A modern office interior with large windows, orange armchairs, and large orange pendant lights. The space is bright and airy, with a focus on natural light and comfortable seating. The windows offer a view of the outside world, and the orange furniture adds a warm, inviting touch to the design.

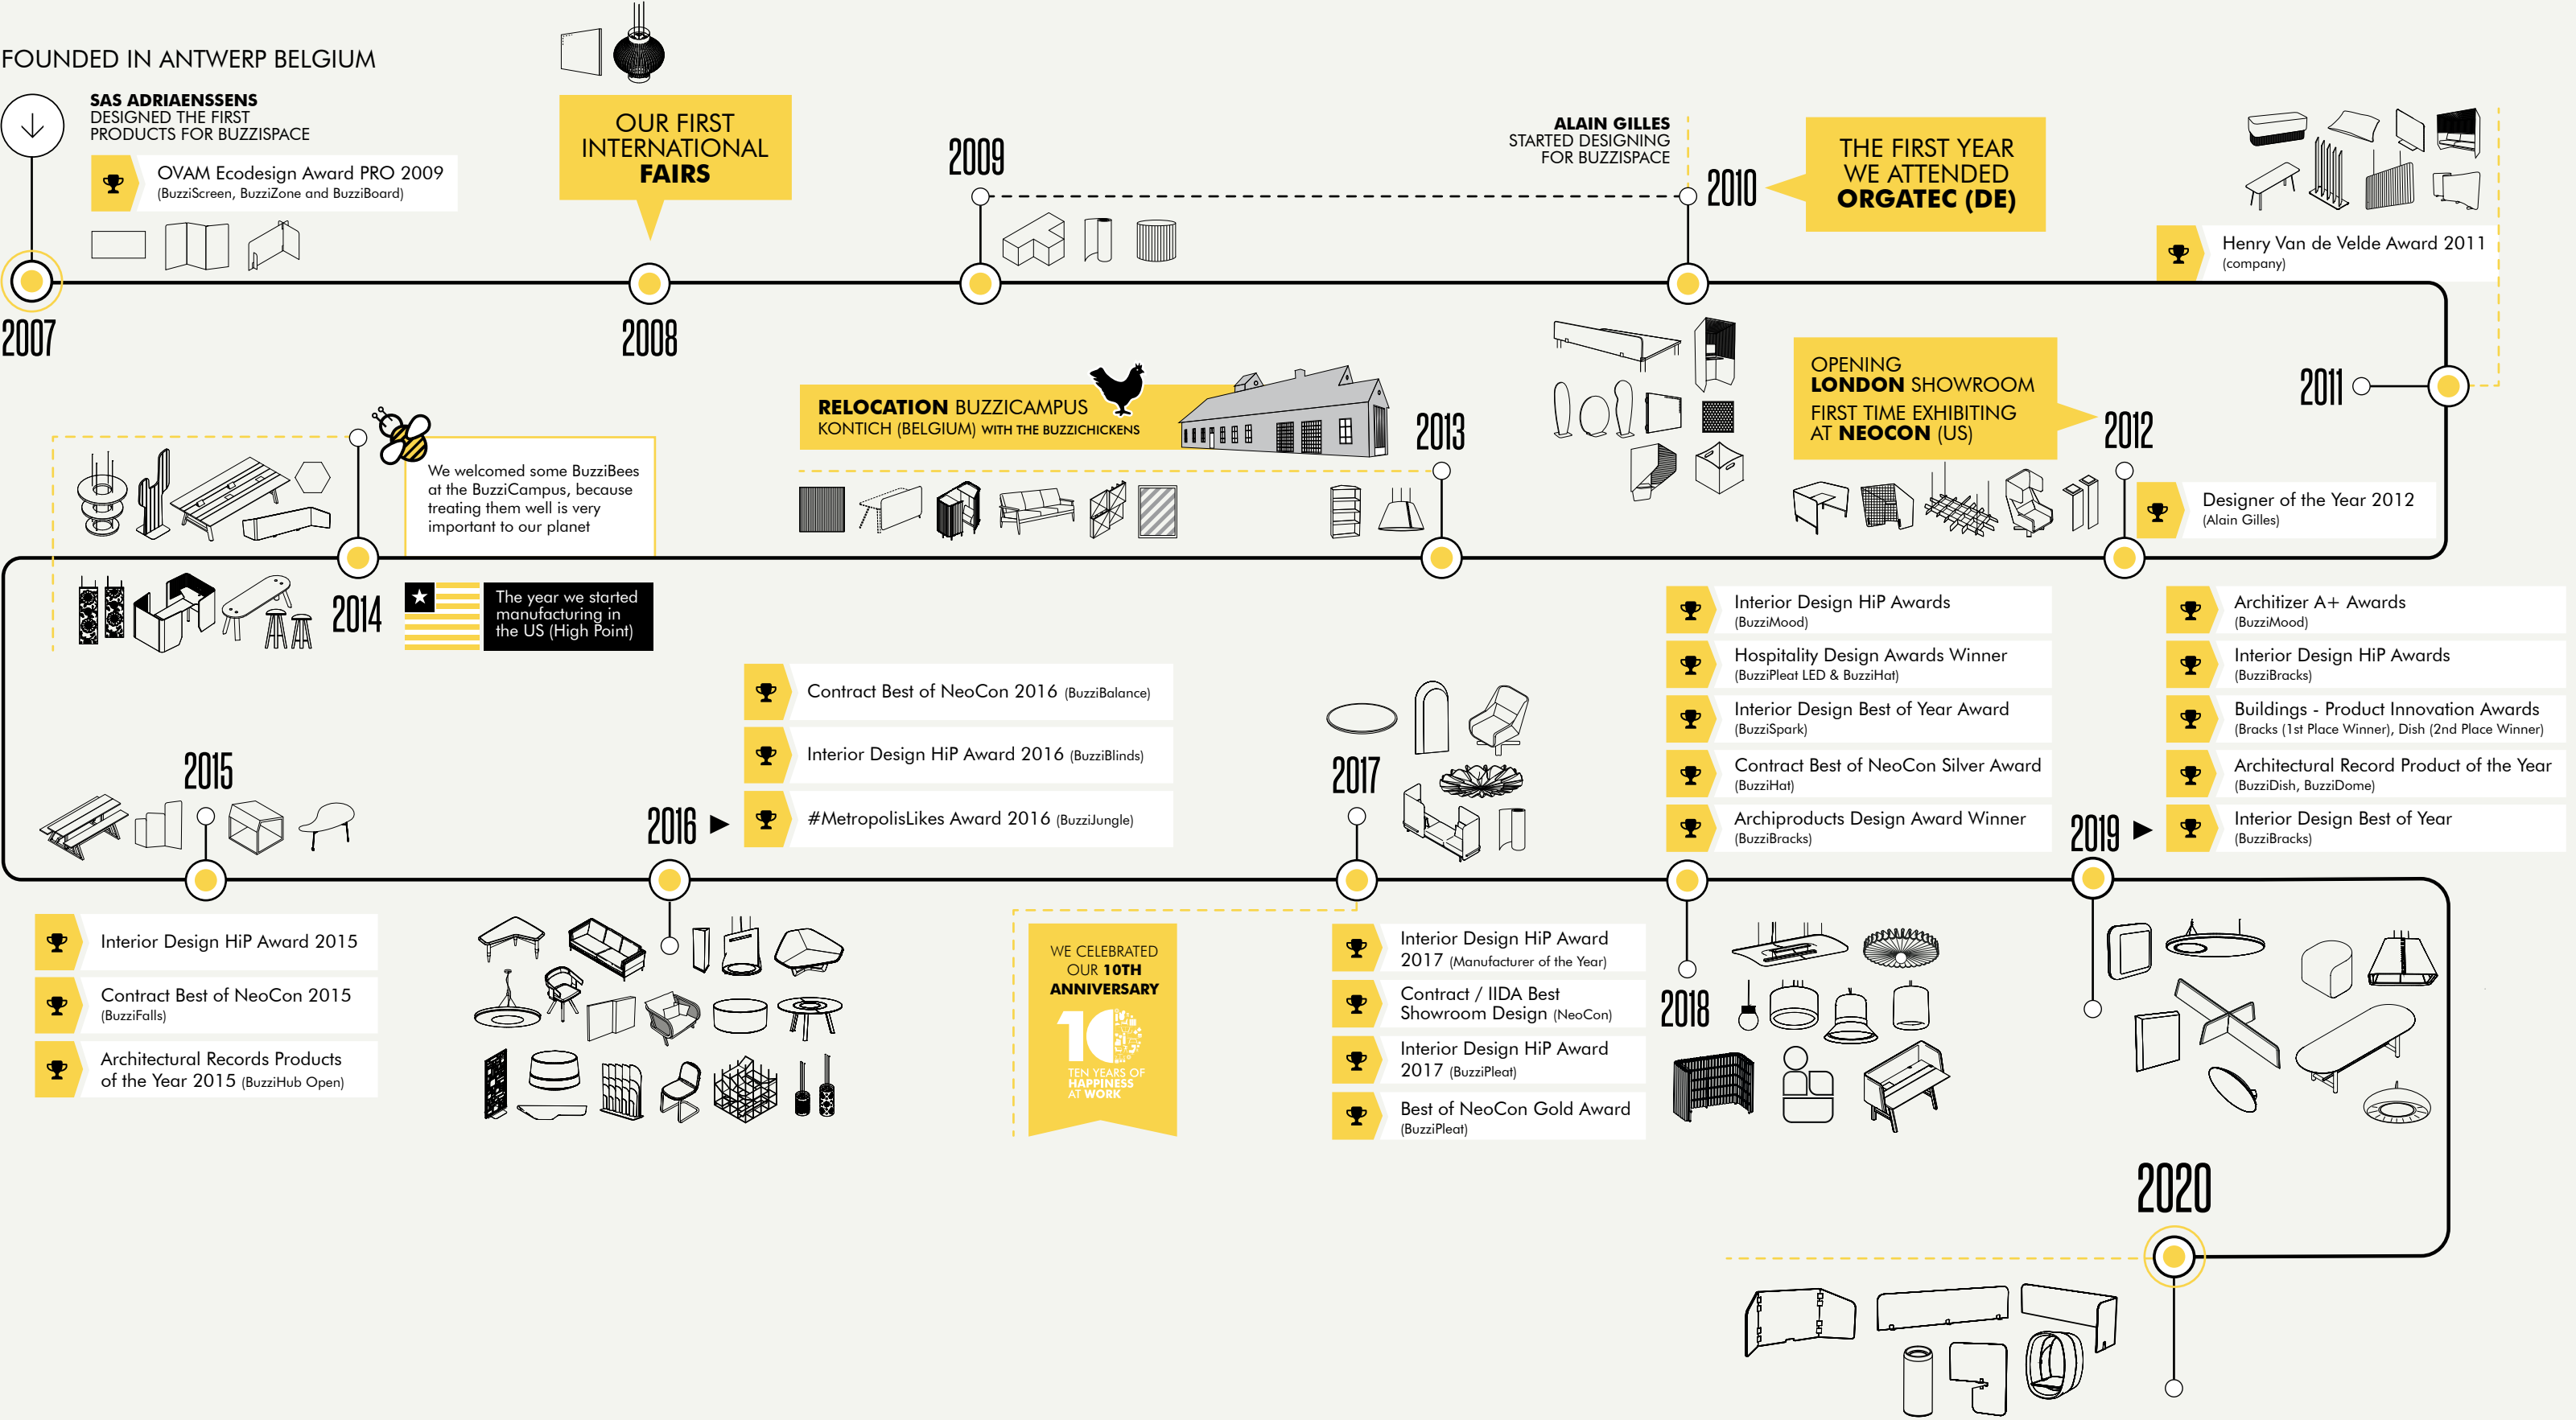

BuzziSpace

— We care about happy and healthy spaces

BuzziSpace creates solutions for happy and healthy workspaces around the world since 2007. Driven by an unbounded passion for solving modern workspace design challenges, we continuously reimagine furniture, lighting and acoustic office solutions. Our in-house studio collaborates with talented designers to provide new ways of working and living—comfortably, collaboratively and sustainably.

Improving the world through design is what drives us every day. This is reflected in numerous design awards and partnerships with well-known designers. With showrooms in Antwerp, New York, Chicago, London, Aachen and Cologne, and our own production sites in Bladel (NL) & High Point (US), we have firmly established ourselves as a global player, creating happy and healthy workspaces.

Our journey

Local Manufacturing

At heart, we're all makers. We're born that way. Each one of us possesses the skills to create things that will amaze and surprise others, even ourselves. It happens daily at our local manufacturing facilities in Bladel (NL) and High Point (US)—fueled by a shared desire to make durable and high-quality furnishings, both facilities bring out that extra sparkle in every BuzziSpace product that sets the brand apart from the competition.

Local Manufacturing in Bladel & High Point

Furniture-making is a tradition that goes back many years in both Bladel and High Point. While the story behind each facility is unique, a common thread unites them: the ability to create quality products of the highest standards. In fact, the rich legacy of manufacturing furniture in both areas is a major reason why BuzziSpace chose Bladel and High Point for its manufacturing locations.

Just across the border of Belgium in the Netherlands, you will find our manufacturing facility in Bladel. From the outside, it might look like any other production facility, but on the inside, it is anything but. Welcome to a world of imagination and innovation, a world where ideas are turned into reality - the world of BuzziSpace.

The facility in Bladel houses more than 80 employees across several departments, with more than 100 years of combined experience in foam cutting, upholstery and stitching. A handful of its current workforce was brought on from the last company

