USE OUR EXPERIENCE WITH COMMON SPACES

CHECK-IN AT ACTIU

2

Communal areas are undergoing a new revolution. The way we understand work, technological innovation or even new ways of interacting have lead us to demand new spaces. **Actiu** has been designing and equipping work spaces for over fifty years. An experience that allows us to accompany our clients in the transformation of their communal spaces, with the objective of making every square metre profitable and attracting and retaining users.

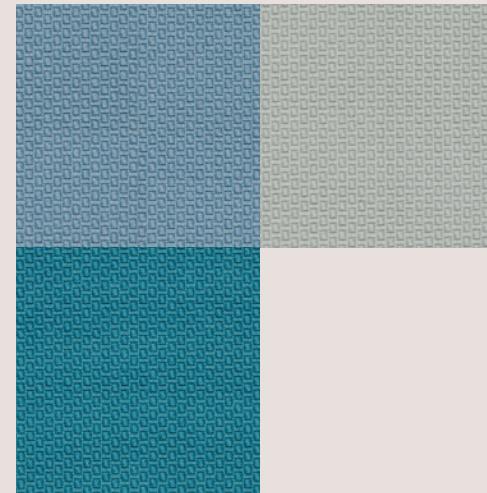

3

Where are there communal spaces?

Hotels, restaurants, hospitals, banks, airport terminals, schools, leisure centres or commercial premises, all have communal spaces capable of adapting to new needs and becoming collaborative spaces.

Multipurpose spaces, where uses blend together to create a new user experience, through a backbone of elements such as furniture, vegetation, connectivity, comfort, light, colours or textures. New spaces for new uses.

6

LOBBY

BY

7

8

LOBBY

Inspired by the social areas in co-working and co-livingspaces, and becoming increasingly humanised, lobbies contribute experiences and are committed to encouraging user socialisation. In addition, they are our the first thing we see when we step into a building, one could say our cover letter.

Noom, designed by Alegre Design, is an extensive range of armchairs, chairs and benches with high customisation capacity thanks to its extensive range of structures, upholsteries, leathers and seams.

10

For years, the contract and hotel sector has been undergoing a revolution in which common areas are taking on a more prominent role.

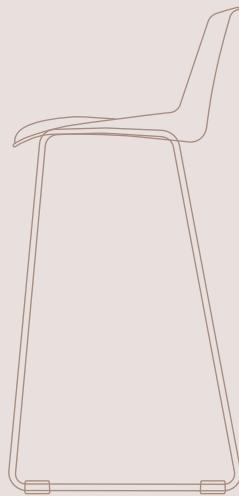

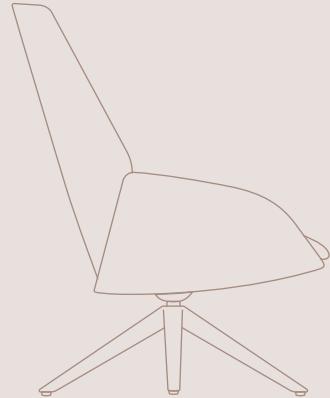

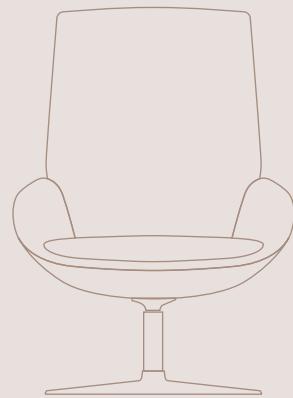

In an increasingly individualistic society, paradoxically the social aspect is of vital importance: in hotels, in addition to the best room, guests demand attractive areas where they can interact, with meeting points, work and spaces where they can socialise that make these spaces much more than just waiting areas.

Hotel receptions become spaces where you can do much more than just check-in and wait. Raisable tables with connectivity or light and versatile furniture areas facilitate communication, meeting as well as managing check-in and check-out.

