PERSONAS

We work for people and their Wellbeing

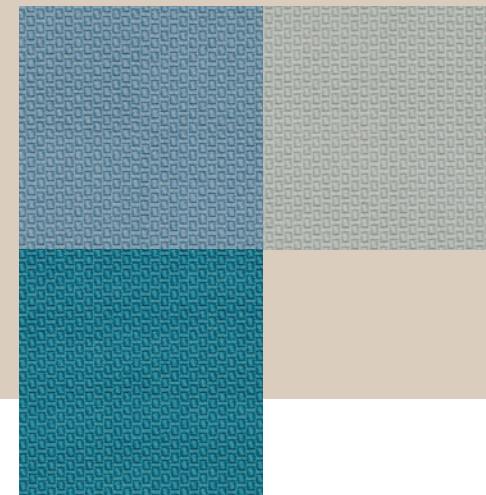

Supporting them in each project and with working with each one of them to ensure their well-being, with furnishing solutions that improve the interaction between users and the space they work in.

Actiu: 50 years designing public spaces and workspaces.

Actiu is an **industrial company** working within the installation sector and specialising in the manufacture of furniture. Actiu's flexibility and productive capacity enable the company to carry out comprehensive equipment projects worldwide, **providing solutions** that favour the wellbeing of people.

Actiu becomes the first industrial company in the world to obtain the WELL™ v2 and LEED® Platinum

