

April 2015. Early morning on the train to Monza in north Italy the idea of Pellington Design was born. Pellington's goal is to create serious but playful design that contributes to a stimulating and inspiring surrounding. The unexpected, unusual and personal is an important part in a meeting, whether it is with a person or an object. Pellington's vision is to create an unanticipated and enjoyable meeting that puts a smile on your face and leads to a serious and lifelong relationship.

Confetti is an expressive and versatile wall-mounted shelf system designed and produced in Sweden. It consists of three parts: back-plate, bricks and shelves that easily can be composed in truly unique combinations. The colours of the bricks ranging from soft pale blends to striking rich colours that opens for a serious personal and artful shelf experience.

The coloured bricks are arranged and then pushed in to the back-plate. The panel is then hanged on the wall and the shelves are finally pushed in between the bricks. Several panels can be combined to create a larger wall piece and it's possible to change the position on both bricks and shelves.

C09 EDITION

A cross-decade color celebration with a flare from past times.

C11 EDITION

Strictly graphically speaking. Mixed with its peers: the beginning of a beautiful friendship.

Actual colours may differ from images shown

C12 EDITION

The heavyweight champion, a serious colorful explosion.

C13 EDITION

Shelf art in its true self, the Mondrian connection is a centerpiece with style.

Actual colours may differ from images shown

C15 EDITION

Sleek and smart, with an air of panache.

CUSTOM CONFETTI

Shelf-creation at his core, bring forth your unique Confetti.
