

AUROOM

Centrsvet was founded in 2005. We are creating functional lighting and offer you modern design, premium quality and reasonable prices.

We focus on developing the fixtures in minimalistic style, maintain a balance between quality and quantity of light and use simple forms. The dimensions of the fixtures are kept to a minimum, while their performance indicators are maximized. The fixtures are perfectly fit into the interior environment and become an integral part of the architecture.

Centrsvet has all the knowledge, up-to-date technology and its unique style to offer you today the best lighting in Russia.

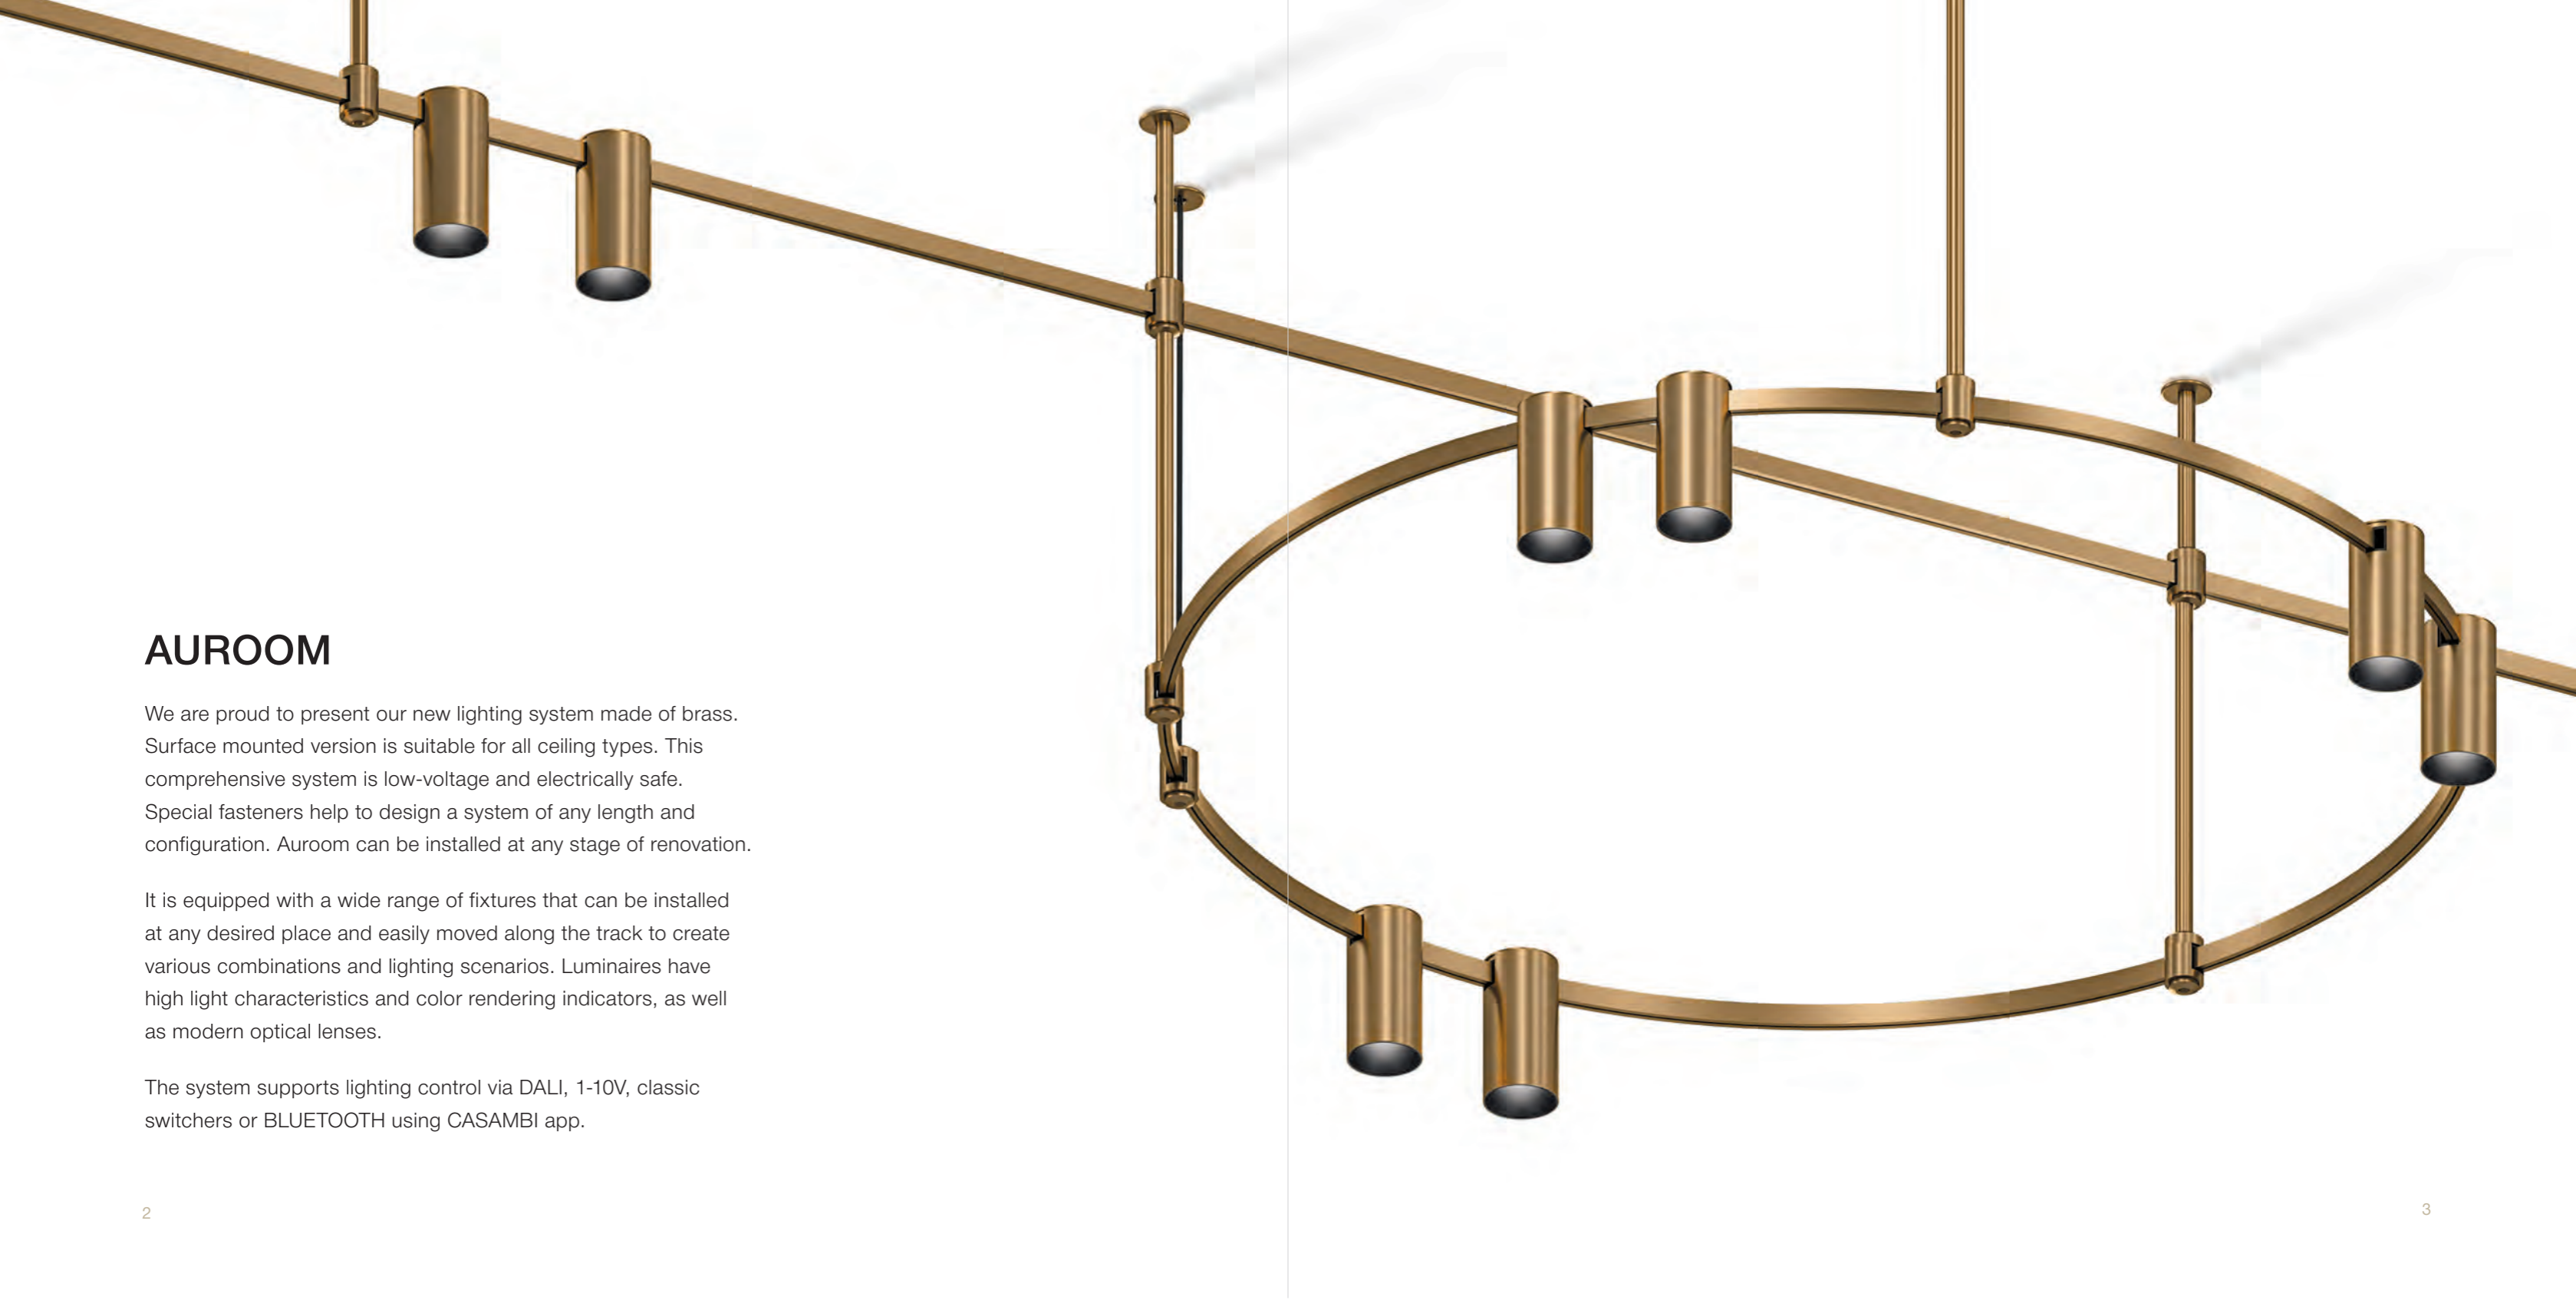

CENTRSVET

AUROOM

We are proud to present our new lighting system made of brass. Surface mounted version is suitable for all ceiling types. This comprehensive system is low-voltage and electrically safe. Special fasteners help to design a system of any length and configuration. Auroom can be installed at any stage of renovation.

It is equipped with a wide range of fixtures that can be installed at any desired place and easily moved along the track to create various combinations and lighting scenarios. Luminaires have high light characteristics and color rendering indicators, as well as modern optical lenses.

The system supports lighting control via DALI, 1-10V, classic switchers or BLUETOOTH using CASAMBI app.

