Design

Branca's partner office, Marco Sousa Santos Design, works national and internationally on commercial, residential and cultural projects of interior design and furniture design services for both the public and private sector.

Committed to a rational yet emotional approach, the work of our design team is guided by the natural properties of materials and traditional techniques of manufacture.

Original concepts, identity, functionality, and sustainable production practices have been the basics of our practice at Branca Design Studio art directed by Marco Sousa Santos

Project

Branca Design Office is available for partnerships on commercial, residential and cultural projects providing full interior and exhibition design as well as furniture design and production services for both the public and private sector.

Branca is able to customise its products on request. According special requirements, some changes of our products are possible regarding material, dimensions, colours, and fabrics.

Wood

Traditional production methods ensure timeless furniture of lasting value. Emphasising the beauty of the material, Branca works on selected wood with its natural markings such as cracks, knotholes, or colour variations intact. At Branca, we work with the best producers on wood, to ensure the best result from our partners, helping Branca to achieve the excellence of furniture design.

Branca products are manufactured combining digital technologies and manual production.

Each product is unique and may differ from each other presenting small features typically seen on a handmade product.

The measurements given are approximate and may differ from actual product.

Images on catalogue may differ from actual product.

Contract

In addition to distributing its furniture through a network of selected retailers worldwide, Branca responds to customer's demand providing a range of contract services.

With our network of specialised suppliers, custom interior solutions can be developed in close collaboration with architects, trade partners and developers. Services include the development of custom furniture or interior solutions, the execution of custom constructions according to the client's requirement as well as manufacturing and installation of custom furnishings.
