creating green spaces

La única Hidrojardinera dotada de un exclusivo sistema patentado de autorriego que reproduce fielmente el entorno natural de las plantas.

Nuestra historia se remonta a 1974, cuando junto a la Universidad de Biología de Barcelona se desarrolló y patentó el sistema Hobby Flower. Desde nuestros inicios hemos apostado por crear espacios verdes adaptados a todo tipo de entornos uniendo calidad, diseño y ecología.

The unique Hydroplanter with an exclusive selfwatering patented system that recreates the natural environment of plants.

Our history goes back to 1974, when together with the University of Biology of Barcelona we developed and patented the Hobby Flower system. From our beginnings we promoted to create green spaces suitable for all kinds of environments joining quality, design and ecology.

Welcome to Hobby Flower.

Diseñadores Designers

Emiliana Design Studio

Ana Mir y Emili Padrós, autores de la colección Ashi, son conocidos mundialmente por sus diseños creativos caracterizados por favorecer un enfoque transversal en la disciplina del diseño.

Ana Mir and Emili Padrós, designers of Ashi collection, are worldwide known for their creative designs characterized by a transversal approach in the discipline of design.

Jordi Vilardell

Diseñador catalán desde 1983 especialista en proyectos para iluminación decorativa y técnica con una larga trayectoria en el sector del Contract.

Catalan designer, specialist in technical and decorative illumination projects for the Contract market since 1983.

Josep Llusçà

Diseñador Industrial y creador de la colección Novo. Desde 1972 ha colaborado con prestigiosas empresas internacionales en todo tipo de áreas industriales.

Industrial Designer, he was the designer of Novo collection. Since 1972 he has collaborated with prestigious international companies in all kinds of industrial areas.

Meritxell Vidal

Interiorista y diseñadora industrial, ha colaborado con Jordi Vilardell para desarrollar las colecciones Adel y Lina, llevando a cabo un exhaustivo estudio sobre las necesidades de las orquídeas.

Interior and industrial designer, she has collaborated with Jordi Vilardell to develop the collections Adel and Lina, carrying out an exhaustive study on the needs of the orchids.

Fabricación nacional National manufacturing

En Hobby Flower trabajamos y promovemos la fabricación nacional. De la mano de prestigiosos diseñadores, cuidamos nuestros diseños, su durabilidad y la extensa gama de acabados con la que contamos. Ofrecemos calidad unida a la proximidad.

In Hobby Flower we work and promote a national manufacture. Together with prestigious designers, we take care of our designs, it's durability and the wide range of finishes that we have. We offer quality together with proximity.

Procesos artesanales Handmade processes

Siguiendo nuestra filosofía, en Hobby Flower fabricamos todos los productos mediante procesos manuales y artesanales con la finalidad de conseguir la máxima calidad en los acabados y materiales.

Following our philosophy, in Hobby Flower we manufacture all the products through manual and craft processes to achieve the highest quality in finishes and materials.

Una forma más fácil de cuidar tus plantas

An easier way to take care of your plants

Patented System®

Sistema de autorriego patentado con espíritu ecológico. Llenar el depósito solo 4 veces al año y regar superficialmente cada 4 o 5 semanas.

¿El resultado? Plantas perfectas con el mínimo mantenimiento.

Self-watering patented system with ecological spirit. Fill the tank only 4 times a year and water it superficially every 4 or 5 weeks.

The result? Perfect plants with minimum maintenance.

Instrucciones de plantado Planting instructions

1

Coloque el drenaje

Spread the drainage

Esparza uniformemente el material de drenaje por encima de las mechas hasta un grueso aproximado de 2 centímetros.

Spread the drainage material uniformly on top of the wicks until they are covered by a layer of approximately 2 centimetres.

2

Añada el sustrato

Add the soil layer

Añada sustrato sobre el drenaje dejando un agujero para cada planta que quiera plantar en su Hidrojardinera. Utilice el sustrato adecuado al tipo de planta deseado.

Cover the drainage layer with soil, leaving a hole for each plant that you wish to plant in your Hydroplanter. Use the appropriate soil for the desired plant.

3

Colocar la planta

Place the plant

Antes de plantar la planta le recomendamos que las raíces queden un poco sueltas (procurando que no se rompan) para favorecer su crecimiento en el sustrato.

Before planting the plant in its corresponding hole we recommend that you loosen the roots (without breaking them) which will encourage the plants to take root in the new soil.

4

Regar el sustrato

Water the soil

Después de realizar el PRIMER plantado, regar el sustrato lentamente, a fin de empapar la tierra y el drenaje y llenar el depósito. La varilla indicadora mostrará el nivel máximo del agua.

After planting the FIRST time, it is important to water the soil slowly until the soil and drainage layer is moist and the water tank is full. The indicator rod will show the maximum water level.

Ahorra hasta un 80% de agua

Save up to 80% of irrigation water

Sistema patentado certificado por la Universidad de Biología Barcelona - UB
Patented system certified by the University of Biology of Barcelona.