11

Comfort and concentration

Comfort and privacy become key in these spaces, where we can sit and wait with a book, have a coffee, answer emails or simply make a call in maximum comfort and privacy, thanks to the proposals of connected or sound absorbing furniture.

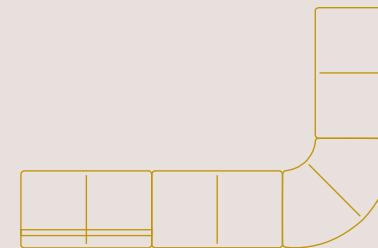

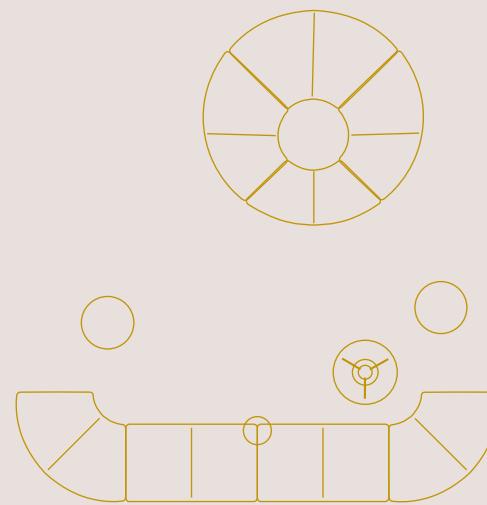

14

Bend is a modular soft seating system designed by StoneDesign that allows you to create comfortable and informal meeting points with inviting aesthetics and infinite configuration possibilities.

The open areas, with light, flexible and easily movable furniture, help to enhance social interaction, whether an impromptu encounter or where you can have a chat with the person that has accompanied you, or simply to just wait, being able to take advantage of the space to rest or talk.

15

Connect, disconnect

New social needs result in offering each user the possibility to freely choose whether they want to connect or disconnect. And have the furniture that facilitates this.

Collaboration spaces, desks

Hotels can also be spaces in which to work comfortably. Where to have that free time to be productive, draft a report or check emails. Open areas where formal and informal meetings can be held, with connectivity and collaboration spaces.

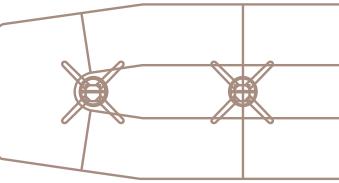

New technologies and an increasingly lighter and versatile furniture allow spaces to change their use according to their needs: from dynamic work and meeting spaces, to cosy rooms where you can meet to have a drink or coffee.

The **Power** desks, designed by ITEM Designworks, are height-adjustable by means of an electric motor system, which benefits the user, who can combine a standing or sitting position according to their needs.

22

23

Having areas where having meetings in the hall and avoiding prying eyes or interruptions in passing areas is as simple as having good sound-absorbing insulation. Small meeting areas where projects can be finished up or pending meetings can be held.

Longo Pod enables having a private space as an acoustically isolated collaborative point, thanks to the sound-absorbing properties of its materials.

Private meeting rooms for larger groups do not always need partition walls. There are other solutions that allow integrating them into open spaces while keeping them completely isolated from the rest, thus facilitating videoconferences or formal meetings.

RESTAURANT

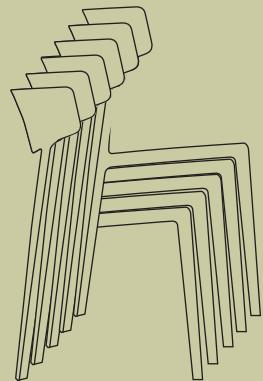

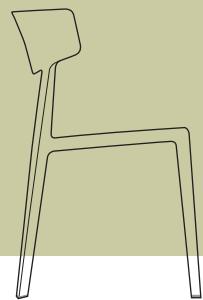

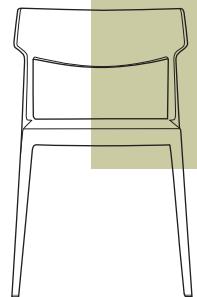

Achieving an attractive and productive environment that enhances creativity and where, in addition to enjoying a pleasant meal, it is possible to work or hold a meeting, is already at the top of the list of priorities for many restaurants.

