L'azienda / *The company*

Quattro generazioni di produttori di pietra si sono succedute nel delicato compito di offrire alla realtà edilizia della propria terra una pietra dalle caratteristiche uniche. Una storia lunga 150 anni, in cui Pi.Mar. non ha mai tradito i suoi obiettivi. Nel tempo gli artisti del luogo hanno saputo valorizzare al meglio tutte le qualità e la versatilità della pietra leccese, dando forma a diverse tipologie di costruzioni dal '600 in poi, la cui bellezza e solidità sfidano la storia. La famiglia Marrocco proprietaria di un'enorme giacimento di 40 ettari di pietra naturale, da generazioni è frutto di una profonda conoscenza del miglior modo di trattare una pietra versatile, duttile e cosmopolita. È tutto questo che permette di essere garanzia assoluta di qualità, scelta e primato nella lavorazione e nell'impiego di questo materiale, grazie alla qualità della sua organizzazione e alla varietà di prodotto che riesce ad assicurare all'edilizia di tutto il mondo. Uno staff qualificato di scavatori, scalpellini, artigiani, impegnato giornalmente nelle varie fasi di trasformazione della pietra, garantisce dall'estrazione alla realizzazione la migliore qualità sul prodotto finito. Un reparto di esperti tecnici, architetti d'interni, e designers, garantisce, con la sua professionalità e preparazione specifica, un'assistenza completa, nell'esatto utilizzo del prodotto come nel mantenimento e nella protezione della pietra, fino alla messa in opera.

In Pi.Mar. four generations of stone manufacturers, one after the other, inherited the task to offer a unique type of stone to the builders of their home country. Their experience during 150 years guarantees a perfect know-how in the manufacturing of a versatile, ductile and cosmopolitan stone - a real family's stone. Since the XVII century local artists have been able to make the most of the quality and versatility of our Lecce limestone in different types of buildings of unrivalled beauty and solidity. Marrocco's family owns a huge field of 40 acres of limestone, from generation to generation is the result of a deep understanding of the best way to treat a stone versatile, flexible and cosmopolitan. This is that allows it to be absolute guarantee of quality, choice and leadership in the processing and use of this material, thanks to the quality of its organization and the variety of product that fails to deliver the building around the world. A qualified staff of diggers, masons, craftsmen, engaged daily in various stages of processing of the stone, from mining to construction guarantees the best quality on the finished product. A department of technical experts, architects, interior designers and guarantees, with his professionalism and specific training, comprehensive support, the exact use of the product as in the maintenance and protection of the stone, until the installation.

LE PIETRE NATURALI

La pietra Pimar è una pietra di origine calcarea risalente al Miocenico (21 milioni di anni fa).
I suoi componenti costitutivi le danno una compattezza, un colore ed una struttura uniche.
La presenza di frammenti di fossili fa acquisire alla pietra ulteriore fascino e ricchezza geologica.
Le tipologie estratte si differenziano tra loro per il colore, l'omogeneità, la compattezza e l'età.
Le principali sono la pietra paglierina, la bianca e la grigia.

*Pimar stone is a Limestone dating back to the Miocene (21 million years ago).
Its constituent components give it a compactness, a color and a unique structure.
The presence of fossil fragments is to to acquire further stone charm and geological wealth.
The types extracted differ from each other in color, homogeneity, compactness and age.
The main ones are the yellow Limestone, the white Limestone and the gray Limestone.*

ARRE

DO

BAGNO

BATHROOM FURNITURE

Dal Salento, in oltre 150 anni di esperienza, la pietra PIMAR, particolarmente apprezzata, ha saputo assecondare e soddisfare l'immaginazione e la creatività dei migliori architetti e progettisti di tutto il mondo. L'impegno della PIMAR è stato ed è quello di garantirne gli sviluppi futuri a tutti i loro progetti.

Oggi è protagonista di questa proposta per il bagno. Spazi sagomati, articolati, ma anche singoli elementi: vasche, lavabi, piani, piatti doccia, che proprio dalla pietra e dalle sue lievi, morbide e continue sfumature prendono spunto per linee sinuose, rotonde, femminee a contrasto con la durezza e resistenza del materiale.

Un allestimento e delle proposte di arredo bagno fatto curve appena accennate di morbidezze e di delicati passaggi tra luce e ombre.

Since over 150 years from Salento their experience has been able to second architects' creativity and imagination all over the world. PIMAR'S commitment has been future developments for their projects.

Today Pimar Limestone is the protagonist of this proposal for the bathroom, with its golden white color, with its ability to absorb and return back the light, with its deep sculptural materiality that makes alive every little decoration and relief.

Shaped and articulate spaces but also individual elements such as baths, sinks, shower trays, top basins, they get ideas just from the stone, from its light, smooth continuous shades for rounded, sinuous and feminine lines that contrast against the hardness and strength of the material.

A stand and some proposal for bathroom furniture made of light and smooth curves, delicate transitions between light and shadow.

NOTE / NOTES

ITA

Le tonalità della pietra sono indicative.

Queste tendono a variare in base alla cava di estrazione utilizzata e dal livello della stessa.

Tutto il materiale in quanto pietra naturale può avere una granulometria non omogenea, la presenza di fossili ed altro ne caratterizza la componente geologica.

In caso di deposito, si consiglia la conservazione del materiale in un luogo coperto.

La pietra è un prodotto naturale che nel tempo potrebbe cambiare colore, per chi non ama ciò si consiglia un trattamento con idrorepellenti su prodotto asciutto.

ENG

The stone shades are approximate and can vary depending on the quarry of origin and its level.

Natural stone contains geological components that can be not-homogenous particles including, but not limited to, small pieces of fossils.

Stone should be kept under shelter if stored for extended period of time.

Pimar reserves the right to modify the packaging of materials.

Natural stone hues in the photos are approximate.

The limestone is a natural product and its colour could change with time.

If you does not love it we suggest to use a waterproofing sealer once the limestone has dried.
