

Made in Italy

ENGI lighting vent'anni di passione per la luce

1997 Nasce ENGI

ENGI viene fondata nel 1997. Si distingue ben presto tra le aziende del settore nella fornitura di apparecchi di illuminazione esterna ed interna, industriale e civile, diventando distributore esclusivo per l'Italia di prestigiose aziende internazionali.

2000 La produzione a led

Nel 2000 inizia la produzione in Italia con l'utilizzo della nuova tecnologia a led, con apparecchi che si distinguono per funzionalità, eleganza, qualità e tecnologia.

Tutti i prodotti sono Made in Italy e realizzati con un team di designers, progettisti e ricercatori.

2017 Vent'anni di passione per la luce

In occasione del 20° compleanno di ENGI viene ampliata la gamma iniziando una collaborazione con maestri artigiani veneti. Si intraprende così la produzione fatta a mano di apparecchi realizzati con l'utilizzo di materiali come vetro, ceramica, legno e metalli e integrati con la più avanzata tecnologia a led.

2019 ENGI è impegnata nello sviluppo totale del prodotto. Gli apparecchi di illuminazione utilizzano sempre più tecnologie IoT e di interconnessione in rete e possono essere gestiti e abilitati da device portatili per il comando e la regolazione o integrati con sensori per il monitoraggio ambientale.

ENGI lighting 20 years of passion for lighting

1997

ENGI was founded in 1997 and became a leading Company in lighting for interior and exterior, for private and public use. ENGI is currently distributor of several international lighting Companies.

2000

In 2000 ENGI started to manufacture in Italy its luminaires with led technology. Our products are characterized from the beginning for elegance, quality, technology and functionality. All products are Made in Italy and they are realized in collaboration with designer, lighting projects and researchers.

2017 20 years of passion for lighting

Our products' range is enlarged with a collaboration with local artisan. ENGI starts in this way handmade manufacturing with materials as glass, ceramic, wood, metals and combined with led technology.

2019 The Company aims to maintain its position as a prime forerunner of technology within the industry: luminaires are more and more on web and use IoT technologies, controlled by remote devices or integrated with sensors for environmental monitoring.

CERTIFICATO DI AUTENTICITÀ

ENGI srl fornisce ai propri clienti prodotti tecnologicamente avanzati e al contempo unici, molti dei quali vengono garantiti, allegando alla consegna del prodotto un certificato numerato che attesta l'autenticità dell'oggetto.

CERTIFICATE OF AUTHENTICITY

ENGI SRL creates and supplies products that are technologically innovative unique. A certificate of authenticity is provided together with the product.

