurch bestimmt, wie das eingelassene Verbindungsteil ausgerichtet ist

Pour une bonne installation de la colonne douche d'extérieur (avec alimentation au sol), vous devez consulter avant vos concepteurs/installateurs au sujet de la direction d'orientation du jet de la colonne, car la direction d'installation de la colonne douche est déterminée par l'orientation du connecteur à encastrer

Para la correcta instalación de las columnas ducha para exterior (con alimentación a suelo) se debe verificar previamente con vuestros decoradores/instaladores donde se quiere esté orientado el chorro de la columna. Porque la dirección de instalación de la columna está determinada por la orientación del cuerpo empotrado

Для правильной установки Душевой Колонны (с подключением к встроенному водоснабжению) необходимо произвести предварительные замеры с Вашими проектировщиками/установщиками и определить в какую сторону будет ориентировано направление душевой струи, поскольку однажды установленная колонна, не может быть повернута из-за встроенного блока подключения к водоснабжению

Prima di collegare il prodotto, eseguire accuratamente lo spurgo dell'impianto, in modo da evitare che si depositi dello sporco nei rubinetti, danneggiando le cartucce. É consigliabile installare all'ingresso dell'impianto un apposito filtro.

Carry out the system purging before the product connection, to prevent mixers functional problems from impurity or remains into the cartridge. It is recommended to install the filter at the system's water intake.

Vor dem Anschluss des Produkts die Wasseranlage sorgsam spülen, damit sich keine Verschmutzungen in den Armaturen ablagen, die die Kartuschen beschädigen. Das Einbau eines Filters am Eingang der Anlage ist zu empfehlen.

Avant d'installer le produit purger à fond la plomberie afin d'éviter que les cartouches soient endommagées par toute impureté ou débris. Nous vous conseillons de placer à l'entrée de l'installation un filtre adapté.

Antes de conectar el producto, realizar en forma precisa la purga de la instalación, a fin de evitar que la suciedad se deposite en los grifos, dañando los cartuchos. Es aconsejable instalar, en la entrada de la instalación, un filtro adecuado.

Перед подключением продукта к водоснабжению, пропустить поток воды, таким образом, чтобы возможные засорения не попали в смеситель, повредив картриджи. Рекомендуем установить соответствующий фильтр на входе подключения водоснабжения.

MODULAR SHOWER SOLUTIONS

MODELLI OPZIONALI SU RICHIESTA
Una delle caratteristiche dei termostatici Bossini è che sono “modulari“, quindi danno la possibilità di ottenere un maggior numero di uscite d’acqua semplicemente aggiungendo rubinetti/deviatori e/o rubinetti d’arresto. Questi modelli opzionali sono disponibili solo su richiesta.

OPTIONAL MODELS ON REQUEST
A further feature of Bossini thermostatic mixers is that they are ‘modular’, which means that more water outlets can be obtained by simply adding taps/diverters and/or stop valves according to the needs. These optional models are only available on request.

SONDERAUSFÜHRUNGEN AUF ANFRAGE
Ein weiterer Vorteil der Thermostat-Brausebatterie von Bossini liegt darin, dass sie „modular“ ausgestaltet sind und durch einfaches Hinzufügen von Umstellventilen oder Absperrventilen weitere Wasserausgängen nack Bedarf erreicht werden können. Diese Sonderausführungen sind nur auf Anfrage erhältlich.

MODÈLES OPTIONNELS SUR DEMANDE
Les mitigeurs thermostatiques Bossini sont également modulables, c’est-à-dire qu’ils permettent d’obtenir un plus grand nombre de sorties d’eau en ajoutant au gré de l’utilisateur des robinets/inverseurs et/ou des robinets d’arrêt. Ces modèles optionnels sont uniquement disponibles sur demande.

MODELOS OPCIONALES A PETICIÓN
Otra característica de los mezcladores termostáticos Bossini es que son “modulares”, por lo que ofrecen la posibilidad de obtener un mayor número de salidas de agua simplemente añadiendo a elección grifos/desviadores y/o grifos de cierre. Estos modelos opcionales están disponibles sólo a petición.

ДОПОЛНИТЕЛЬНЫЕ МОДЕЛИ ПО ЗАПРОСУ
Еще одна особенность термостатов Bossini то, что они «модульные», а следовательно, дают возможность увеличить количество выходов воды, просто добавив на выбор краны/девиаторы и/или запорные краны. Эти дополнительные модели доступны по запросу.

