# MORA

HMD

*Colours and textures represented may vary, and are subjected to chromatic changes due to printing, and to the fact that every screen has different displays and colour settings.*

The MORA line comprises a Console, a Side Table and a Low Bench. We love the lightness of these pieces, and how they allow you to conceal things. The Brass plate slides over the Natural Wood Veneer top, which is shaped like a deep tray. The feet are made of Solid Wood.

These pieces are customizable, and the different colour combinations that we propose in the Technical Sheet make the MORA a very chameleonic line that fits into any room and décor style.

TOP IN EUCALIPTUS, FEET IN BLACK TIMBER  
AND OXIDISED BRASS TRAY

TOP AND FEET IN WALNUT,  
BRASS DARK OXIDISED TRAY

TOP AND FEET IN RIFT,  
BRASS DARK OXIDISED TRAY

This side table is often used as a bedside table.

The feet are made in stained timber according to the top finish. The top is a deep tray, allowing for objects to be concealed, and comes in Veneer in the finishes available in the Technical Sheet.

There is a Brushed Brass sliding plate on the top, that comes in three possible finishes.

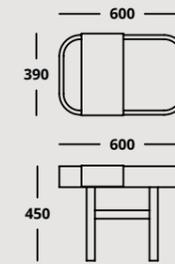

TOP AND FEET IN RIFT,  
BRUSHED BRASS TRAY

# **B T A B L E**

HMD

*Colours and textures represented may vary, and are subjected to chromatic changes due to printing, and to the fact that every screen has different displays and colour settings.*

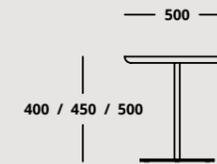

Our goal when creating the B-Tables was for the tabletops to be the protagonists. So, we designed a visually light but still robust and stable base, that allows the tabletop materials to shine.

The tables' different shapes and sizes allow you to nest them and play with the design by mixing textures and materials.

## TECHNICAL SHEET

Measures in millimeters;

Colours and textures represented may vary, and are subjected to chromatic changes due to printing, and to the fact that every screen has different displays and colour settings.

The concave tabletop has a height of 4.5cm and is made in stained ash, with a matte lacquered epoxy metal base. You can choose other colours from our RAL catalogue. We love this tabletop paired with the other resin and marble options. This table comes in three different heights.

### for the base

# SERA

HMD

*Colours and textures represented may vary, and are subjected to chromatic changes due to printing, and to the fact that every screen has different displays and colour settings.*

TOP IN TERRAZZO DOMINO,  
BASE IN WENGUE OAK

Our SERA table is available in many different sizes, which means that it can be adapted to all your needs - it can be used as a side table, a coffee table, and even in a bar, as the height can go up to 60 cm. At the same time, you can get creative and play with the different materials and nest the tables with each other. The base is available in Natural Veneer and Lacquered MDF.

The table tops are 20mm thick, and you can choose between Stone, Veneer, Lacquer or Resin for the finish.

# MOONWOOD

HMD

*Colours and textures represented may vary, and are subjected to chromatic changes due to printing, and to the fact that every screen has different displays and colour settings.*

The MOON in Wood is light in all aspects, but the feet make it a very robust piece. Aesthetically, this is a very neutral piece, and all the different possible finishes ensure that the MOON adapts into any room. You can choose to have your MOON table in Lacquered MDF or Wood Veneer.

MOON WOOD

HMD

# MOON METAL

HMD

*Colours and textures represented may vary, and are subjected to chromatic changes due to printing, and to the fact that every screen has different displays and colour settings.*

BASE IN POLISHED STAINLESS STEEL

Much like its Wood version, the MOON METAL table is defined by its lightness. However, the curves on the feet make it very robust. The MOON is very aesthetically neutral, and the endless possibilities for finishes turn this into a chameleonic piece of furniture that adapts seamlessly into any room.

If you opt to have the feet made in Stainless Steel you can choose between Natural (brushed or polished), Brushed Gold, and Brushed Old Gold for the finish. For the Epoxy Metal legs you can choose to have them in any colour of our RAL catalogue.

Refer to our Technical Sheet to have a look at all the possible finishes for the table top.