to occupy the space, a manufacturer of caravan cushions, consequently bringing with them a strong level of expertise in upholstery and foam-work, which has been key to creating several BuzziSpace products.

Despite having an extensive skillset, employees do sometimes face challenges. The truth is, the process of making caravan cushions differs greatly from that of making a BuzziSpace product - the work is more rigorous and complex, and requires a much keener eye for detail.

For example, making a product like BuzziCube 3D involves a particularly complex lamination process. Expertise is required to find the right balance between pressure, temperature and glue, to seamlessly fasten fabric to the 3D cut foam. Every time a new fabric is introduced, our production team has to reevaluate the formula from scratch, so the team is constantly innovating to meet new challenges.

Across the Atlantic, we also work hard to maintain our position as an industry front-runner. Establishing a second manufacturing facility in High Point, North Carolina, has been critical to our success.

Every day, 35 employees strive to deliver products of the highest quality at this location, which used to be an old cotton mill before it was transformed into a BuzziSpace manufacturing facility.

With a rich history of furniture-making and a skilled local labor force, High Point was the ideal location for us to establish production in America.

At BuzziSpace, craftsmanship is crucial to guarantee high-quality finished products. In several departments, much of the work is still done by hand, requiring special techniques to achieve the desired result. For instance, lacing and upholstery are some of the departments in which the work necessitates a steady hand and eye for detail. Here, the work is both an art and a skill.

Every year, thousands of meters of fabrics and cubic meters of foam are used to produce BuzziSpace solutions. It's inevitable to avoid any waste materials. With sustainability being one of BuzziSpace's founding pillars, both facilities have implemented recycle management of core materials such as foam, cardboard and fabric.

In Bladel, for instance, foam recycling has proven to be a great success in resourcing old materials and eliminating excess waste.

In High Point, sustainable practices are primarily guided by LEED (Leadership in Energy and Environmental Design), a green building certification program.

