THE SKY'S THE LIMIT

Movisi is a Germany based company which specialises in manufacturing modular furniture, shelving, seating and partition systems.

The company supplies cutting-edge designs for workspaces, trade fairs, events and other environments where flexible or temporary solutions are needed.

Assembly requires no tools or special expertise, and can be carried out by just one person in a matter of minutes. Being lightweight and easy to handle Movisi furniture cuts down on transport and construction costs.

Movisi works with some of today's hottest designers to create furniture that reflects your individuality.

The collection brims with products that permit the user to 'design' their own compositions.

The light bright practicality of Movisi furniture is bound to energise you, and those around you.

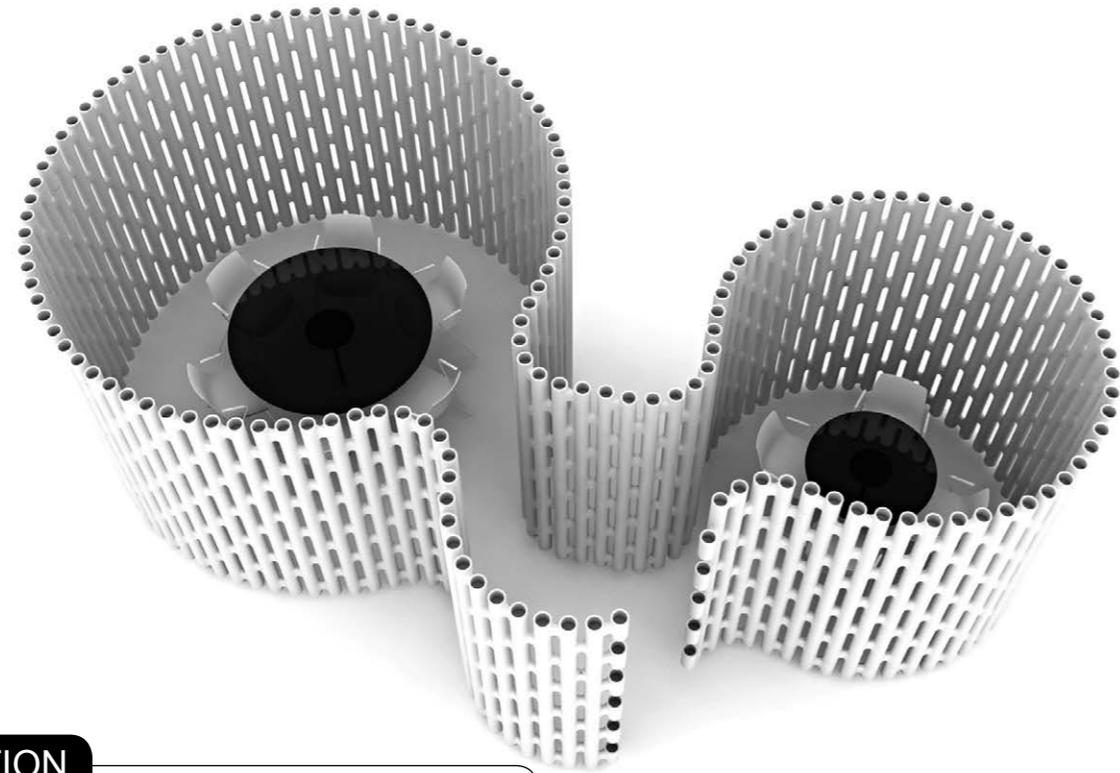

ONLY THE BEST

QUALITY & ENVIRONMENT FIRST

There is no substitute for quality. This is why we only use carefully selected materials that fit with our philosophy, which is to provide you with creative freedom and flexibility.

Movisi wants to secure good quality as well as take on social responsibility. This is why our products are manufactured in Germany and adhere to strict ecological and socially-responsible production methods.

All our furniture which is made from ARPRO® (Expanded Polypropylene), a lightweight high performance plastic foam, is 100% recyclable, toxic free, emission free, allergy friendly, energy absorbing, easy to clean and extremely lightweight (95% air) and therefore very easy to handle.

LINK PARTITION

LINK is a freestanding modular partitioning system that features units that link together to create free-standing partitions and room dividers for different interior settings.

Quick to construct and quick to change; unique and diverse in its capabilities to modify its design as many times as the end user chooses. Assembly requires no tools or special expertise and can be done by just one person.

A LINK wall can also be accentuated by the use of coloured lighting or projections.

