Coperture

Architettura tessile

Nell'ambito dell'architettura tessile, le coperture Sprech rappresentano il perfetto binomio tra forza e leggerezza.

Gazebo, tensostrutture, tendocoperture con standard qualitativi elevati, realizzati nel rispetto di tutte le norme di settore e provviste di certificazioni europee marchio CE).

Le coperture Sprech coniugano la resistenza delle strutture portanti, in acciaio o alluminio, alla flessibilità e la leggerezza dei materiali tessili. Caratteristiche che le rendono particolarmente adatte a inserirsi in qualunque tipo di contesto paesaggistico, con un impatto ambientale minimamente invasivo.

Coperture leggere, come i gazebo, in grado di rispondere alle esigenze del settore pubblico e privato. Gazebo di piccole dimensioni per realizzare aree coperte in giardino o gazebo per ampie superfici, in grado di riparare dagli agenti atmosferici gli spazi all'aperto di attività commerciali.

Tensostrutture e tendocoperture rispondono invece all'esigenza dell'allestimento di grandi superfici, con progetti su misura per coperture fiere, coperture di aree sportive, coperture di aree mercatali.

In the textile architecture industry, Sprech roofs perfectly blend strength and lightness.

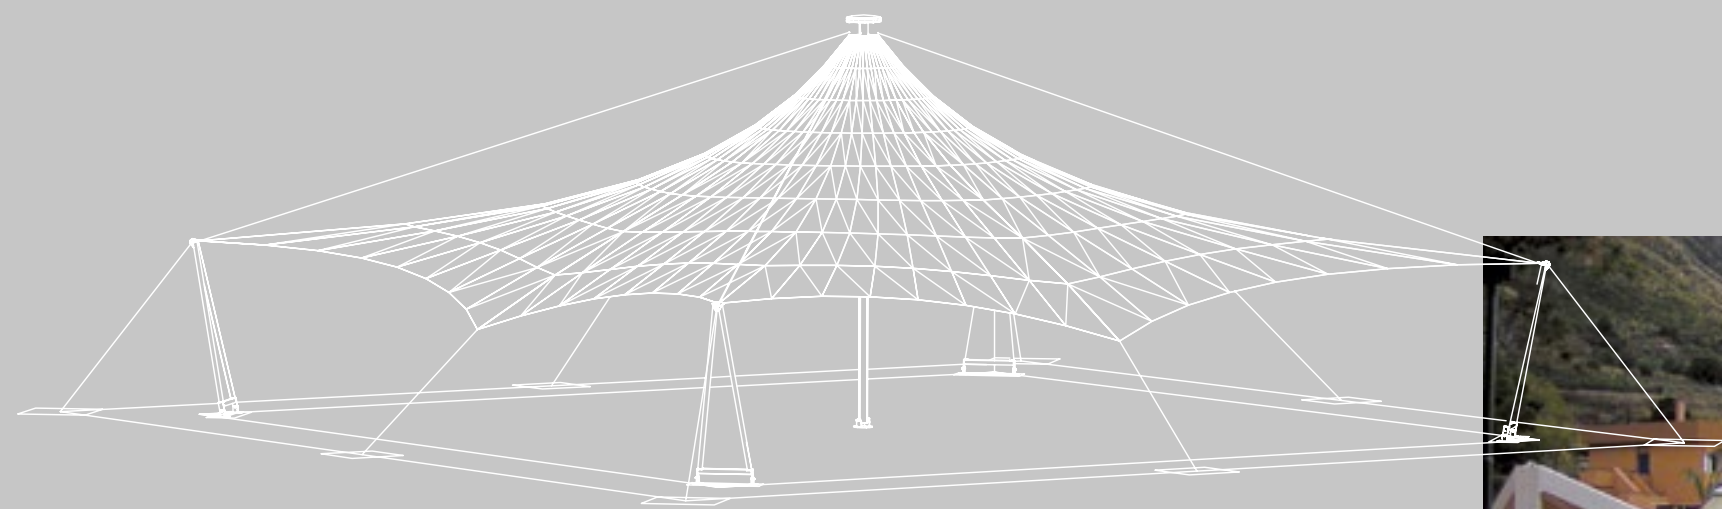

Supreme quality standard gazeboes, tensile structures, tent-roofs, made in compliance with all regulations of the industry and with (EC) marking European certificates.