Outdoor equipment

Restaurants also require versatile and comfortable solutions on their terraces. Products that respond to the technical and aesthetic needs of the new trends, due to their design, colour, finishes and functionality, and which, at the same time, are also resistant and easily storable.

Through highly diverse environments, ranging from reserved to communal tables, bars, seating areas or traditional dining tables, restaurants, through their equipment, respond to very different needs. And they do so using certified furniture that proves it can be used intensively or even ranges that can contribute points in the WELL or LEED certifications. Furniture without lacquers, non-polluting furnitures with no harmful substances such as formaldehyde .

LEED® Gold certified 2011 • LEED® Platinum certified 2017

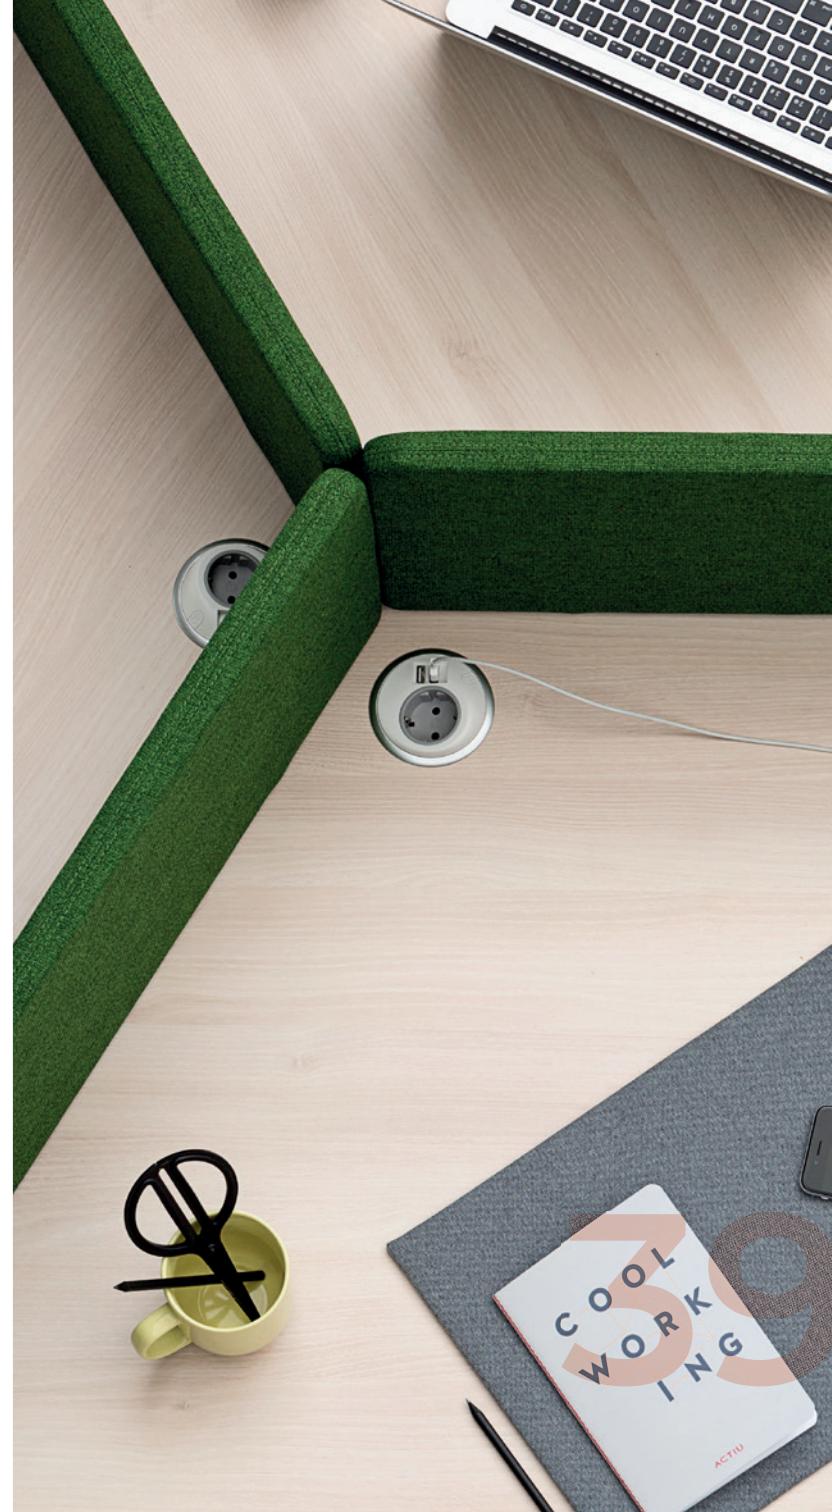

Restaurants have abandoned their homogeneous character and offer very different environments, with bars from which to send an email while having a quick snack, to shared tables that favour networking, video calling areas or spaces reserved for private meetings.

Possible configurations thanks to versatile, comfortable furniture, whose design permits adapting its finishes to the personality of each establishment and guaranteeing great comfort and durability.

Different designs of spaces, different views from the interior, but with connected furniture in all of them. Eat alone and watch a movie. Charge your device. Connectivity accompanies, it does not disturb. Furthermore, it adapts to each space, to each environment, to each aesthetic.

POL IVAL ENTE

42

Multipurpose rooms are very useful spaces. We can create hundreds of configurations for different uses simply from the furniture. From a co-working space to a conference room or a makeshift room for delivering presentations of doing sport.

MULTIPURPOSE

43

Hosting a convention, a company presentation or a team meeting can be simple if we have furniture capable of equipping a room within a few minutes. Moveable, folding, stackable and very comfortable furniture which can be easily stored and organised.