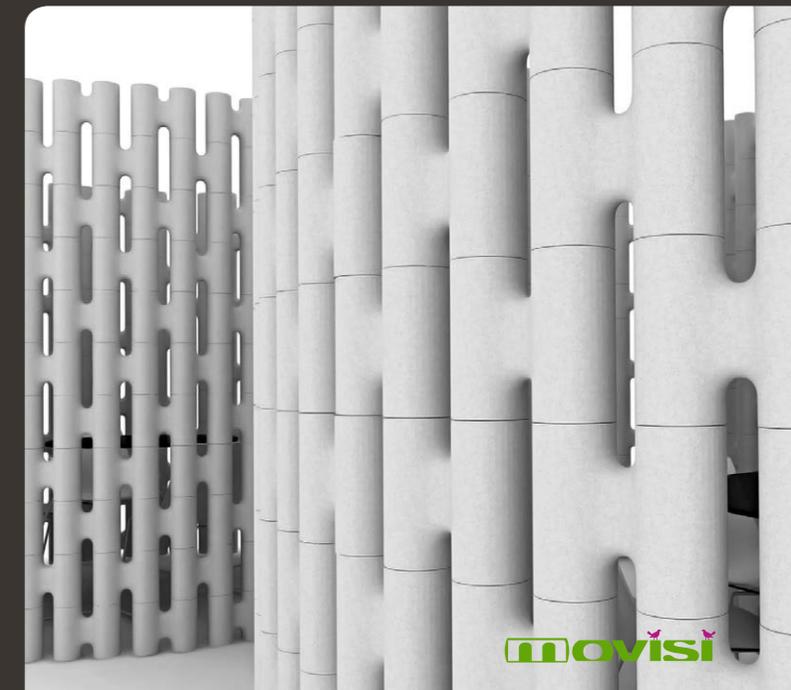

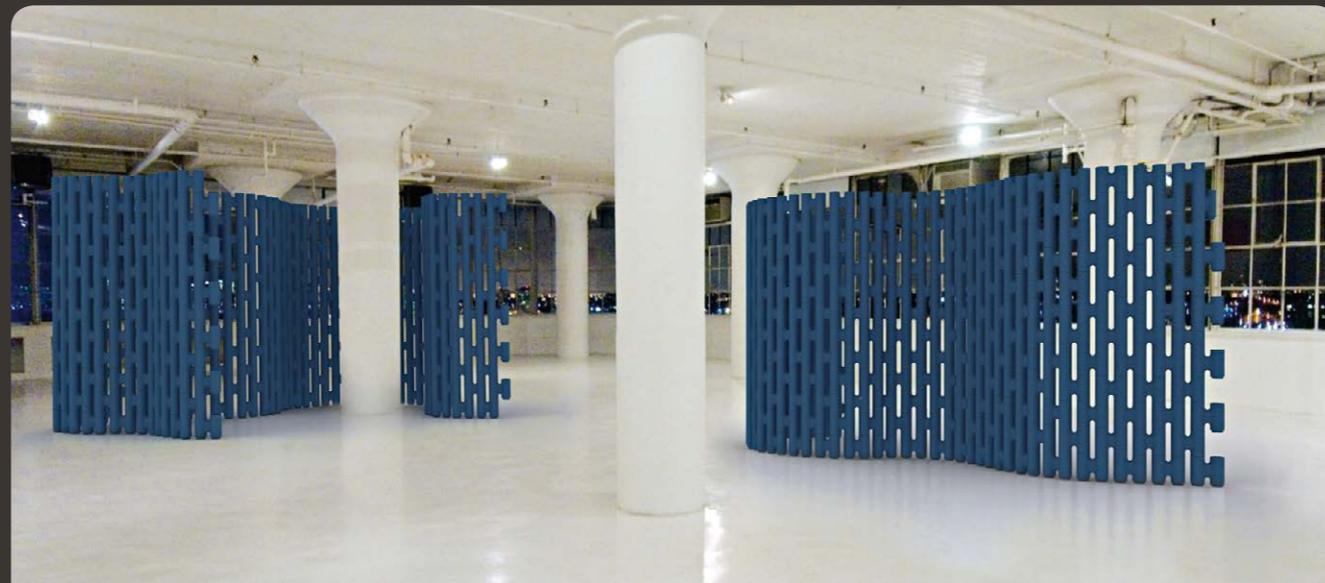

A flexible and durable system, LINK works in the following environments:

- **Office:** reception, break out, informal meeting areas.
- **Exhibitions and events:** booths, shrouding walkways, creating temporary press or cafe areas.
- **Retail:** shop displays, wall cladding, back drops.

Design: PearsonLloyd

LINK PARTITION

SIZE, WEIGHT AND MATERIAL

15 pieces of LINK are required to build a 1m x 1m wall.

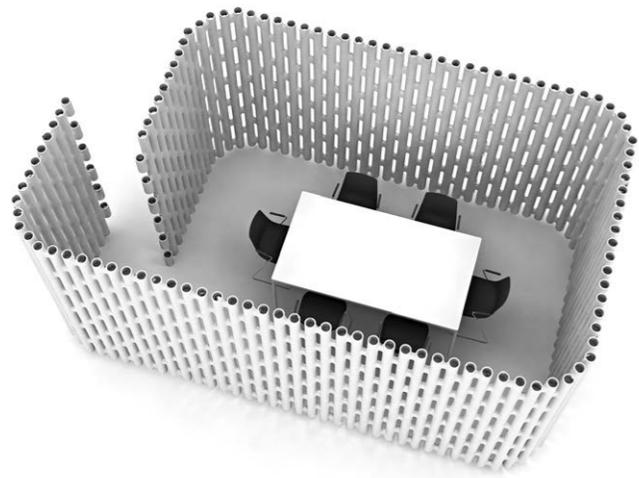

Size of 1 LINK module:

W 288 mm x H 216 mm x D 120 mm
(H 200 mm when linked)