TECHNICAL FEATURES

CARATTERISTICHE TECNICHE DEI TERMOSTATICI ALTA PORTATA
Tutti i termostatici ad alta portata hanno attacchi da 3/4”e possono essere installati in verticale (con entrata dell’acqua calda e fredda rivolte verso il basso) o in orizzontale (con entrate dell’acqua calda e fredda rivolte verso il lato destro o sinistro). Una delle caratteristiche principali del sistema termostatico alta portata di Bossini è che funziona in modo ottimale anche in condizioni di bassa pressione. Esistono due tipologie di termostatici: **bassa pressione LP (Low Pressure)** con rubinetti singoli, oppure **alta pressione HP (High Pressure)** con l’utilizzo del rubinetto/deviatore 2 vie.

TECHNICAL FEATURES OF HIGH FLOW THERMOSTATIC MIXERS
All the high flow thermostatic mixers have 3/4” connections and can be installed vertically (with the incoming hot and cold water directed downwards) or horizontally (with the incoming hot and cold water on the left or the right). One of the main features of the Bossini high flow thermostatic system is that it works well even in low pressure conditions. There are two types of thermostatic mixer: **Low Pressure LP** with single taps, or **High Pressure HP** by using a 2 way tap/diverter.

THECHNISCHE EIGENSCHAFTEN DER HOCHDURCHFLUSS THERMOSTAT-BATTERIE
Alle Hochdurchfluss Thermostat-Batterie von Bossini haben ¾“ Anschlüsse und können sowohl senkrecht (mit Warm- und Kaltwassereingang nach unten) als auch waagerecht (mit Warm- und Kaltwassereingang nach rechts oder links) eingebaut werden. Ein der wichtigsten Vorteile der Hochdurchfluss Thermostat-Brausebatterie liegt darin, dass sie auch bei Niederdruck optimal arbeiten können. Zwei verschiedenen Typen sind erhältlich: **LP (Low Pressure)** Niederdruck Batterie mit Einzelstoppventilen oder **HP (High Pressure) Hochdruck** Batterie mit 2-Wege Umstellventilen.

CARACTÉRISTIQUES TECHNIQUES DES MITIGEURS THERMOSTATIQUES
Tous les mitigeurs thermostatiques haut débit sont dotés de raccords 3/4” et peuvent se monter en position verticale (l’entrée de l’eau chaude et froide dirigée vers le bas) ou en position horizontale (l’entrée de l’eau chaude et froide dirigée á la droite ou la gauche). L’une des principales caractéristiques du système haut débit Bossini repose sur sa capacité de fonctionnement optimal ausi en conditions de basse pression. Il existe deux types de mitigeurs thermostatiques: basse pression **LP (Low Pressure)** dotés de robinets individuels ou haute pression **HP (High Pressure)** avec l’utilisation du robinet/inverseur à 2 voies.

CARACTERÍSTICAS TÉCNICAS DE LOS MEZCLADORES TERMOSTÁTICOS ALTA CAPACIDAD
Todas los mezcladores termostáticos alta capacidad tienen conexiones de ¾” y pueden ser instalados en vertical (con entrada del agua caliente y fría hacia abajo) o en horizontal (con entradas del agua caliente y fría hacia el lado derecho o izquierdo). Una de las características principales del sistema termostático alta capacidad de Bossini es que funciona óptima mente también en condiciones de baja presión. Existen dos tipos de mezcladores termostáticos: **baja presión LP (Low Pressure)** con grifos simples o bien **alta presión HP (High Pressure)** con grifos/desviadores de 2 vías.

Технические Характеристики Смесителей ВЫСОКОЙ ПРОПУСКНОЙ СПОСОБНОСТИ
Все термостаты высокой пропускной способности имеют соединение на 3/4” и могут быть установлены вертикально (входы горячей и холодной воды повернуты к низу) или горизонтально (входы горячей и холодной воды повернуты в правую или левую сторону). Одна из основных особенностей системы термостатов высокой пропускной способности от Bossini – оптимальная функциональность, даже при низком давлении. Есть два вида термостатов: **низкого давления LP (Low Pressure)** с отдельными запорными кранами или высокого **давления HP (High Pressure)** с использованием крана/девиатора на 2 направления.