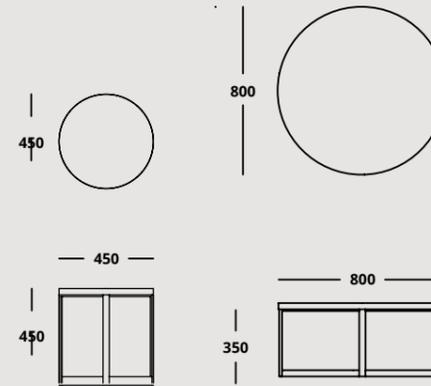

BASE IN OLD GOLD

# TOO SIMPLE HMD

*Colours and textures represented may vary, and are subjected to chromatic changes due to printing, and to the fact that every screen has different displays and colour settings.*

With minimalism at its core, the only protagonist on the TOO Simple is its material. The table stands on a recessed, low plinth, that makes it look as if it is floating. There are two shapes to choose from for the TOO Simple – the Square, which comes in Wood Veneer, Lacquer, and Microcement, and the Round, available in Lacquer and Microcement.

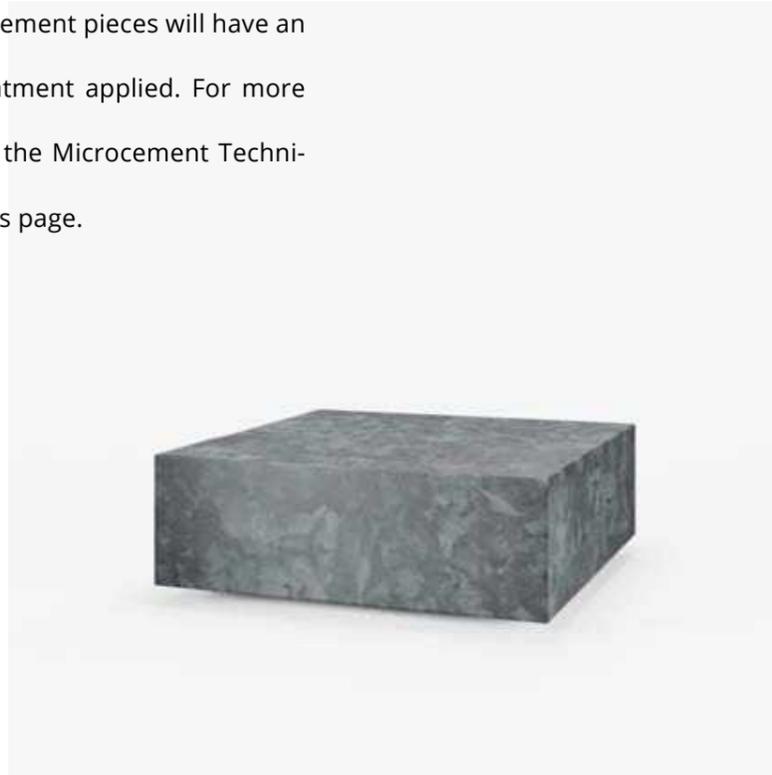

ON THE LEFT  
TOO SQUARE IN OAK SMOKED

ON THE RIGHT  
TOO ROUND IN MICROCEMENT ARENA

NATURAL OAK VENEER

Please note that Microcement is an artisanal technique and the color is defined by the way in which the artisan works the spatula. As such, we cannot guarantee that the colors are always going to be the same. Imperfections are part of the piece and should not be seen as flaws. We can, however, guarantee that all Microcement pieces will have an excellent protection treatment applied. For more information please read the Microcement Technical Sheet on the Materials page.

# PLEASE SIDE HMD

*Colours and textures represented may vary, and are subjected to chromatic changes due to printing, and to the fact that every screen has different displays and colour settings.*

Combining quality and timelessness, the PLEASE table is a piece that will last for a lifetime. The base is strong and robust, built with the best materials and made to last. The tabletop was designed to not need a single screw, which not only means that you can effortlessly clean and maintain it whenever needed, you can also change it after a few years if you wish to. This catalogue page displays the Side and Low versions, but we also have Bistro measurements available.

BASE IN BLACK MICRO-TEXTURED  
RIM IN POLISHED BRASS  
TOP IN HIGH GLOSS LACQUER - RAL 3007

We know that a side or coffee table is only functional if it is adjusted to fit its own space, which is why the PLEASE table has many different options regarding measurements and possible finishes. While there are some options presented in the Technical Sheet, this line can be made in almost all of our entire range of finishes and materials, so feel free to ask one of our salespeople for help so that you can have the perfect PLEASE table tailored to your needs.

The table base can be made in Lacquered Metal (microtexturized) or Stainless Steel, in the colours presented below. You can ask for the rim in Lacquered Metal or Stainless Steel in the same colours, or in Brass. There are many possibilities in our finishes catalogue for the table top, so you can let your imagination fly. However, if you want it in Laminated Fenix or in Ceramics, please ask us for a direct quote.