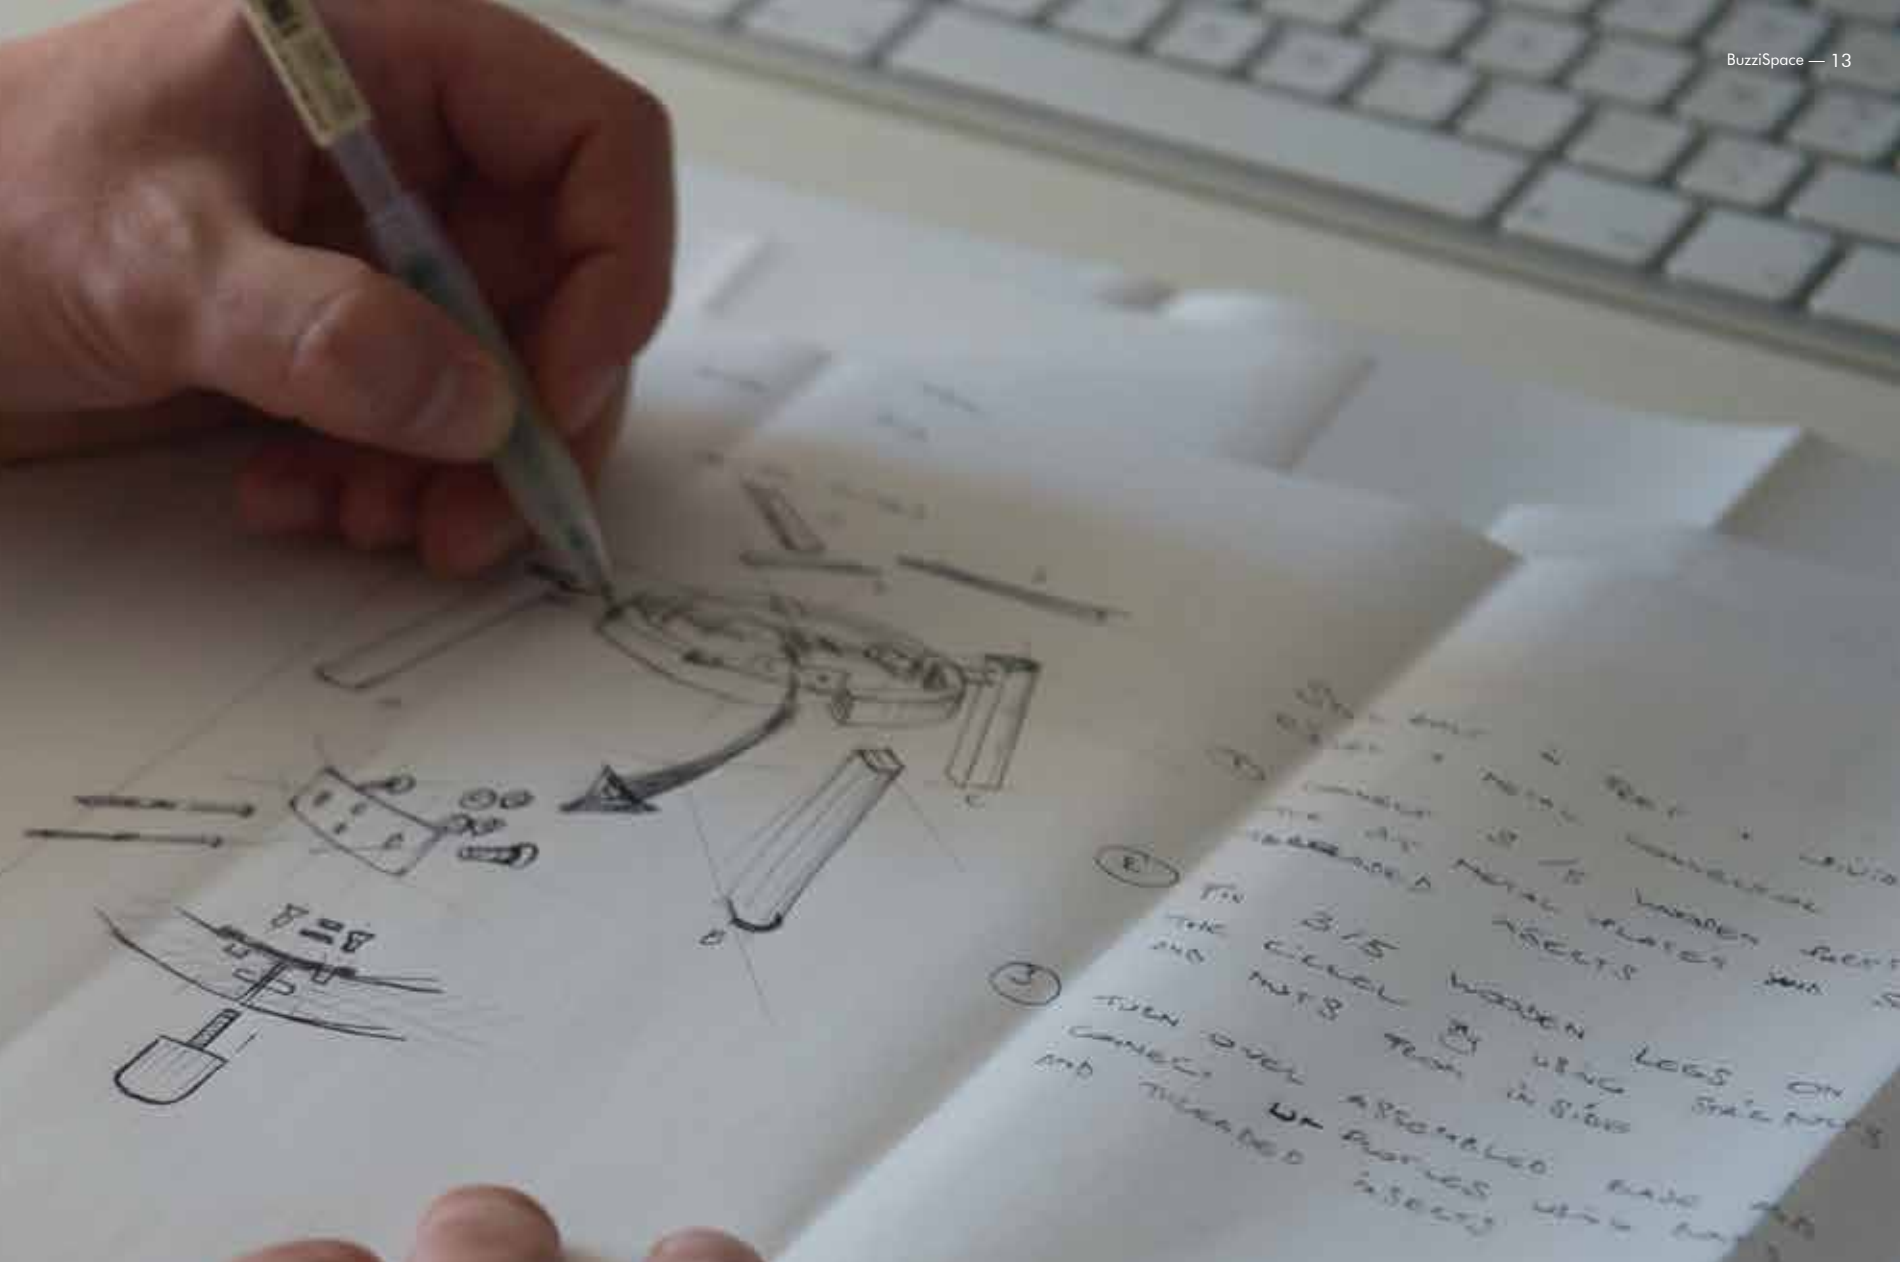

Despite the distance between our two facilities and some differences, both locations share an important place in BuzziSpace's existence: a shared passion for making products that will solve the modern design challenges of today—and beyond.

“Lacing and upholstery are some of the departments in which the work necessitates a steady hand and eye for detail. Here, the work is both an art and a skill.”

Meet our Designers

BuzziSpace has always given opportunities to both upcoming and established designers to develop products and ideas that match the DNA of BuzziSpace. These designs are often ahead of their time and each tells a unique story. They do not only look good but they also meet a particular need.

Sas Adriaenssens

I don't design with the 'new way of working' in mind, because I believe that people work and live how they want to. It's my role as a designer to listen to their needs and try to give them a personalized solution.

Sas Adriaenssens obtained a master's degree in graphic design and illustration and after several years in marketing, naturally moved into the world of interior and product design. After many years of experience in companies of all shapes and sizes, she went freelance in order to create her own cocktail of creativity and practical organisation. She prefers to describe herself as a 'creative problem-solver with a compulsive aesthetic sense'.

Sas designed the very first products of BuzziSpace, which were made out of ecofelt, a hundred percent recycled material made of old plastic bottles. They were an instant hit and won several awards. BuzziSpace was catapulted into the spotlight and rapidly expanded its range keeping its original philosophy in mind: ecology, flexibility and acoustics.

Alain Gilles

“Design is in the details.”

After studying Political Sciences and Marketing Management, Alain Gilles went on to work in the international financial world for five years, but he decided to follow his passion. Thanks to the moral support of his wife, he went back to study Industrial Design in France. He opened his own studio in 2007 in order to pursue his dreams and develop his personal approach to product design, furniture design, art direction and scenography. In 2012, he was named “Designer of the Year” by the prestigious Interieur Kortrijk Foundation in Belgium.

Alain Gilles started designing for BuzziSpace in 2009 and developed the BuzziHood, an acoustic cocoon you can hang on the wall and a fun reminder of the classic vintage phone booths. Alain's experience with working in a corporate environment for 5 years also helped him understand the needs of open-plan offices, which he incorporated in new product ideas for BuzziSpace. Each of them are groundbreaking products that fit perfectly into the philosophy of BuzziSpace.

13&9 Design

“We encourage interdisciplinarity in every design project. Our different backgrounds give us the flexibility to use unconventional skills in developing new products.

Austrian product design firm 13&9 was founded in 2013 in Graz and is based on the partnership between architect and CEO of INNOCAD Architecture, Martin Lesjak (Contract magazine’s Designer of the Year) and designer Anastasia Su (who also studied medicine). 13&9 is a design studio for international companies and also has its own label that designs, produces and sells their own products. The interdisciplinary team’s successful cooperation with specialist partners has led to achievements in furniture, lighting, floor coverings, fashion, accessories and art objects, as well as exhibition and sound design projects. 13&9 collaborated with BuzziSpace for the first time in 2016 and created the BuzziBalance and BuzziBalance Board. Two pieces that encourage movement and energy—creating a hub of social activity in the office space.

Jonas Van Put

Jonas Van Put is a young Belgian interior architect and furniture designer. He creates monumental steel constructions, furniture and art installations that question and improve social interaction. He is intrigued by nature, landscapes and everything that derives from this. The underlying processes of nature as well as artificial circumstances on different scales fascinate him. The launch of the BuzziJungle introduced the design world to young Belgian talent Jonas Van Put. It was Van Put’s first project with an international manufacturer.

Jeffrey Huyghe

With a background in industrial product design, mechanical engineering, and lighting, Belgian designer Jeffrey Huyghe has a broad understanding of different design disciplines. Architectural lighting was his first love and has only grown bigger throughout the years. This, however, hasn’t stopped the young talent from extending his portfolio to include other designs, for instance, acoustic solutions. Lighting or non-lighting, there’s a common theme, a signature, that unites Jeffrey’s portfolio. Everything rotates. Everything is built to move and to surprise!

BUZZISPACE PRODUCTS

2019 BuzziDish

“Everything I create has a spark of magic. Each design holds a moment of surprise while maintaining its original purpose.

Chris Hardy

Chris Hardy is an American industrial designer based in Atlanta. Born in 1984, he pursued an education in design, receiving a BFA from the College for Creative Studies in Detroit and a Masters of Design from the School of Design at the Hong Kong Polytechnic University. After returning to the United States in 2009, he began his career as a freelance designer collaborating with companies for both industrial and graphic design. His clients include interior design firms, retail stores, furniture and lighting manufacturers, and design publications. For the expansion of BuzziSpace’s range of acoustical lighting solutions, Chris Hardy created a distinctive new pendant shape, named BuzziBell, that won an Interior Design HiP Award Honoree at NeoCon 2016.

“I aim to develop pieces that can be connected with on an emotional level. My work is inspired by the challenge of personalization in the modern world and the increasing desire we have to own objects that match our own styles and philosophies.

BUZZISPACE PRODUCTS

Gerd Couckhuyt

Belgian designer Gerd Couckhuyt opened his own design studio ‘Bhoom’ in 2012 and was a late bloomer in the design world. At a very young age, he began his career at Bekaert Engineering as a mechanic and later as an electrician. At the age of 18, his interest for interior design was stimulated by a friend who painted. Later he obtained several degrees in art, interior design, light consultancy and sculpture art. The combination of his technical background and his feeling for creation and art makes him a more complete designer with an eye for the visual and the technical aspects. His inspiration comes from daily visual and emotional impulses. Designing objects and interiors is not an assignment for Gerd, but a distillation and fine-tuning of ideas already present in his mind. He now works for several international brands, such as Modular, Wildspirit, Manutti, etc. With his design ‘Elements’ for Manutti he won the prestigious Red Dot Award in 2014.

Cory Grosser

“

As a designer, empathy is crucial. It’s about understanding and transforming how people feel in a space. Of course, functionality is important too, but nothing beats putting a smile on people’s faces.

