COD. SA320

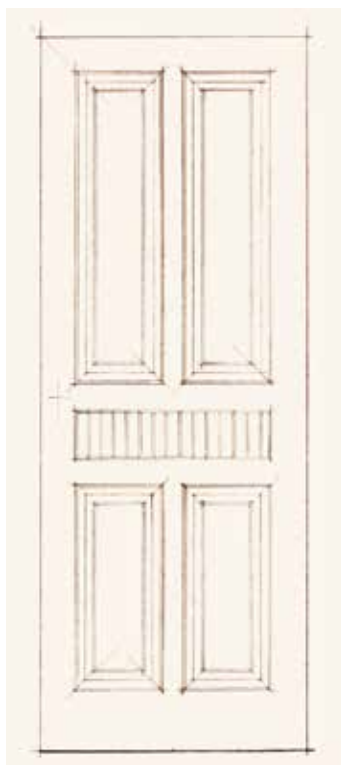

Porta con 4 riquadrature
Door with 4 panels

COD. SP120

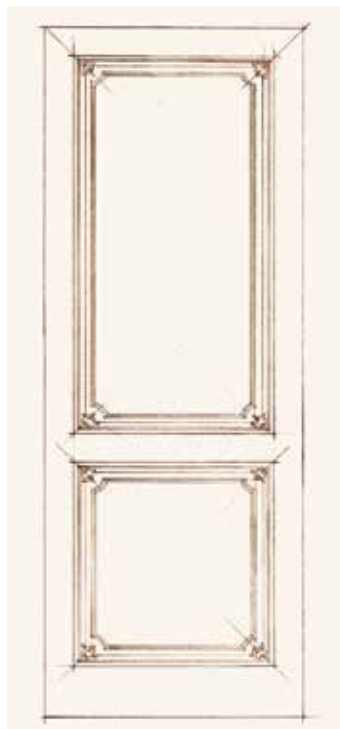

Porta con 2 riquadrature
Door with 2 panels

COD. SP220

Porta con 4 riquadrature
Door with 4 panels

COD. SB120

Porta con 2 riquadrature
Door with 2 panels

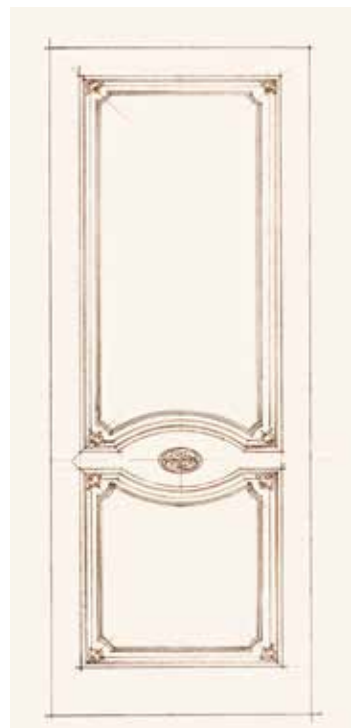

COD. SB220

Porta con 1 riquadratura
e griglia vetro
Door with 1 panel
and glass grid

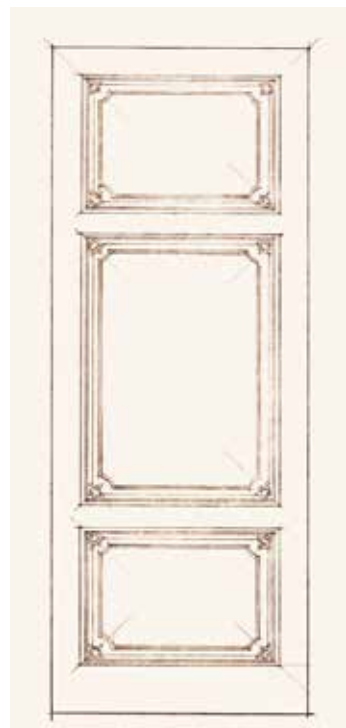

COD. SB320

Porta con 1 riquadratura
e griglia decorata vetro
Door with 1 panel and
decorated glass grid

COD. SB420

Porta con 2 riquadrature
e ovale con decoro
Door with 2 panels and oval
with decoration

