

The background is a high-contrast, black and white marble pattern. It features a dark, almost black base with intricate, light-colored veins in shades of white and light grey. The veins vary in thickness and orientation, creating a complex, organic texture. Some veins are straight and diagonal, while others are more irregular and branching.

EDEN DESIGN
COLLECTION

Eden Design

Handmade in Belgium

Since 2007 we combine the imagination of the designers with our research and development, allowing in only a few years to create a range of products with timeless design, distributed from Genk, Belgium to over 50 countries worldwide.

We use natural materials, selected with the greatest care. They are being processed in local workshops by professional craftsmen.

Eden Design

Bespoke

Most of the lighting products can be customized, allowing to obtain an exclusive product that is adapted to your projects. You will thus be able to create an atmosphere, accentuate objects (clothes, paintings, ...) as you wish.

Eden Design

Innovation & Quality

Artificial light is as important as sunlight, which is why Eden Design invests all its knowhow in exclusive and innovative lighting products that comply with international quality standards.

°on line  10

Introducing... °on line

As pioneers in low voltage tracks with magnetic connection of luminaires, we are proud to announce the 10th anniversary of our track system '°on line'!

It was designed in 2009 by architect Bart Lens, and first shown to the public at Biennale Interieur Kortrijk in 2010. When first introduced to the public in Kortrijk, it met a resounding success.

Ten years later, we can state that the °on line system has set new standards for modern track lighting.

Technique and design

The rise of LED technology resulted in new possibilities in terms of design. Bart Lens designed a slim track, with matching luminaires with a lot of character in a modern style. Adding an innovative, state-of-the-art magnet and contact system resulted in a great flexibility. Fixtures can be easily repositioned, switched, added or removed according to the needs or preferences over time.

Awarded with a Red Dot design award - Best of the Best, Design Plus and Henri van de Velde award for its design and technology, the system is widely recognized.

HENRI VAN DE VELDE
LABEL 2010

DESIGN PLUS
powered by light-building

Next generation

The past 10 years the system has been refined and expanded with new designs. We are now introducing the °line.s: same on the outside, new on the inside.

The Line S offers a wide range of tracks, new LED drivers working at 48Vdc with noise- and flicker-free dimming down to 1%, UGR versions, increase of efficacy, new finishes, and a wide range of dimming possibilities like Casambi, switchDIM, dali, 0-10V and 1-10V.

Ready for the next 10 years!

what's new

new colors

The classic white, black and aluminum fixtures can now be accompanied in your tracks by brass, bronze and dark bronze **anodised finishes** to brighten up, diversify or be that finishing touch in your interior.

Find out what KNICK Small looks like in these new colors.

bevel

To supplement the range of fixtures for our magnetic tracks, °bevel, a tubular pendant fixture with a unique shape at the top and bottom can now give an extra dimension to your track lighting. Discover it with °line S and °bloc. °bevel comes in 4 colors of anodised aluminum.

bloc evolved

All Bloc elements can now be combined in new aluminum, brass, bronze and dark bronze anodised finishes.

Choosing a now available **Bloc monopoint** can complete your lighting design with this special touch.

With its excellent glare rate (UGR <10) and a light output of up to 2000lm from a 300mm luminaire, Bloc keeps its quality standards high and exclusive.

high ceiling?

The TURN Plus fixture is your solution. With its 10° - **very narrow** - beam angle, it reaches >23000cd and can be combined with other track mounted fixtures for a smooth general lighting of your interior.

multip

Not just a surface mounted spot... An innovative concept combining light, audio, motion and smoke detection.

The Nero Marquina edition is produced with the world's thinnest stone created from a raw piece of real marble stone sourced from Verona, Italy.

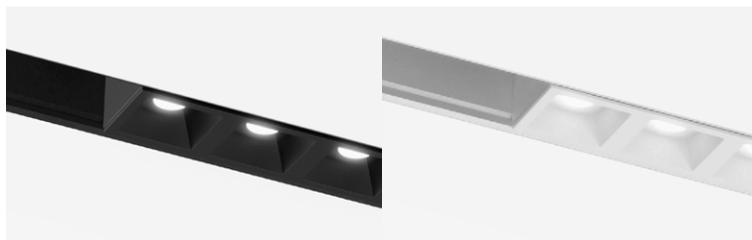

Stand-alone or combined in a unique way, it is very versatile and will please any taste.

new UGR values

Extending the range of fixtures with an antiglare louvre in the new °line S, you'll discover that the IN Spot has an **excellent glare rate** (UGR <11) and a **high color rendering index** (CRI >95), which makes it perfect for lighting up artwork. The beam angles range from 20° to 60°.