Weight: 200 g /per piece

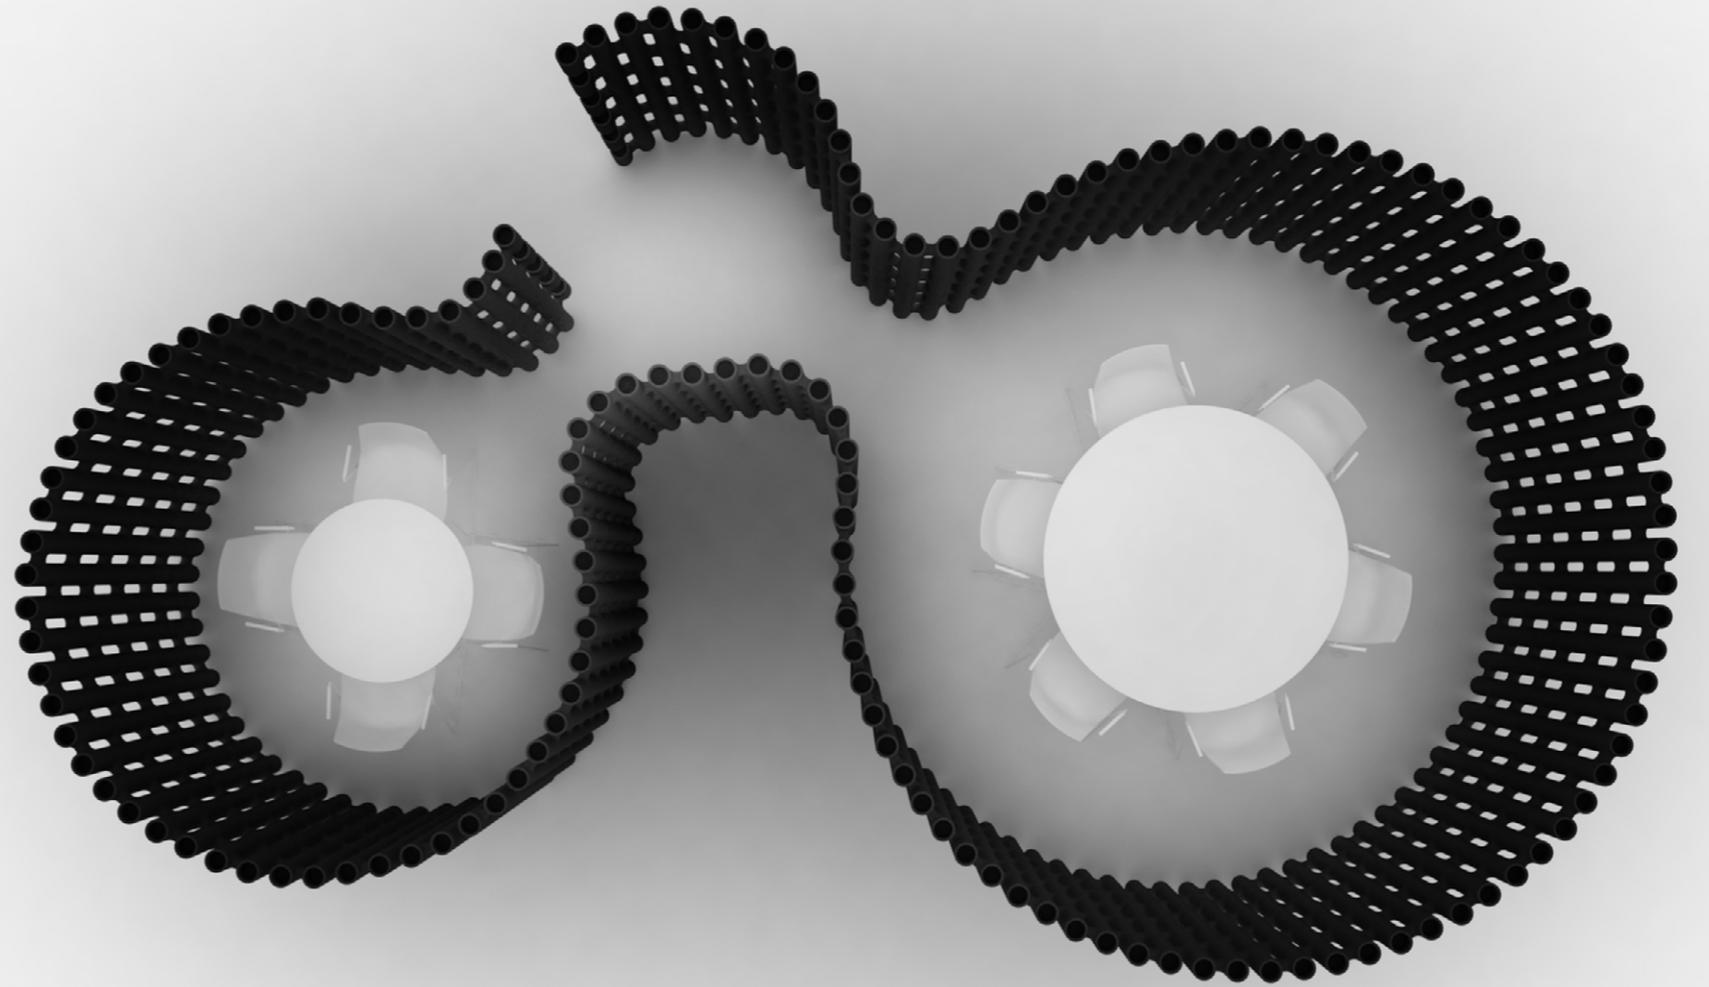

Material: ARPRO® EPP (toxic free, 100% recyclable)

See page 5 for more details.