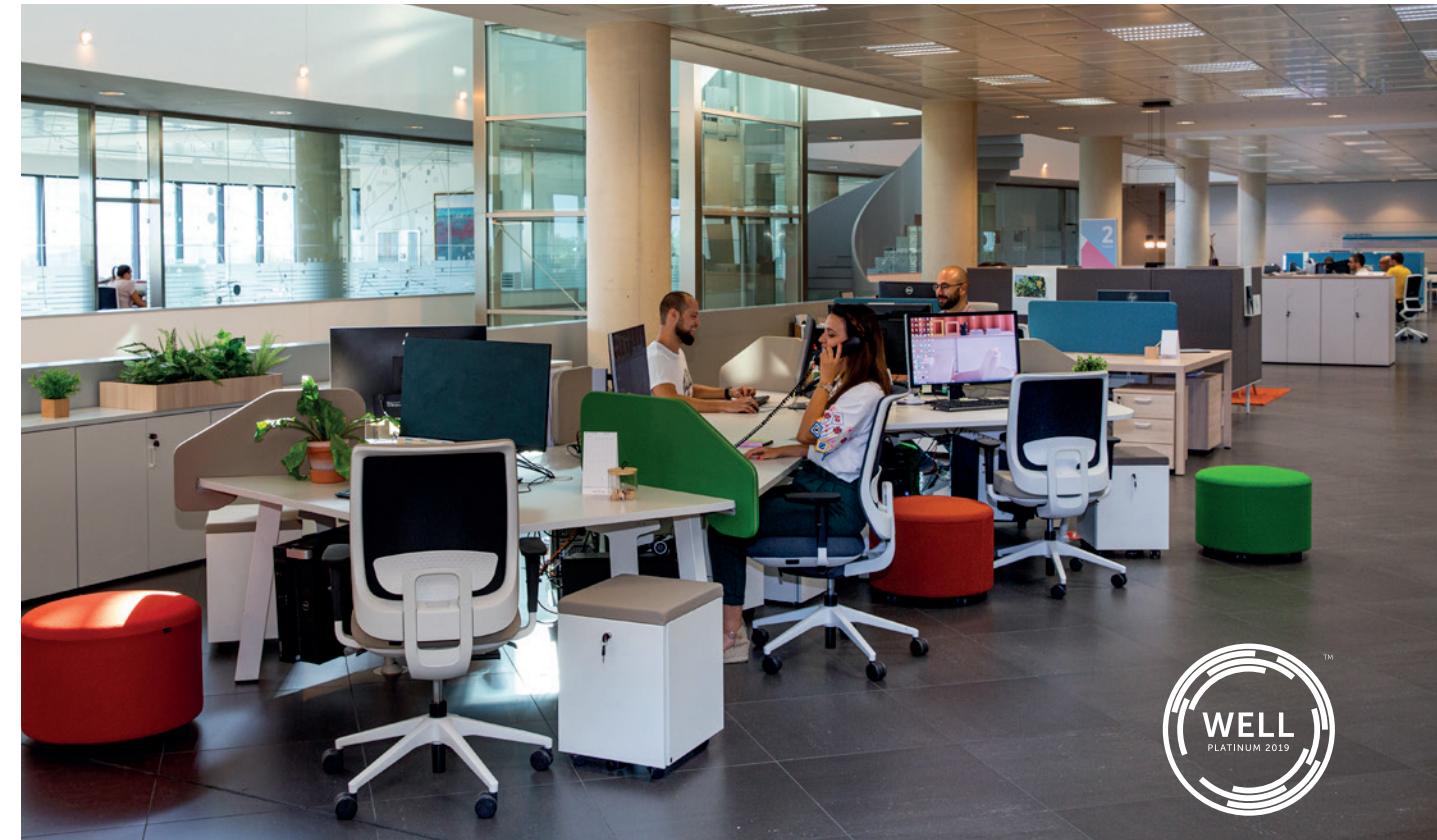

Sustainability begins with an idea

In 2011 we **became the first European industry** in the sector to obtain the LEED® Gold Certification, which guarantees the construction of environmentally responsible spaces and whose design allows the efficient use of natural resources.

Actiu´s Technology Park has not only updated its LEED® Certification, it has managed to go up a category, with seven more points, reaching the maximum currently awarded, LEED® Platinum.

ACTIU TECHNOLOGY PARK
LEED® PLATINUM certified by USGBC

The WELL Building Standard™ (WELL) Certification, which analyses the variables that affect the physical and psychological **well-being of the people** who occupy the space, aims to promote healthy habits and maximise the well-being of the users of the building.

id PREMIOS
NACIONALES
DE INNOVACIÓN
Y DE DISEÑO 2017

Spanish national design award 2017

“This award is a recognition of a way of understanding design as a strategic business weapon that applies to all areas of the company, from product design, architecture, projects, graphic identity, workspaces and even in the design of our internationalization plan”.

Vicente Berbegal. Actiu Group Founder

Actiu Technology Park

A philosophy made architecture

Designed by architect José María Tomás Llavador, **the complex covers 200.000 m²**, divided between the Corporate Headquarters, logistics, production plants and green areas, designed from the outset as a pleasant, **environmentally friendly place**.

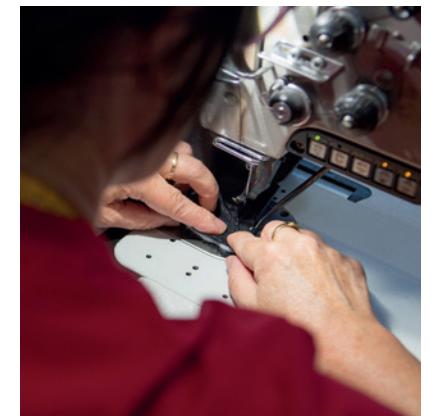

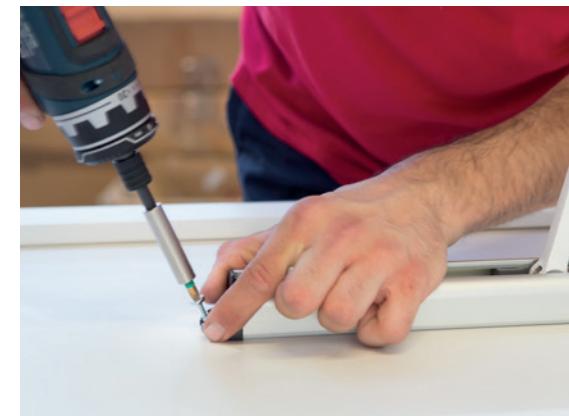

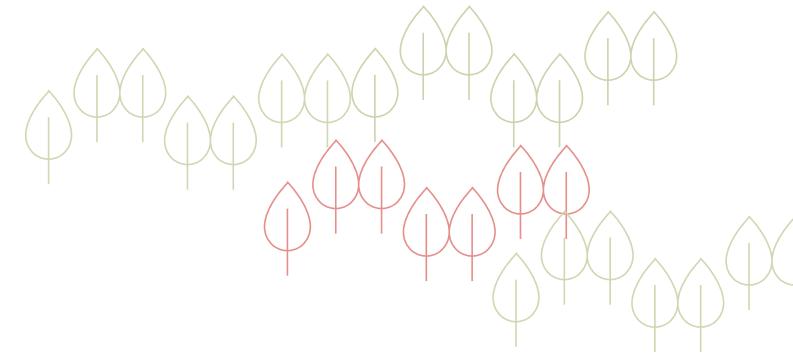

Actiu Technology Park Awards:

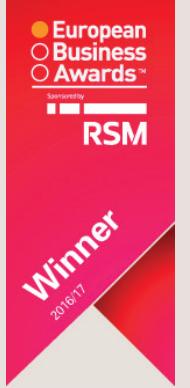

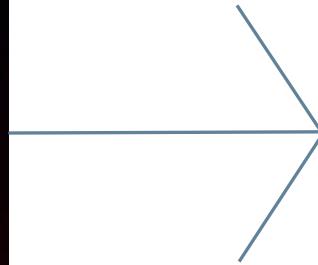

More than manufacturers

Actiu produces **more than 156.000 standard items** to which must be added another 93.000 custom made solutions. Thousands of items adapted to the technical needs of each project, with efficiency and quality guaranteed.