The louvres now also come in matt black and even in white to perfect your exclusive magnetic track system.

Our creatives

Bart Lens

Through his architecture and design, Bart Lens hopes to have an impact on our living environment. Bart Lens transforms things which already exist. As a part of the creative process, he observes how people experience their environment and how they occupy space. He is drawn ever closer to the materials, with the traditional ways of working them becoming ever more important. With this emphasis, Bart Lens brings sensitivity and atmosphere to a substantial part of the overall living environment.

lensass.be

Eden Design

Being active in the installation market for more than 35 years, Eden Design has built up a long history. Gradually turning to building automation, a significant know-how has been gathered.

When entering the path of design, this know-how has played a large role.

Creating innovative products, integrating technology and design is the main thought behind the Eden Design lighting.

Etre Moderne

Designers Philippe Vermeersch and Caroline Gielen are specialized in lighting, furniture and object design. Their style is no-nonsense, straightforward & unpretentious. At first sight simple, but sophisticated in detail. Different materials and techniques are like a red thread through the designs. They produce local (Belgium), wanting to preserve the work of craftsmen and to make their talent last.

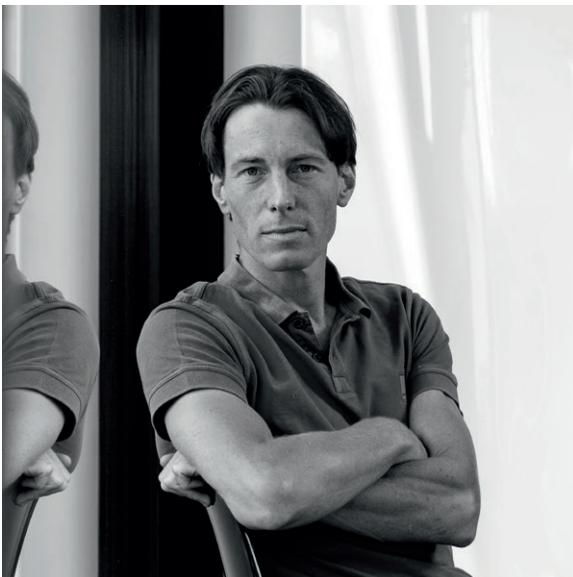

etremoderne.be

Rubens-Frederix Architects

Strives for tactile and experimental design. At different scales, various issues such as spatial experience, materialization, relationships, etc. are questioned in interaction with the client in order to convert functional expectations into inspiring answers.

rubens-frederix.be

Stan Maes

Stan Maes is a product designer, having worked throughout Europe in the past. "Creating outstanding products; together" is his motto. This, with an initial strategic approach and a customized design process, to let his interior objects and lighting find their way to the market. A well balanced equilibrium between technology and design is very often the starting point.

° on line

The power of this light source lies in its slenderness and unobtrusiveness; the simplicity of the fixtures' design makes that it can be used anywhere. An innovative and state-of-the-art magnet and contact system makes that a wide variety of led-fixtures can be easily inserted or moved.

The led-fixtures are similar in style yet each one of them has its own character and lighting quality.

Eden Design was the first to introduce this magnet system on the market. First presentation was in **2010** on the designfair Interieur Kortrijk, Belgium.

This collection won several awards, such as:

- The Best of the Best Red Dot Award (2011)
- Design Plus powered by Light & Building (2012)
- Henri van de Velde Label (2010)

Lenght**Guidelines**

Two bloc elements of the same material should not be placed next to each other. There can be no guarantee that the drawing or pattern of the material will continue to run smoothly in the next element, since they are all natural materials with their own unique drawing. It is therefore **recommended to always alternate between the materials.**

A bloc.stripe or a bloc.spot should be placed between two elements without light (full material). It is **recommended not to place two elements with light next to each other.**

A bloc.spot or bloc.stripe should never be used at the end of the track, unless the end of the track fits against a wall.