Cory Grosser + Associates (“CG+A”) is a multi-disciplinary, boutique design agency that implements beautiful design for the benefit of commerce and culture. Founded in 2002 by American designer, Cory Grosser, CG+A’s approach drives creative strategies for brands and engaging narratives for people. The Pasadena-based studio has collaborated with many top American and international brands on projects in the fields of: architectural design, furniture and product design, design strategy and creative direction.

“

Our biggest challenge is to constantly innovate and search for an innovative and original approach which we can be proud of.

COUVREUR.DEVOS

Bram Couvreur & Björn De Vos are a Belgian design duo who dare to reach beyond the borders of the everyday. COUVREUR.DEVOS is part of Maister, a creative agency, and focuses on interior design and product development. Whether it’s a question of lighting, champagne bottles or designing an interior: they make sure form and function are in harmony every single time. In 2012, they designed BuzziWings for BuzziSpace, an inventive partition that ensures optimum acoustics and a subtle lighting of the room thanks to the integrated, indirect light source.

Axel Enthoven

Axel Enthoven (1947) a big name in design land. With his design bureau, Yellow Window (formerly known as Enthoven Associates Design Consultants), he not only designs furniture but also buses, trams, trains or even medical equipment. This Antwerp-based design bureau has already made 1,900 products, and is active worldwide in product development, design consultancy and innovation research. The team has won several awards, including various Red Dot Design Awards and IF Design Awards. For his pioneering work in the design sector, Axel Enthoven received the Henry Van de Velde Award in 2004. For BuzziSpace he designed the BuzziMe in 2012. The ideal lounge chair to get away from it all.

“

The big difference between designing today and in the past is that designing now has become teamwork, while it used to be a one-man business. Today there are so many different elements associated with our profession that are very important like for example marketing.

Stal Collectief

Stal Collectief is a collaboration between four young furniture designers who studied in Mechelen (Belgium): Len de Paepe, Bob Segers, Tim Vranken and Jonas Blondeel. This collective, which occurred through common interest and friendship, wants to create timeless and honest pieces of furniture and lighting objects. New ideas are conceived, prototyped and sometimes even developed under one roof. The BuzziShade, which provides light and absorbs sound at the same time, is the culmination of an artistic collaboration between BuzziSpace and the four young Belgian furniture designers of Stal Collectief.

Anthony Duffeleer

“

Designing is the outcome of a process where the role of the designer is seriously relative. The material, the production process and other parameters control the direction and form of our designs.

The Flemish architect Anthony Duffeleer heads the Antwerp-based agency Frap together with architect Freia Rombouts. The duo is specialized in product design and architecture. In addition to this, Duffeleer is the initiator of Xala, a collection of must-haves for house and garden. As a designer he is particularly interested in the quest for the right production method. In 2010, he designed a funky room divider for BuzziSpace, named BuzziPlant.

BUZZISPACE PRODUCTS

Jean-Pierre Galeyn

“

We design from the bottom up, creating unique, innovative products appreciated by consumers, concerned by better quality and long-term use.

Jean Pierre Galeyn owns a craft workshop called Tradewinds, where outdoor and garden products are created, assembled and distributed. The art of outdoor living is their main concern, so they reshape widely used and distributed products to restore their authentic purpose and make them lasting, user-friendly and pleasant to the eye. They seek for the perfect blend between authentic craftsmanship and new technology to achieve unique objects.

Silence is Not a Luxury

From the very beginning, acoustics have been a driving force when developing or considering new products. A well-balanced room with a perfect acoustical level is a key factor to the performance and well-being of workers all over the world and therefore our logical main concern. For BuzziSpace, acoustics is more than just a generic word. It's our way of caring for workers and contributing to a pleasant working environment by balancing any given space with the recommended reverberation time and enhancing the speech intelligibility.

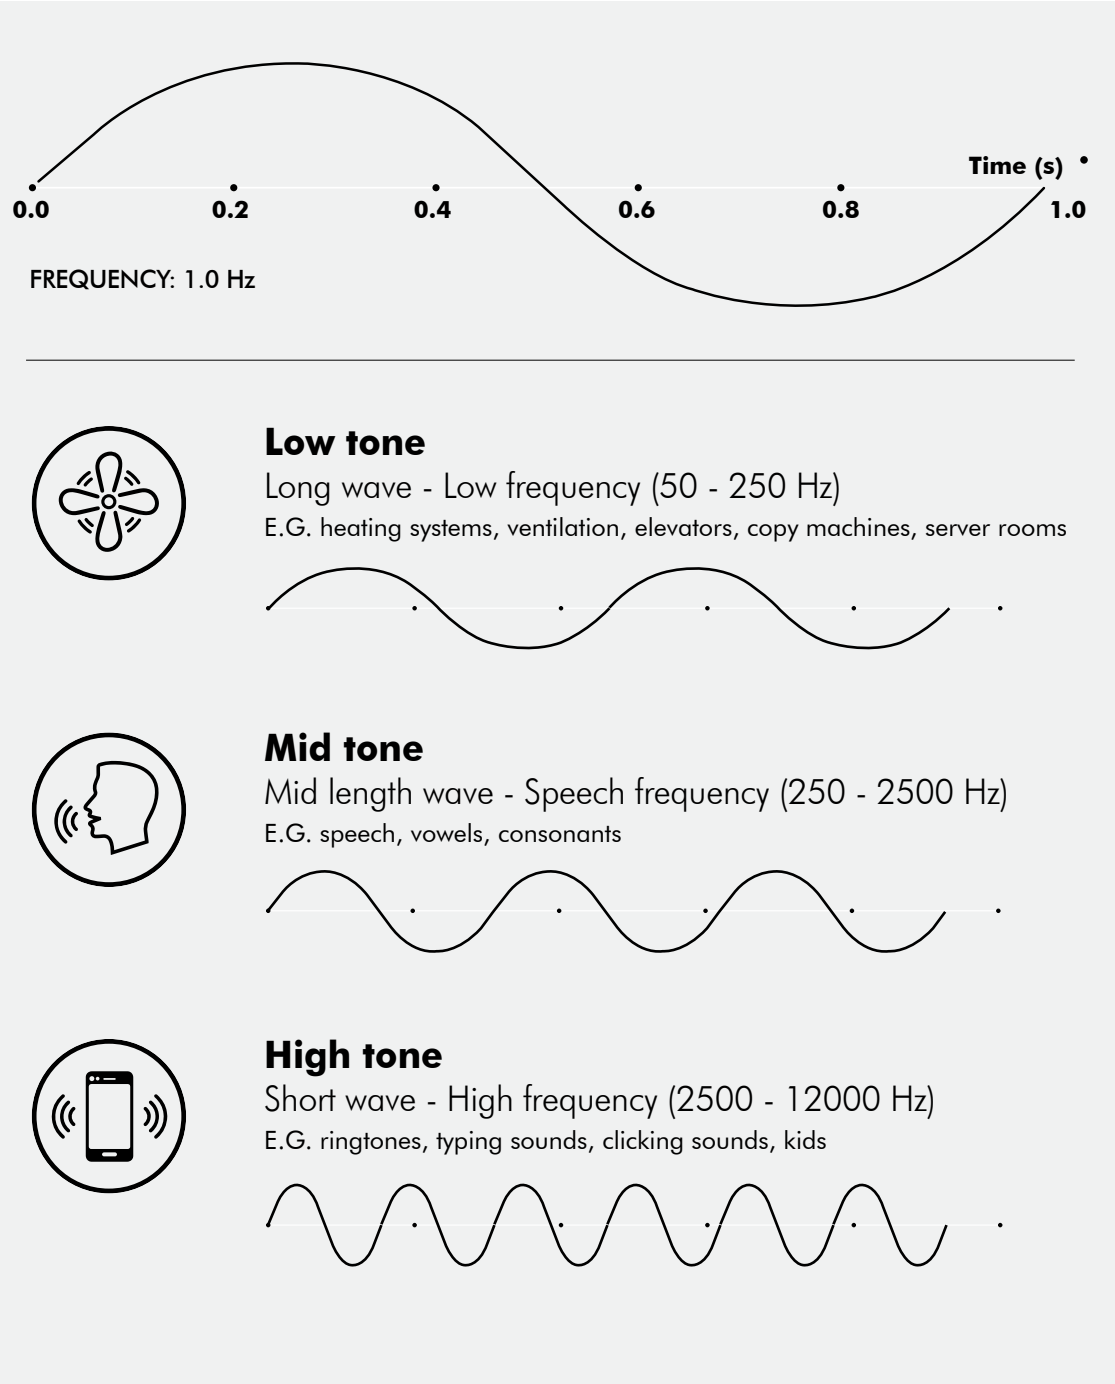

UNDERSTANDING ACOUSTICS

Sound consists of pressure waves running through the air. It can be described as energy, created by vibrations, transmitted through the air or any other medium. The inner ear converts those vibrations into electric signals, which are sent to our brain, where they will be processed and perceived as the actual sound coming in. Consequently, sounds are perceived differently depending on the frequency, intensity (decibel), and reverberation time in a room.

Frequency

The wavelength determines the sound frequency. It is measured as the number of repetitive vibrations per cycle per second and is expressed in Hertz. The audible range of sound is between 20 to 20 000 Hz. The higher the frequency, the higher the tone.

Acoustic Principles

To create a better acoustical environment and reduce reverberation time in a room, BuzziSpace products are developed to perform on one or more of the following acoustic principles.

Absorption

Sound waves are absorbed by any ‘acoustically soft’ material they encounter.

Sound is energy and in order to stop this energy from propagating, absorptive panels will be used to convert this energy into heat through friction. The absorption coefficient of a product will determine the level and quality of absorption. Absorption applies to fixed wall or ceiling elements.