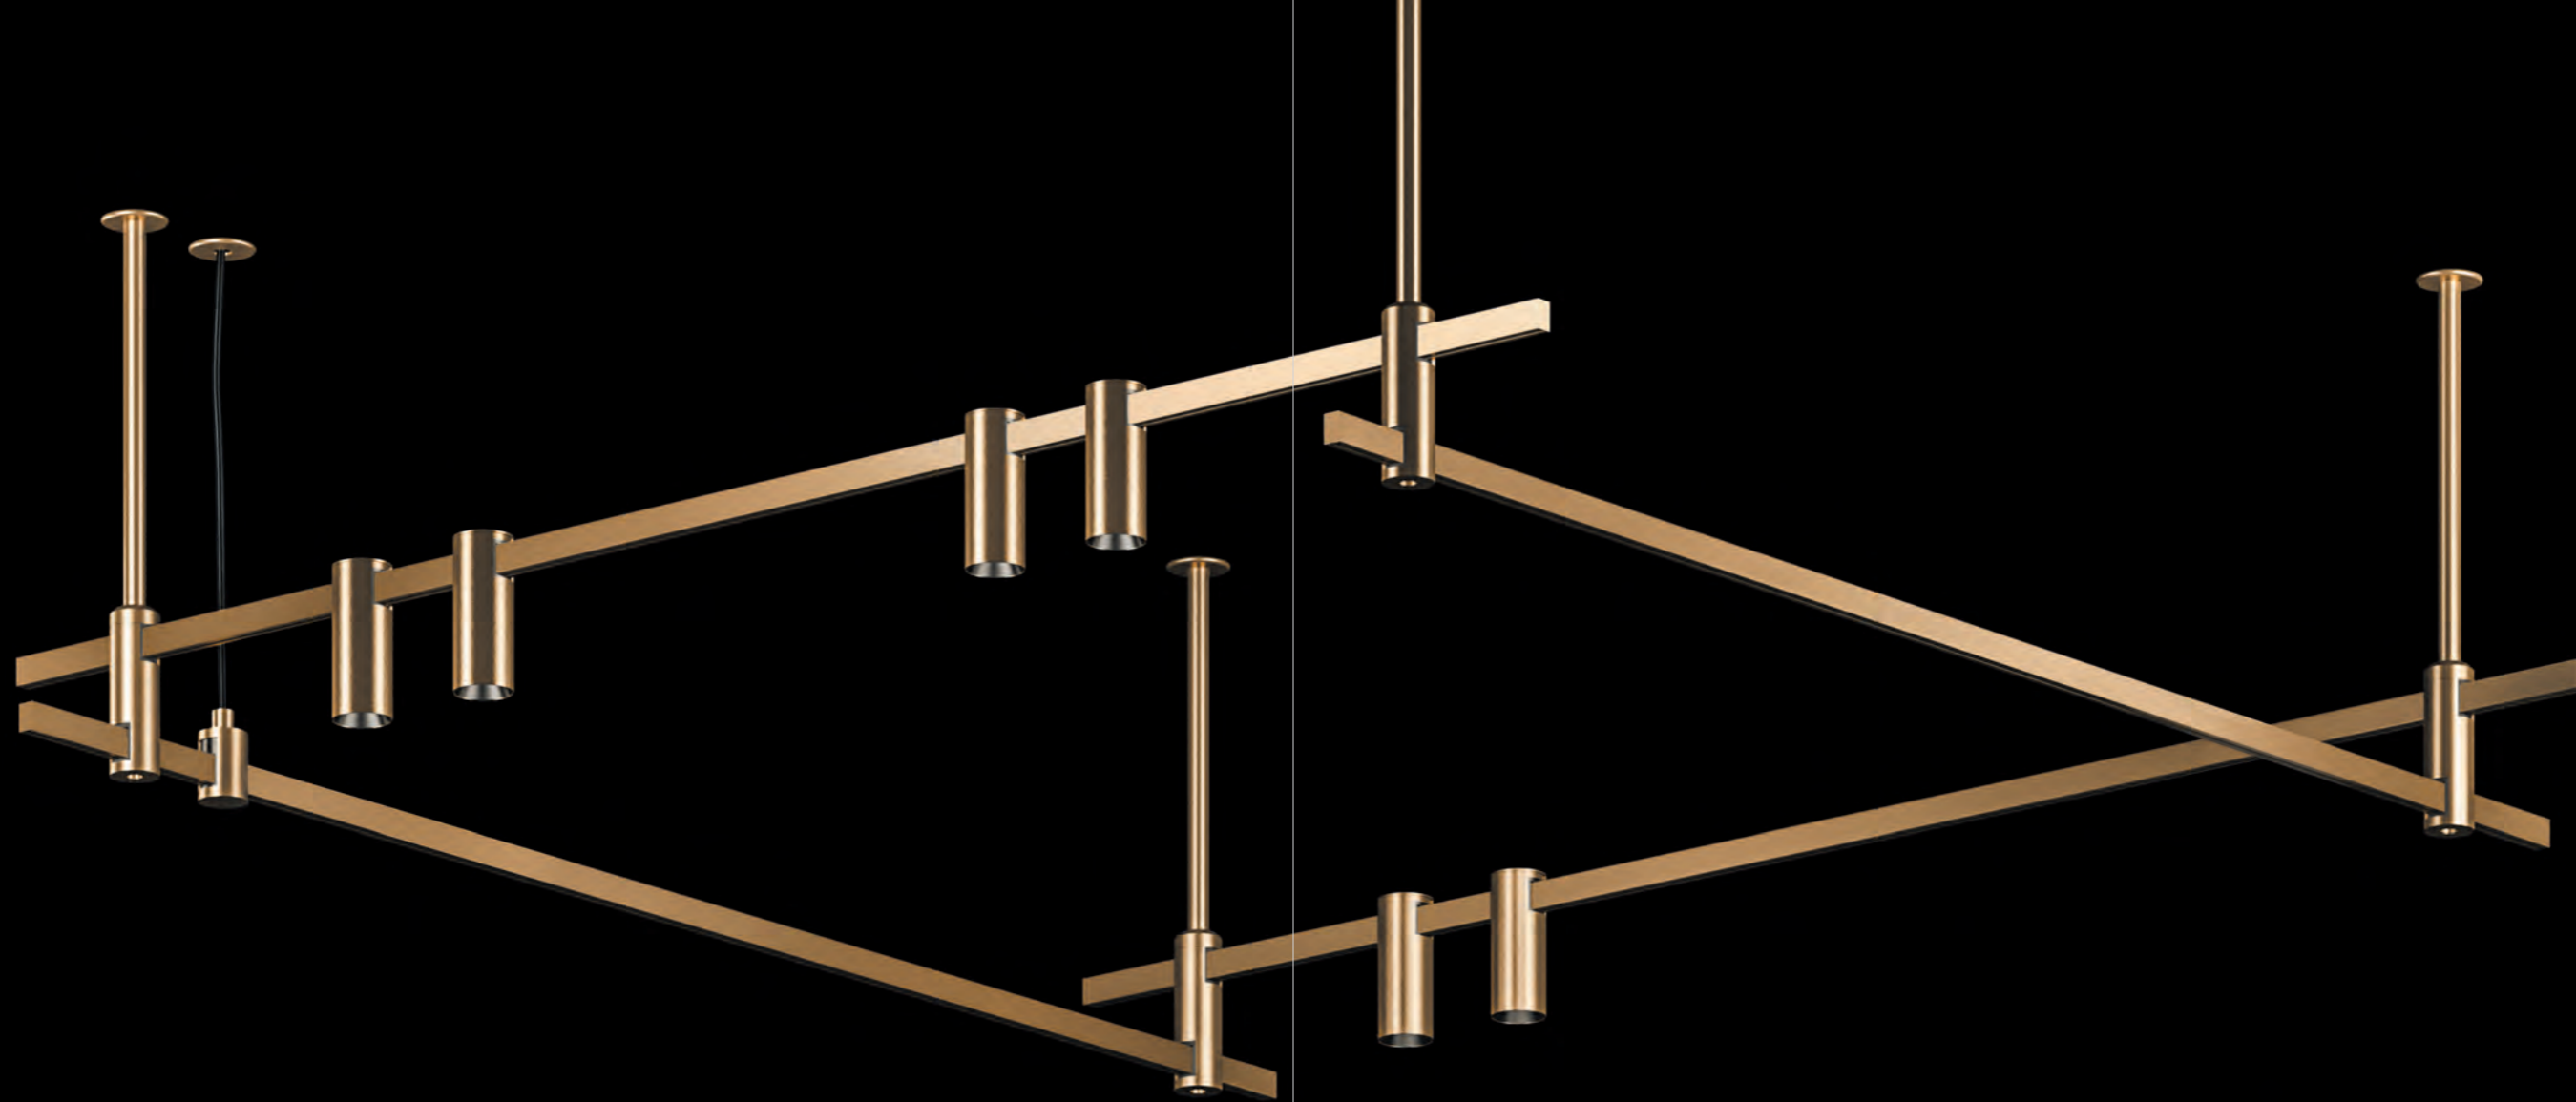

PURE BRASS

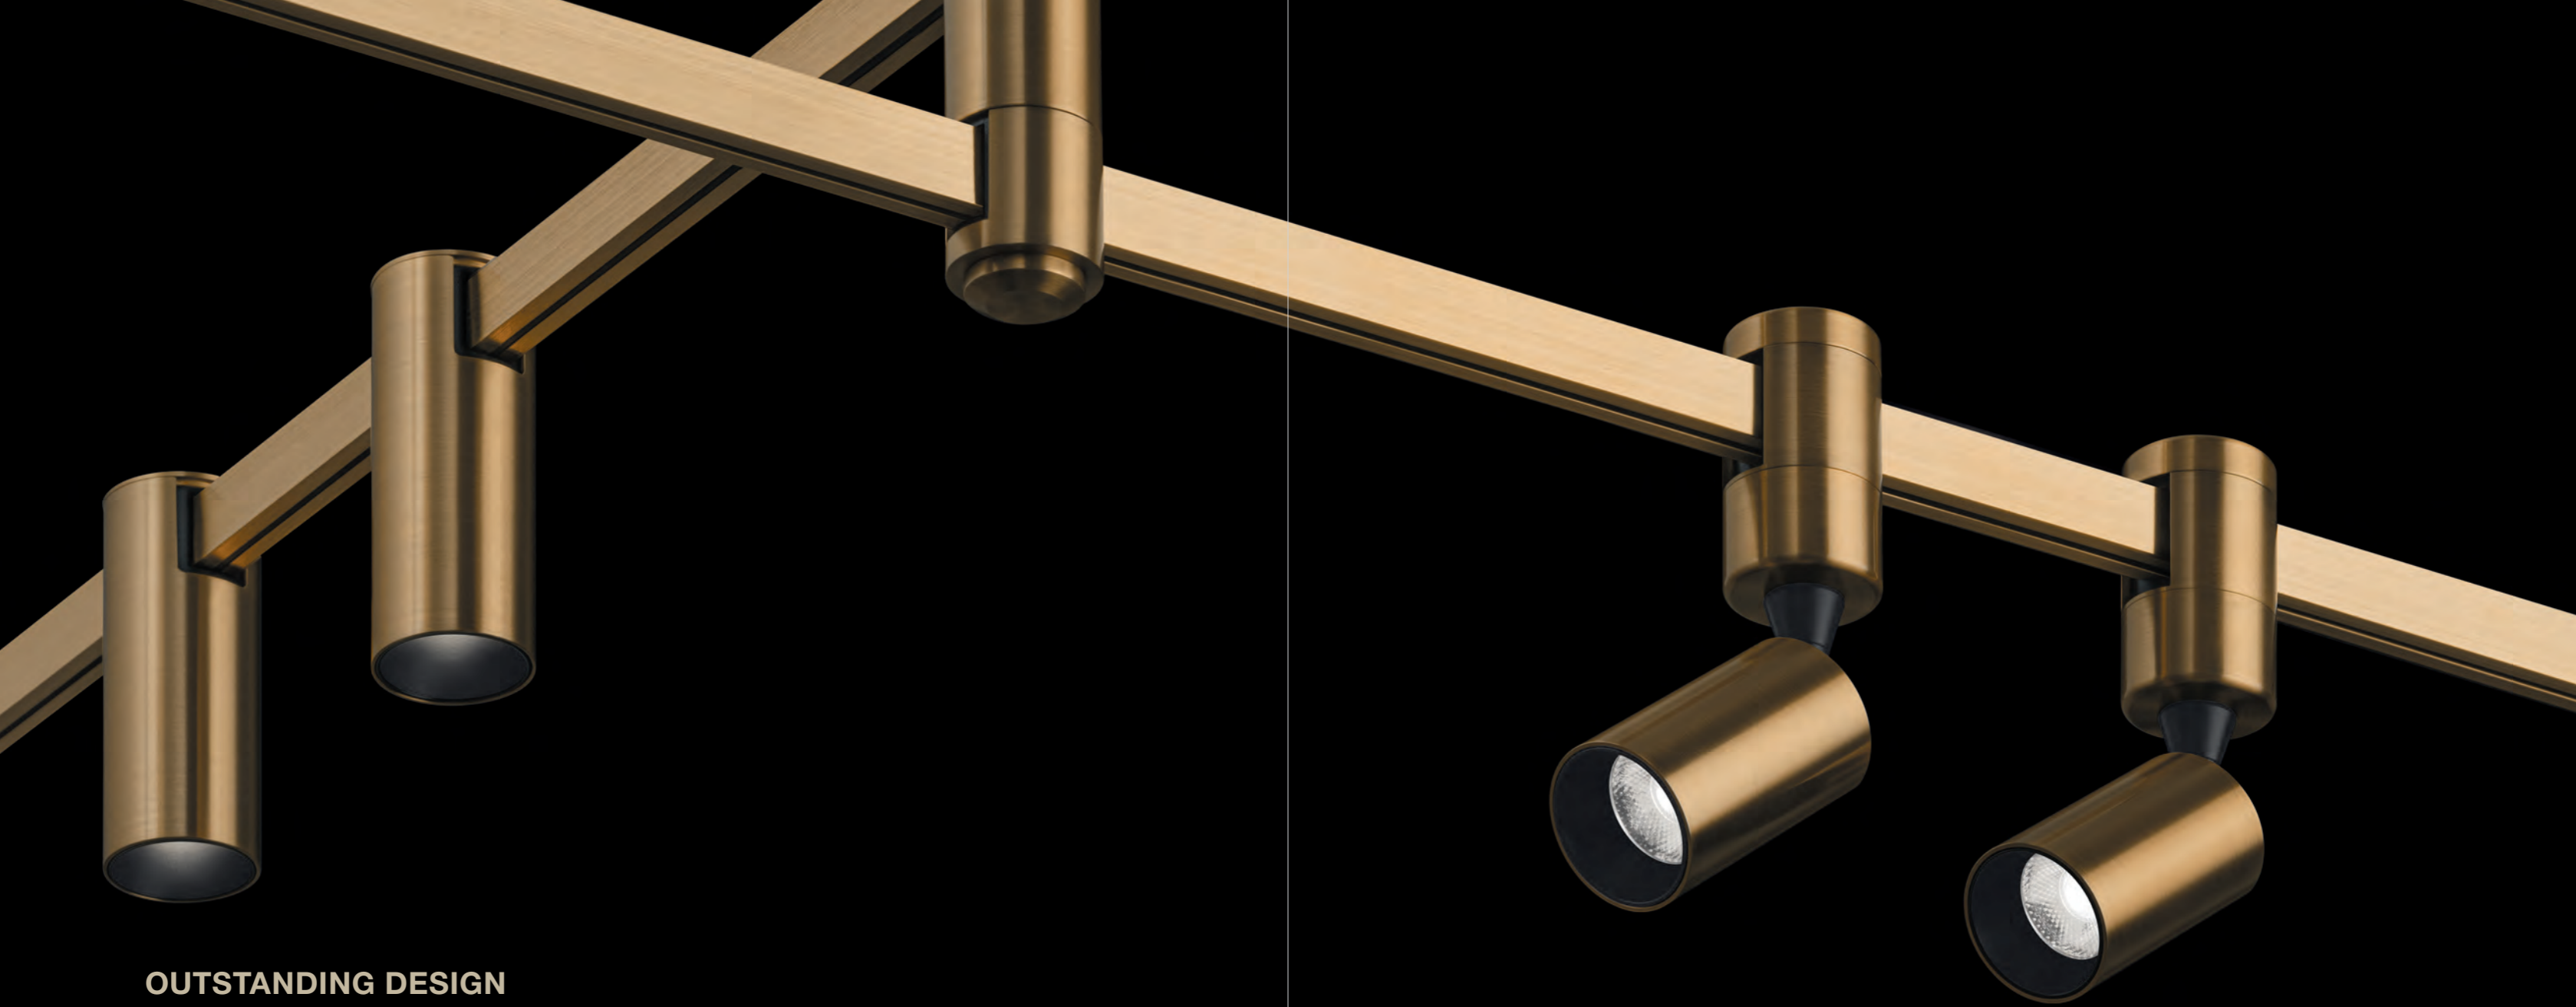

The whole system (tracks, fasteners and fixtures) is made of pure brass.

The surface of all elements is additionally brushed to provide refined matt effect.