BUILD MODULAR SHELVING

BUILD is a lightweight modular shelving system based on a single geometric unit. The versatile blocks can be stacked up to suit a wide range of functions – from shelves to partitions. Freestanding or mounted on the wall, BUILD adapts to your needs. The individual blocks can also double as boxes or stools.

BUILD is made from a single material (Expanded Polypropylene) which is non-toxic, allergy friendly, and 100% recyclable. BUILD is installed in minutes – no instructions or tools are needed. You can extend and reconfigure the system over time, as your requirements change.

Modular and multifunctional

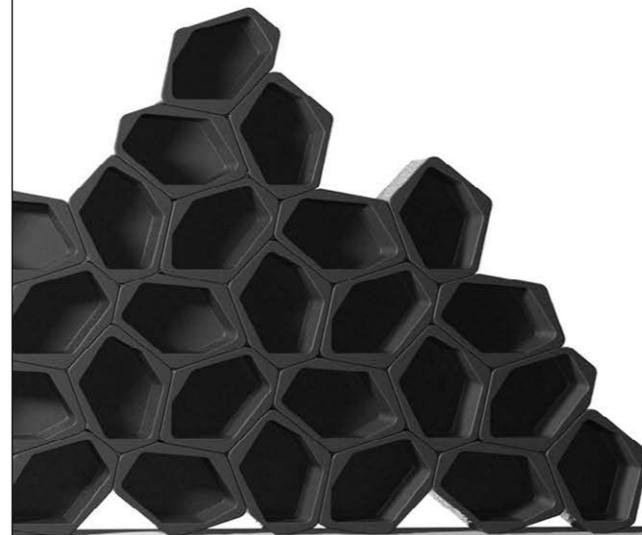

A flexible and durable system, BUILD works in the following environments:

Retail: shelving, product displays, wall cladding.