Diffusion

Sound energy is spread evenly in a given space.

Wavelengths which cannot be absorbed through acoustic treatment will scatter evenly back into the room, ensuring a better spread while maintaining a live, vivid sound. This property can be obtained by alternating different depths of absorptive material and 3D shapes.

Attenuation

Reducing the sound transfer within a room.

In order to reduce the sound transfer between different spaces, vertical elements will be applied to cut down sound energy. Those can come in different shapes such as sound blocks, vertical ceiling panels, room dividers and desk screens. Attenuation or sound dampening has a positive impact on speech intelligibility and clarity.

Reverberation time

Reverberation time is the time needed for an original sound source to decay 60 dB and is expressed in seconds. In order to generate excellent speech intelligibility and clarity, the reverberation time should be adjusted and balanced by means of absorptive material in function of the specific acoustical issues in a given space. The recommended reverberation time will always have to be adapted to the room volume and the type of activity.

RECOMMENDED REVERBERATION TIME:

- Office: 0.75s
- Meeting room: 0.60s
- Cafeteria: 1.00s
- Gymnasium: 1.50s
- Auditorium: 1.50s to 2.00s

For detailed acoustic reports, check the product pages on our website: www.buzzi.space

BuzziBlinds Classic

— By Alain Gilles

Room divider

These rotating acoustical blinds take their inspiration from modernist architecture—more specifically from the exterior sunshades that can be found on modernist buildings designed by Oscar Niemeyer. The free-standing room divider is made up of a series of five rotating acoustic blinds. With a simple twist, the blinds can be opened or closed to varying degrees to create privacy or open-up space. This gives individuals the opportunity to determine the level of privacy they may want or need at any given moment to concentrate on a specific task.

BuzziBlinds

— By Alain Gilles

Acoustical performance and privacy with a twist
New additions to the BuzziBlinds Classic. The new generation of BuzziBlinds offers 4 different shapes of the fins covered with plain BuzziFelt. The innovative v-cut technique strengthens the architectural and minimal look. The rhythm and tonalities created by the orientation of the v-cut add a dynamic of depth to any space.

BuzziBlox

— By BuzziSpace Studio

Wall mounted or ceiling pendant acoustic panel

BuzziBlox is a group of acoustic panels with different depths, developed to tune a room in the speech spectrum range and especially in the low and mid frequencies.

By using alternating depths, the absorption of the different wavelengths into the thick layers of foam will be improved and make sure that the waves don't reflect into the room again. This diffusion effect will give the room a more pleasant sound experience. When placed against a wall, the Blox rather has the appearance of a piece of art while fully maintaining its initial purpose: to control and monitor the sound in any given room.

BuzziBoard

— by Sas Adriaenssens

Acoustic panel with power magnets in BuzziFelt
The BuzziBoard is a magnetic and sound-absorbing memo board that can be attached to metal surfaces or to both sides of a glass wall with no need for hooks or screws. You can use it to pin things up, to absorb sound or to darken your windows; in any case this multipurpose object invites you to use your imagination in the workplace or at home.

Dimensions

Finishes

2 layers of BuzziFelt with 6 power magnets

Mounting

- On a metal wall
- On a regular wall: use the metal strip
- 2 BuzziBoards with glass wall in between: gauge of glass max.10 mm - 0.39"
- Clear glass only, without osmose cleaning technique
- Not recommended for ceiling applications

BuzziBrickBack Architectural

— by Sas Adriaenssens

A work of art

This architectural, sound-absorbing wall brings blank walls back to life. Made of multiple layers of sound-absorbing BuzziFelt in monochrome colors, this easy-to-install solution reduces high-frequency tones, while creating visual interest with its tactile, linear pattern. The versatile surface can also serve as a bulletin board to pin up memos, notes, photos and inspiration.

Dimensions

Panels can be mounted horizontally or vertically.

Finishes

Sliced BuzziFelt in Anthracite and OffWhite

BuzziCactus

— by Sas Adriaenssens

Free-standing sound-absorbing screen

Do you need privacy, quiet or protection? The BuzziCactus is a charming room divider that combines no less than three factors: sound absorption, design and a surface you can stick pins onto. Thanks to its striking shape and color you can make a statement at home or at the office. Put your BuzziCactus in direct sunlight – it deserves to be seen!

BuzziDesk Cross

— by BuzziSpace Studio

Divide by four

Desk sharing encourages collaboration and perhaps that is why it's becoming increasingly common in many workspaces. Meeting tables are turned into workstations housing several employees who each requires personal space and privacy from time to time. To accommodate such requests, BuzziDesk Cross is the ideal solution as it transforms a meeting table into four individual workstations.

BuzziDesk FlipFlop

— by Alain Gilles

Free-standing desk divider screen

These movable and foldable acoustic screens have been designed in order to instantly define a quieter and more personal space on any desktop. They can be conveniently stored against a wall in a flat manner since their side flaps are fully movable. They can be used in a more or less closed manner depending on how protected one wants to be, but can also be set in a zig-zag manner on a table top. They were originally designed to be used on the multifunctional BuzziPicNic table (with two small extra sliders that fit perfectly in its central opening), but they can be used on any tabletop to define a specific area when needed.

BuzziDish

— by Jeffrey Huyghe

A playful high-performance acoustic solution with rotating capabilities
Playful exterior, complex interior. BuzziDish marries design and function with the recognizable shape, reminiscent of a satellite dish. Featuring a fabric-upholstered body paired with a perforated structure and acoustic foam core interior, BuzziDish’s parabolic, concave design efficiently mitigates noise by absorbing undesired sound waves. With a rotating connector, attached to the back of the outside curvature, BuzziDish offers additional functionality and flexibility. Combine an array of panels and turn the body in different directions for added acoustic impact and visual interest—create something never seen before!

BuzziFalls

— by Sas Adriaenssens

An artful room divider in BuzziFelt

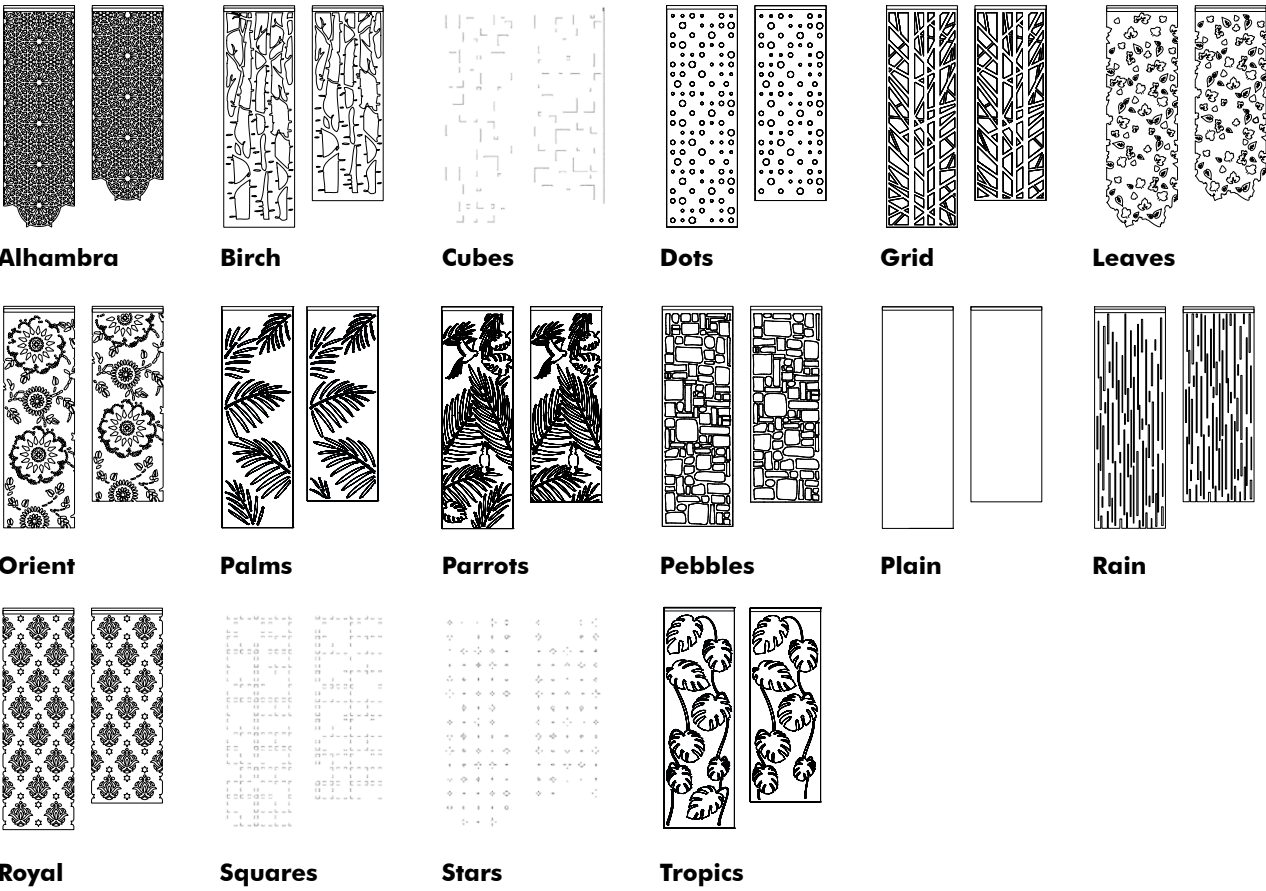

Partition a space and create a layer of privacy with BuzziFalls, a collection of floating, decorative panels, which offer artistic style with acoustic benefits. Designed to tackle the challenges unique to open-floor plan environments, BuzziFalls is an elegant art piece and room-dividing solution in one. Made of dual layer BuzziFelt, these sound-absorbing panels are precision cut with bold patterns, available in a range of organic, geometric and cityscape motifs.