ATTENZIONE!
- In caso di pressione d’esercizio superiore ai 5 bar si consiglia l’utilizzo di riduttori di pressione
- If the operating pressure exceeds 5 bar, the use of pressure reducers is recommended
- Bei einem Betriebsdruck über 5 bar wird empfohlen, Druckminderer zu verwenden
- En cas de pression d’exercice superieure a 5 bar, on conseille d’utiliser des reducteurs de pression
- En caso de que la presión de trabajo supere los 5 bares, se recomienda utilizar un reductor de presión
- В СЛУЧАЯХ, КОГДА ДАВЛЕНИЕ ПОДАЧИ ПРЕВЫШАЕТ 5 БАР, РЕКОМЕНДУЕМ ИСПОЛЬЗОВАТЬ ОГРАНИЧИТЕЛИ ДАВЛЕНИЯ

La speciale presa d'acqua a due uscite e pulsante d'arresto si collega ad un punto di alimentazione d'acqua fredda preesistente, come quello per la cassetta di scarico del WC, del bidet o del lavabo. Con il set doccia bidet si consiglia l'impiego di un flessibile a fili intrecciati in acciaio resistente all'alta pressione

The special water supply with dual outlet and on-off button can be connected to a pre-existing cold water outlets, such as the one for exposed WC cistern, bidet or wash basin. With the bidet spray set the use of a high pressure resistant stainless steel braided hoses is recommended

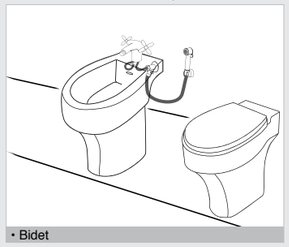

Der besondere 2-Weg Wandanschluss mit Schaltknopf kann an bestehende Kaltwasserversorgungssysteme, wie Spülkasten, Bidet oder Waschbecken, angeschlossen werden. Die Verwendung eines Edelstahlfäden-Schlauches mit dem Bidetbrauseset ist empfehlenswert

La coude murale à double sortie d'eau avec bouton d'arrêt peut être connectée à sorties d'eau froide préexistants, á des réservoirs apparents, au bidet ou lavabo. Avec l'ensemble de douche bidet l'emploi d'un flexible renforcé en inox est recommandé

La toma de agua especial de dos salidas con stop se conecta a una alimentación de agua fría ya existente, como aquellas de cisterna Wc a la vista, bidé, o lavabo. Con el conjunto de ducha bidet se conseja utilizar un flexible reforzado de acero inoxidable

Специальная водорозетка на два выхода с предохранительным клапаном, подключается к уже существующему холодному водоснабжению, как то которое предназначено для смывного бачка WC, биде или раковины. Для комплекта с гигиенической лейкой рекомендуем использовать усиленный (inox) шланг, резистентный к высоким давлениям

CONDIZIONI GENERALI DI VENDITA

Le presenti condizioni generali disciplinano tutti gli attuali e futuri contratti fra le parti, salvo eventuali deroghe specificatamente concordate per iscritto. Eventuali condizioni generali del compratore non troveranno applicazione nei rapporti futuri fra le parti se non espressamente accettate per iscritto dalla ditta Bossini spa (in seguito "venditore").

1.Formazione del contratto

L'invio da parte del compratore di un ordine al venditore comporta l'applicazione al contratto di vendita delle presenti condizioni generali. Il venditore si riserva il diritto di accettare o rifiutare l'ordine ricevuto. Le offerte fatte da agenti, rappresentanti ed ausiliari di commercio del venditore non sono per lui impegnative fino a quando non siano confermate dal venditore stesso.

2.Prezzi

Ai prezzi indicati nel presente listino deve essere applicata l'I.V.A. secondo l'aliquota in vigore al momento della fatturazione. Il vendi¬tore si riserva di modificare i prezzi, o di variare il listino prezzi senza alcun preavviso.

3.Resa della merce

Salvo patto contrario, la fornitura dei prodotti si intende Franco Fabbrica del venditore: trasporto ed assicurazione sono pertanto a carico del compratore e ciò anche quando sia convenuto che la spedizione o parte di essa venga curata dal venditore. In tal caso quest'ultimo agirà come mandatario del compratore, essendo inteso che il trasporto verrà effettuato a rischio del compratore. I rischi relativi alla fornitura passano al compratore al momento in cui i prodotti lasciano lo stabilimento del venditore.

4.Termini di consegna

I termini di consegna si intendono approssimativi a favore del venditore e comunque con un congruo margine di tolleranza. E' esclusa qualsiasi responsabilità del venditore per danni derivanti da anticipata, ritardata o mancata consegna, totale o parziale. Il compratore è sempre tenuto a prendere in consegna i prodotti, anche in caso di consegne parziali e di consegne anticipate o pos¬ticipate rispetto a quando richiesto. Il termine di consegna verrà prorogato di un periodo pari a quello della durata dell'impedimento al verificarsi di cause di forza maggiore. In nessun caso, a causa del verificarsi di tali circostanze, il compratore potrà esigere compensi o indennizzi di qualsiasi natura.

