WHO WE ARE

An established Turkish furniture designer & manufacturer, Parla Design is a 3rd generation family owned business. Seriously committed to supplying the best quality loose & fitted furniture, Parla Design achieves this with a beautiful blend of very experienced traditional handcraft masters working with hi-tech Italian machinery. Based in Istanbul, the 10.000 sq m factory is a hive of activity, producing over 30 containers of furniture a month.

MESSAGE FROM THE OWNERS

At Parla we not only believe in what we do, we also love what we do. As a family business in its 3rd generation, our ethos is to continue what our grandfather started and keep on pushing the boundaries to make it better. Our father taught us that we must take care of the customers and employees equally, and everyday we strive to achieve this...

We have had occasions where we will not send the customer their order if we are not happy about one small detail, even if the customer says it is ok. For us it is so important to get the job done well, and work as a team to make that happen. We love to find out that customers are happy with the service and quality we offer and are telling others 'Parla is a reliable brand that gets everyone in their company.'

THE FACTORY

Combining state of the art Italian machinery with the highest quality bespoke craftsmanship, the factory spans 10.000sqm, and has highly qualified and skilled in house teams that take on metalwork, woodwork and upholstery.

The factory has a great mix of age groups with the older generation handing down their skills to the apprentices, and the young designers guiding the makers to create contemporary pieces of furniture.

High Quality

WHAT IS IMPORTANT TO US

Eco Credentials

We make our products from locally sourced materials that are produced in the most responsible manner. We believe in sustainability and take steps to lead the way in environmentally friendly manufacturing in Turkey.

Efficiency & Great Customer Service

Our efficient and dedicated customer service has allowed us to become a well respected 3rd generation furniture company. We pride ourselves to be dynamic, on point and able to become a dedicated solution partner to all of our customers.

Parla Ethos

We believe in delivering affordable luxury that is beautiful and robust. We have a young, dynamic and forward thinking team that become the client's partner from day one, making the journey with Parla a pleasure.

Quality

We have stringent quality control systems in place. We use the finest quality materials and very high quality craftsmanship and Italian machinery to achieve an excellent finish that has a 2 year warranty.

CHAIRS

Important Notice

Solid Wood - Indoor

Solid Wood - Outdoor

Metal Plating

Metal Powder Coating

Marble

Natural Wicker

We recommend to check and tighten periodically all screws and bolts which are used to connect individual parts. This will result in increased overall strength and durability of the product. Bigger clearance in the joints can cause excessive strain on parts and cause damage to the product. We recommend to check on the condition of glides from time to time to avoid a damage of the floor or the product. Slight ripples and wrinkles can appear on upholstered products during the upholstery process or during the use of the product. These ripples or wrinkles can be determined by the characteristic of upholstery materials or technology of the upholstery and therefore cannot be subject to any claim. We kindly ask you to follow instructions and recommendations contained in this manual. Regular professional care extends the life of your product and besides can be also a condition for warranty compensations. The manufacturer does not take any responsibility for potential damage to the product resulting from unauthorised use and unprofessional handling of the furniture. PARLA company is constantly working on the further development of all products, which may cause some changes in used materials, constructions and finishing. As a result of this the recommendations and guidelines for the proper use of products may be also changed. Thank you for your understanding and we wish you pleasant moments spent while using our products.

Solid Wood - Indoor

Solid wood is wood that has been cut from a tree, which is composed of wood fibers that are held together with adhesives, solid wood contains wood fibers throughout the piece of lumber. Each type of solid wood has its own characteristics, including its grain pattern, color and texture.

MAINTENANCE

We recommend that you regularly clean the surface with soft cloth and specific products for wood. Do not use abrasive material.

WARNING

*As wood is a natural material, variations in color and pigmentation will occur on each piece.

*Wooden furniture will also change appearance over time as it is affected by the environment (daylight, humidity, etc.) in which it is placed.

*Solid wood furniture should therefore not be placed too close to heat sources.

Solid Wood - Outdoor

Iroko is a special timber which has very durable outdoor usage.

MAINTENANCE

We recommend special treatment carried out every six months, preferably in spring and autumn, to help the Iroko reach its full service life.

WARNING

Exposure to the sun and rain will eventually change Iroko's colour.

Wood Veneer

A veneer refers to a thin layer of wood which is cut from the circumference of a tree. It is then bonded onto a dense piece of wood, which is typically MDF, chipboard or plywood. No veneer table leaf, no matter how expertly cut or treated, is identical to another which is a charm of natural product. Veneer provides high-quality looks, but without the need for large amounts of expensive wood.

MAINTENANCE

We recommend that you regularly clean the surface with barely damp soft cloth to wipe the veneer following the direction of the wood grain. Don't use oil or ammonia-based products to clean wood veneer.

WARNING

*Veneers are generally different colour than solid wood which is used for the tables legs. We therefore recommend stained table tops, and legs.

Metal Plating

PARLA most frequently uses metal, brass, aluminium and stainless steel for metal components. Depending on the product, metal surfaces are either Powder-coated, PVD-coated, polished, satine. A matte or textured powder coating finish provides colour and surface protection.

