"what is essential is invisible to the eye"

Company

Italian quality, technology & production

RICERCA | RESEARCH

Laboratorio interno di ricerca e sviluppo per testare prodotti e materie prime innovative.

In-house research and development lab to test innovative products and raw materials.

CONTROLLO | CONTROL

Sistema qualità certificato per una produzione e progettazione completamente italiana.

Certified quality system for a completely Italian production and design.

COMPETENZA | EXPERTISE

La formazione continua del personale e 30 anni di esperienza ci contraddistinguono da sempre.

Constant training for personnel and 30 years of experience have always been our hallmark.

INNOVAZIONE | INNOVATION

Continuo sviluppo di nuovi prodotti con performance tecniche superiori.

Constant development of new products with superior technical performance.

AFFIDABILITÀ | RELIABILITY

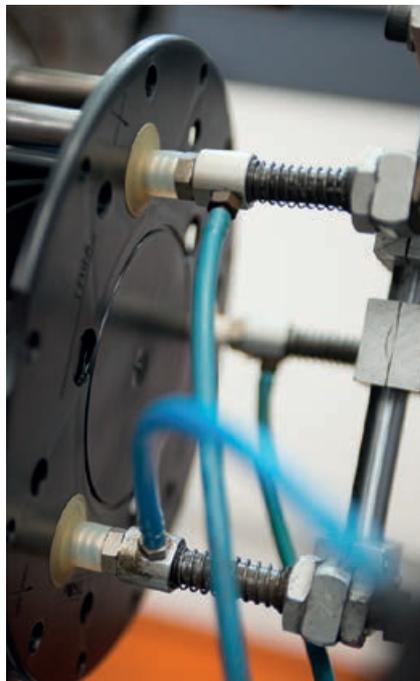

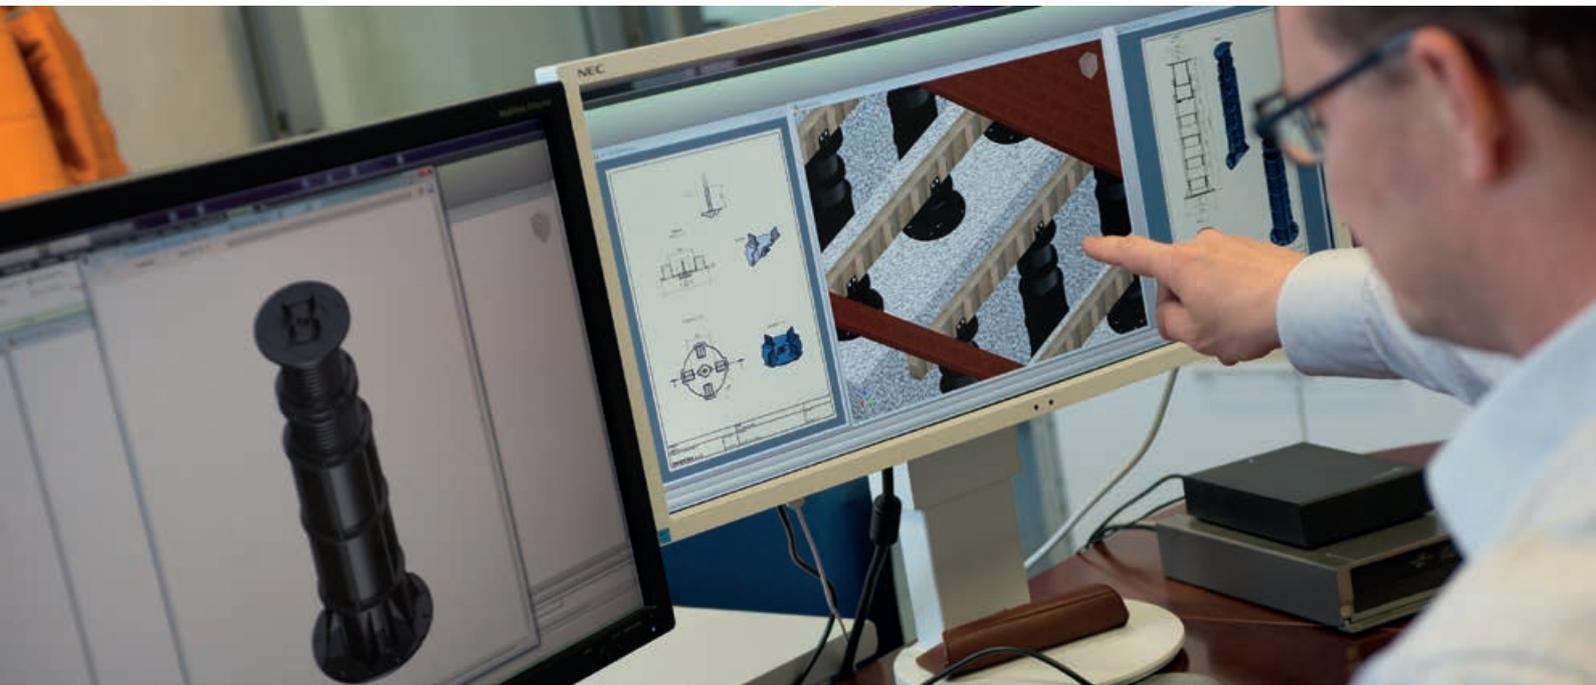

Presenti nel mercato già dai primi anni '90 i nostri Martinetti sono una garanzia di affidabilità e prestazioni con milioni di pezzi venduti in tutto il mondo e utilizzati con qualsiasi condizione climatica.

Operating on the market since the early 1990s, our Martinetti guarantee reliability and performance with millions of pieces sold worldwide and used in any climatic condition.

ENTUSIASMO | ENTHUSIASM

L'entusiasmo di un team di oltre 25 professionisti con lo sguardo rivolto al futuro.

The enthusiasm of a team of over 25 professionals with an eye to the future.

Pedestal Line

Raised Floor Supports

Linea Pedestal è il sistema di supporti ed accessori per la creazione di pavimentazioni sopraelevate: un organismo unico e multiforme, capace di evolversi in base alle esigenze di progettazione, semplificare acquisto e stoccaggio dei prodotti e di adattarsi alle problematiche della posa direttamente in cantiere.

I sottili supporti Mini, la sfaccettata famiglia Martinetto, i supporti autolivellanti Balance e i possenti MegaMart, creano una gamma completa di prodotti regolabili con escursione da 10 a 1020 mm di altezza, strutturati per la regolazione millimetrica continua ed una portata fino a 1000 kg.