COD. SB520

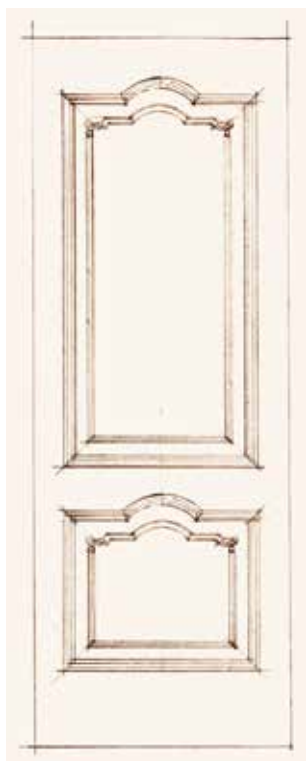

Porta con 3 riquadrature
Door with 3 panels

COD. SD120

Porta con 1 riquadratura
Door with 1 panel

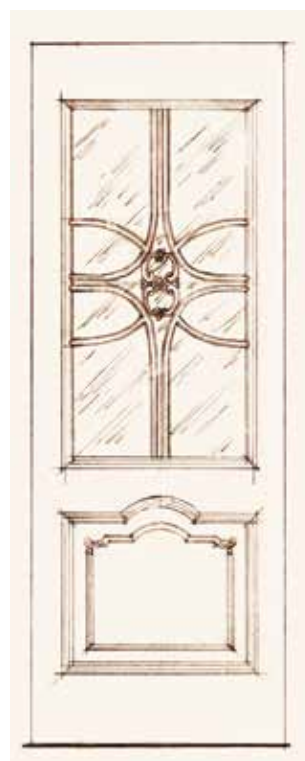

COD. SD220

Porta con 2 riquadrature
Door with 2 panels

COD. SD320

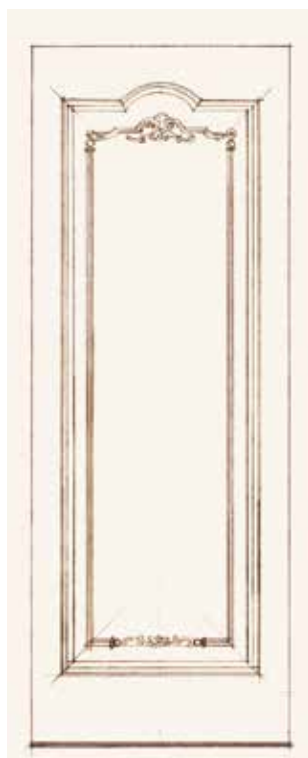

Porta con 1 riquadratura
e griglia vetro
Door with 1 panel
and glass grid

COD. SD420

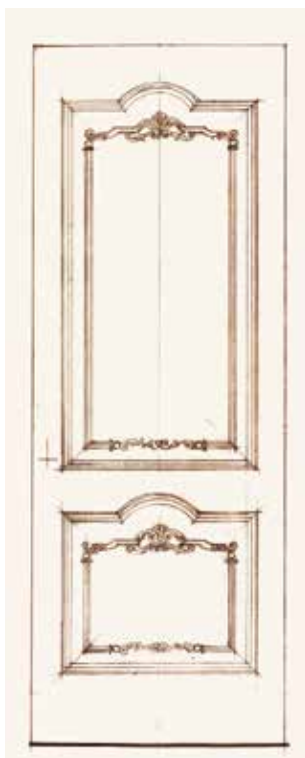

Porta con 1 riquadratura
e griglia decorata vetro
Door with 1 panel and
decorated glass grid