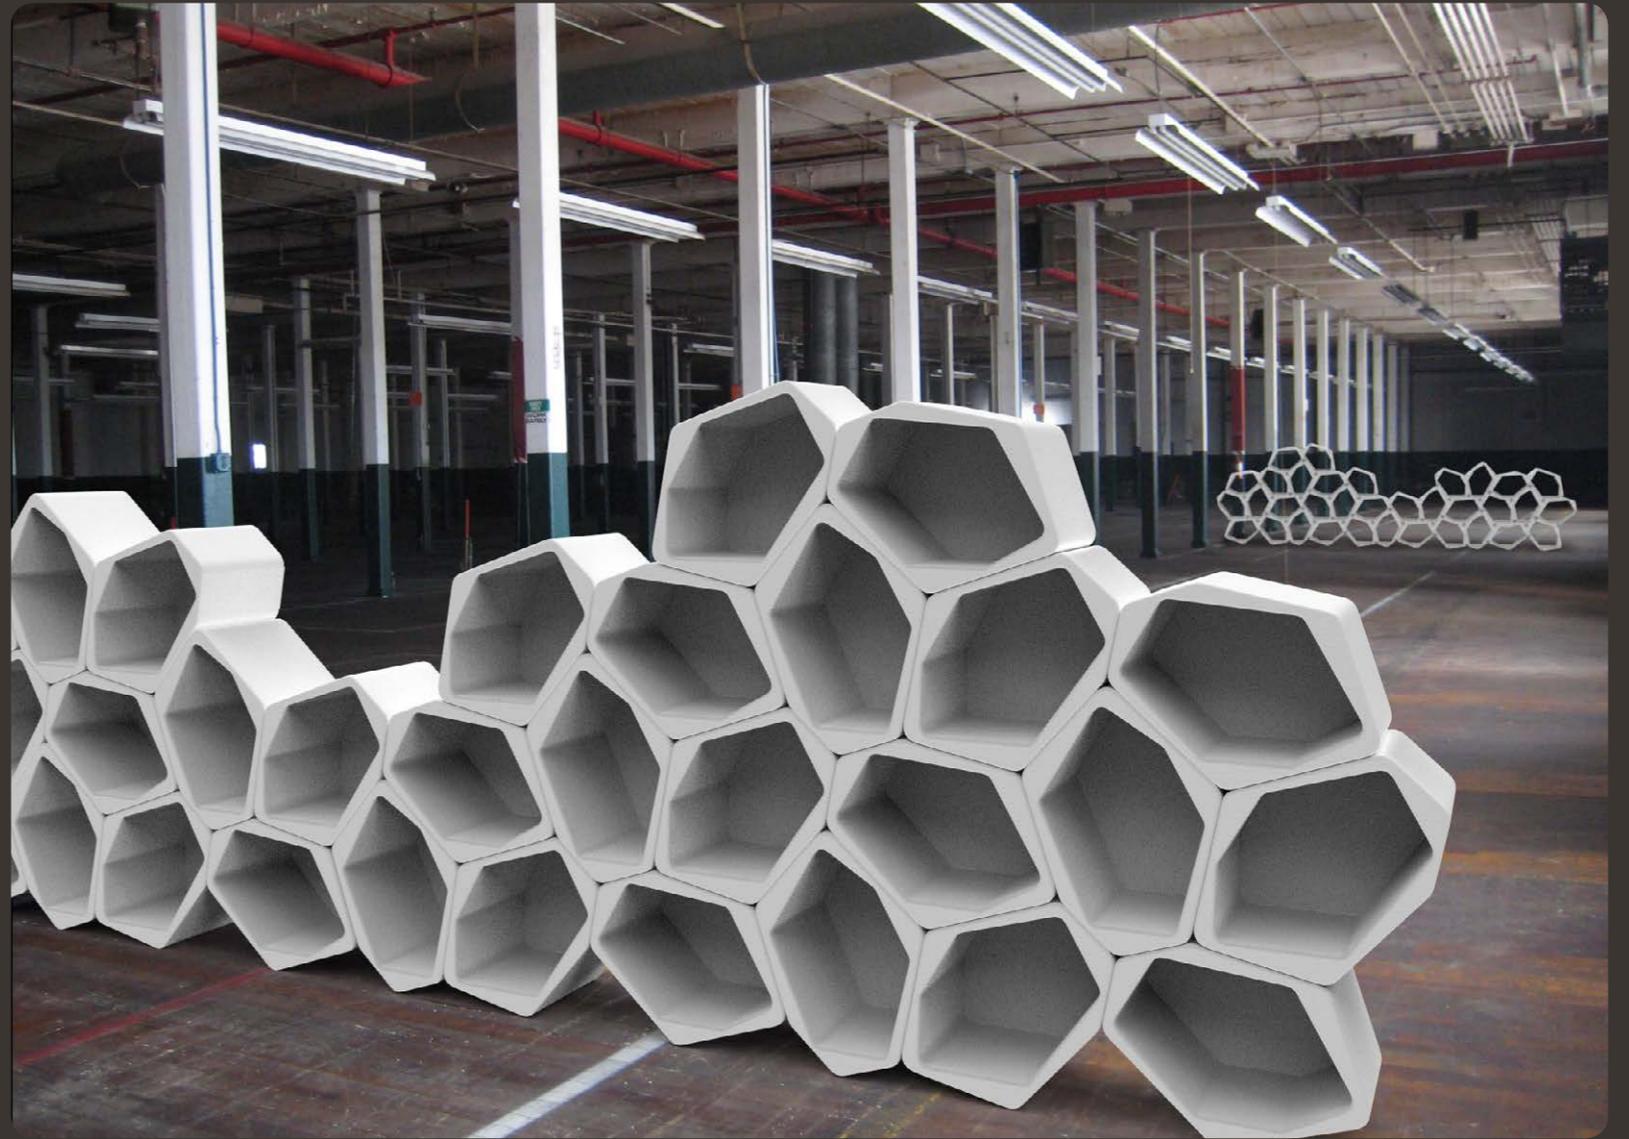

Office: shelving and partitioning, reception area, frequent workplace re-designs and co-working spaces.

Exhibitions and fairs: booths, product displays, storage, temporary seating.

Special: ideal for pop-up stores and whatever else your creative mind can think up.

BUILD MODULAR SHELVING

BUILD MODULAR SHELVING

You can arrange the units to keep all shelves horizontal.

SIZE, WEIGHT AND MATERIAL

Available in 2 versions:

with back (closed) / without back (open)

Size of 1 BUILD element:

External dimension in mm:

520 mm x 385 mm x D 290 mm*

*(D 303 mm when closed version)

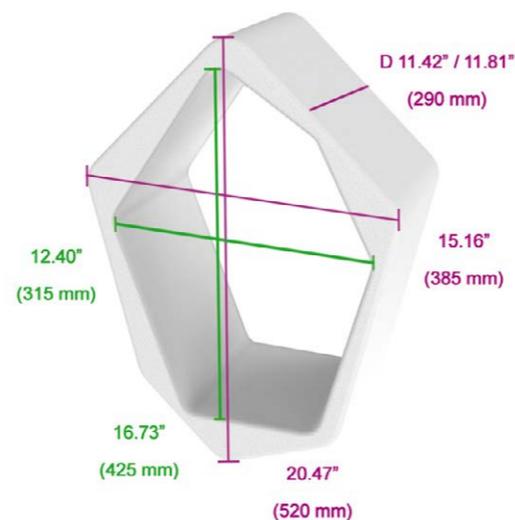

Internal dimension: 425 mm x 315 mm x D 290 mm

Weight: 700-750 g /per element

Material: ARPRO® EPP (toxic free, 100% recyclable)

BUILD comes with a silky smooth texture.

See page 5 for more details.

Mount BUILD on the wall by using the supplied clips (screwed into wall)

BUILD MODULAR SHELVING

Illumination available in various colours and designs. Individual light concepts and effects available on request.