Whass is a chair designed by ITEM Designworks whose most outstanding features are its versatility and super-stackability, which allows maximum space optimisation.

46

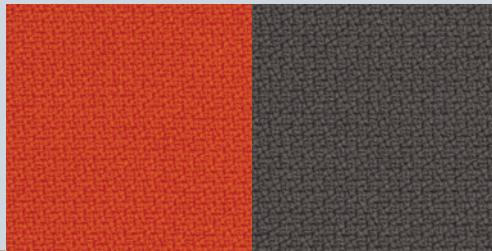

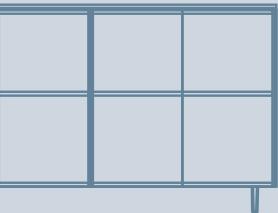

Talent is a highly versatile range of tables, designed by Alegre Design. They are mobile, foldable stackable and height-adjustable without the need for an electrical connection, which is very useful in multipurpose spaces

PEOPLE

What makes these rooms comfortable is having easily stackable and storable furniture. Comfortable ranges in its use and simple disposition that allow a room's design or layout to be changed in a few minutes.

47

Without privacy there is no socialisation. In addition to the open areas that enhance social interaction and the exchange of ideas, it is necessary to equip these spaces with solutions that favour holding meetings, working in silence or having a private conversation.

Innovation

ACTIU
UNLIMITED

There is room for both innovation and art in communal spaces. Proof of this is Karbon, the carbon fibre chair designed by ITEM DesignWorks and marketed by Actiu Unlimited, the new Actiu brand that was created to create iconic and unmistakable pieces.

Karbon is not only a piece of design and art with a marked timeless character, it is also a productive challenge and an innovation in the use of materials for new spaces. Its timeless design, marked by the seduction of its shapes, its impeccable ergonomics as well as being warm, ultralight and functional, this piece add a unique personality to any spaces it is used in.

reddot award 2019
winner

52

Karbon navigates between furniture and art, between design and functionality, to stand out in those spaces where it is installed. Senior management offices, representation areas, VIP meeting rooms... its presence in these spaces provides a unique interaction with the user and generates a unique and incomparable sophistication.