°multip

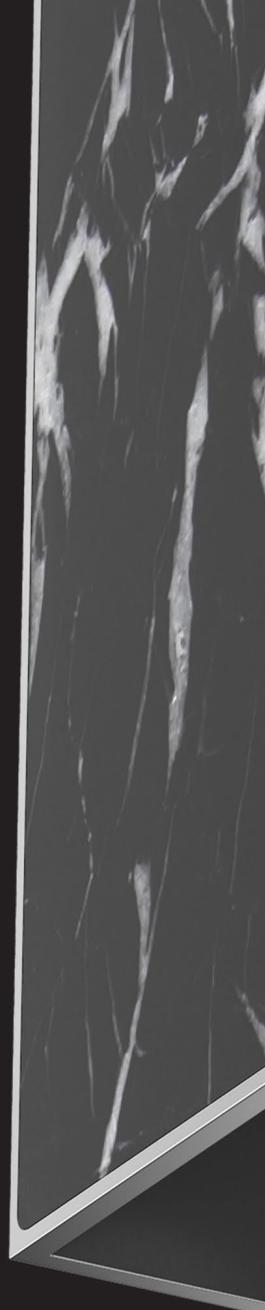

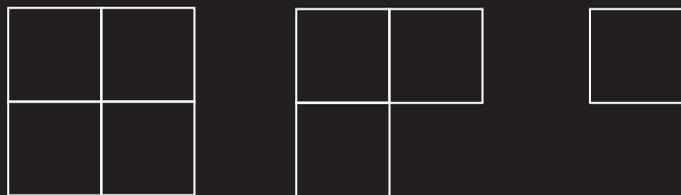

Multip is extremely versatile in terms of technology and design. Different modules allow you to combine light, audio, motion detection and smoke detection within the same product and look.

The modules can be connected with an innovative connection platform which distributes power and data. This also offers the flexibility to add additional modules after the installation is finished, if required.

All modules can be installed alone, or combined with others offering the freedom to form a unique combination, as shown on the image below.

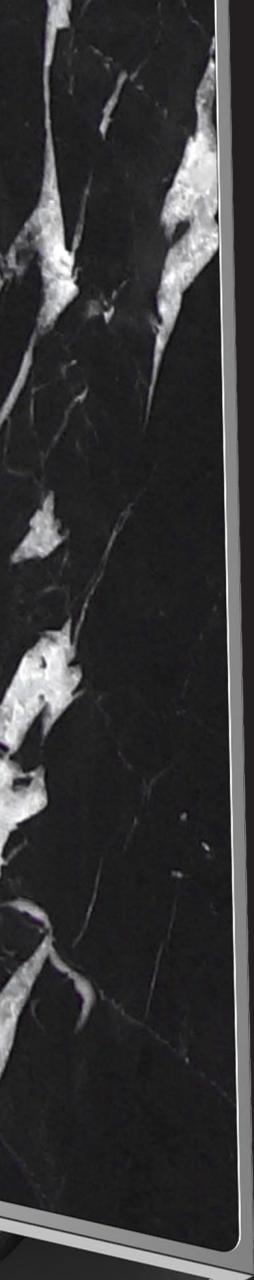

Design by Eden Design

audio
light
motion sensor
smoke sensor

°multip Nero Marquina

Handmade

Each product is handmade in Belgium with the greatest precision.

Light & durable

The world's thinnest stone created from a raw piece of real durable marble stone sourced from Verona, Italy.

Unique & Timeless

Each Nero Marquina marble plate is unique and created by nature over 100 million years ago. Marble is known for its timeless and luxurious look offering you an exclusive product.

Modular

Easy connection system for multiple modules such as light, audio, motion and smoke detection.

Light module

directable LED spot with different options of light beam and colour.

Antiglare design

results in an UGR below 19 offering a good visual comfort.

Different finishes with premium materials

over 100 different combinations to match your interior.

Speaker module

can be connected to the amplifier of your desired AV system, for example SONOS, popular all over the world.

Motion detection

KNX or DALI control to integrate in your smart home system.

Modular system

The modular system allows an easy install, as you only need to feed 1 module.

The other modules can be connected through an innovative connection platform which distributes power and data.

This also offers the flexibility to add additional modules after the installation is finished, if required.

°cd

°cd is a spot, especially developed for cast concrete ceilings.
This collection of spotlights is almost invisibly integrated into the ceiling and can also be combined with a ventilation nozzle.
It offers a solution for the proliferation of surface-mounted devices for ceiling techniques; usually in various sizes and shapes, not compatible with each other.
The spots can easily be mounted in drilled or poured holes in the ceiling. An extra advantage is that the character of a concrete ceiling is additionally exposed.