TOP IN BRASS RESIN,  
BASE IN WENGUE OAK

Our SERA table is available in many different sizes, which means that it can be adapted to all your needs - it can be used as a side table, a coffee table, and even in a bar, as the height can go up to 60 cm. At the same time, you can get creative and play with the different materials and nest the tables with each other. The base is available in Natural Veneer and Lacquered MDF. The table tops are 20mm thick, and you can choose between Stone, Veneer, Lacquer or Resin for the finish.

# HAZE

HMD

*Colours and textures represented may vary, and are subjected to chromatic changes due to printing, and to the fact that every screen has different displays and colour settings.*

HMD

HAZE  
OLD GOLD WITH RESIN

Made entirely with stainless steel, the HAZE gets its name from the effect the resin has when applied all over the stainless steel.

While Resin is a very resistant material, it is still fragile to a degree, so here are some tips on how to care for it. The process of getting the haze effect is artisanal, and to achieve it the resin is brushed by hand. This means that there will be some thin and thick strokes, and the sensation of porosity. However, these details are part of the uniqueness and beauty of this product and should not be considered flaws. To maintain this effect, you can sand your table with a fine grain sandpaper every 6 months. To wipe away any grease marks use a soft cloth and some window cleaner.

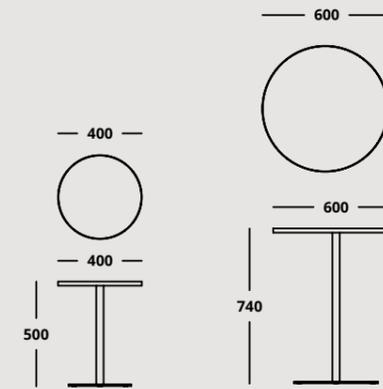

Lastly, let the light shine on your HAZE and enjoy how special its finishing is.

# TATA

HMD

*Colours and textures represented may vary, and are subjected to chromatic changes due to printing, and to the fact that every screen has different displays and colour settings.*

The TATA is very close to our designer Monica Hedderich's heart. Inspired on the skirts of her dear Tata, it reminds her of a time when she would hide under them and feel safe. The base is made with a folded metal plate, and only a small opening is visible. You can have your TATA in Lacquered Metal or Stainless Steel, which is manually brushed to give it an industrial and sophisticated look.

HMD

# LAPPA HMD

*Colours and textures represented may vary, and are subjected to chromatic changes due to printing, and to the fact that every screen has different displays and colour settings.*

The LAPPA collection of sideboards and cabinets is characterized by overlapping lines and thin but striking handles. The contrast between the wood and the lacquered interior grants these imposing pieces some lightness. The interior lacquer can be ordered in any colour of our RAL catalogue.

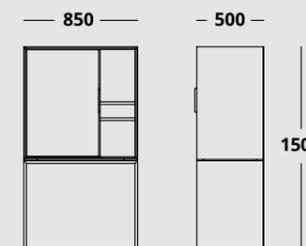

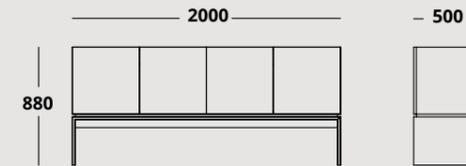

There are three versions of the LAPPA. The Bar has one door and three exposed shelves. The Cabinet has two doors, designed to not reach the bottom, leaving a visible niche. And the sideboard has one interior drawer with cutlery dividers and two adjustable shelves in the same finish as the exterior.

HMD

### OPTIONAL INTERIOR DETAIL

# NEGRONI

HMID

*Colours and textures represented may vary, and are subjected to chromatic changes due to printing, and to the fact that every screen has different displays and colour settings.*

HMD

The NEGRONI is an imposing yet extremely contemporary line. The robust doors framed by 8cm of solid wood give expression to these strong pieces. It combines Oak Veneer and Solid Wood, and it's available in three finishes: Natural, Coffee and Wengué.