Vicent Berbegal, European Entrepreneur of the Year 2017

Corporate Project

We are moved by values like architecture, our roots to our territory, the innovation and development, sustainability and on top of all, **the people and their wellbeing**. Actiu is a family owned company of first generation, professionalized and vanguard with the aim to guarantee the wellbeing of the users and the durability of its products, which combine design, quality and innovation.

Cool Working

by **ACTIU**

Cool Working by Actiu is its own project methodology developed together with the Biomechanics Institute of Valencia to create environments that **are as comfortable as they are efficient in workspaces**. Places, which are created from fifty years' experience designing and equipping offices, so that organisations can align their transformation challenges with current needs.

FOCUS

Quiet areas that allow you to focus all your attention one task. Small "shelters" for concentration that we can use freely and autonomously.

COLLABORATION

Pleasant, spacious, bright and well-equipped spaces that favour communication and teamwork.

SOCIALIZATION

Spaces that promote social connection through meeting areas, canteens, etc. where we can give free rein to creativity and reduce built up tension.

LEARNING

Flexible and modular areas, capable of being adapted to the needs at a given time and with maximum connectivity.

CONFIDENTIALITY

Private spaces that provide solutions such as private meeting rooms, phone boxes for calls or furniture to file away confidential documentation

ACTIU
next®

Actiu Next®

The future of well-being is here: Actiu Next®

Actiu Next® is our smart furniture range. **A technological solution based on smart IoT sensors** integrated into our furniture and data in the Cloud, which, through its App, allows monitoring and collecting information about the status and use of the workspace.

The implementation of technology in furniture is a consequence of our goal of pursuing the well-being of people who share a work space, and Actiu Next® provides knowledge to users about factors that could be affecting them: such as posture, air quality, temperature, humidity, lighting or noise. Furthermore, it encourages the adoption of healthy habits within the organization through different tips and guidelines.

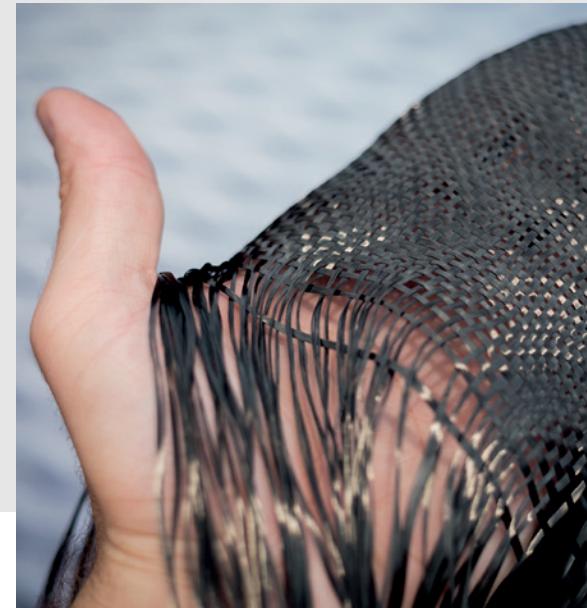

Innovation

ACTIU
UNLIMITED

There is room for both innovation and art in communal spaces. Proof of this is Karbon, **the carbon fibre chair designed by ITEM DesignWorks** and marketed by Actiu Unlimited, the new Actiu brand that was created to create iconic and unmistakable pieces.

Karbon is not only a piece of design and art with a marked timeless character, it is also a productive challenge and an **innovation in the use of materials** for new spaces. Its timeless design, marked by the seduction of its shapes, its impeccable ergonomics as well as being warm, ultralight and functional, this piece add a unique personality to any spaces it is used in.

A building built on strong Mediterranean pillars

We have rehabilitated La Venta so that it continues to do what it always did: **connect people**. A sustainable architecture project for hosting exhibitions, conferences and trainings in order to keep the spirit of our land alive: the spirit of professionals, artists and entrepreneurs who just need a place to meet and make their energy flow.

Valencia named World Design Capital® 2022

The World Design Organization (WDO)[®] announced that Valencia (Spain) has been named World Design Capital[®](WDC) 2022 as a result of its longstanding design legacy, which has become a leading example of a city's effective and strategic use of design on the development of public policy and its impact on industry.