The BuzziFalls Rail enables BuzziFalls to be slid with ease — creating movable room dividers that shift from private to public space. Running on a single three-meter track, panels slide from left to right. To create the effect of sliding doors, install two layers of parallel tracks for the rails. BuzziFalls can be attached directly to the surface of the track rail or suspended and exists in a black or white color.

BuzziFrio

— by BuzziSpace Studio

Set of three acoustic panels

Fresh mountain air would work wonders on office workers, but sadly bringing all that air into the city to ventilate workspaces would be quite a challenge. BuzziSpace has the next best thing. The shape of the BuzziFrio Machu and BuzziFrio Pichu room dividers recalls the rocky mountains of Peru, thus visually transforming an office space into a wide-open landscape. The playful shapes bring a touch of humor to the office, a defining trait of BuzziSpace.

As BuzziFrio consists of three panels set closely together, it has a large surface area that enables it to effectively regulate sound in a space. BuzziFrio is available in the standard BuzziSpace fabrics and can also be covered with fabrics from selected Kvadrat collections.

BuzziGrid

— by Alain Gilles

Ceiling element in BuzziFelt

The BuzziGrid is a sound buffer that limits echo in a room. It takes its inspiration from the structures that have been widely used in the 60s and 70s to partially hide ceilings in public spaces. In this case the grid has been turned into a functional sound-absorbing product that can be used in meeting rooms, lobbies, or other public spaces to define areas.

BuzziKey Soft

— by BuzziSpace Studio

A playful acoustic panel attuned to modern spaces
BuzziKey Soft offers exceptional sound-absorption capabilities ensuring an acoustically well-balanced space that is never out of tune! The soft exterior and chamfered edges create an intriguing blend of contrasts that help break the hard surfaces and lines of a space. BuzziKey Soft lightens and softens walls all while upholding a sense of familiarity with the classic acoustic panel. It’s back to basics, yet attuned to modern spaces and interiors alike. Play with perspectives and add depth of field with different models, available in various sizes and depths, and choose your favorite color combinations for a distinctive look.

Lift up your mood

Let your imagination run wild and create your own graphic wall art. BuzziMood is an acoustical wall solution that offers the possibility to combine materials found in nature with upholstered pads in a range of different fabrics and geometrical shapes. This blend mitigates noise and serves as a natural air humidity indicator too when mixed with moss panels. Choose between two moss colors, a light and dark green, to create varying degrees of contrast against the metal frames. As the name suggests, this acoustic solution will undoubtedly lift up your mood in any setting.

BuzziPlanter

— by BuzziSpace Studio

Biophilic room divider with acoustic powers
BuzziPlanter divides open spaces into green and silent microenvironments in no time. Being built with a thick layer of high-density foam and finished off with a layer of fabric, it has the ability to absorb excessive noise, whilst creating calm, peaceful areas where it’s nice to work, gather and relax. BuzziPlanter comes in 6 different heights and widths. The bigger, the more sound-absorbing. The pots have a built-in plastic container, making it suitable for both real and artificial plants. Thanks to a wide variety of colors it easily suits any interior.

BuzziPleat

— by 13&9 Design

A series of architectural solutions by 13&9

The BuzziPleat delivers light and sound control with architectural edge. This series reinterprets ancient techniques used in fashion design, like smocking and pleating, to create large-scale, yet lightweight sculptural forms, made of sound-absorbing BuzziFelt.

Architectural folds maximize surface area, delivering exceptional acoustic performance. The hanging acoustic pendants can be configured with or without a light source, to marry sound control and illumination in one multi-purpose product.

BuzziScreen

— by Sas Adriaenssens

Sound-absorbing dividing screen

The folding screen has come back into fashion with a bang! The BuzziScreen is a contemporary take on the flexible room divider with all sorts of advantages. For example, it can be extended infinitely: the handy recycled zipper system makes it easy for you to add panels. Just like with other BuzziSpace products, you can pin objects, photos or letters to the screen, and of course it works as sound absorption as well. Divide your office or room however you want, wherever you want!

BuzziScreen Mix

— by Sas Adriaenssens

Sound-absorbing sound screen with different heights

The BuzziScreen Mix combines different heights and fabrics to vibrant effect. Alongside, the regular BuzziSpace fabrics (and select collections by Kvadrat) give a great edge to the end result. Add industrial zippers and this is not your average room divider, but a true designer piece. Of course, this room divider wouldn't be BuzziSpace if it didn't have acoustic qualities.

BuzziSkin Printed

— by Sas Adriaenssens

Cheer up your walls with sound-absorbing wall cover

Customize your wall with BuzziSkin Printed and enhance the room acoustics at the same time. Made from sound-absorbing materials, this bold wall cover helps reduce high tones in a space, e.g., ringtones and typing sounds. The self-adhesive backing makes installation very easy while the tackable surface offers the possibility to personalize a space with notes and images. Easily brighten up corners and nooks with a pinch of creativity no matter the print you choose. Go with the marble print for a sophisticated look, the concrete for a more urban vibe or go wild with one of the green or camouflage prints—any of these will undoubtedly make your interior stand out!

BuzziTab Soft

— by BuzziSpace Studio

A chic reinterpretation of the classic acoustic panel
BuzziTab Soft is a playful acoustic treatment with exceptional sound-absorption capabilities. This chubby wall solution reinterprets the classic acoustic panel, suggesting that acoustics and design do pair. With its friendly appearance, well-rounded corners and edges, BuzziTab Soft breaks the hard surfaces and lines of a space. It lightens and softens walls—all while providing a retro look and feel. Play with perspectives and add depth of field with different models, available in various sizes and depths, and choose your favorite color combinations for a distinctive interior.

BuzziTripl Home

— by BuzziSpace Studio

Room and desk partition for your home office
BuzziTripl Home family was specifically designed with compact homes and the new ways of working in mind. Create a small, temporary office for focused work with BuzziTripl Home Low and use BuzziTripl Home High as a screen to hide any visual clutter that may appear in the background during video meetings, as well as a room divider and kid’s playroom. Both are so light and flat, that you can easily pick them up, move them around and store them under the bed or in a cupboard. From now on you’ll be able to concentrate and create separate spaces with these bicolor (OffWhite/Anthracite), compact and tack-able solutions. The panels are made of 3 layers of Felt and are connected to each other with Velcro strips.

BuzziZepp

— by Alain Gilles

A suspended, linear acoustic panel

BuzziZepp is an impressive, sound-absorbing panel offering acoustic treatment to a space. The suspended design was conceived by designer Alain Gilles as an “imaginary island” to visually delineate and bring a sense of tranquility to large open spaces. With its striking linear design, BuzziZepp hovers from above to define zones without obstruction, establishing a more intimate, quiet and purposeful sense of space—no vertical partitions or walls needed! The slim framework is made of upholstered acoustic panels, engineered to absorb sound and reduce echo.

BuzziBalance

— by 13&9 Design

Move your body, move your mind

BuzziBalance creates a non-traditional environment that brings people together, provoking joy and conversation. The BuzziBalance family offers both a seating and standing element.

While standing, BuzziBalance Board becomes a muscle activator. As one balances on the wooden-carved rocking board for a few moments, the mind and body are awakened. While sitting on the BuzziBalance, a rocking pouf in small and large version, the benefits of purposeful stretching are brought into the workplace. The upholstered seat also offers added acoustical benefits.

The perfect solution for creative hubs in the workplace, hospitality or residential homes. BuzziBalance offers the best of both worlds. Stretch your legs for a quick phone call or gather and rock away during a creative session.

BuzziBracks

— by Alain Gilles

A room within a room

BuzziBracks found its way to the drawing board to answer the need for flexible, new ways of working. In open spaces, this modular unit system can be combined in numerous ways to create different areas—to work, focus, relax or meet. The curtains, available in a wide color palette, act as a visual as well as an acoustic shield from the surroundings, separating one zone from the other. Combine transparent with non-transparent curtains and open or close them as needed for privacy. Be your own architect and continuously create and recreate microenvironments within open workspaces.

BuzziBooth

— by Alain Gilles

Upholstered temporary workstation

There has been a big shift toward working in open-plan offices that have a loft-like feeling of home. While there are many benefits, the challenge is maintaining space to make a phone call or work quietly and independently. Designer Alain Gilles' solution is the BuzziBooth: a phonebooth that dampens outside sounds. Now you can have a moment alone even in the noisiest of surroundings. Micro-architecture for maxi spaces!

BuzziDee

— BuzziSpace Studio

Versatile pouf with exceptional acoustic capabilities

A, B, C, BuzziDee. With this originally-shaped acoustic pouf in the room, you can speak out without worrying about disturbing coworkers thanks to the sound-absorbing capabilities. Featuring rounded corners on top and below, BuzziDee’s eye-catching curvature adds structural integrity for maximum comfort; meanwhile, its firm yet lightweight body makes it easy for users to rearrange or store away BuzziDee as needed, or pull up as extra seating in a meeting room or communal space.

BuzziMe

— by Axel Enthoven

Lounge Chair

Me, myself and I: there are times when you want to spend some time on your own in peace and quiet. BuzziMe is the ideal space to get away from it all. Belgian designer Axel Enthoven was responsible for an ingenious look that harmoniously combines functionality and ergonomics. Put two BuzziMe lounge chairs together for a private meeting. The acoustic absorption of the lounge chair reduces any external noise and vice versa: the perfect chair for lobbies, airports and offices - or your very own 'quiet' cocoon at home.