MAINTENANCE

We recommend that you clean the surface with wet soft cloth and dry immediately. Do not use alcohol. Avoid to use abrasive materials that can alter or scratch the surface.

Marble

Marble is a natural material, of sedimentary origin and is formed mainly by calcium carbonate (CaCO₃). Texture of marble depends on the form, size and uniformity of grains. The element components of marble determine the color of the stone. Marble features veining with contrasting colors that run throughout each piece giving it a distinctive look.

MAINTENANCE

We recommend that you regularly clean the surface with barely damp soft cloth. Pay the maximum care while making these operations to avoid scratching the surface. We recommend solvent based special treatment carried out every months, to help the surface reach its full service life. Solvent based stain protector creates an invisible barrier on the applied area. It penetrates in depth and protects against dirt, dust, water stains. It generates easy clean effect.

WARNING

*Marble is porous and has a poor resistance to acidic substances (vinegar, lemon juice, wine, tea, coffee, etc.) that even in small quantities can corrode the surface and penetrate into the pores forming mat spots.

*Do not use any products containing acetone, ammonia, chlorine, or solvents, abrasive products and furniture polish, since these might permanently damage the surface of the product, making it look opaque, with marks.

Glass

Glass manufacture characteristics such as small air bubbles, surface waviness and light pitting are to be expected. All glass used in our furniture is tempered to ensure greater durability.

MAINTENANCE

Glass tops should be wiped with a clean, dry cloth. Clean with household ammonia as the occasion requires. Never use abrasives or sharp-edged tools.

WARNING

Glass is not scratch – resistant, so avoid dragging objects across the surface. Glass is very heat-resistant, but we recommend that you never place hot objects directly on the surface.

Glides

Glides protect the product material as well as the floor against damage, which can reduce noise and help to make moving the chair on the floor easier, especially on carpets. Specify the required type of glides to suit your floor in your order.

If you are not sure which type of glides to choose, request an opinion from your floor covering supplier. We supply plastic (standard) and felt glides (optional).

MAINTENANCE

Glass tops should be wiped with a clean, dry cloth. Clean with household ammonia as the occasion requires. Never use abrasives or sharp-edged tools.

WARNING

Glass is not scratch – resistant, so avoid dragging objects across the surface. Glass is very heat-resistant, but we recommend that you never place hot objects directly on the surface.

Natural Wicker

Wicker is a natural material, variations on texture and weaving may occur. Since it is a natural material it might dry out and crack over time.

MAINTENANCE

We recommend that you regularly take dust with a soft cloth or a soft brush. Avoid damaging surface.

WARNING

*Natural wicker is perfectly fine for indoor use but it's not suitable for the outdoors.

*Natural wicker is susceptible to rain, sleet, snow, moisture, and other forms of inclement weather.

*Sun bakes the fibres leaving them dry and brittle, moisture can loosen joints and warp frames.

Fabric

Cleaning and maintaining upholstered furniture regularly is important to retain the appearance of the fabric and to prolong its lifespan. Over time, dust and dirt can cause furnishing fabrics to change color and exacerbate wear.

MAINTENANCE

Vacuum the furniture regularly using the upholstery nozzle to remove dust and avoid fluff and pilling. Straighten the fabric with your hands from time to time. Wrinkles in the fabric can be straightened using a steamer. Soak up spilled liquids immediately with an absorbent napkin or cloth by dabbing gently towards the centre of the stain. Never use concentrated detergents or bleach, ammonia, optical brighteners or soap intended for hard surfaces. We do not recommend spot cleaning of individual marks and stains as this damages the fabric and causes colour loss. On wool fabrics, most stains can be removed with lukewarm water on a clean lint-free cloth. If necessary, add a little neutral detergent. Avoid rubbing the material hard as this could result in loss of colour and damage the fabric.

Genuine Leather

Natural leather has a pleasant characteristic smell and is wear resistant. Its quality depends on the animal's lifestyle as well as on the method of leather processing. Minor defects originating during the animal's life, such as wrinkles, blood veins, scars, scratches, etc. are regarded as permissible and are even required as evidence of the 'genuine and unique' quality of the leather.

MAINTENANCE

The best maintenance for leather is regular vacuuming with a soft brush. Avoid using cleaning products and sharp objects. If cleaning is necessary use boiled water with natural soap shavings of good quality.

Whip 2-3 tablespoons of soap flakes in 1-liter water and only use the foam. Apply the foam with a soft cloth, let the furniture dry and dry afterward the leather off thoroughly with a soft cotton cloth.

Artificial Leather

Artificial leather is usually undemanding in maintenance.

MAINTENANCE

Remove dust regularly with a fine suction force of your vacuum cleaner or with a wet cotton cloth. Dry spilled liquids immediately by a dry cotton or paper towel. Do not let other stains dry on the surface but remove them from the surface immediately with lukewarm water. Wipe the surface carefully with a moistened cotton cloth and dry with a dry towel.