Grazie alla dettagliata serie di teste specifiche per pavimentazioni tile e decking, al sistema di prolunghe e ai correttori di pendenza, con una serie anche ridotta di prodotti ed accessori è possibile realizzare rialzamenti di pochi millimetri o terrazze alte più di un metro, pavimentazioni decking nel verde o bordi piscina in pietra.

VANTAGGI DEL SISTEMA

Posa semplice e veloce, perfetto controllo di altezza e planarità, garantisce ispezionabilità e manutenzione degli impianti sottostanti, aereazione della soletta, protezione dell'impermeabilizzazione, alleggerimento della pavimentazione finale, assorbimento dei rumori, isolamento termico ed eliminazione dei costi di demolizione di pavimentazione preesistenti.

DESTINAZIONI D'USO

Terrazze, bordi piscina, passaggi pedonali su coperture, giardini pensili e spazi urbani

Pedestal Line is the system of supports and accessories for installing raised flooring: this unique and versatile solution can be adjusted according to design needs, facilitating the purchase and storage of products, and it can be adapted to installation requirements directly on site.

The thin Mini supports, the faceted Martinetto range, the Balance self-levelling supports and the powerful MegaMart are part of a complete range of adjustable products with excursion from 10 to 1020 mm in height, structured for continuous millimetric adjustment and with a capacity of up to 1000 kg.

A detailed series of specific heads for tile and decking floors and a system of extensions and slope correctors, with a small series of products and accessories, allows for elevations of a few millimetres or terraces more than one metre high, as well as garden decking floors or stone pool edges.

ADVANTAGES OF THE SYSTEM

Quick and easy installation, perfect control of height and flatness, it ensures inspection and maintenance of the underlying systems, ventilation of the slab, waterproofing protection, lightening of final flooring, noise absorption, thermal insulation and elimination of demolition costs of existing flooring.

INTENDED USES

Terraces, pool edges, walkways on roofing, hanging gardens and urban spaces

the **Right** support

Prodotti con materiali riciclati e riciclabili
Products made of recycled and recyclable material