BuzziRing

— by BuzziSpace Studio

A smart, compact and acoustic pod
BuzziRing is a wall-mounted, compact and temporary work or meeting space designed with open-plan offices in mind. The upholstered-foam body can absorb the sound waves from crowded environments and prevent them from bouncing back into the room. At the same time, BuzziRing is acoustically well-balanced on the inside, being an ideal space for short meetings, catching up on emails or making phone calls away from distractions. It comes with a built-in table in Antwerp oak, white laminate or melamine, and a functional light with two USB ports for charging. It offers a transparent screen which mitigates concerns about potential transmission. Choose what best suit your existing decor.

BuzziSpark

— by Alain Gilles

A comfy escape with a twist, pulling you out of a stressful moment
BuzziSpark invites you to relax and observe in silence what happens in your surroundings. But it holds a surprise. Until you plunge yourself in its cocoon, you won't know 'who' or 'if' someone is sharing the same experience. You may run into another nomad with another story looking to escape from the every day and make a new connection. The magic of BuzziSpark lies in the allure of the unknown—the surprise of not knowing who you'll meet around the corner.

BuzziTemp

— by Alain Gilles

Temporary workstation

The BuzziTemp is a temporary workspace. The idea is to bring more dynamic to a space and allow the creation of small islands where people can come to connect or concentrate.

The straight sides create the possibility to generate straight office lines by using multiple BuzziTemp units together. At the same time it is offering you the necessary privacy whilst staying connected with the office environment.

BuzziBounce

— by Gerd Couckhuyt

The perfect chair to bounce back

BuzziBounce is a full-bodied seat on a flexible metal base that provokes a light spring-like effect when sitting. It is defined by its S-shape. Either a wooden finish or upholstery can be used as a highlight on the back of the chair. BuzziBounce brings movement into an otherwise static workday. Its mixture of materials and interactive design distinguishes it as an engineered, comfortable seating experience. BuzziBounce is ideal for offices or residential use.

BuzziCane

— by Wiebe Boonstra & Marc van Nederpelt

A soft lounge sofa on an unexpected frame
With its woven cane back, wood base, and luscious upholstery, the BuzziCane sofa brings a fresh, vintage-inspired look into the contemporary workplace. This sofa mixes a firm, elevated structure with plush seat and back cushions that are perfect for relaxing. Created by Dutch designers Wiebe Boonstra and Marc van Nederpelt, BuzziCane recalls the playful aesthetic that made them famous. The informal design welcomes guests with its friendly feel. BuzziCane is ideal for hotel suites, private offices and homes. It is available as a one, two or three seater.

BuzziFloat

— by Alain Gilles

A minimal chair to maximize space
BuzziFloat is an intentionally simple design that blends into its surroundings. This transparent chair is engineered to feel spacious and airy and has a strong graphic personality. BuzziFloat is offered in multiple finishes: non-upholstered or upholstered with an elegantly cushioned seat and backrest. Meeting all functional needs the chair is available with three base options: wooden base, metal cross (with or without wheels). The bent plywood back support aligns perfectly with your tabletop. BuzziFloat fits together perfectly with BuzziPicNic tables in office settings, residential homes and hospitality areas.

BuzziJungle

— by Jonas Van Put

Vertical conversation tower

Inspired by nature, BuzziJungle offers a solution to the conventional meeting space. The launch of the BuzziJungle introduced the design world to young Belgian talent Jonas Van Put. This is Van Put’s first project with a major international manufacturer. BuzziJungle is BuzziSpace’s reflection of their vision for the social office and further pushing the traditional boundaries of the workplace.

Various elements within the structure provide an opportunity for different interactions within the “jungle”. You can climb, lounge and meet in the elevated work-lounge space made from powder coated steel. The BuzziJungle creates an urban footprint in large and small spaces.

BuzziMilk

— by Alain Gilles

A classic milk stool

This rustic-meets-modern take on the old farmhouse favorite would even make your grandma feel nostalgic. BuzziMilk is a sturdy little stool inspired by elements not usually found in a standard office space. Its goal? Create a warm and homey feeling at work.

BuzziMilk has four legs and an upholstered seat for a softer experience. Select from a variety of wood finishes and make it your own by pairing with one of our many BuzziSpace fabrics. Whether you choose a bold pop of color (red, yellow, green, white and blue) or a natural neutral, it is designed to stand on its own or match the BuzziPicNic table.

Looking for a pure wood stool? BuzziMilk Stool AllWood is pure simplicity and strong design.

BuzziMirage

— by Alain Gilles

The Art of Illusion

BuzziMirage is about reflections, false perspectives and fake shadows. The mirrors act as a “trompe l’oeil” since they are based on false impressions and confused perceptions. “It’s a discussion between materials, reality and virtuality. But, above all BuzziMirage is about creating a little world of its own,” says designer Alain Gilles. The offset between the arch-shaped mirror and its support creates a sense of depth and false impression that a door or window is open. The design combines various materials —a metal or wooden arched frame, paired with a glass mirror—to play with depth and light, creating new vanishing points.

BuzziTable

— by Alain Gilles

An effortless signature

Subtle, yet resilient. The straightforward character of BuzziTable is its force. With an oval-shaped table top and supporting structure refined to the essentials, this design leaves behind an effortless signature. The sideless silhouette brings everyone together, leaving no-one out of the conversation. Compared to other communal furniture and worktops, BuzziTable has a lightweight appearance, giving the illusion of a floating tabletop with the rounded corners vanishing below the surface. Available in a variety of materials and colors to easily accommodate a range of different styles and spaces—from communal to hospitality spaces and meeting areas. No matter the space, BuzziSpace makes a statement without being flamboyant. It is proof that less is more.

BuzziBell

— by Chris Hardy

Acoustical lighting solution

Stretching the BuzziFelt to its limits, BuzziBell is recognized by the harmonious curve of its bell-shape. Its design adds softness to a room with the textural look of felt and a delicate, diffused light source or high performance LED engine. BuzziBell is offered in 12 BuzziFelt colors, has a metal feature and is CE and UL listed. BuzziBell makes a statement in offices, restaurants, hotels, institutions and residences.

BuzziDome

— by BuzziSpace Studio

Temple of silence

BuzziDome is a modern acoustic light distinct for its refined dome shape. BuzziDome’s concave design, coupled with its acoustic foam element, acts as an excellent diffuser and absorber of sound. Therefore, BuzziDome provides exceptional acoustic treatment for open-plan settings. A recessed LED light source, paired with its tailored design, accentuates the pendant’s meticulous craftsmanship while also emitting a warm, functional light. BuzziDome accommodates the demand for both sound absorption and light, being the perfect fit for open-plan workplaces, hospitality settings, and break-out areas. Pick yours from a wide range of colorful upholstery options. It will definitely complement the aesthetic scheme of your interior.

BuzziHat

— by Alain Gilles

Say goodbye to noisy environments

A decorative and highly recognizable hat-shaped pendant light with excellent sound absorption capabilities. Its unique design, combining an upholstered part with a metal shade is bound to steal the attention in any space. The upholstered foam body is available in a wide palette of color and fabric combinations, while the metal shade and ring come in 4 finishes (black, white, beige red and gold). Mix colors of your choosing and match the fabric of BuzziHat with the color of your furniture to create an impeccable setting. BuzziHat is available in different sizes to fit different noisy environments which makes it the ultimate acoustic lighting for any office, lobby or restaurant that needs acoustic absorption treatment combined with high-quality lighting.

BuzziJet

— by BuzziSpace Studio

Powerful acoustic circle of light
Form follows function with BuzziJet, an intentionally simple design based on the principles of geometric acoustics. Wide in diameter, this cylindrical design allows sound waves to bounce back-and-forth within the radius of its circular body, and in turn mitigates noise. BuzziJet is considerable in size, yet appears lightweight and airy thanks to its upholstered foam core. Its soft presence evokes a majestic sense of serenity. Concealed inside the body, a powerful light source emits warm, pleasant light.

BuzziPleat Light

— by 13&9 Design and BuzziSpace Studio

Sculptural pendant enfolds silence and light

BuzziPleat, a dynamic series of acoustic solutions by 13&9 Design, delivers sound control with architectural edge. Traditional fashion design techniques, like smocking and pleating, are reinterpreted with sound-absorbing BuzziFelt to create large architectural folds, which maximize surface to deliver exceptional acoustic performance. The suspended BuzziPleat Light configuration marries sound control and illumination. It is equipped with BuzziSol, a powerful LED light source. The dimmable warm light gives BuzziPleat an even greater sense of depth.

BuzziSol

— by BuzziSpace Studio

Shine bright
BuzziSol is a versatile and straightforward pendant light fixture. It can be fitted with a frosted glass globe for a decorative effect or with a reflector for more direct lighting. Both the LED Globe and the Spot are designed to complement existing acoustic lighting solutions, for instance, BuzziPleat, BuzziShade, BuzziProp, and more. Alternatively, use BuzziSol standalone as a unique lighting centerpiece. No boundaries!

Models

Finishes

Powder-coated metal heatsink in black (RAL 9005)
Black fabric power cable
(Check our application overview p. 312)

Mounting

Ceiling Suspended
Black metal ceiling canopy and black fabric cable incl.

Light

Frosted glass globe or reflector spot.
Input Voltage: 220 - 240V
Input Frequency: 50/60Hz
Lumen Output: 1500 Lm
Color Temperature: 3000K
Color Rendering Index: 90
Diffuser: Glass globe or Reflector spot
Dimming: 1-10V or Dali on request
CE/CB certified / cULus listed

LUX levels

To enlighten your space with optimal LUX levels take following measures into account.