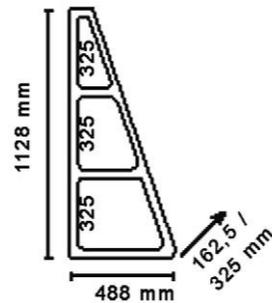

MAKE/SHIFT SHELVING

MAKE/SHIFT

MAKE/SHIFT is a self adjusting shelving system that expands and contracts to fill different size gaps. The corrugated edges fix the units at the right size.

You do not have to worry about exact dimensions, as MAKE/SHIFT can always adjust to fit. The shelving units can also be used as a free standing system by using the included clips.

Size: see drawing.

Weight: ~ 2 kg /per unit

Material: ARPRO® EPP
(toxic free, 100% recyclable)

See page 5 for more details.

Q-COUCH

This modular sofa system has some very special qualities. The first thing that stands out is its organic and light-hearted appearance. In order not to limit your creativity this couch can be „Q-ued“ in all lengths, and colours in any way you want.

Design: Frederik Van Heereveld

Q-COUCH

SIZE AND WEIGHT

Size of 1 Q-COUCH module:

L 980 mm x H 800 mm x W 120 mm
(W 180 mm when not connected)

Weight: approx. 1.5 kg /per piece

Material: ARPRO® EPP
(toxic free, 100% recyclable)

See page 5 for more details.

MOIRÉ CHAIR

The double layered shell of the MOIRÉ chair with its unusual transparency plays with light and shadow, giving a subtle edge to its plasticity. The concept behind the design was to create a form pure in structure whilst retaining an excellent quality. The complex forms and geometry of the MOIRÉ chair were only attainable through the use of advanced digital technology, including rapid prototyping.

For the first time in history a double layered grid has been produced as a one-part injection moulded piece without the need for fiberglass reinforcements. The lightweight structure (from 3.1 kg) is therefore characterised by its small mass relative to the applied load.

100 % recyclable.

Design: Ton Haas

CORAL CHAIR

Designer Ton Haas took inspiration from the intricate beauty of coral reefs to create this lightweight chair. The ergonomically designed seat and backrest together with its lumbar support ensure comfort even when sitting for lengthy periods of time. The CORAL chair is a one piece injection moulded chair made from fiberglass reinforced Nylon. This makes it lightweight (3.9 kg), durable, flame-retardant and UV resistant.

CORAL is suited for indoor and outdoor use. The chair's smooth and open structure does not allow water or dirt to adhere to it, resulting in a clean and dry surface on which to sit.

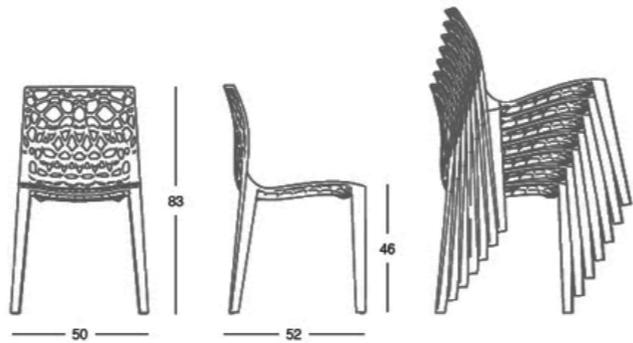

The CORAL chair works in the following environments:

hotels, events, restaurants, pubs, bars, garden areas, terraces, coffee shops, lidos, swimming pools.

Design: Ton Haas

CORAL CHAIR

SIZE, WEIGHT AND MATERIAL

Suitable for indoor and outdoor use.
Stackable: up to 20 chairs
Size: W 480 mm x H 825 mm x D 520 mm (Seat H 460 mm)
Weight: ~ 4 kg
Material:
 Polyamid (Nylon 6), reinforced with glass fibre
 (100% recyclable)

SKYROOM MOSKITO

Banish mosquitoes and create an elegant space in seconds.

Skyroom Moskito is a 'room in room' insect proof system and the perfect solution for undisturbed bug proof sleeping, eating, working or relaxing. Developed in collaboration with the illusionist Nils Bennett, the Skyroom Moskito clips to the ceiling and unfolds with an origami like rotation to create a 3D temporary space. When not in use, it folds away to create a baldachin under which one can rest and relax.

The playful ease that lies behind this lightweight room-in-room system is not only functional, but is also a real eye catcher.

Elegant, easy and fun to handle, the system can also be used in residential and commercial interiors such as hotels to define and separate a space – such as the bed in an open plan loft.

The SKYROOM MOSKITO works in the following environments:

- Private homes: bedrooms, temporary office, living rooms, lofts and open space studios, covered terraces and pergolas
- Contract: hotels, lodges and wellness resorts, restaurants
- Hotels and beach houses: bedrooms, lounge areas, covered terraces, restaurants, Spa areas, resorts
- Offices: temporary meeting rooms, shared office spaces for temporary privacy
- Events and exhibitions: catering, rest and retreat areas, use as projection screen, veiling / revelation for show effective presentations

100% made in Germany.