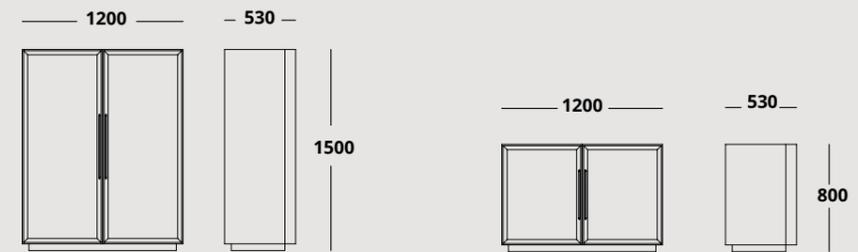

There are two pieces available in the NEGRONI line, the Sideboard and the Showcase. The Sideboard has two adjustable shelves on the inside, which can be lacquered in any colour in the RAL catalogue. The Showcase can have the doors made in Wood or Glass, and the interior can be plated with Gold Zinc. The hardware in both pieces is delicate and discreet, but still sturdy and perfect for everyday use. There is the option to put LED strips inside both the Sideboard and the Showcase to create an even more impressive piece.

# MORA CONSOLE

HMID

*Colours and textures represented may vary, and are subjected to chromatic changes due to printing, and to the fact that every screen has different displays and colour settings.*

The MORA line comprises a Console, a Side Table and a Low Bench. We love the lightness of these pieces, and how they allow you to conceal things. The Brass plate slides over the Natural Wood Veneer top, which is shaped like a deep tray. The feet are made of Solid Wood.

These pieces are customizable, and the different colour combinations that we propose in the Technical Sheet make the MORA a very chameleonic line that fits into any room and décor style.

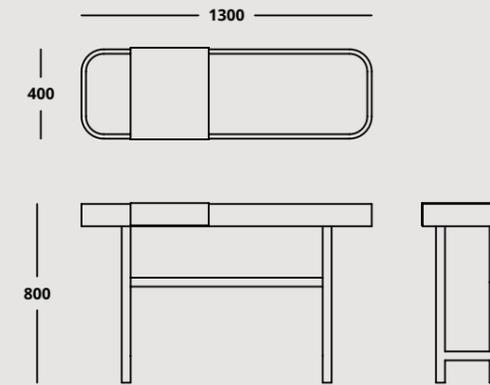

When customizing your console choose the colour for the Solid Wood Feet, the Veneer for the tray top, and the Brass colour for the plate.

# MOLEDO

HMD

*Colours and textures represented may vary, and are subjected to chromatic changes due to printing, and to the fact that every screen has different displays and colour settings.*

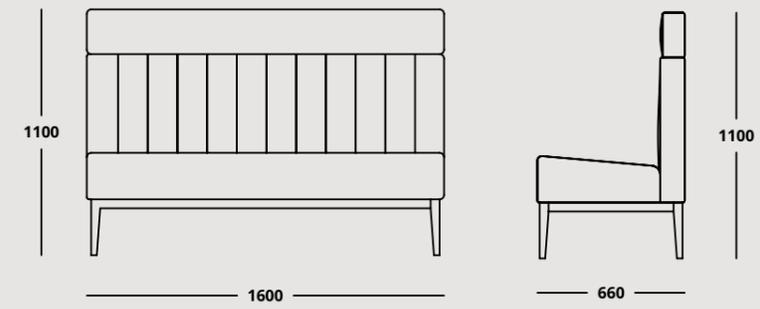

Inspired by the American diners, but with French bistros in mind, the MOLEDO was born. The tall and elegant solid wood feet combined with the decorative seams on the back bring this sofa bench into the most modern and irreverent restaurants. We invite you to look at the portfolio page on our website to see the projects that feature the MOLEDO. The Technical Sheet has the standard measures for this bench, but this is a fully customizable product.

# BISTRO

HMD

*Colours and textures represented may vary, and are subjected to chromatic changes due to printing, and to the fact that every screen has different displays and colour settings.*

One day, a client sent us the following request –  
“We want a comfortable sofa for our bistro, with an upholstery that will look impeccable for many years. We also want it to be so versatile that if we wanted to design it in the shape of a serpent, it would be possible. Finally, we want the shapes to be so subtle that we can use it in many spaces without it ever looking the same.”

We did all that, and even better.

Thus the BISTRO was born.

# PUDIM

HMD

*Colours and textures represented may vary, and are subjected to chromatic changes due to printing, and to the fact that every screen has different displays and colour settings.*

While robust and with a stretched surface, the PUDIM remains soft and plump. True to its name, it looks as if it has just come out of a pudding mold. Spacious and comfortable, its size makes it perfect for any space, and for anyone who sits on it.