MegaPro

WEB-APP PER LA PROGETTAZIONE DELLA POSA | WEB-APP TO DESIGN LAYING

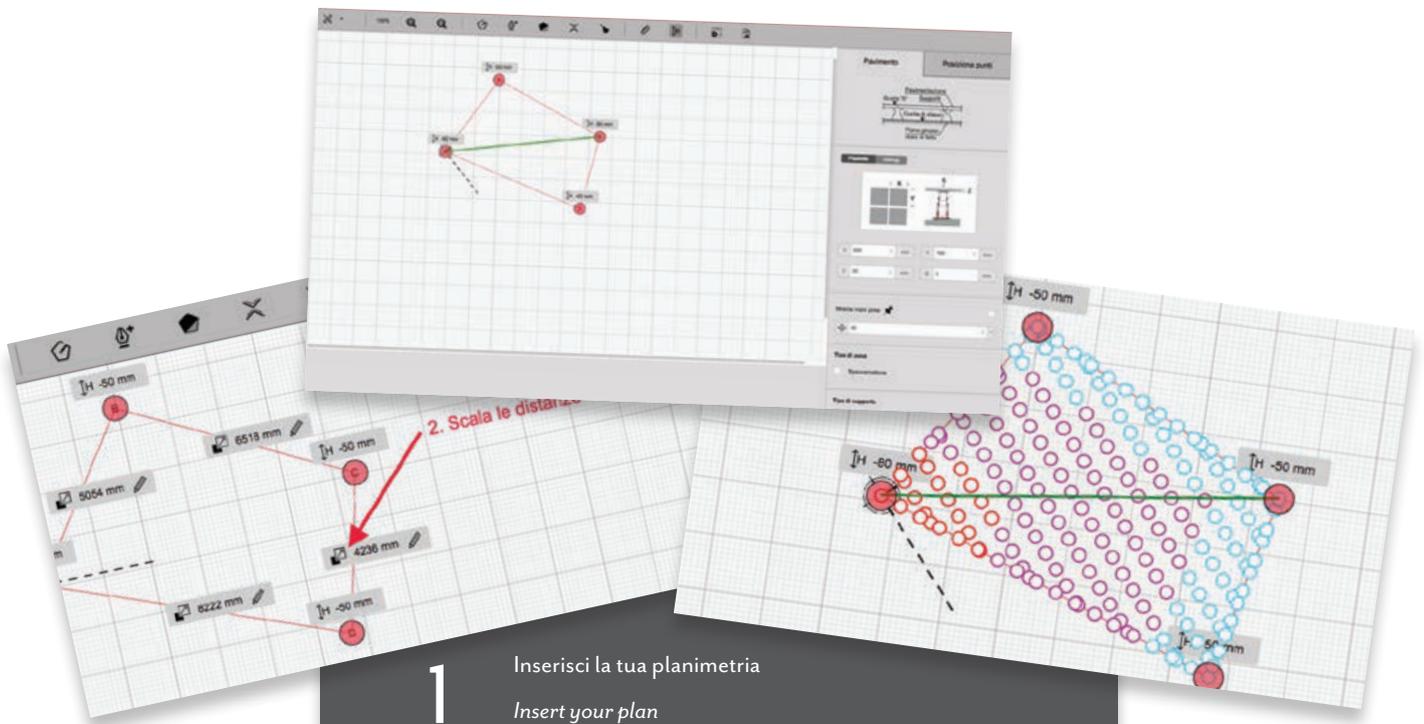

MEGAPRO È LA WEB-APP IMPERTEK PER LA PROGETTAZIONE DELLA POSA DI PAVIMENTI SOPRAELEVATI UTILIZZANDO I SUPPORTI DELLA GAMMA MARTINETTO E MEGAMART.

Accessibile direttamente on-line, MegaPro mantiene tutte le potenzialità, la facilità d'uso ed il continuo aggiornamento di un sito web. Attraverso il login alla tua area riservata, entrerai in uno spazio di lavoro dove progettare la posa dei supporti sulla base di un tuo disegno tecnico completamente personalizzabile.

Gli strumenti a disposizione replicano quelli reali ed indispensabili di un tavolo da disegno tecnico: traccia linee, righello, zoom, modifica ecc, con la possibilità di mostrare le altezze di ciascun punto.

I supporti vengono scelti tra l'intera gamma di Martinetto e MegaMart ed in pochi istanti è possibile impostare le caratteristiche del pavimento sul quale stai lavorando. Inoltre, MegaPro ti consente di salvare i progetti creati e di generare, per ognuno, la distinta con il dettaglio dei supporti utilizzati.

Prova MegaPro andando su megapro.impertek.it

1

Inserisci la tua planimetria
Insert your plan

2

Specifica le altezze dell'area supporti e i dati del pavimento
Specify heights of supports area and flooring data

3

Esporta il PDF con la distinta dei supporti
Export PDF with the bill of materials for supports

MEGAPRO IS THE IMPERTEK WEB-APP TO DESIGN LAYING FOR RAISED FLOORS USING THE RANGE OF MARTINETTO AND MEGAMART SUPPORTS.

Accessible directly online, MegaPro has all the potentials of a website, including ease of use and constant updating. By logging in to your reserved area, you can access a workspace to design the laying of supports on the basis of your own fully customisable technical drawing.

The tools available replicate real ones, which are essential for a technical drawing table: drawing board, ruler, zoom, editing, etc., with the option to show the heights of each section.

The supports are chosen from the full range of Martinetto and MegaMart and you can quickly set the characteristics of the flooring on which you are working. In addition, MegaPro allows you to save the created projects and to generate, for each one, the bill of materials with the details of the supports used.

Try MegaPro by visiting megapro.impertek.it