SKYROOM MOSKITO

Design: Nils Bennett

SKYROOM MOSKITO

SIZE, WEIGHT AND MATERIAL

Dimensions: L 220 cm x W 220 cm x H 220 cm

Dimensions of metal frame: L 250 cm x W 250 cm x H 2 cm

Weight: approx. 12 kg

Technical information:

Mounting: 4 point suspension from ceiling

Minimum ceiling height needed to mount the SKYROOM: 240 cm

Innovative, easy motion, hand-operated pull rope system

Packaging dimensions: 120 x 60 x 20 cm

Material:

Powder coated metal frame (indoor use)

Stainless steel frame: silver (outdoor use)

TEARS OFF WALLPAPER

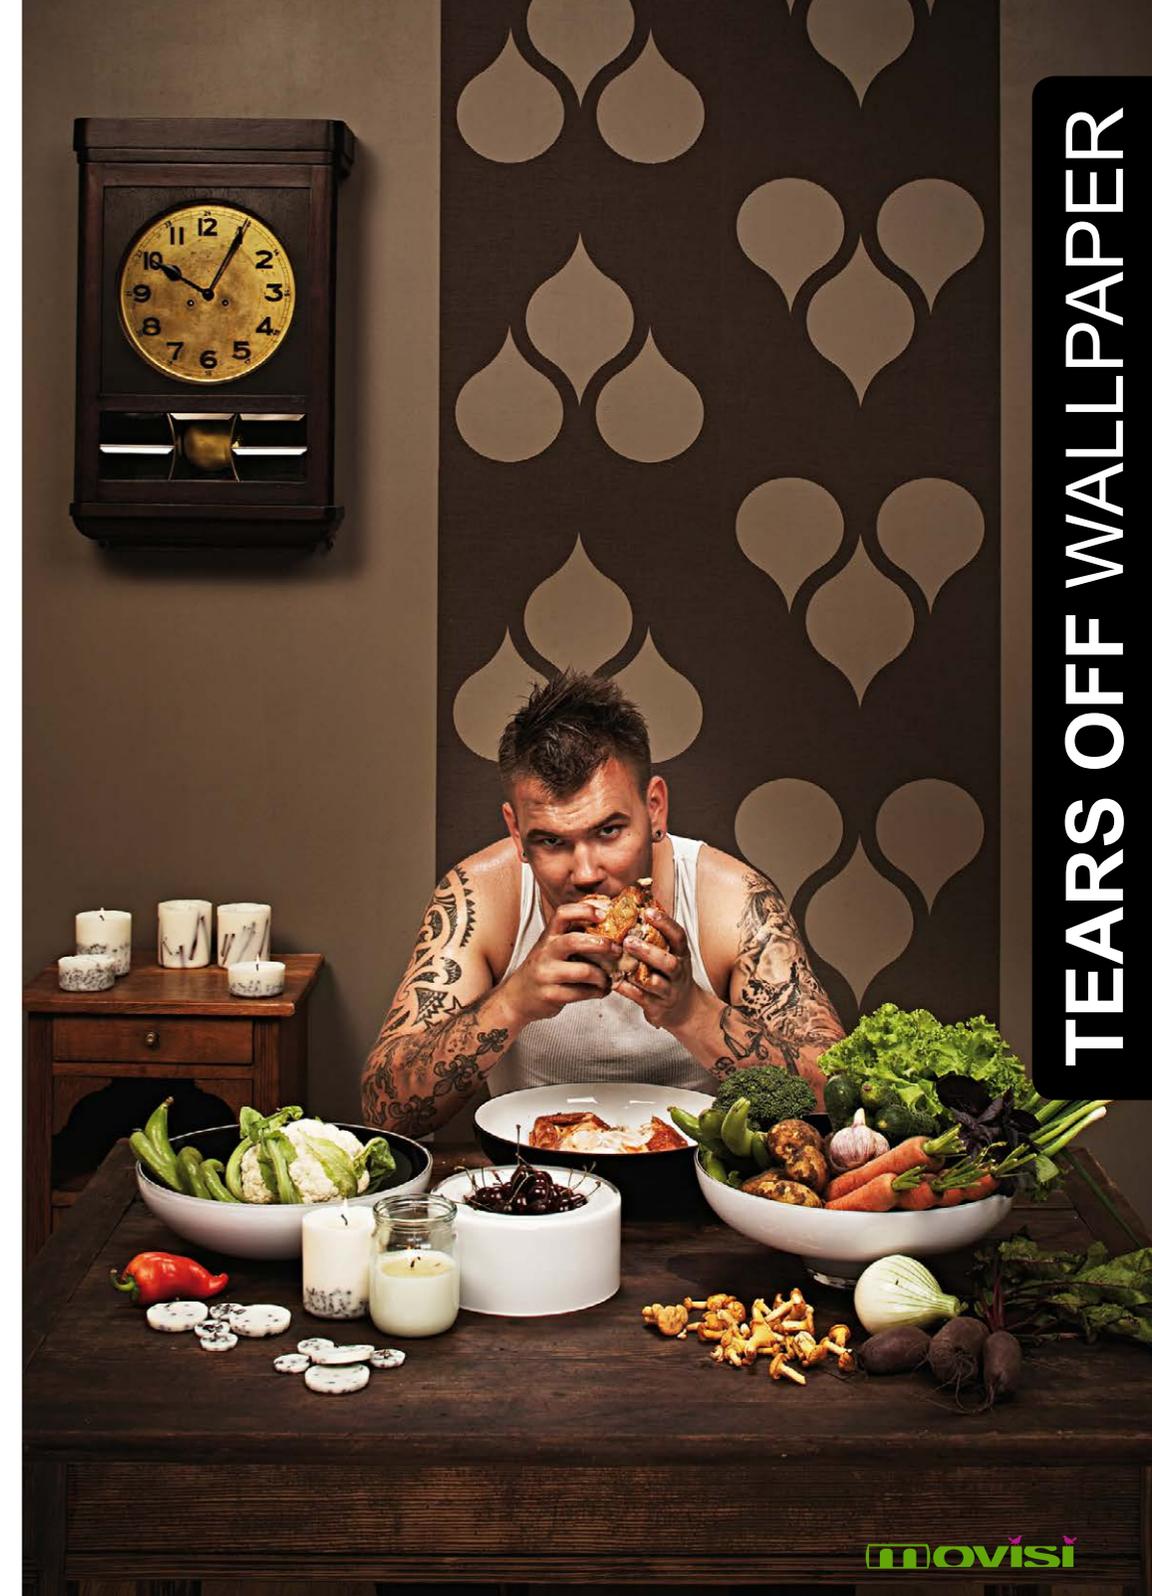

TEARS OFF is a modular wallpaper. The innovative wallpaper is created with a specially designed perforation. By tearing off pieces of the wallpaper, you can create your own unique space. The colour and texture underneath the wallpaper will become a significant element within the design. Tearing off pieces of the wallpaper is an easy and creative process.

SIZE AND MATERIALS

Dimensions of 1 sheet: H 1000 mm x W 465 mm
Material: Vinyl coating on a non woven backing
Flammability: European Class : B-s2 -d0EN 13501-1
Lightfastness: ≥ 7 international wooscale / BS1006; ISO 105-B02; DIN 54004

Awards

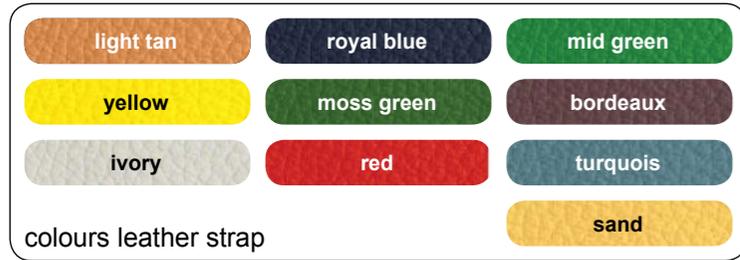

Best New Product, I.D. Magazine
 Certificate of Excellence in Materials, Material ConneXion
 Best Product, Heimtextil Frankfurt

TEARS OFF WALLPAPER

TEARS OFF WALLPAPER

LOOP MIRROR

A circular mirror suspended by a leather strap hung from a fixed wall peg. The peg is easily fixed to any type of wall, whilst the leather strap fits snugly and securely around the mirror frame. Simple lines, contrasting leather colours with natural oiled wood. Combine either walnut or ash wooden frames with accent leather colours.

Small: Ø 26 cm

Medium: Ø 46 cm

Large: Ø 66 cm

LOOP MIRROR

FIOCCO LAMP

FIOCCO LAMP