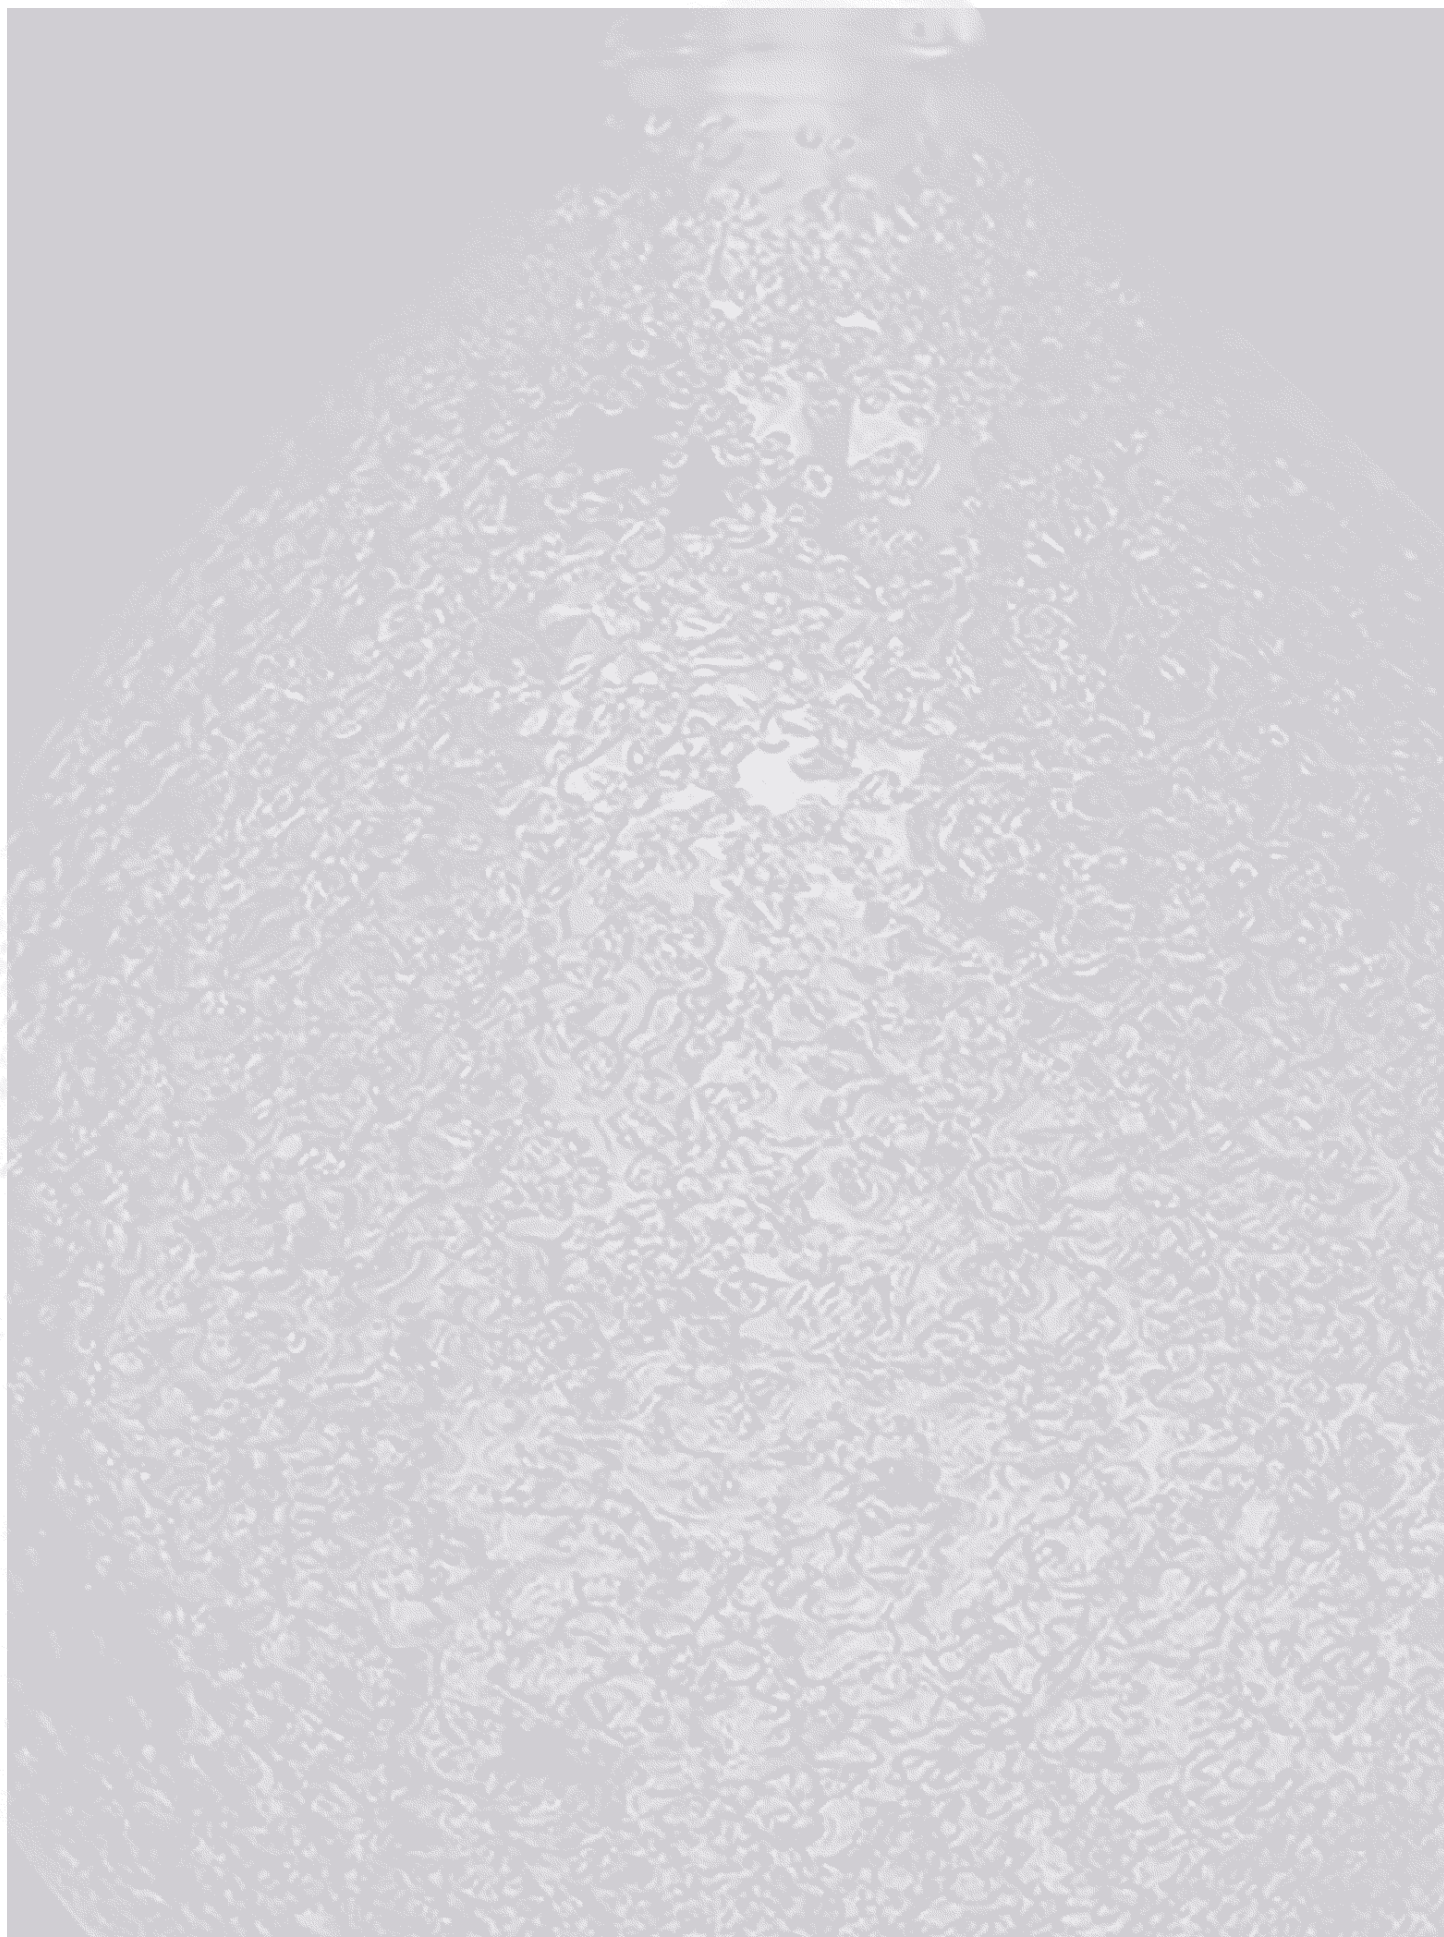

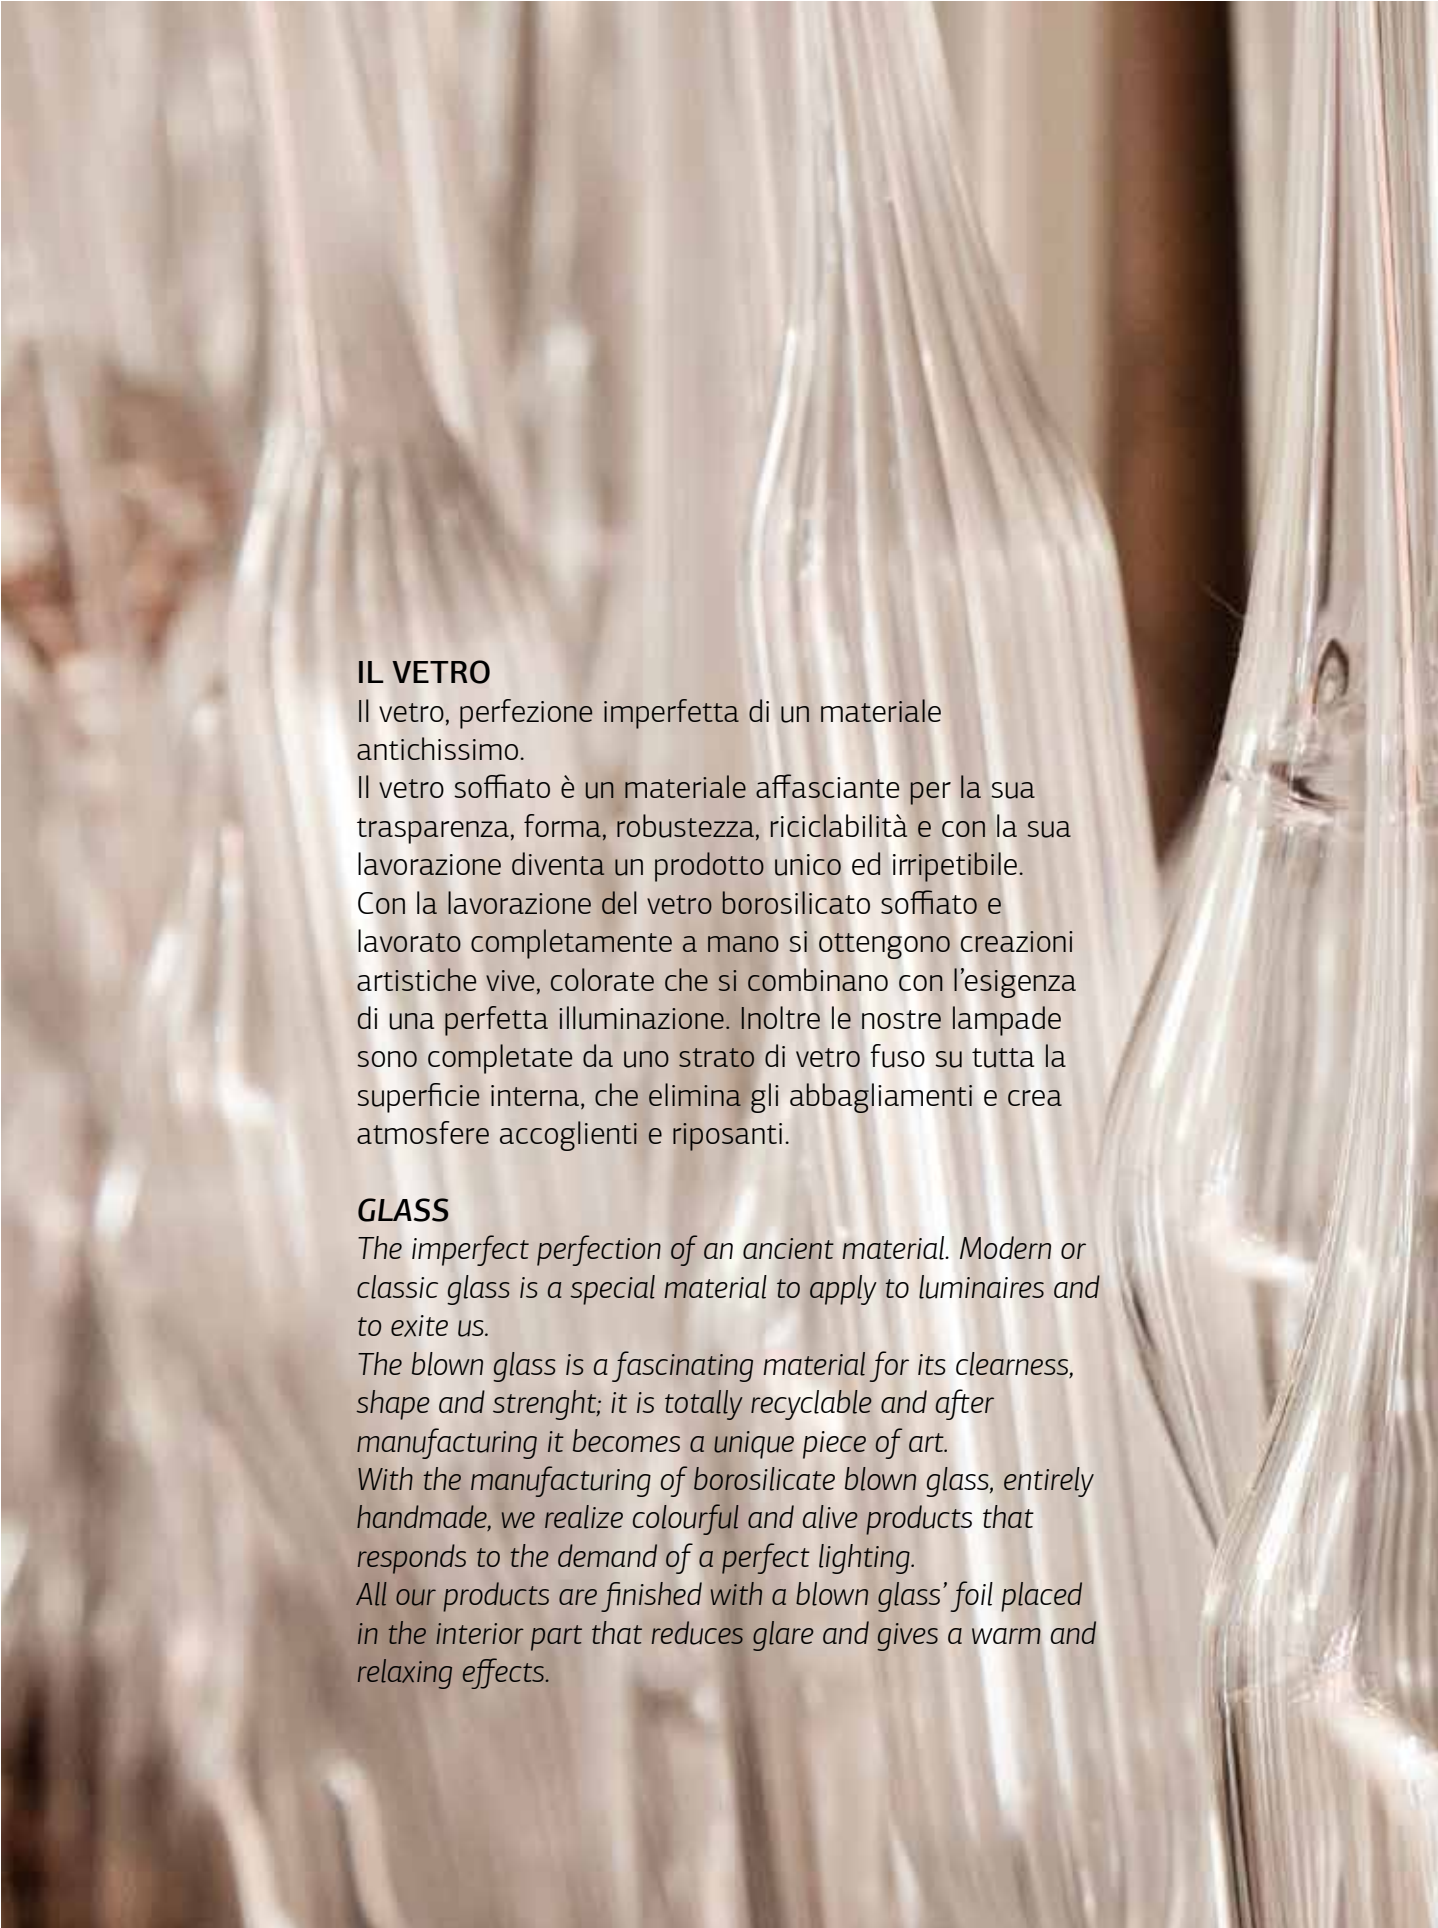

Nella terra del Palladio e di Canova
giovani maestri artigiani
perpetuano la tradizione millenaria
dell'arte e della creatività realizzando
a mano opere uniche
ricche di fascino e suggestione.

VETRO / GLASS

IL VETRO

Il vetro, perfezione imperfetta di un materiale antichissimo.

Il vetro soffiato è un materiale affascinante per la sua trasparenza, forma, robustezza, riciclabilità e con la sua lavorazione diventa un prodotto unico ed irripetibile.

