## Our furniture in virtual reality

We look to the future and care about the comfort of our customers, so the furniture items from this catalog are also supported in virtual and augmented reality formats.

In virtual reality, there are both showrooms by style, and entire apartments with an area of up to 250 square meters, filled with our furniture.

You can view the item from different angles, open the doors and drawers, turn on the lights – all as in a real inspection of the item.

Augmented reality is available both with the help of virtual reality glasses and mobile devices (pads, smartphones), so you can try on an item to the existing environment, evaluate its style, color and dimensions.