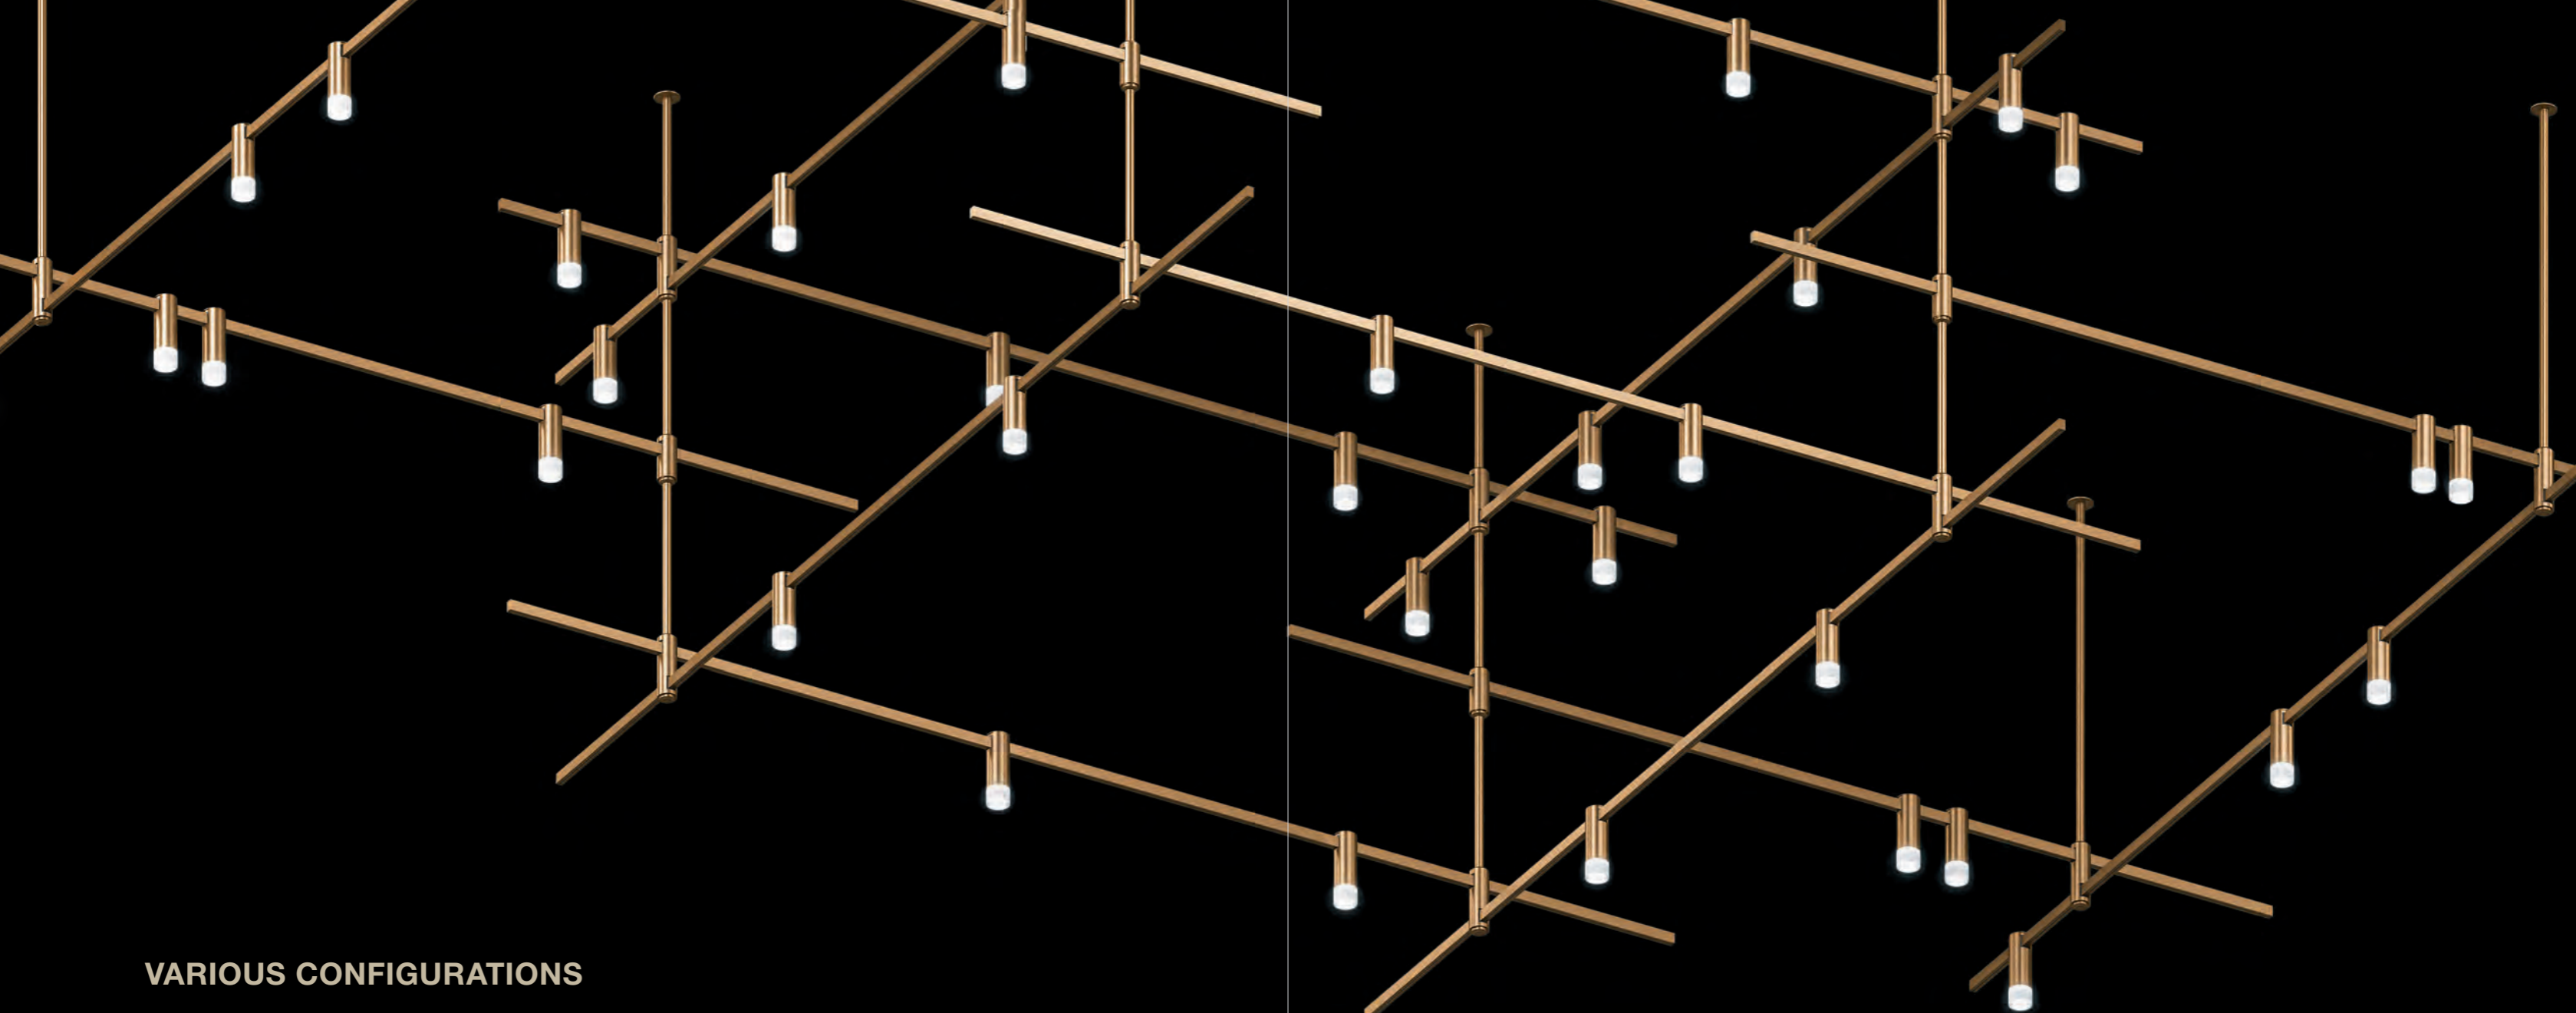

EASY TO INSTALL

Auroom system does not require mounting into the ceiling and can be easily installed on different surfaces at any stage of repair.