COD. SE120

Porta con 1 riquadratura
Door with 1 panel

COD. SE220

Porta con 2 riquadrature
Door with 2 panels

COD. SE320

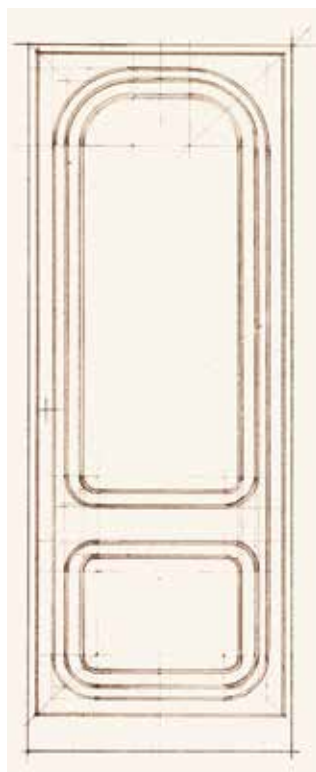

Porta con 1 riquadratura
e griglia vetro
Door with 1 panel
and glass grid

COD. SE420

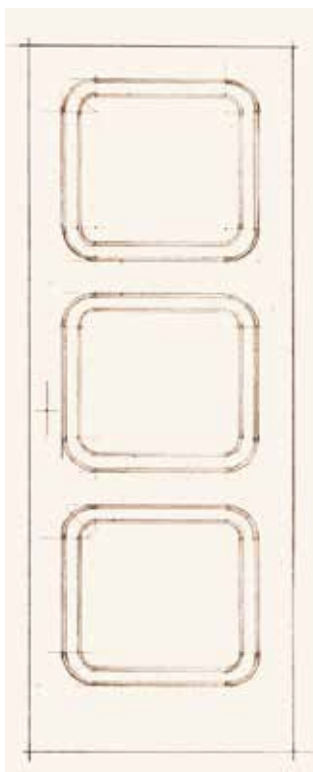

Porta con 1 riquadratura
e griglia decorata vetro
Door with 1 panel and
decorated glass grid

COD. SF120

COD. SH12

Porta con 1 riquadratura
Door with 1 panel

COD. SH22

Porta con 2 riquadrature
Door with 2 panels

COD. SH32

Porta con 3 riquadrature
Door with 3 panels

TIPOLOGIE CORNICI - FRAME TYPES

Cornice con decoro E
Frame with decoration E

Cornice con decoro F
Frame with decoration F

Cornice con decoro G
Frame with decoration G

* Realizzabile solo nelle finiture laccate - Available in lacquered finishes only

* Aggiungere al codice della porta il codice della tipologia di cornice. (es. SH12E) - Add the frame type code to the door code (e.g. SH12E)

COD. SU120

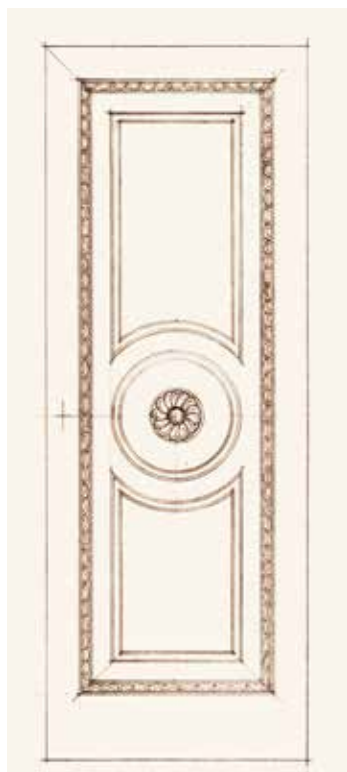

Porta con 6 riquadrature
Door with 6 panels

COD. SU220

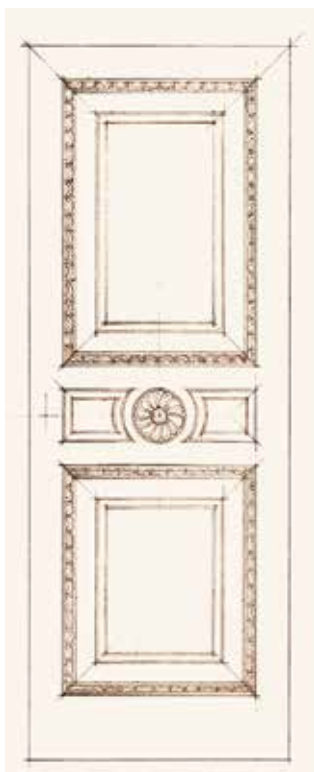

Porta con 6 riquadrature e bugne
Door with 6 raised panels

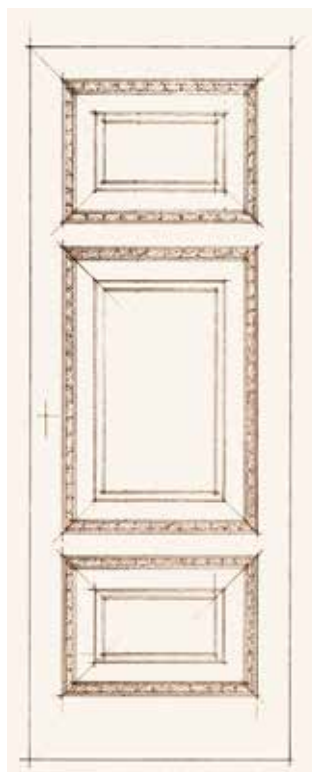

COD. SS120

Porta con 1 riquadratura
e decoro centrale
Door with 1 panel
and central decoration