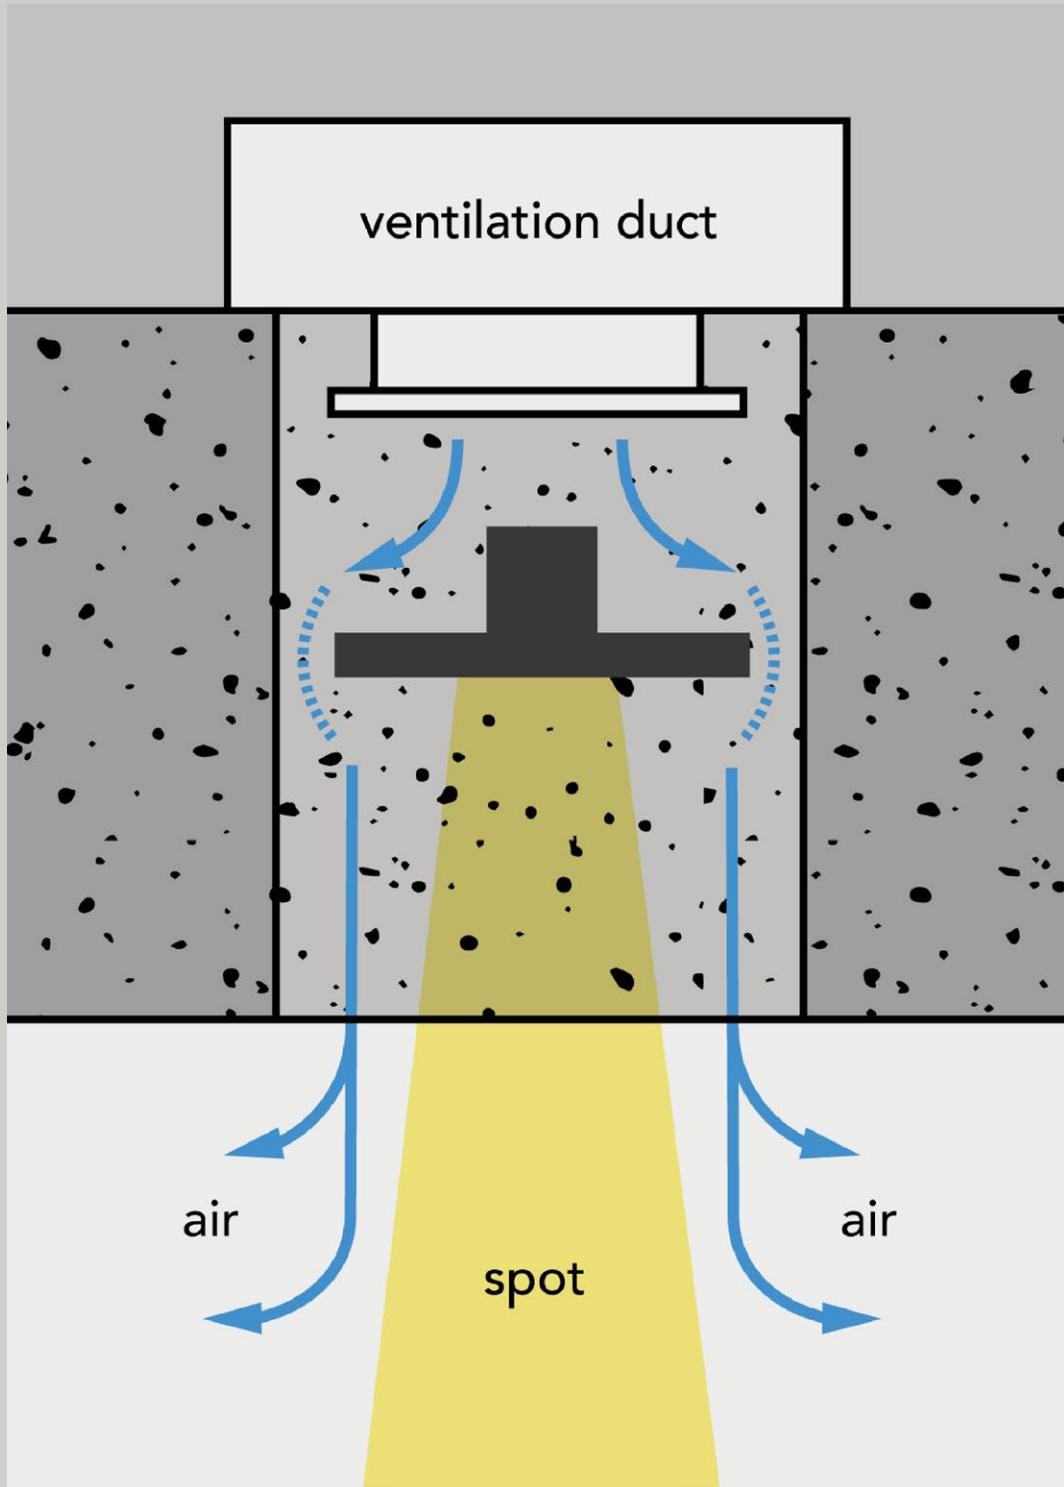

Design by rubens-frederix architects & etre moderne

°ledline

Continuous lines of light, without limits.