5.Garanzia

Il venditore garantisce la conformità dei prodotti forniti; con il termine di conformità dei prodotti si intende che essi corrispondono per qualità, quantità e tipo a quanto stabilito nel contratto e che sono esenti da vizi che potrebbero renderli non idonei all'uso cui sono destinati. La garanzia per vizi è limitata ai soli difetti dei prodotti conseguenti a difetti di progettazione, di materiale o di costruzione riconducibili al venditore, e non si applica nel caso in cui il compratore non provi di aver effettuato una corretta conservazione dei prodotti e di non averli modificati senza il consenso del venditore. Il venditore non risponde dei difetti di conformità dei prodotti dovuti all'usura normale di quelle parti che, per loro natura sono soggette a usura rapida e continua. La garanzia non copre danni causati da installazione e/o utilizzo impropri, errata concezione dell'impianto in cui sono installati/collegati i prodotti, deposito di calcare od impurità, impiego di prodotti di pulizia e manutenzione diversi da quelli specificatamente indicati nelle istruzioni di montaggio del venditore.
Qualora il compratore destini i prodotti alla rivendita resta inteso che il medesimo sarà responsabile verso i propri clienti per eventuali richieste di garanzia, con espressa rinuncia del compratore al diritto di regresso nei confronti del venditore per quanto prestato al consumatore privato, salvo diverso accordo scritto tra compratore e venditore.

6.Reclami

Il compratore è tenuto a verificare la conformità dei prodotti e l'assenza di vizi. I reclami relativi a non conformità palesi dei prodotti forniti dovranno essere effettuati, a pena di decadenza, entro e non oltre otto (8) giorni dal ricevimento della merce a destino. I vizi, difetti o non conformità occulti devono essere denunciati immediatamente alla loro scoperta e comunque, a pena di decadenza, entro e non oltre la durata della garanzia. Tutti i reclami devono essere effettuati mediante lettera raccomandata indirizzata al venditore e devono indicare dettagliatamente i vizi e le non conformità contestate. La garanzia ha una durata di ventiquattro (24) mesi dalla data di consegna al compratore.

7.Rimedi

In caso di prodotti non conformi, e dopo aver ricevuto un rapporto dettagliato dal compratore, il venditore potrà, a sua insindacabile scelta: a) fornire gratuitamente Franco Fabbrica al compratore prodotti dello stesso genere e quantità di quelli risultanti difettosi o non conformi a quanto pattuito, dopo averne ottenuto la resa per la verifica a spese del compratore. L'eventuale sostituzione effettuata prontamente dal venditore non può essere ritenuta un implicito riconoscimento dei vizi contestati: detto riconoscimento dovrà essere sempre esplicito e con-seguente al controllo del venditore sui prodotti contestati. Qualora il venditore, in sede di verifica, non riconosca viziati i prodotti, provvederà alla fatturazione di quelli inviati in sostituzione; oppure b) emettere una nota di accredito a favore del compratore per un importo corrispondente al valore dei prodotti difettosi. In entrambi i casi il venditore ha diritto alla restituzione dei prodotti difettosi che diventano di sua proprietà.
La presente garanzia è sostitutiva della garanzia legale per vizi e conformità ed esclude ogni altro rimedio o pretesa, inclusi eventuali costi di manodopera per smontaggio e/o reinstallazione, a favore del compratore.

8.Limitazione di responsabilità del venditore

Salvo dolo o colpa grave del venditore l'eventuale risarcimento di qualsiasi danno al compratore non potrà comunque superare il prezzo di fattura dei prodotti contestati.

9.Pagamento

I pagamenti ed ogni altra somma dovuta a qualsiasi titolo al venditore si intendono netti al suo domicilio. Qualsiasi ritardo o irregolarità nel pagamento dà al venditore il diritto di sospendere le forniture o di risolvere contratti in corso, anche non relativi ai pagamenti in questione, nonché il diritto al risarcimento degli eventuali danni. Il venditore ha altresì il diritto a decorrere dalla scadenza del paga¬mento, agli interessi moratori nella misura stabilita in Italia dall'art. 5 del Decreto Legislativo 9 ottobre 2002, n. 231. GENERAL CONDITIONS OF SALE

These general conditions regulate all present and future sales contracts between the parties, subject to any exceptions specifically agreed upon in writing. Any general conditions of the purchaser will not apply to future contractual relations between the parties unless expressly accepted in writing by Bossini spa (below "the seller").