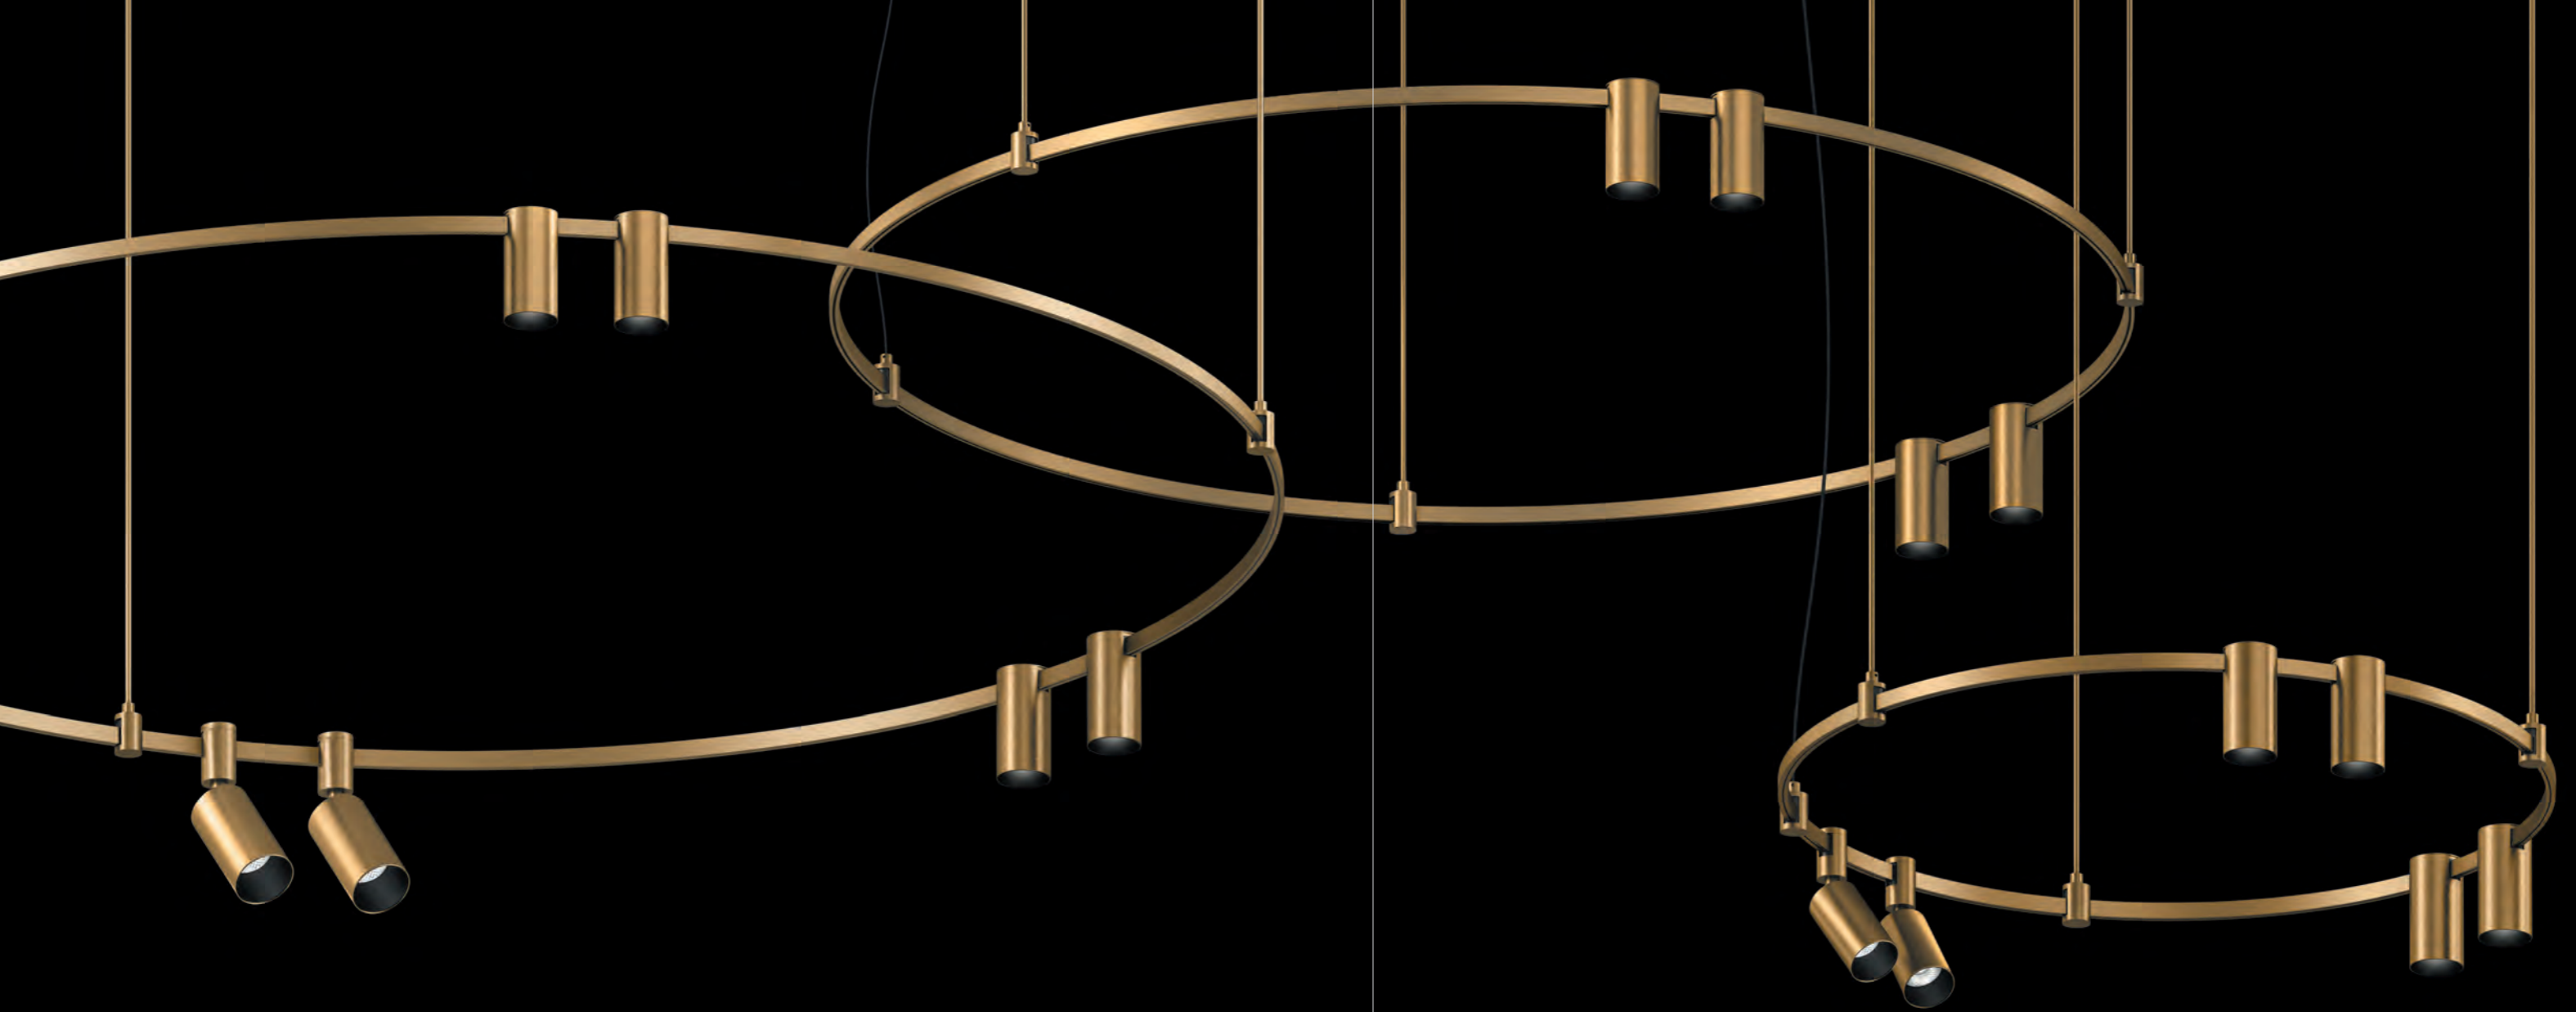

OUTSTANDING DESIGN

Minimalistic proportions.
The track size is only 9x15 mm.

VARIOUS CONFIGURATIONS

Track system of any length can be created by cutting the track at any necessary place. Swivel elements and other fasteners ensure possibility to develop a system of desired configuration.