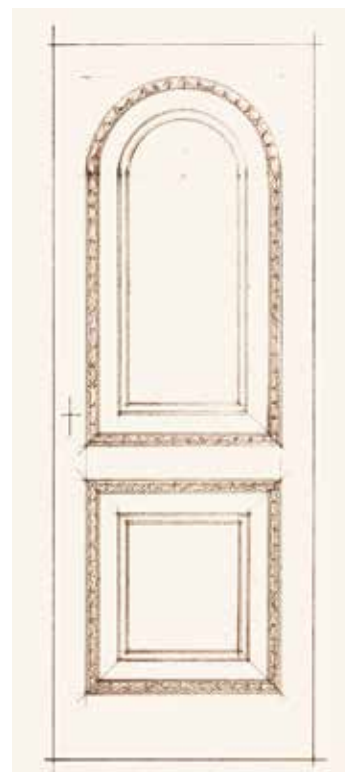

COD. SS220

Porta con 2 riquadrature
Door with 2 panels

COD. SS320

Porta con 3 riquadrature
Door with 3 panels

COD. SS420

Porta con 2 riquadrature
e curva superiore
Door with 2 panels
and upper curve

COD. SV12

Porta con 1 riquadratura
Door with 1 panel

COD. SV22

Porta con 2 riquadrature
Door with 2 panels

COD. SV32

Porta con 1 riquadratura
e griglia vetro
Door with 1 panel
and glass grid

COD. SV42

Porta con 1 riquadratura
e vetro
Door with 1 panel and
glass

decoration and glass grid

ESEMPIO DI PORTA A PROGETTO

ESEMPIO DI PORTA A PROGETTO

ESEMPIO DI PORTA A PROGETTO

ESEMPIO DI PORTA A PROGETTO

EFFETTUARE UN CORRETTO RILIEVO - TAKE THE CORRECT MEASUREMENTS

Nella progettazione delle porte è necessario tenere in considerazione tutti i diversi aspetti tecnici e stilistici:

Dimensione del vano e misura della porta

Misura dell'ingombro di mostrine o di lesene, rispetto al vano.

Misura dell'imbotto in profondità

Limiti per aperture porte (nella scorrevole la porta si apre totalmente solo se si sceglie una maniglia ad incasso).

Nella battente l'apertura avviene con una certa raggiatura dipendente dalla scelta della mostrina o della lesena con capitelli più o meno sporgenti.

When designing doors it is necessary to take into consideration all the different technical and stylistic aspects:

Size of the opening and measurements of the door

Measurements of the area occupied by architraves or pilasters, with respect to the opening.

Depth of the casing.

Door opening limits (Sliding doors open completely only if integrated handle is selected).

Leaf doors open with a certain radius, depending on the choice of the architrave or pilaster with more or less protruding capitals.

RILIEVI NECESSARI - NECESSARY MEASUREMENTS

Prospetto frontale - Front prospect

* È necessario verificare in più punti le dimensioni del vano porta in modo da poter individuare eventuali fuori squadra.

Per un corretto rilievo è necessario anche indicare la presenza di muri ad angolo, eventuali prese di corrente, interruttori o quant'altro sia presente sulla parete.

* It is necessary to check the size of the opening in several places to identify whether it is out of square. To take the correct measurements, it is also necessary to indicate the presence of corner walls, any electrical sockets, switches or anything else which is on the wall.

TIPOLOGIE CERNIERE E MECCANISMI - MECHANISM AND HINGE TYPES

Le porte possono essere battenti (standard con cerniere a scomparsa e a richiesta cerniere anuba), scorrevoli interno muro, scorrevoli esterno muro, doppie scorrevoli con doppio binario, rototraslante. Tutte le porte singole possono essere raddoppiate per ottenere porte doppie. A richiesta si possono avere porte con motorizzazione e sensori di apertura. Le porte scorrevoli possono avere apertura sincro a richiesta.