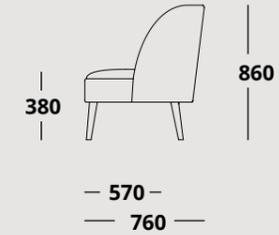

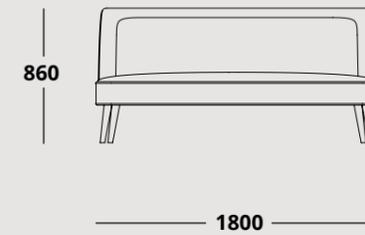

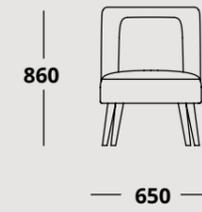

A bench version of the sofa is available upon request. For this, we raised the height to 48cm and set the depth at a narrower 57 cm, so that your bench suits any dining table. As always, we can tailor our bench versions to adapt to the needs of any room and project.

# DEMETRIO

HMID

*Colours and textures represented may vary, and are subjected to chromatic changes due to printing, and to the fact that every screen has different displays and colour settings.*

If the DEMETRIO was a person, it would be stern and grumpy, but its large back and big ears would invite you to spend a whole afternoon with it. The sofa version is imposing and comfortable enough to take your breath away. This is a piece that looks beautiful enough on its own, but you can complement it with the matching pouf.

# CALA

HMD

*Colours and textures represented may vary, and are subjected to chromatic changes due to printing, and to the fact that every screen has different displays and colour settings.*

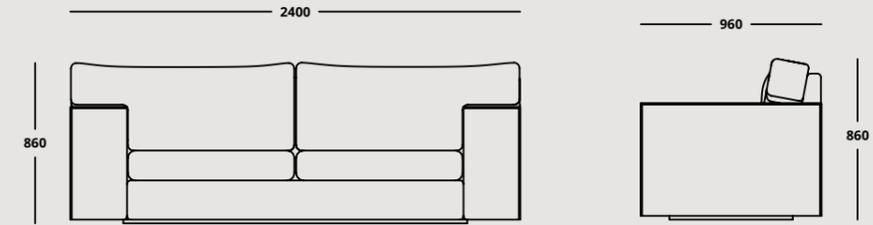

Thanks to the perfect combination between foam and feathers, the CALA is just as comfortable as it looks - like sitting on a cloud. The large armrests aesthetically balance the whole piece. Small details like the piping on the armrests and the hidden feet are what make this sofa stand out from others.

# LLORONA HMD

*Colours and textures represented may vary, and are subjected to chromatic changes due to printing, and to the fact that every screen has different displays and colour settings.*

HMD

Elevate your bedroom with the LLORONA headboard. The LED light system in each circle of light has a touch sensor, allowing you to turn the lights on or off with the tap of a finger. The light produces a subtle effect, like that of a nightlight, but it still enhances the beauty of the material you choose for your LLORONA. The headboard can be made in Wood Veneer or Lacquered, available in matte or gloss.

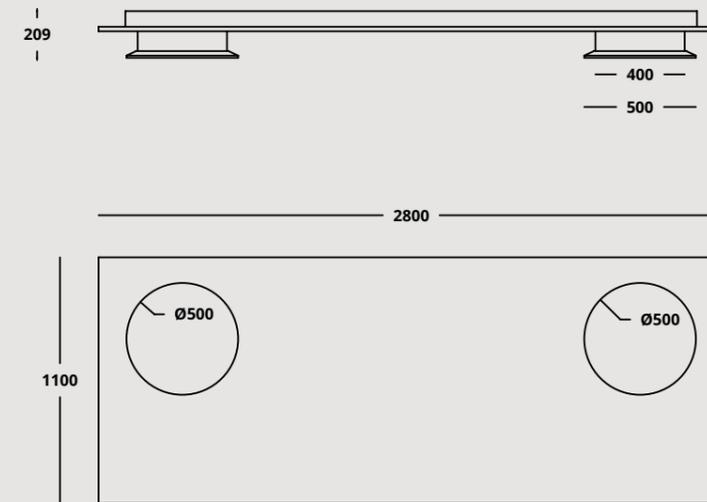

The LLORONA is very easy to install. For this, we supply you with a wooden ruler to fix to the wall – you just need to pick the desired height for your headboard, and slot it onto the ruler.

# BENTO HMD

*Colours and textures represented may vary, and are subjected to chromatic changes due to printing, and to the fact that every screen has different displays and colour settings.*

The BENTO screen partitions divide a room while adorning it. Inside the solid wood frames, you can choose to have your screen made with brass mesh or rattan, which allows for the light to get through.

