SENSU *Collection*

SENSU

design by luca martorano & mattia albicini

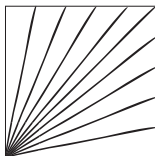

Made a Mano, come la sua terra d'origine, la Sicilia, è un testimone dell'incontro di culture, della fusione di diverse civiltà e di linguaggi artistici; raccoglie e reinterpreta influenze dell'oriente e dell'occidente, fa rivivere segni del passato e del presente. Il ventaglio pieghevole (in giapponese "Sensu") è l'oggetto che meglio di altri simboleggia questa storia. Per secoli ha affascinato tutte le culture del mondo, diventando simbolo di eleganza, leggerezza e sensualità.

La sua essenza e la sua pulizia formale vengono interpretate in questa collezione attraverso pochi tratti manuali. La forza del segno e il profondo legame con la storia riaffiorano attraverso colori decisi e materiali intimamente legati alla terra di Sicilia, come lo smalto dipinto, il bronzo fuso, il cotto manuale o la pietra lavica.

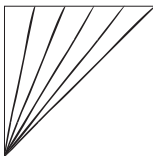

Made a Mano, just like its country of origin, Sicily, is an expression of the encounters between cultures, the fusion of different civilizations and artistic languages. It gathers and reinterprets influences from the East and West, it brings back to life traces of the past and present.

A folding fan ("Sensu" in Japanese) is the object that best embodies this heritage. It has been fascinating all cultures of the world, becoming a symbol of elegance, lightness and sensuality. Its essence and formal clearness are interpreted in this collection through few manual strokes. The power of the sign and its connection to history emerge through the use of colours and materials typical of Sicily, like coloured glaze, bronze fusion, handmade cotto or lava stone.