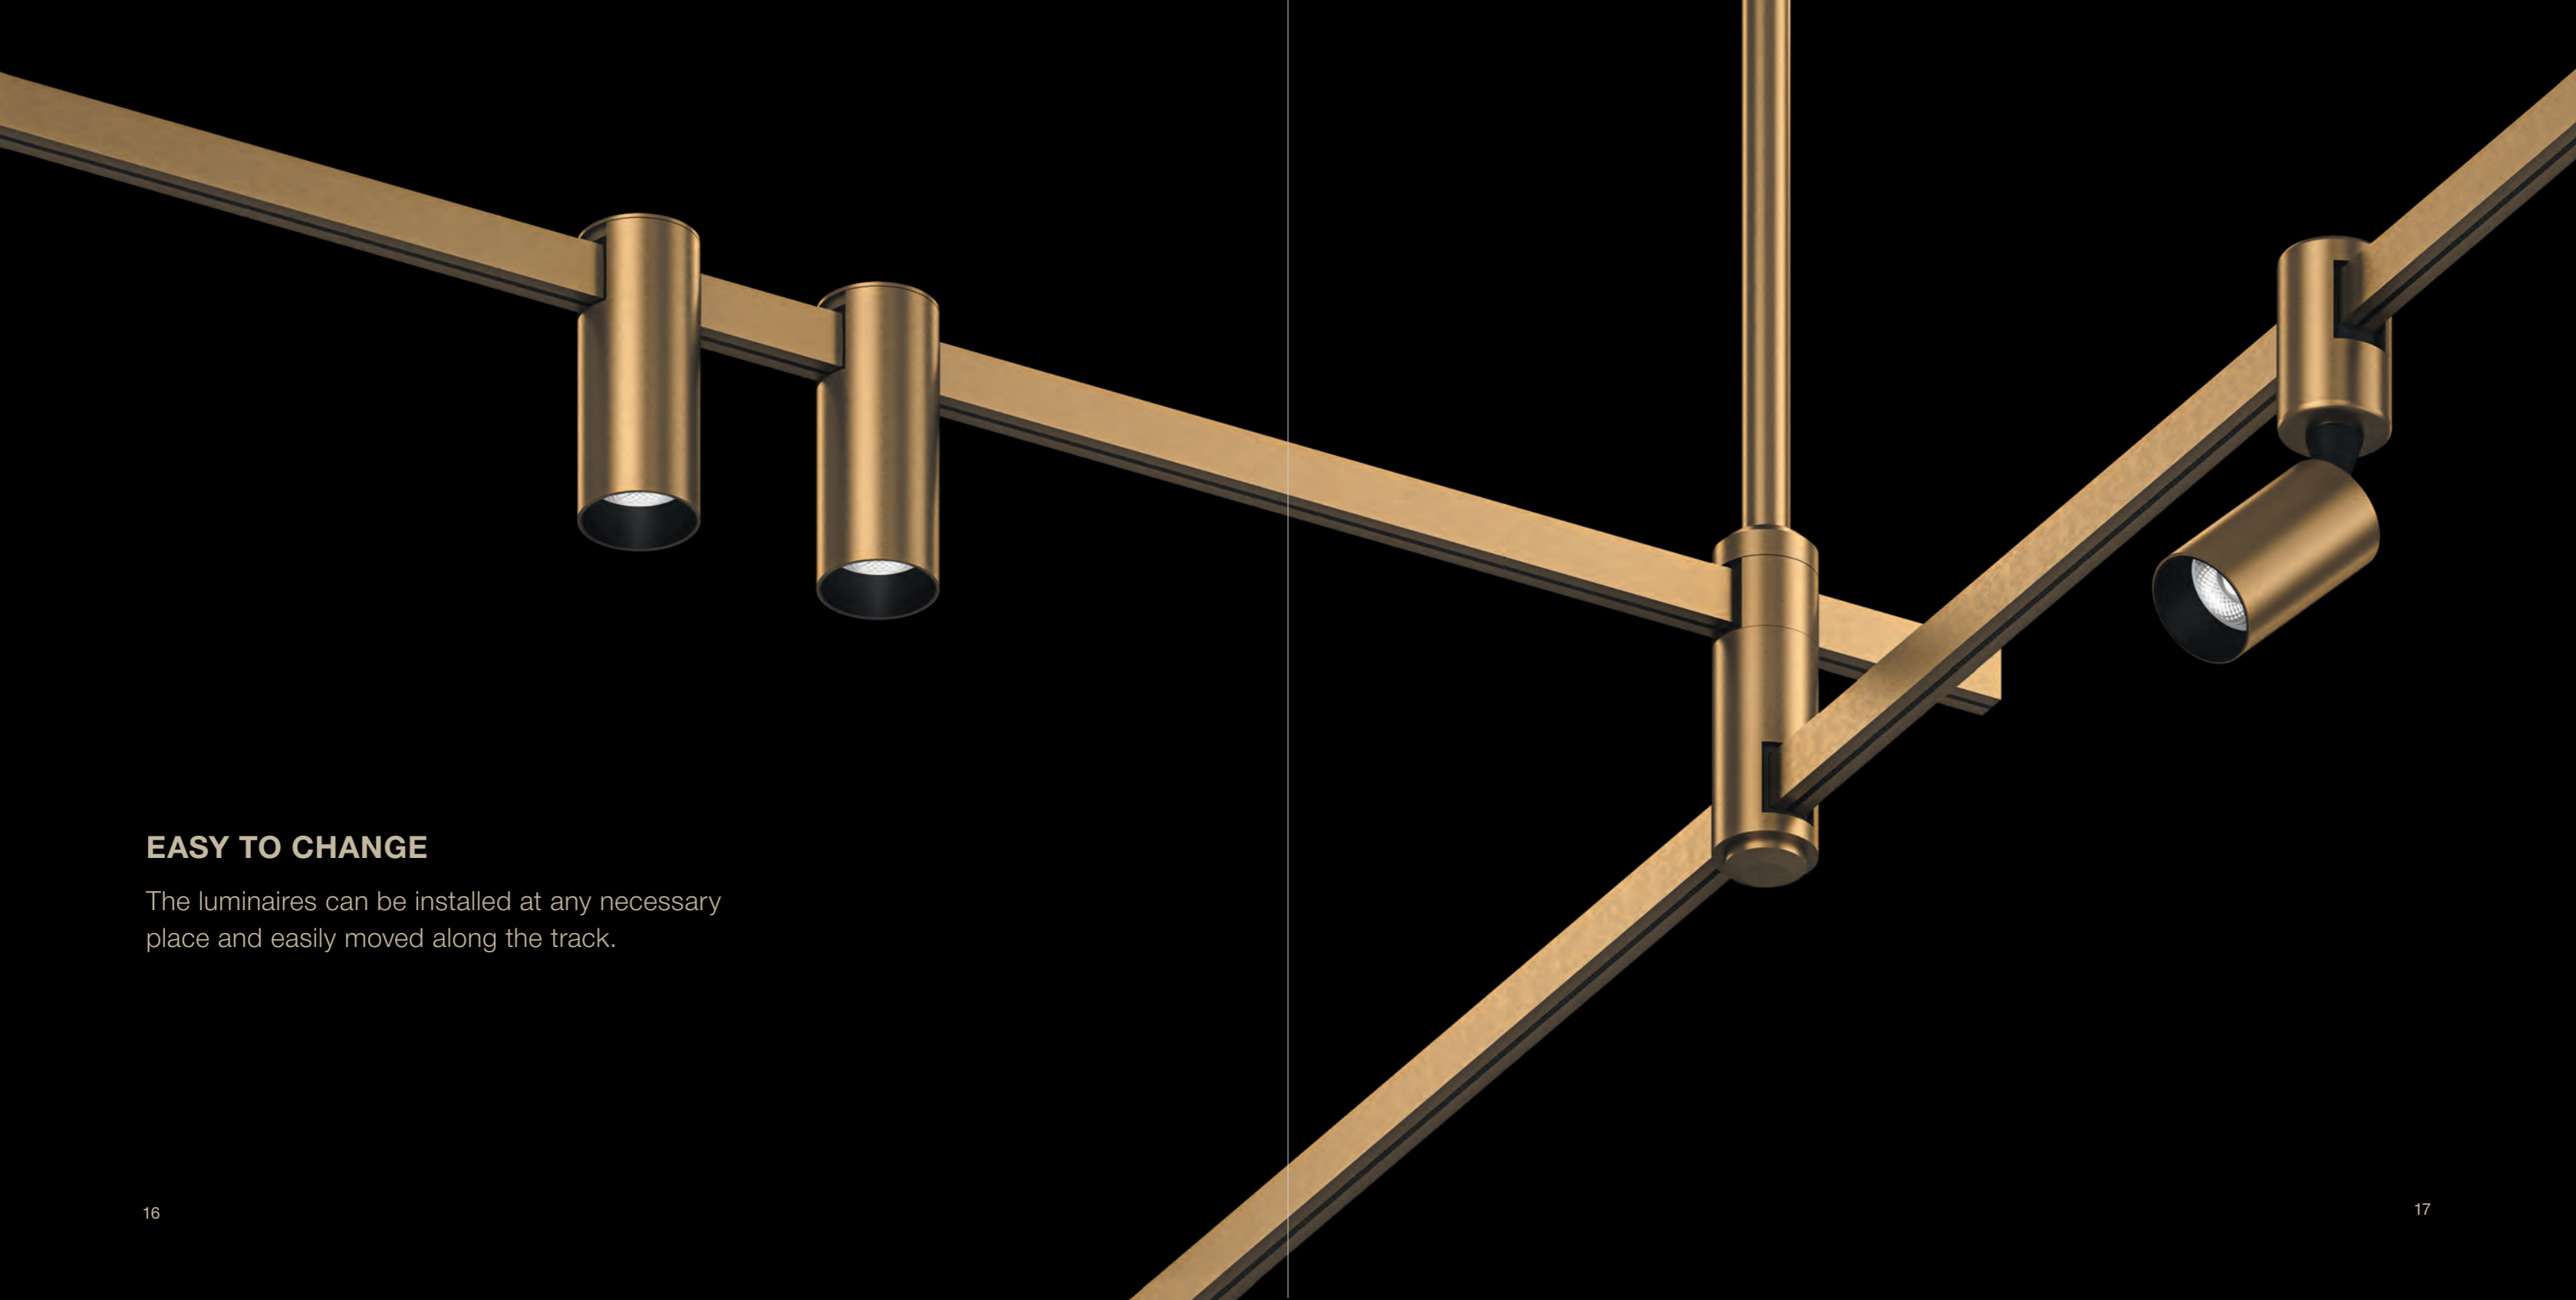

CUSTOMIZED RINGS

Auroom is presented in four standard diameters:
880 mm, 1200 mm, 1500 mm, 1800 mm.