This is a highly customizable product, since we make several 50cm panels, allowing you to add as many as you want to make your BENTO the perfect width, and even into a cornered structure. If you want any mesh panels that are independent from the front panel, we can connect them to the main screen with hinges. The front panel is made of wood veneer, in the same colour as the frames – an Ash Stained Walnut Tone. Between this panel and the screens there is a led strip light with a switch. We can also add power plugs to the panel should you need them.

We invite you to draft your BENTO according to the needs of your space - whether this is your office, a bedroom, living room, or even a restaurant - and send it to us.

*Natural Veneer*

**Oak Smoked**  
*Natural Veneer*

**Eucaliptus**  
*Natural Veneer*

**Ebony Macassar**  
*composed veneer*

Wood veneers are applied on a high density MDF board through a hot pressure system using high quality glue. This makes the natural wood veneer more durable and sturdier.

The wood base is protected with a polyurethan primer, after which an acrylic varnish is applied. These finishing processes are dried in personalised greenhouses with humidity control, to ensure a better performance of the applied materials.

Wood Veneer is a natural product, and as such, colour and grain may differ.

### CARE INSTRUCTIONS

For cleaning, we recommend a damp cloth or a diluted mild soap if necessary.

We do not recommend using furniture polish as this may damage the surface. Avoid contact with hot objects by using table mats. Avoid any impacts where possible, as damage of this nature will result in cracks to the lacquer. Prevention is the best protection from surface scratches.

## Timber

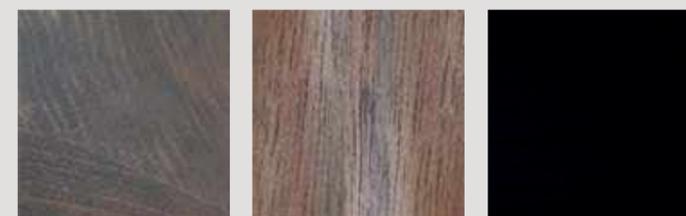

**Natural Oak**

**Ash Stained in Oak tone**

**Ash Stained in Walnut tone**

**Coffee Stained Ash**

**Warm Grey Stained Ash**

**Walnut**

**Black Stained Ash**

We have selected solid wood for its beauty and functionality. Solid woods go through controlled drying and thermal treatments to best take advantage of its natural characteristics. Because this is a raw material, colour and grain may differ in each product.

### Oak

Comes in light yellow to dark Brown, with a coarse grain. A hard and sturdy wood. Depending on the sawing, it can have very decorative radiating lines.

### Ash

Coarse-grained white wood with veining. A hard wood, but notable for its flexibility.

### Walnut

Comes in grey to brown and has a fine grain. Its texture is veined and glistening, with a dense and hard surface, that is easy to work.

### CARE INSTRUCTIONS

For cleaning, we recommend using a damp cloth, with a diluted mild soap if

necessary. We do not recommend furniture polish as this may damage the surface. Avoid contact with hot objects by using table mats. Avoid any impacts where possible, as damage of this nature will result in cracks to the lacquer. Prevention is the best protection from surface scratches

Colours and textures represented may vary, and are subjected to chromatic changes due to printing, and to the fact that every screen has different displays and colour settings.

HMD

## Lacquered MDF

**Lacquered MDF Gloss**  
choose any other color from RAL chart

**Lacquered MDF Matte**  
choose any other color from RAL chart

Our lacquered is made with MDF (medium density fibreboard). We offer a wide range of colours for this material, which you can pick out from our RAL Colour Catalogue. The lacquered comes in two finishes: matte or gloss. The matte is finished with a 20% varnish, while the gloss version is finished with a high-shine 80% varnish.

### CARE INSTRUCTIONS

Wipe daily with a damp cloth and dry it off with a soft cloth. While a lacquered surface is sealed so that it is difficult for any dirt or liquids to penetrate the wood, it takes ap-

proximately four weeks for the lacquer to harden, so be very careful during the first month after the arrival of your furniture. Lacquered surfaces can be quite delicate, and scratches cannot be removed. To do a thorough clean, wipe off any dust and dirt, then use a solution of water and a mild detergent (1 tsp of detergent for 1,5 litres of water) with a soft cloth to clean any stains.

Be aware that lacquer is very vulnerable to heat, alcohol and moisture, which can leave visible marks.