Sprech roofs combine the resistance of the steel or aluminum bearing structures with the flexibility and lightness of textile materials. Features that make them particularly suitable for use in any kind of landscape context with minimally invasive environmental impact.

Light roofs, such as gazeboes, capable of meeting the needs of the public and private sector. Small gazeboes for creating sheltered areas in the garden or gazeboes for large surfaces, capable of sheltering outdoor business areas against atmospheric agents.

Tensile structures and tent roofs are instead appropriate for setting up large surfaces, with projects customized for sheltering sports areas and market areas.

Sunshine System

MODULAR SOLAR PARKING

design F. Spada

COPERTURE

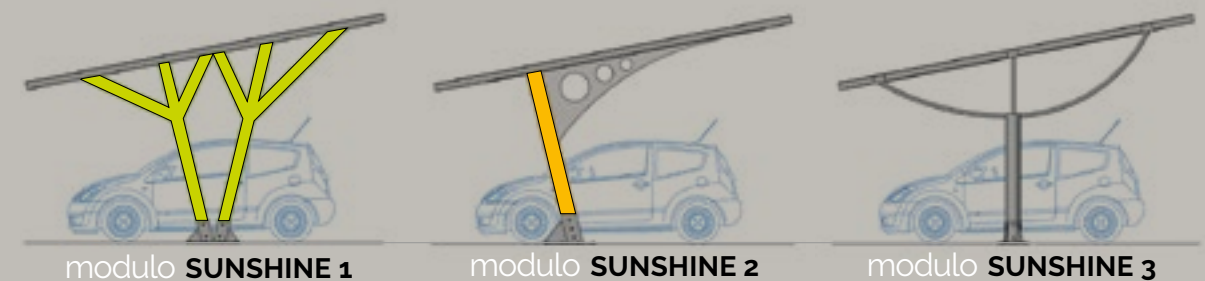

142

Sunshine: compatibilità aziendale, design, autonomia energetica. Un sistema di parcheggi modulari con copertura fotovoltaica a forte efficienza energetica. Pensati per piccoli e grandi spazi, grazie alla loro adattabilità e flessibilità strutturale i nuovi prodotti Sunshine permettono una totale integrazione con ogni tipologia di ambiente urbano e architettonico.

Natura e hi-tech, eco-sostenibilità, massima efficienza energetica per prodotti che uniscono, alla loro naturale funzionalità, stile e produzione energetica. Sunshine si integra funzionalmente con il più ampio progetto sulla mobilità sostenibile, che da tempo con partners nazionali ed internazionali. Enti di ricerca e Istituzioni pubbliche promuovono un sistema di rete elettrica integrata con nuovi eco-mezzi urbani. Un progetto per piccoli e grandi centri urbani per un reale impegno sullo sviluppo sostenibile con l'impiego di fonti di energia pulita.

Sunshine: environmentally friendly, design, energy independence. A modular parking system with photovoltaic roof and excellent energy efficiency. Designed for small and large areas, due to its adaptability and structural flexibility sunshine new products allow full integration with all types of architectural and urban environments.

Nature and hi-tech, eco-friendly, maximum energy efficiency for products which combine, with their natural functionality, style and energy production. Sunshine has for some time combined functionally with the widest sustainable mobility design, with national and international partners, research institutions and public institutions has promoted an integrated electrical network system with new eco-friendly urban transport. A design for small and large urban centres for a real commitment to sustainable development with the use of clean energy sources.