Spot

Globe

According to EN12464 (only on LUX levels) at full output

BuzziTrom

— by BuzziSpace Studio

A sweet melody

This circular acoustic pendant lamp lends a lightweight appearance to any space with its felt-covered frame. But don't be mistaken by the straightforward design. BuzziTrom is an acoustic powerhouse in disguise. The drum-shaped body, outfitted with a dual-layer of felt, holds enclosed air cavities that ensure maximum acoustic performance. The cylindrical design traps sound waves within the radius of the frame; meanwhile, the exterior helps diffuse sound energy. The BuzziSpace signature lacing has been replaced with versatile black push buttons to give BuzziTrom a contemporary expression that suits any modern space. Opt for a single color or upgrade to a bicolor version to bring out the playful character of BuzziTrom.

Models

Finishes

Metal frame in black (RAL 9005)
Shade with an inside and outside layer of BuzziFelt finished with push buttons in glossy black.
(Check our application overview p. 312)

Options

Bicolor (inside or outside in different felt color)

Mounting

White metal ceiling canopy and transparant power cable incl.

Light

Input Voltage: 220 - 240V
Input Frequency: 50/60Hz
Lumen output: 2545 Lm
Color temperature: 3000K / 4000K on request
Color Rendering Index: >90
Dimming: 1-10V or Dali (CE/CB)
Diffuser: milky (URG22) or prismatic (UGR19) on request
CE/CB certified / cULus listed (from end of summer 2020)

LUX levels

To enlighten your space with optimal LUX levels take following measures into account.

BuzziZepp Light

— by Alain Gilles and BuzziSpace Studio

A suspended plane of light with sleek acoustic body
BuzziZepp is an impressive shield of light, offering acoustic control. The suspended design was conceived by designer Alain Gilles as an “imaginary island” to visually delineate and bring a sense of tranquility to large open spaces. With its striking linear design, BuzziZepp hovers from above to define zones without obstruction, establishing a more intimate, quiet and purposeful sense of space—no vertical partitions or walls needed! The slim framework is made of upholstered acoustic panels, engineered to absorb sound and reduce echo. The streamlined design is outfitted with dimmable LED lines, which can be adjusted for various situations. Dim the lights to set a more relaxed tone at your next meeting, or brighten your workstation to focus on the task at hand.

Models

S

M

Finishes

Upholstery in fabric collections CAT A, B, C, D, E
(Check our application overview p. 312)
Black LED Line

Mounting

OUTDOOR

BuzziBreeze — 303

BuzziNordic ST900 — 304

BuzziShed — 307

OUTDOOR

BuzziBreeze

— by BuzziSpace Studio in collaboration with Cassecroute

Outdoor workstation
BuzziSpace has always had a penchant for picnics, which is why it created the BuzziPicNic. This award-winning indoor table has all the nostalgic design features of a traditional picnic table. Our love of outdoor living inspired our designers to create BuzziBreeze, answering the call for an outdoor workstation that captures the collaborative needs of the modern workplace. BuzziBreeze is constructed using a powder coated metal frame, with the top and seat in weather-resistant hardwood or aluminum.

Models

Low

Finishes

Base in powder coated steel black (RAL 9005) or white (RAL 9010)
Worktop & seats in powder coated aluminum black (RAL 9005) or white (RAL 9010), Oak* or Iroko.
Iroko wood is naturally durable but may be prone to movement and cracking in outdoor environments.

How to order

- Length
- Color base
- Material worktop & seats

*Not suitable for outdoor use

BuzziNordic ST900

— Stäffan Thomasen

Outdoor zen
Vintage-inspired furniture should not be limited to the indoors. The BuzziNordic ST900 Collection gives you the opportunity to upgrade your outdoor space with a Scandinavian look and feel. Choose among several models; a single armchair, a matching ottoman and a daybed, all built on a frame of solid hardwood, suitable for the outdoors. Each style is outfitted with upholstered cushions in a variety of outdoor weather-proof fabrics, so you can choose to enjoy the open air year-round.

BuzziShed

— Jean-Pierre Galeyn and
BuzziSpace Studio

Outdoor shed
While working outside might seem nice, the lack of comfy furniture and the glare of the sun on your laptop or smartphone screen might cause a lot of discomfort. Until now. With the launch of the BuzziShed, designed by Jean Pierre Galeyn and BuzziSpace Studio, you can now work or spend time outside in this stylish outdoor shed, protected from sunlight and even from the rain. The BuzziShed can also be used as a garden shed on cool or rainy days or to create meeting points in a large open space.

WOOD

- IROKO
- ANTWERP OAK
- OAK
- WALNUT
- ASH NATURAL
- ASH WALNUT STAINED
- ASH BLACK STAINED
- ASH WHITE WASH
- ASH LACQUERED
- HPL
- WHITE LAMINATE

Ash Black Stained

Properties Black clear coating with a matt look, consisting of a durable finish, suitable for furniture, that masks normal wear and leaves the wood grain visible to the eye.
Maintenance First, wipe the surface with a dry cloth then clean carefully with a damp cloth. Do not use any abrasive cleaning products or scourers as this can damage the surface.

Ash White Wash

Properties Oil based coating with white pigments consisting of durable finish, suitable for furniture, that masks normal wear and leaves the wood grain visible to the eye.
Maintenance First, wipe the surface with a dry cloth then clean carefully with a damp cloth. Do not use any abrasive cleaning products or scourers as this can damage the surface.

Oak

Properties Clear coating with a matt varnish look, consisting of a durable finish, suitable for furniture, that masks normal wear and leaves the wood grain visible to the eye.
Maintenance First, wipe the surface with a dry cloth then clean carefully with a damp cloth. Do not use any abrasive cleaning products or scourers as this can damage the surface.

Walnut

Properties Clear coating with a matt varnish look, consisting of a durable finish, suitable for furniture, that masks normal wear and leaves the wood grain visible to the eye.
Maintenance First, wipe the surface with a dry cloth then clean carefully with a damp cloth. Do not use any abrasive cleaning products or scourers as this can damage the surface.

Ash Natural

Properties Clear coating with a matt varnish look, consisting of a durable finish, suitable for furniture, that masks normal wear and leaves the wood grain visible to the eye.
Maintenance First, wipe the surface with a dry cloth then clean carefully with a damp cloth. Do not use any abrasive cleaning products or scourers as this can damage the surface.

Ash Walnut Stained

Properties Oil based coating with walnut colored pigments consisting of durable finish, suitable for furniture, that masks normal wear and leaves the wood grain visible to the eye.
Maintenance First, wipe the surface with a dry cloth then clean carefully with a damp cloth. Do not use any abrasive cleaning products or scourers as this can damage the surface.

Note color deviation may occur.
Find the latest update of the material specifications and colors on our website: www.buzzi.space
Refinishing In the event that scratching or marring has occurred we recommend that refinishing be carried out by a professional furniture refinishing company.

Cumaru

Properties Tropical hardwood which is more resistant to weather influences. No oil or varnish is applied. In normal use, wood will turn grey over time.
Maintenance Aftermarket teak cleaning product can be used for yearly maintenance to freshen up the wood after winter. Do not use any abrasive cleaning product or scourers as this can damage the wood. Cumaru wood is naturally durable but may be prone to movement and cracking in outdoor environments.

Iroko

Properties Tropical hardwood which is more resistant to weather influences. Oil based coating with white pigments consisting of durable finish, suitable for furniture, that masks normal wear and leaves the wood grain visible to the eye.
Maintenance First, wipe the surface with a dry cloth then clean carefully with a damp cloth. Do not use any abrasive cleaning products or scourers as this can damage the surface. Note: Iroko wood is naturally durable but may be prone to movement and cracking in outdoor environments.

Antwerp Oak

Properties Oak Solid wood with a subtle rustic look, allowing some pith and small cracks. Oil based coating with white pigments consisting of durable finish, suitable for furniture, that masks normal wear and leaves the wood grain visible to the eye.
Maintenance First, wipe the surface with a dry cloth then clean carefully with a damp cloth. Do not use any abrasive cleaning products or scourers as this can damage the surface.

Ash Lacquered

Blue
PANTONE 299 C

Green
PANTONE 370 C

Red
PANTONE 185 C

Yellow
PANTONE 115 C

White
PANTONE 000 C

Properties Lacquered coating with matt look, leaving a visual woodgrain.
Maintenance First clear the surface with a dry cloth, then clean with a slightly damp cloth. Do not use abrasive cleaning products nor scourers, they can damage the surface.

Refinishing Renovation should be done by a specialist in furniture coating. It requires sanding of the parts and re-applying an equal amount of coating on all sides.

White Laminate

Properties HPL top layer with plywood core and straight oiled visible plywood edge
Maintenance Depending on the stains/dirt there are different prescriptions:
LIGHT: dry or damp paper towels, a cloth or sponge.
NORMAL: with a cloth or soft nylon brush and washing powder, soft soap, toilet soap or washing-up liquid. If necessary, leave for a while and then rinse thoroughly with clean water.
HEAVY: Discoloration stains through long exposure to tea, coffee, etc. use washing powder and household bleach (but do not repeat too often). For stains such as lead pencil, felt-tip pens, marker and ball-point pens use an organic solvent for example acetone (nail varnish remover).

Properties Fine-textured powder coated steel or aluminum with a matt look.
Maintenance Clean as needed using a soft cloth or brush with a mild detergent. Avoid steam cleaning, abrasive cleansers, carbon steel brushes/wools and cleaners containing chlorine.

Uncoated Aluminum

Properties Bare aluminum with clear coating.
Maintenance Clean as needed using a soft cloth or brush with a mild detergent. Avoid steam cleaning, abrasive cleansers, carbon steel brushes/wools and cleaners containing chlorine.

Galvanized Steel

Properties Hot-Dip Galvanization > applying a protective coating layer to prevent corrosion of the metal part.
Maintenance Clean as needed using a soft cloth or brush with a mild detergent. Avoid steam cleaning, abrasive cleansers, carbon steel brushes/wools and cleaners containing chlorine.