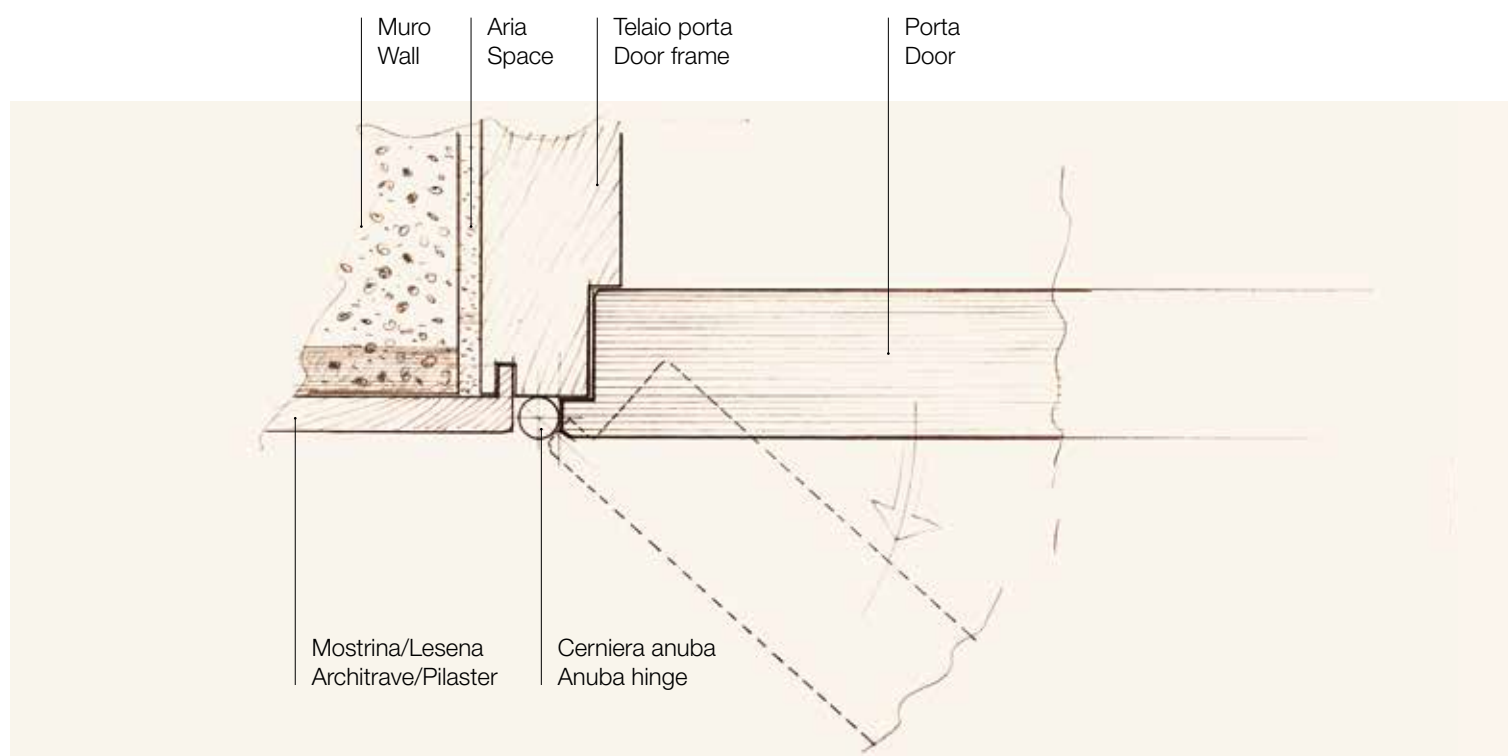

The doors can be leaf (standard with invisible hinges or anuba hinges to order), sliding inside wall, sliding outside wall, double sliding with double track, pivot sliding. All single doors can be doubled to create double doors. It is possible to order doors with motorisation and opening sensors. Sliding doors can be ordered with synchronised opening.

PORTE BATTENTI - LEAF DOORS

Porta con cerniera a scomparsa - Door with invisible hinge

Porta con cerniera anuba - Door with anuba hinge