FIOCCO is a self-assembly modular lighting system, made up of interlocking modules.

FIOCCO offers a 3 layer sandwich system which gives this lamp a shiny and elegant appearance.

In addition, the use of PP in a 3 layer system makes the lampshade dust repellent and easy to clean.

FIOCCO becomes a decorative highlight in any room.

All you need is an energy saving lightbulb (max. 15W /220V) .

Available as table lamp, floor lamp or pendant light.

Material: lamp shade is made from PP (Polypropylene), 100% recyclable.

Sizes:

Table lamp: Ø 23 cm, Ø 35 cm

Floor lamp: Ø 50 cm, Ø 100 cm

Pendant light: Ø 50 cm, Ø 100 cm

Design: Ronen Kadushin

ECLIPSE LIGHT

ECLIPSE is the simple way to make your space a little brighter. Cut by a laser from a single sheet of steel, this lamp is then bent into shape by hand. The steel reflects the light, and bending it to different degrees can create different effects.

The sheet steel creates an interesting frame, making a feature of the light bulb itself, instead of hiding it. All you need is a nice looking light-bulb (25W/220V).

Design: Ronen Kadushin

Material: 1.5mm stainless steel

Size: L 290 mm x W 220 mm x H 590 mm

ECLIPSE LIGHT

FLAT KNOT BOWL

FLAT KNOT is a fruit bowl made from a flat sheet of steel which is then warped and knotted into itself.

Not only is it a practical way to hold fruit, but the FLAT KNOT BOWL is a feature in it's own right, as the unique shape and the warped reflections on it's surface make it an ideal centre piece when empty also.

Its reflective surface means that it fits into any room, by echoing the colours of its surroundings, and also, reflecting the colours of whatever is placed within it.

Design: Ronen Kadushin

Material: 1.0 mm stainless steel

Size: available in 3 different sizes:

Small L 360 mm x W 170 mm x H 140 mm

Medium L 460 mm x W 210 mm x H 180 mm

Large L 620 mm x W 300 mm x H 230 mm

Design: Ronen Kadushin