Con la lavorazione del vetro borosilicato soffiato e lavorato completamente a mano si ottengono creazioni artistiche vive, colorate che si combinano con l'esigenza di una perfetta illuminazione. Inoltre le nostre lampade sono completate da uno strato di vetro fuso su tutta la superficie interna, che elimina gli abbagliamenti e crea atmosfere accoglienti e riposanti.

GLASS

The imperfect perfection of an ancient material. Modern or classic glass is a special material to apply to luminaires and to exite us.

The blown glass is a fascinating material for its clearness, shape and strenght; it is totally recyclable and after manufacturing it becomes a unique piece of art.

With the manufacturing of borosilicate blown glass, entirely handmade, we realize colourful and alive products that responds to the demand of a perfect lighting.

All our products are finished with a blown glass' foil placed in the interior part that reduces glare and gives a warm and relaxing effects.

A close-up photograph of several glass lamp components, likely stems or bases, arranged vertically. The glass is clear and reflective, showing highlights and shadows that emphasize its smooth, curved surfaces. The background is dark, making the glass elements stand out.

CERAMICA

CERAMIC

LA CERAMICA

Bassano e Nove sono territori famosi per la lavorazione della ceramica. I fattori che dal XVII secolo hanno favorito la nascita e lo sviluppo dell'arte della ceramica sono molteplici, tra questi la presenza nel sottosuolo di argilla plastica, saldame e caolino e la vicinanza al fiume Brenta. I nostri prodotti vogliono raccontare la nostra storia, quella della tradizione artigianale e del fatto a mano che si evolve con l'applicazione della nuova tecnologia a led.

CERAMIC

These pieces are unique, locally handmade taking in consideration the long history of ceramic in Bassano and Nove. There are several elements that have supported the origin and development of the ceramic art since the 17th century in our territory. Among them the availability of plastic clay and kaolin in the subsoil and the Brenta river. Our products tell about us and our history, a long tradition of competences that evolves in combination with the new led technologies.

Premio ARTE 2017

Giuseppe Facchinello l'artista che ha creato le lampade in ceramica per ENGI è stato recentemente premiato con la Targa d'oro risultando vincitore del Premio ARTE 2017 per la sezione scultura. Le sue opere sono state esposte nella prestigiosa sede milanese di Palazzo Reale.