1.Formation of the Contract

The purchaser placing the order fully accepts the application of these general terms to the Contract for sale. Seller reserves the right to accept or refuse it. Offers made by Agents, Representatives or auxiliaries of the seller do not bind him until they are confirmed by the seller itself.

2.Prices

The prices indicated in this price list do not include V.A.T. or any other tax whatsoever. Seller may modify the prices / price list without prior notice.

3.Surrender of the goods

Unless agreed to the contrary, the supply of the products is intended ex-factory: transport and insurance are therefore at the charge of the purchaser, this also when it is decided that the delivery or part of it will be taken care of by the seller, in which case the latter will act as the purchaser's agent, it being understood that the transport will be carried out at the expense and risk of the purchaser. The risks relative to the supply pass to the purchaser, at the latest at the time in which the products leave the seller's plant.

4.Delivery terms

The delivery limits are agreed approximately in favor of the seller and not binding for him. Any liability of the seller is excluded for dam¬age deriving from anticipated, delayed or missed delivery, total or partial. The purchaser is always held to take delivery of the products, even in the case of partial deliveries and even when the products are consigned before the established delivery date or successively to that date. The seller shall not be deemed to be in breach of this agreement, or otherwise be liable to the purchaser, by reason of any delay in delivery, to the extent that the delay is due to any Force Majeure, and the time for performance of delivery shall be extended accordingly.

5.Guarantee

The seller guarantees the compliance of the products supplied; by the term compliance of the products it is meant that they corre¬spond in quality, quantity and type to what was agreed in the contract and that they are without defects that could render them unfit for the use to which they are intended to be put. The guarantee against defects is limited only to product defects due to defects in planning, materials or construction that can be attributed to the seller, and does not apply in the case where the purchaser is unable to prove a correct preservation of the product and where he has modified them without the agreement of the seller. The seller is not liable for defects in product compliance due to the normal wear of those parts which, by nature, are subject to rapid and continuous wear and tear.
The warranty does not cover damages caused by improper installation and/or use, incorrect design of the system in which the products are installed/connected, scale or impurity deposits, use of cleaning products and maintenance different than those specifically indicated in the assembly instructions of the seller. If the product is intended to be resold, it is understood that the buyer will be liable to its customers for any warranty claims, with express renunciation of the buyer to the right of recourse against the seller for what is given to the private consumer, unless otherwise agreed in writing between buyer and seller.

6.Claims

The purchaser is required to control the compliance of the products and the absence of flaws. Claims relevant to evident non-conformities of the goods must be made, on pain of forfeiture, within and not later than 8 days from the goods arrival at their place of destination. Hidden flaws, defect or non-compliances must be reported immediately after the discovery and in any event, on pain of forfeiture, not later than the duration of the guarantee . Claims must be made by registered letter, addressed to the seller and must describe in detail the flaws or disputed non-compliances. The guarantee is for a limited period of twenty four (24) months from delivery date to the buyer.

7.Remedies

In case of faulty products and following to a report by the purchaser, the seller may at his discretion: a) supply ex-factory to the purchaser products of the same kind and quantity as those that proved not in compliance, on receiving returns for checking at buyer's expense. Any replacement carried out promptly by the seller cannot be considered as implicit recognition of defects claimed: said recognition must always be explicit and following control by seller on goods challenged; should the seller, on controlling, find the goods in compliance, he will invoice for those sent in replacement; or b) issue to the purchaser a credit note in the amount equal to the value of the defec¬tive products. In both cases the purchaser shall return the faulty products to the seller. This warranty is a substitute for the legal guarantee for defects and conformity and excludes any other relief or claim, including any labor costs for dismantling and/or reinstallation, in favor of the buyer.

8.Limit of the seller's liability

Except in the case of fraud or gross negligence on the seller's part, compensation of any damage to the purchaser will not, in any event, be greater than invoice price of the disputed products.

9.Payments

The payment and every other sum due to the seller, are understood as net at the registered office of the seller. Any delay or irregular¬ity in the payment gives the seller the right to suspend the supply or to cancel the contract in course, even if they are not relevant to the payments in question, as well as the right to compensation for eventual damages. The seller has also the right - starting from the payment deadline - to interests for delay as per art. 5 of Italian Legislative Decree no. 231 of 9/10/2002. The delays of payment likewise give the seller the right to exclusion from guarantee, for the whole period that the delay may persist.