## Microcement

**Arena**  
microcement

**Warm Grey**  
microcement

**Negro**  
microcement

Microcement was originally applied to walls, flooring, bathrooms, countertops and façades. An example of chemical and technological evolution, microcement is made by using the traditional method of producing cement and mixing it with other products to thin the cement out, making it extremely durable but also flexible. The result is an aesthetically pleasing and waterproof coating, with minimal thickness (between 2 and 4 mm) and great adherence.

### CARE INSTRUCTIONS

Because of its lack of porosity and joints, this material is very easy to maintain and simple to clean. Always use pH neutral detergents and avoid abrasive or corrosive products. Be aware of stains, as they may change the microcement's colour and must be removed immediately. Oils, blood, sauces, wine, coffee and iodine stains should be cleaned with a cloth dampened with water and a neutral detergent.

## Terrazzo

**Green**  
terrazzo

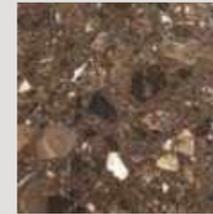

**Nightfall**  
terrazzo

**Africa**  
terrazzo

**Domino**  
terrazzo

**Imperador**  
terrazzo

**White**  
terrazzo

RMC stands for a fine and rare quality civilized marble and beyond. It takes the best from nature and adds on non-porosity hardness and higher chemical resistance. RMC is a unique building material that listens to your heartbeat and adjusts accordingly. Our Terrazzo pieces have a polished finish.

### CARE INSTRUCTIONS

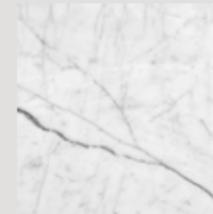

Wipe clean with a soft cloth and warm water, or any non-abrasive general household cleaner.

**Colours and textures represented may vary, and are subjected to chromatic changes due to printing, and to the fact that every screen has different displays and colour settings.**

## Marble / Natural stone

**calacata oro**  
marble

**white carrara**  
marble

Marble is a natural stone, so each cut has different individual colour and pattern variations. While marble surfaces are resistant to heat, they are also more porous than some stones, and absorb stains easily, so they require delicate care. We advise you to treat marble tops with a marble polish to seal it before use and repeat the treatment two to three weeks after the first use. Afterwards, this treatment should be done four to six times a year, depending on wear and tear.

### CARE INSTRUCTIONS

Due to the delicate characteristics of marble, avoid contact between the stone and acid solutions, such as abrasive cleaning products, vinegar or lemon juice. To avoid staining and discolouration protect the marble with the appropriate treatment and care that a natural stone should have. The best method to clean marble is with lukewarm water and a non-abrasive sponge or cloth but be aware that this will not remove any

stains or marks that had time to seep into the surface.

HMD

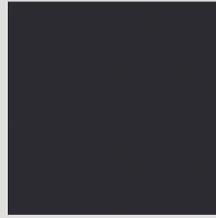

## Ceramic

**Calacatta**  
*ceramic*

**White Carrara**  
*ceramic*

**Nero**  
*ceramic*

Ceramics are an alternative to marble as they are more resistant and require less maintenance. We use this material mainly on tabletops. We offer a selection of samples from the brand NEO-LITH©.

### **CARE INSTRUCTIONS**

Ceramic doesn't absorb food stains and other residues, which makes it very easy to clean. It is also resistant to most chemical agents in cleaning products, so they can be used on these surfaces. However, a damp cloth is usually enough to properly clean it.

## Glass

**Lacquered glass**  
*choose any other color from RAL chart*

For our pieces containing glass we offer the option of clear or lacquered glass. For lacquered glass, we apply a layer of paint to the bottom of the glass, for which the colour can be chosen from our RAI Standard Catalogue.

### **CARE INSTRUCTIONS**

We recommend cleaning glass surfaces daily, with a soft dry cloth.

**Colours and textures represented may vary, and are subjected to chromatic changes due to printing, and to the fact that every screen has different displays and colour settings.**

**HMD**

## Iron

**Epoxy iron**  
choose any color from  
RAL chart

*Black Epoxy iron*  
**micro-textured**

**Gun color**  
**lacquered metal**

## Stainless Steel

*Stainless Steel*  
**Brushed**

*Stainless Steel*  
**Old Gold**

*Stainless Steel*  
**Gold Matte**

*Stainless Steel*  
**Polished**

Stainless steel (304) is highly resistant to oxidation, very durable, and it does not peel. For this material we offer two different finishes: brushed and polished. Polished stainless steel comes in its natural colour. The brushed option comes in two different colours, Gold and Old Gold (a brownish colour). We do not use varnishes or epoxy paints on stainless steel, guaranteeing the material's natural beauty.

