## The Company

Founded in 1989, Albino Miranda, Ltd. is a company that is within the decorative sector, creating and developing furniture and sculpture.

Starting with the Gestos brand, the company has debut on the market with a stone composite developed by Albino Miranda, in order to conceive decorative sculptures.

With its progress come however new investments, such as the adaptation to the unique furniture, combining stone with exotic woods and custom finishes.

In 2009, with the need to take the first steps in the international market, the company embraces a new challenge, presenting their latest brand of furniture in fiberglass, Karpa, designed for interior and exterior and composed by a wide range of artistic, unique and luxurious products.

It was in 2015, with Karpa focused on artistic and unique solutions and the desire to expand to different markets, that the company launched the GANSK brand, in order to serve markets that look for something more simple and elegant, proposing innovative, modern and sophisticated fiberglass furniture.

## Albino Miranda

*The Artist*

Born in 1967 in the midst of a humble family, Albino Miranda always did stand out for his creativity and aptitude for the art.

After working with several companies mainly in the field of ceramic, in which he has always stood out for his talent as sculptor, it's in the 90s with the ambition to grow professionally on his own and taking sculpture as passion, that he starts a possible project that comes later to be Albino Miranda, Ltd.

Starting with a small space at home, he made his sculptures out of a composite stone invented by him and his project started growing. Always following the market needs, the business would eventually be extended to other types of stone, wood and custom finishes.

He currently develops his projects in fiberglass, material with which he intends to work from now on, due to its mechanical properties and design flexibility.

*“Art... an expression of thought.”*