Each led module can be cut every 8 cm, this gives architects and lighting designers a lot of flexibility.

Led line has a very good efficiency. A high-tech diffuser was implemented to block as little light as possible and still give an opal look.

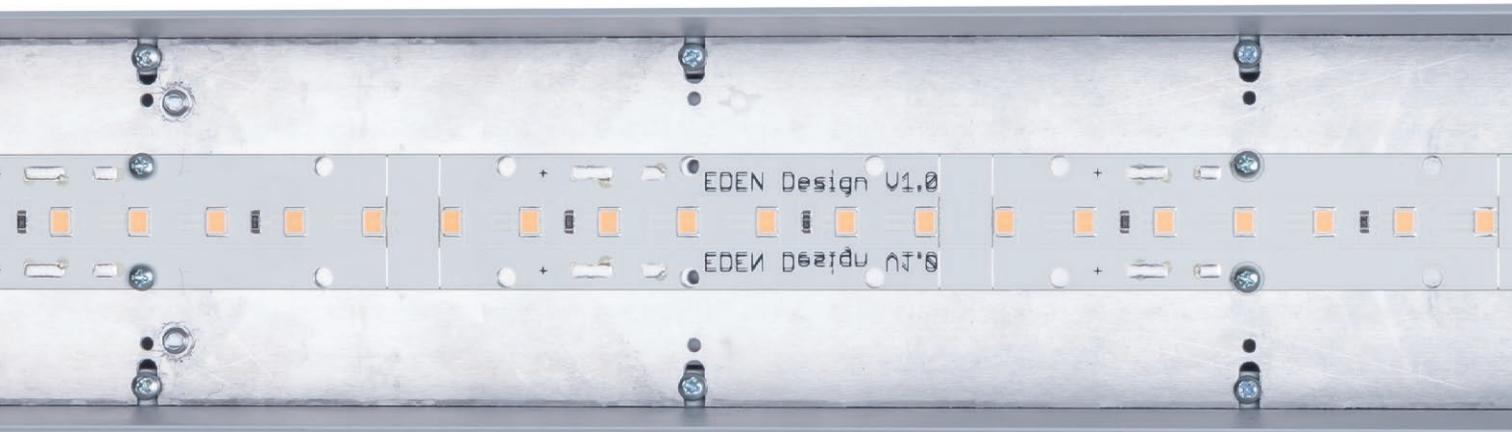

Led line can be installed surface mounted and pendant. It is available in two control options: DALI & 1-10V. Available in anodized aluminum, black or white.

°sphere

Belgian architect Bart Lens needed a large lamp that would create an encircling sphere of light above the conference table in their office, and so began the search. After a long and fruitless quest, he finally decided to design his own mega-light with the “sphere” of a dome. The result has been likened to a “Calimero” dome, a giant bell, a half moon.... Everybody seems to have a different name for it.

°XXXL(amp)

Perhaps symptomatic of an architect's mindset, the lamps and objects are becoming increasingly 'space defining'. The xxxl(amp) is essentially a flattened dome, inspired by the shape of a Chinese lantern. The twelve-segment construction makes the connection with the lantern, but a pumpkin is perhaps the first association that comes to mind, while the suspension system recalls an upside-down hot-air balloon. If the ceiling is high, but not overly high, the lamp can be hung at about 1.50m. As befits any impressive space, you'll want to enter with a slight bow. Once seated at the dining or conference table, you'll still retain a sense of the surroundings beyond the boundary. Hanging a half or a quarter xxxl(amp) in a mirrored room creates an impression of spacious rooms full of giant lanterns.

°led on fire

In a T-restaurant in Peking (China), Mr. Lens was eating at an immense mirror table with candles hanging above him. It was cozy, romantic, but also streamlined and modern. For another design we already experimented with hanging led-lights suspended from low charged wires. We marveled at the vision of a completely accidental, out-of-the box combination of a led underneath a burning candle. The effect of the translucent candle-emulsion was also heartwarming. The apparition of a led fixture, burning, not at all kitschy, with light shimmering through the material structure is imprinted in our minds. “The led is on fire”, we tried it out.