### CARE INSTRUCTIONS

Wipe clean with a soft cloth, ideally in leather, fleece, or microfiber. You can use

cleaning agents such as detergent, stainless steel cleaner or polish, a water and vinegar (or lemon juice) solution, chloride free all-purpose cleaners or organic solvents. Always wipe in a brushing motion. For pattern rolled surfaces use a soft nylon brush.

## Brass

*Brass*  
**Brushed**

*Brass*  
**Dark Oxidized**

*Brass*  
**Light Oxidised**

*Brass*  
**Polished**

We use brass in many elements of our products, such as table and chair legs, tabletops, and for furniture structures, which are coated with a fine layer of resin. You can choose between polished and brushed brass. For the brushed brass option, we have developed two coatings: traditional oxidised and near-black oxidised, or bronze, as it is usually known.

### CARE INSTRUCTIONS

Depending on the piece, we apply wax or

matte varnish to prevent any oxidation. However, varnishes do not last forever and for that reason we recommend that you regularly polish brass surfaces to stop them from tarnishing or turning dark. Brass metal polish keeps the metal shiny and cleans off the tarnish. Before polishing, wash the object with warm, soapy water, then rinse and let it fully dry. To polish, use a soft sponge or cloth.

**Colours and textures represented may vary, and are subjected to chromatic changes due to printing, and to the fact that every screen has different displays and colour settings.**

## Brass Mesh

**Brass Mesh**

The metallic brass mesh is used in pieces such as our room dividers/screens/partitions. As it is a fine material, it can become oxidised with time. As such, we recommend applying a brass protective polish three to six times a year, to assure it keeps the colour and beauty of the mesh.

### CARE INSTRUCTIONS

Carefully vacuum the mesh at a distance, and then wipe with a clean, slightly damp cloth. Let it fully dry in a well ventilated room.

## Resin

**resin**  
brushed brass + brushed resin

*Stainless Steel*  
**Resin Old Gold**

*Stainless Steel*  
**Resin Gold Mate**

*Stainless Steel*  
**Resin Brushed Natural**

Epoxy resin is a type of plastic that, when in contact with a catalysing agent, hardens very quickly, turning into a solid surface. Epoxy resin stands out for its durability, as it makes surfaces long-lasting and more resistant. Because this is a waterproof coating; epoxy resin can be applied to many products. However, we do not recommend this for products kept outdoors,

as the change in temperatures and exposure to UV rays can compromise the quality and durability of the resin.

### CARE INSTRUCTIONS

Epoxy resin is very easy to clean, and it does not require a lot of maintenance. Wipe clean with a damp cloth and a pH neutral soap, or with a soft bristle brush. If

the resin tabletop gets scratched, you can lightly sand it down using a very fine grain sandpaper and wipe it again afterwards.

## Gold Leaf

**Gold Leaf**

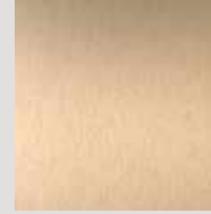

Gold leaf is usually applied to an MDF surface, as this provides a stable base that ensures the best performance of the natural gold leaf material. However, gold leaf is still a delicate material, especially after varnished. Avoid setting down objects containing liquids or anything scratchy on a gold leaf surface.

The process of applying gold leaf is an artisanal one, so each piece is unique.

### CARE INSTRUCTIONS

Wipe clean with a damp cloth.

## Zinc

**Gold Colored Zinc**

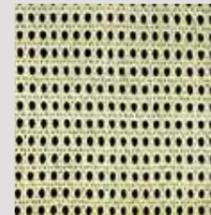

elZinc Rainbow® is a kind of rolled titanium zinc that complies with the European Standard EN988 and the American ASTM B-69. To achieve this finish, the zinc is pre-treated and finished with the addition of mineral pigments. Natural elZinc is already a very durable material, but by applying a 35µm organic

coating over the mineral pigments, we ensure extra protection against corrosion.

### CARE INSTRUCTIONS

Clean with lukewarm water and pat dry with a delicate cloth to avoid scratching.

## Rattan

**Rattan**  
Natural color

Rattan is a natural material derived from a climbing vine, that is harvested in canes and woven by hand to make wicker furniture in various patterns. Because of its flexibility and lightness, rattan is a very versatile material, that can be coloured by using special painting processes.

### CARE INSTRUCTIONS

Carefully vacuum rattan at a distance, and then wipe with a clean, slightly damp cloth. Let it fully dry in a well ventilated room.