The bigger size can be customized on request.

ATTENTION TO DETAILS

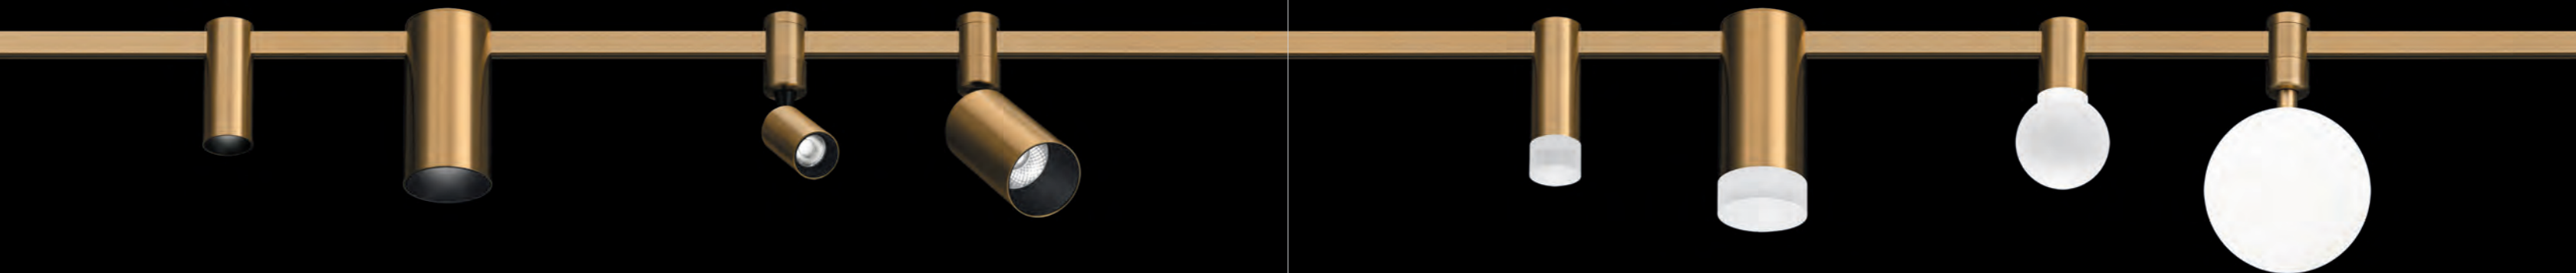

Power cable output and mounting base thread are hidden by brass plates.