°fool moon

People have always been fascinated by the light of a perfect circle. The returning full moon and the natural phenomena ascribed to it (higher childbirth percentage, fertility, transformation from human to animal, etc.), the archetypical form of a UFO, the shape of a gong, the sun... are but a few striking examples. Despite its shape of a full circle ('full moon'), the lamp can be used in several positions: horizontally, diagonally, obliquely or vertically ('fool moon'). Thanks to its large dimensions, the lamp is easily recognisable and has the possibility of demarcating or creating spaces. The lamp also has a highly symbolic value due to its imposed abstraction.

Design by Bart Lens

°oh!led

Raising lighting to a new level. In the past OLED has mainly been used for decorative and ambient lighting. OLED stands for Organic LED and produces a natural glare-free light. This innovative OLED luminaire has a lumen output of 300lm from a single 12,7 cm sheet, which makes it the brightest commercially available OLED in the world and makes it perfectly suitable for functional lighting. This sleek panel, mainly made out of aluminium and glass is less than 5mm thick!

°xl(amp)

This lamp was initially designed to mark the edge of a fair booth and simultaneously present images on the inside. The lamp shade foil is foldable. This allows for easy transport and makes it possible to cover the lamp with a photo film. The lamp, by virtue of its size, defines its own space.

°LEDit-bi

LEDit-Bi is a wall lamp shining in two directions (Bi-directional). The shade is built up out of two materials (Bi-material cover). The aluminium profile holds a foil that in its material and color can be adapted to your interior and style. As well with the light as with the design of the shade, an accent is set. The here used light sources are standard available bulbs. Any replacement is easy and assured.

°i-light

i-light is a thin, hanging tubular light fixture with an incorporated LED-light. The small loose-hanging chrome-plated sphere creates an unusual light and shadow play. The lamp can be used as trim lights, hanging lights, or – when several are combined – as a chandelier. When the tubes are hung low, the reflection of the chrome-plated rods produces a ‘starry sky effect’.

Design by Bart Lens

°SO1

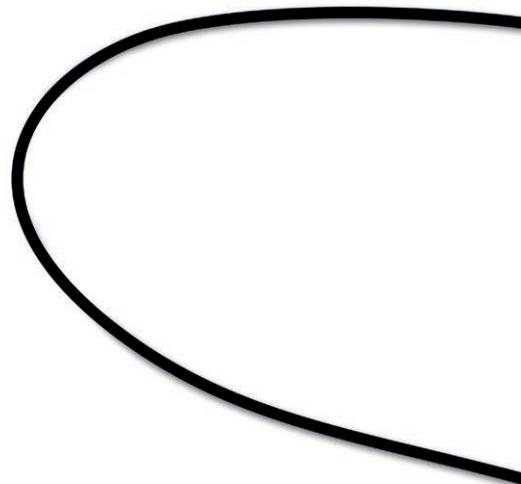

The design of this large-scaled lamp is pure and back to basic, therefore the SO1 really leaves nobody untouched. Made in PE (polyethylene) by rotational moulding, this large lamp (height 1m40) can be used inside as well as outside.

Built-in into ceiling or wall, lying on the floor or just hanging in the room.

Outside used as street light (with a post) or as lighting accent in the garden.

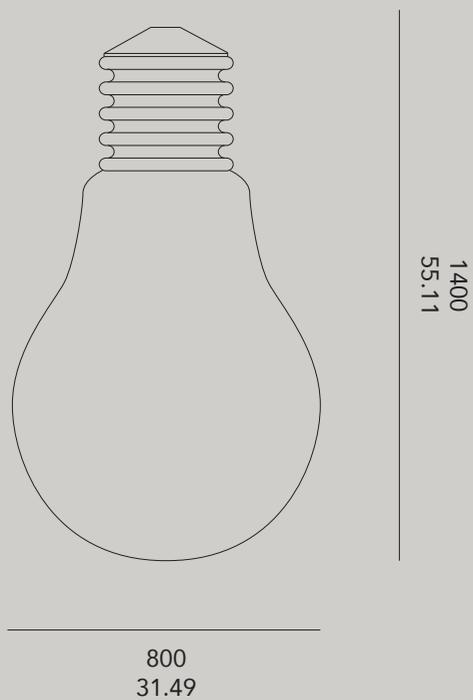

The use of this lighting-object will give an extra accent to rooms, spaces, streets and public parks.

Design by Sara Olaerts
