

NEW ITEMS

ZUMI light and acoustics is a Belgian manufacturer that focuses on design, technology and innovation. Our collection offers solutions for architects, interior designers, lighting designers, engineering offices and installers to create projects with lighting and acoustics.

All products are made in Belgium, all electronics come from Europe. We give a 5-year guarantee. Controls, emergency lighting and wireless solutions can also be found with us. Recently we also offer an IOT platform for retail, offices and hospitality.

ZUMI makes the difference by offering a wide range of colour temperatures, tunable white solutions and PI-LED technology. Our devices are equipped with high-quality reflectors with an UGR lower than 19. We also have dimming systems with 1-10V, DALI and DMX.

The collection has grown into various possibilities for recessed and surface mounted, track solutions, suspended, wall applications and profiles.

Made to measure is one of our specialties that offers a lot of possibilities to obtain unique results.

We hope to meet you soon for a collaboration in your future projects,

Tony Decavele
CEO & founder

Projects

ZUMI in the picture

Since the start of ZUMI in 2016, we can already look back on a recognition of 3 AWARDS. The first AWARD in our own country, the Kortrijk Design Award, was an extremely important kick off. London and Paris followed shortly after this recognition.

We are currently nominated for the MDO Award in Monaco.

All recognitions show that ZUMI not only brings beautiful design but also produces innovative and high-tech solutions for lighting and acoustics.

Our aim remains to be a trendsetter in this fast-moving market.

Permanent or non-permanent solutions

Guarantee

ZUMI offers a 5-year guarantee on all devices with a rated lifetime of at least 50.000 hours. Batteries are excluded from this guarantee.

Made to measure

In addition to our standard range we offer customised solutions for both architectural projects and industrial applications.

Technical support

Our team is at your disposal to support you with light calculations, autocad drawings, making offers linked to the datasheets and technical assistance. The ZUMI team also comes on site to give advice.

Showroom

Our complete collection can be viewed in our showroom, by appointment only.

Thanks to

We would like to thank everyone who worked on this catalogue: the ZUMI team, our designers, photographer, marketing agency, engineering office, our suppliers and so many more ...

We also thank the architects, interior architects, techniques engineering offices, installers and real estate investors who believe in our product, vision and quality. We constantly strive for a perfect result.

And of course also a word of thanks to our distributors who deliver our product every day in a qualitative way.