10.Retention of Title

The delivered products remain the seller's property until the moment of the complete payment of the price.

11.Applicable Low and Competent Law-Court

All Contracts ruled by these general conditions are submitted to Italian Law. For any controversy relative to, or connected to the contractual products to which this general conditions apply, the seller's Law-Court has the exclusive competence; the latter, however, will have the opportunity to act also in the purchaser's Law-Court.

a) dem Käufer frei ab Werk Produkte derselben Art und Menge wie jene, die sich als fehlerhaft oder nicht vertragskonform erwiesen haben, liefern, nachdem er zu Prüfungszwecken auf eigene Kosten eine Lieferung derselben erhalten hat. Der gegebenenfalls vom Verkäufer umge¬hend geleistete Ersatz impliziert keine Anerkennung der beanstandeten Mängel: diese Anerkennung muss immer ausdrücklich und im Anschluss an die vom Verkäufer an den beanstandeten Produkten durchgeführten Kontrollen erfolgen. Falls der Verkäufer bei der Kontrolle keine Mängel feststellt, wird er die ersatzweise versandte Ware in Rechnung stellen; oder b) eine Gutschrift über einen Betrag im Wert der fehlerhaften Produkte zugunsten des Käufers ausstellen.

Настоящие условия регулируют все актуальные и будущие контракты между двух сторон, за исключением возможных отступлений согласованных письменно. Возможное внесение условий со стороны покупателя не будет рассмотрено в будущих отношениях сторон, если оно не было принято и письменно подтверждено со стороны компании Bossini spa.

3.Отгрузка товара

За исключением противоположных соглашений, отгрузка продукции происходит с предприятия продавца: транспортировка и страхование груза осуществляется за счет покупателя, также как и в тех случаях договоренности, когда отправка или какая-то ее часть будет проходить под контролем продавца. В таком случае, продавец выступает в качестве поверенного покупателя, при полной осведомленности, что транспортировка и возможные риски лежат на покупателе.

4.Сроки поставки

Сроки поставки назначаются приблизительные с предпочтением для продавца и с допустимым запасом на обстоятельства. Продавец исключает любую ответственность за ущерб, возникший в случае преждевременной, запоздалой или недостаточной поставки, общей или частичной. Гарантия на недостатки товара ограничена дефектами, которые вызваны по причине недостатка проектирования, материала или изготовления, и доведены до продавца, и не распространяется на тот случай, при котором покупатель не пытается осуществить надлежащее содержание изделия, и изделие было модифицировано без предварительного разрешения продавца. Продавец не отвечает за дефекты, возникшие вследствие естественной эксплуатации тех частей, которые по своему назначению предрасположены к быстрому и продолжительному использованию.

Все рекламации должны быть отправлены заказным письмом на адрес продавца и должны иметь подробное описание дефекта или обнаруженного несоответствия. Гарантия распространяется сроком на шесть месяцев.

7.Разрешения

В случае несоответствия продукции и после получения детализированного отчета от покупателя, продавец принимает решение на свой выбор: а) бесплатно поставить на свой склад для покупателя такую продукцию и количество, какая была признана, как бракованная или несоответствующая, по результатам проверки. Возможная замена без промедления, осуществленная продавцом, не может рассматриваться, как безоговорочное признание заявленных дефектов: данное признание не должно быть двусмысленным и должна быть подтверждена контролем продавца на заявленную продукцию. Если продавец, после проведения проверки, не признает продукцию недоброкачественной, она будет внесена в счет, как отправленная на замену или б) будет выставлен аккредитив в пользу покупателя на сумму соответствующую общей сумме товара с дефектом. В обоих случаях продавец имеет право на возвращение товара с дефектом, который становится его собственностью.

8.Пределы ответственности продавца

9.Оплата

Оплаты, также как и другие платежи, надлежащие продавцу, понимаются, как нетто и отправляются по местонахождению продавца. Также продавец имеет право, начиная со срока окончания платежа, начислить проценты на остаток задолженности в той мере, какая установлена в Италии согласно п. 5 Законодательного Декрета от 9 октября 2002, N° 231. Задержка в платежах дает продавцу право на исключение гарантийных обязательств на весь период, в течение которого длится задержка

10.Право собственности

Продукция, подготовленная к отгрузке, остается собственностью продавца до момента полной оплаты ее цены.

11.Применимое законодательство и компетенция суда

Все контрактные обязательства представленные в настоящих общих условиях регулируются итальянским законодательством.