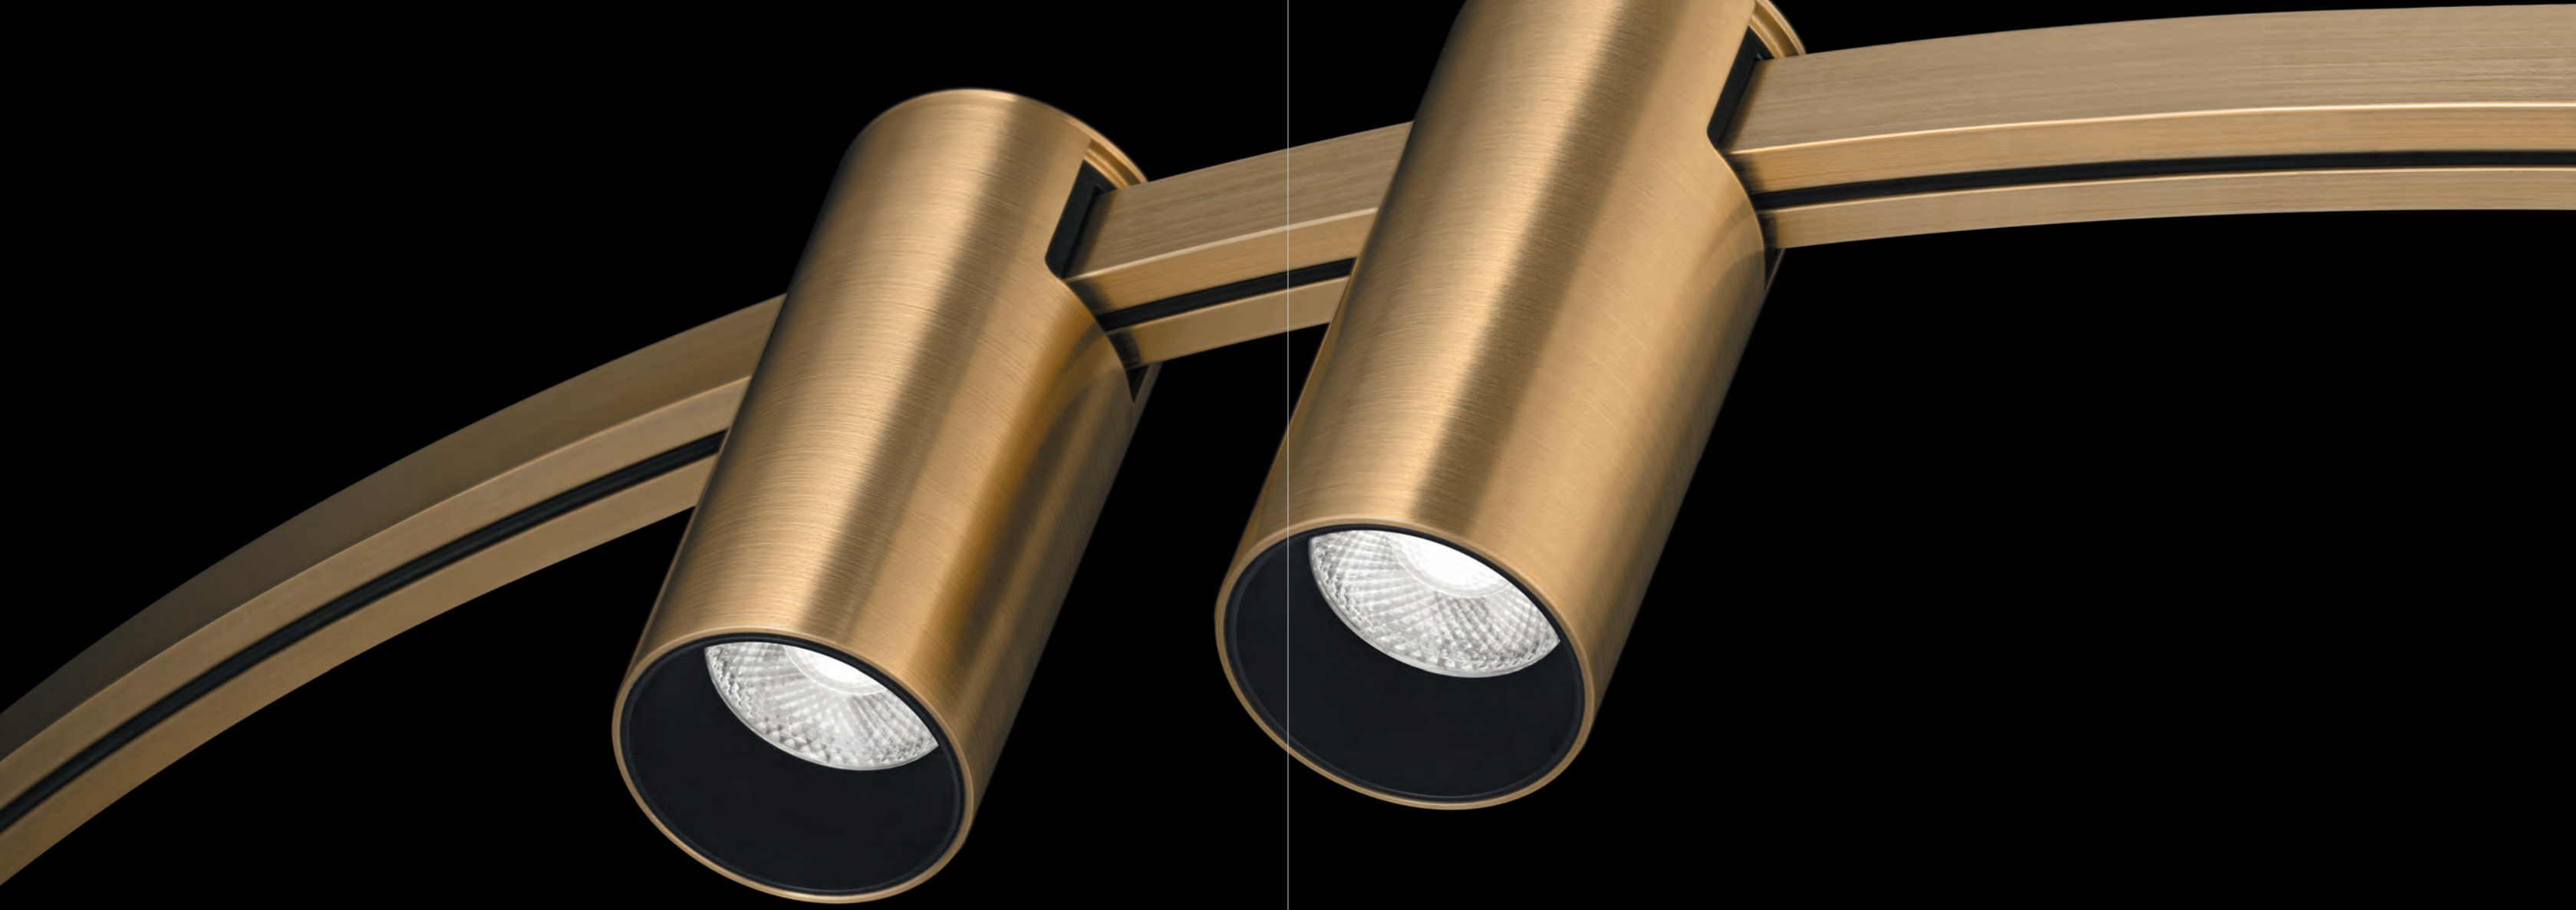

EASY TO CHANGE

The luminaires can be installed at any necessary place and easily moved along the track.

WIDE RANGE OF LUMINAIRES

The series is featured with rotary, linear, decorative luminaires of various power and beam angles. The fixtures can be easily combined with each other to create various lighting scenarios.

HIGH-LEVEL OF LIGHT PERFORMANCE

The fixtures are distinguished by superb light characteristics, color rendering index and outstanding optical lenses.

CUT-EDGE TECHNOLOGIES

The system supports lighting control via DALI, 1-10V, classic switchers or BLUETOOTH using CASAMBI app.

AWARDS AND NOMINATIONS

AERO LUMINAIRE IS THE WINNER OF THE INTERNATIONAL IF DESIGN AWARD HELD IN BERLIN, GERMANY.

THE PRODUCT HAS BEEN SELECTED AS ONE OF THE WINNERS BY 78 INDEPENDENT EXPERTS FROM AROUND THE WORLD.