FOCUS

Quiet areas that allow you to focus all your attention one task. Small "shelters" for concentration that we can use freely and autonomously.

COLLABORATION

Pleasant, spacious, bright and well-equipped spaces that favour communication and teamwork.

SOCIALIZATION

Spaces that promote social connection through meeting areas, canteens, etc. where we can give free rein to creativity and reduce built up tension.

LARNING

Flexible and modular areas, capable of being adapted to the needs at a given time and with maximum connectivity.

CONFIDENTIALITY

Private spaces that provide solutions such as private meeting rooms, phone boxes for calls or furniture to file away confidential documentation

Cool Working

by **ACTIU**

Cool Working by Actiu is its own project methodology developed together with the Biomechanics Institute of Valencia to create environments that are as comfortable as they are efficient in workspaces. Places, which are created from fifty years' experience designing and equipping offices, so that organisations can align their transformation challenges with current needs.

The WELL Building Standard™ (WELL) Certification, which analyses the variables that affect the physical and psychological well-being of the people who occupy the space, aims to promote healthy habits and maximise the well-being of the users of the building.

We are currently in the process of confirming that we are the first industry in the world to obtain the Well Platinum V.2 Certification and that we will be one of the 17 healthiest buildings in the world. In addition, our products provide credits for obtaining said certification..

LEED® Gold certified 2011 · LEED® Platinum certified 2017

In 2011 we became the first European industry in the sector to obtain the LEED® Gold Certification, which guarantees the construction of environmentally responsible spaces and whose design allows the efficient use of natural resources.

Actiu´s Technology Park has not only updated its LEED® Certification, it has managed to go up a category, with seven more points, reaching the maximum currently awarded, LEED® Platinum.

ACTIU: 50 YEARS DESIGNING PUBLIC SPACES AND WORKSPACES.

Actiu is an industrial company working within the installation sector and specialising in the manufacture of furniture. Actiu's flexibility and productive capacity enable the company to carry out comprehensive equipment projects worldwide, providing solutions that favour the wellbeing of people.

ACTIU, 50 AÑOS DISEÑANDO ESPACIOS PÚBLICOS Y DE TRABAJO.

Actiu es una empresa con una trayectoria industrial en el sector de la instalación, especializada en la creación de mobiliario, cuya flexibilidad y capacidad productiva permite desarrollar proyectos de equipamiento global a nivel internacional aportando soluciones que ofrezcan el bienestar de las personas.

ACTIU, 50 ANS DE CONCEPTION D'ESPACES PUBLICS ET DE TRAVAIL.

Actiu est une entreprise dotée d'un parcours à caractère industriel dans le secteur de l'installation, qui se spécialise dans la création de mobilier, et dont la flexibilité et la capacité de production permettent de développer des projets d'équipement global à un niveau international, tout en apportant des solutions qui puissent offrir du bien-être aux personnes.

ACTIU, 50 JAHRE DESIGN UND PRODUKTION VON MÖBELN FÜR ÖFFENTLICHE EINRICHTUNGEN UND ARBEITSRÄUME.

Unsere ständige Forschung, Weiterentwicklung, Flexibilität und Erfahrung ermöglichen es uns, Projekte im privaten und öffentlichen Bereich der verschiedensten Sektoren auf nationaler und internationaler Ebene durchzuführen. Stillstand ist uns fremd. Uns treibt das Bedürfnis an, näher an den Menschen zu sein und Lösungsmöglichkeiten zu entwickeln, die den Endnutzern Wohlgefühl bieten.

We dream of going beyond our own immediate reality. We design to mature our desires. We walk because only our initiative changes the world and breaks new ground. We progress by being ourselves without the fear of underperforming against our own expectations and goals.

D. Vicente Berbegal Pérez

President and Founder of the Actiu Group.
