neoprene  
artisanal  
applications

Neoprene yarn is velvety, flexible, smooth and pleasant to touch. Products made with the yarn feel soft and silky, in complete contrast with its robust appearance and intense colors.

Sourcing the best Italian raw material, Neó manufactures high-end objects for the home and personal accessories, which are knitted, crocheted, woven, simply plaited, twisted or knotted. Design ideas come from many sources. Natural forms and everyday objects, found in travels around the world, inspire the shape and colors of each piece that fuses sophistication, durability and a modern aesthetic.

Neó is a company with a philosophy that focuses on creating timeless, exclusive items that are easy to care for and made to last. Each product is entirely handmade in Italy, using traditional techniques and processes, relying completely on the skills of local artisans.

By choosing to use methods from the past, Neó has revived the beauty, quality and artistic talent of craftsmanship that many wish was evident in modern day products. Each piece is made with care to ensure its excellence and integrity.

Slight size variations contribute to its beauty and uniqueness.

The Neó collections are sold in museums and design stores all over the world.

## TWIG

Men too build the nest, but they use twigs twisted with neoprene.

# CANAPA

Diversity is what moves the world,  
materials are enhanced only  
if placed near their opposite.  
Softness and silkiness of the  
neoprene are enhanced by the  
hardness and toughness of the  
natural hemp.