"ARTE" PRIZE 2017

Giuseppe Facchinello creates with ENGI srl ceramic luminaires. He won the "PREMIO ARTE 2017" in Milan. His creations has been shown in Palazzo Reale, Milano.

Nasce il Novettino
ogni pezzo
unico e diverso

La passione, l'idea, l'abilità delle mani.

Questa serie di prodotti in ceramica si contraddistingue per oggetti con il profilo umano. Con questa scelta si vuole ricordare che la persona umana rimane centrale e che continua ad esprimere sentimenti, arte, poesia e felicità anche in un periodo storico dove la tecnica, i robot e la digitalizzazione sembrano essere le uniche risorse vincenti.

This handmade family in ceramic is characterized by the human face. This is a choice we have done on purpose in order to keep the human being at the center and as the key of our lives. It express emotions, art, poetry and happiness even if we are living a historical period where techniques, robots and digital development seem to be the unique resources to improve lives.

TWIST

Lampada a sospensione con corpo principale in ceramica e parte superiore in vetro soffiato.
La forma avvolgente e la finitura a solchi catturano la luce in un gioco di luce e ombre, creando un dinamismo senza fine alla materia.

Pendant LED luminaire with body in ceramic and superior part in blown glass.
The combination of this type of shape and the grooved finishing produces a dance of light and shadows, material lives with an everlasting dynamism.

SERVO MUTO

Lampada da terra in ceramica, con base circolare in acciaio verniciato. Funzioni multiple; combina l'illuminotecnica con il sostegno di oggetti leggeri. L'effetto è unico per dimensioni e rifiniture fatte completamente a mano con colori che creano sensazioni uniche. Collegamento elettrico con interruttore a piede.

Floor luminaire in ceramic with a round base in painted steel. It can be a luminaire but also an hanger for light clothes and objects. Handmade with special effects created by color matching. Electrical connection with switch.

LED E27 – excluded lamp – 230Vac **CE**
Peso / Weight 13,5 kg

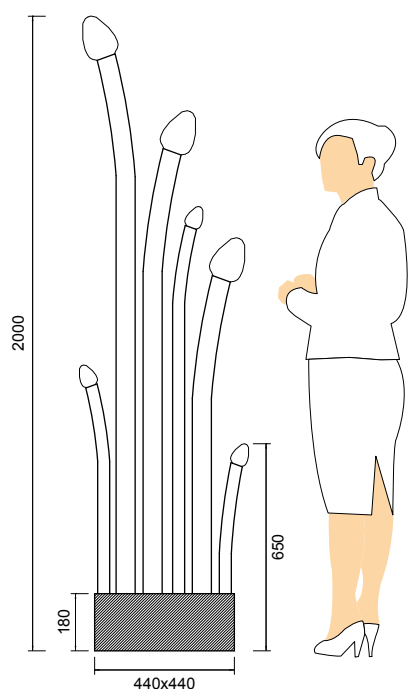

GOCCE DI RUGIADA

Lampada da terra in ceramica, con base di appoggio a terra in legno naturale, composta da 7 gambi in ceramica ricavati da estrusione della materia grezza, dipinti a mano con terre colorate e cotti al forno. Alle estremità lampadine a led di varie dimensioni. La composizione, dalle forme floreali, emana riflessi di luce e ombre grazie alla superficie rugosa la quale è stata impreziosita anche da cristalli di rugiada Swarovski. Oggetto fortemente emozionale che utilizza tutti componenti naturali e crea una simbiosi tra la natura e la tecnica conservando un design unico e non replicabile.

Floor luminaire in ceramic with base in natural wood. It is composed by seven ceramic stems, all of them are handmade from a unique piece of raw material, colored by hand and cooked in furnace. Led luminaire and Swarovsky diamonds as decorative accessories. It is not only a luminaire, not only a statue, but a unique masterpiece between architecture and nature.
