forms.
Versatile
functions.**

BASIC.4

A workstation system as it should be:
focussing on the essentials. Extremely functional; yet an attractive, high-quality look. At the same time, BASIC.4 is able to fulfil a variety of requirements – and is therefore the perfect basis for efficient working.

The idea: a functional, modular workstation system that looks anything but boring despite its minimalist form. But how can you give it that distinctive look with an absolutely clear-lined design? Through its finish, for instance. That's why we've used mitring and a shadow gap as design elements, and we've added another desk with its own particular character to complement the functional design of the existing models.

DESIGN

Good style at work is that easy. Classic, down-to-earth, functional – and yet sophisticated as a result of the mitred edges and the shadow gap. The BASIC.4 system is convincing as a result of its simple elegance, always looking good in the many different styles that are available. It has optional height adjustment to adapt even better to the varying requirements of the workplace. It makes working a positive experience.

TEAMWORK

Reduced to the bare essentials – and open for everything.

The modular design of BASIC.4 makes many things possible: extending a desk, adding a second workstation, integrating special elements or linking desks. In this way the system can provide the right basis for any kind of work.

Chairs: OKAY.II product family

COMFORT

A desk for all eventualities. BASIC.4 impresses with its versatile functionality, having a wide selection of leg frames and various different tops. Furthermore, the sliding top can be removed without tools, offering you the comfort you are used to with König+Neurath office furniture.

EFFICIENCY

An eye for detail.

It's often especially the little things that make working more pleasant and efficient.

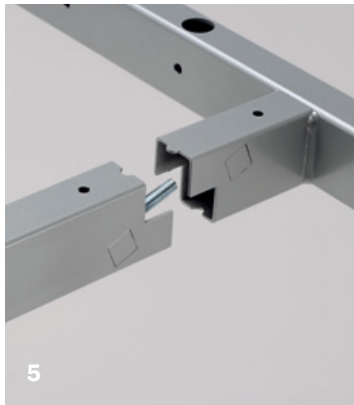

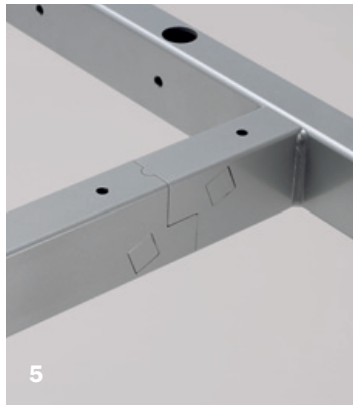

1 | High quality: mitring and shadow gap (square tube) as a visual feature with a top thickness of 13 mm, optionally available with 25 mm thickness.

2 | Standard: square tube or round tube are both available with the 13 or 25 mm top thickness.

3 | Simple: the top is fitted with clips and can be removed without any tools at all.

Flexibility is always in demand.
That's why a BASIC.4 desk is
completely orientated towards your
requirements – without a fuss.

4 | Intelligent: a system solution that can be extended in a variety of ways. Linking is only possible with the standard leg frame.
5 | Practical: the bolted leg frame is extremely stable, making assembly, reconfiguration and logistics simple.

6 | Adaptable: spring-assisted height adjustment in increments for comfortable adjustment within a range from 680 to 850 mm.
7 | Sturdy: leg frame without height adjustment with a fixed height of 720 mm.
8 | Infinitely variable: adjustable from 680 to 760 mm by means of an integral screw thread for round tube and 680 to 820 mm for square tube.

9 | Flexible: adapters for cable connections are located on the edge of the desktop.

10 | Mobile: TFT monitor swivel arm for adapters.

11 | Saves space: desk railing with rails organisable on both sides to take up organisation elements or flat screen retainers.

12 | Organiser accessories: desktop screen with fabric cover or in the form of an aluminium organiser board.

13 | Clever: Table railing alternatively with composite filling or acrylic glass panels.

So many possibilities.

BASIC.4 is a workstation system that can be used for a variety of functions.

14

15

16

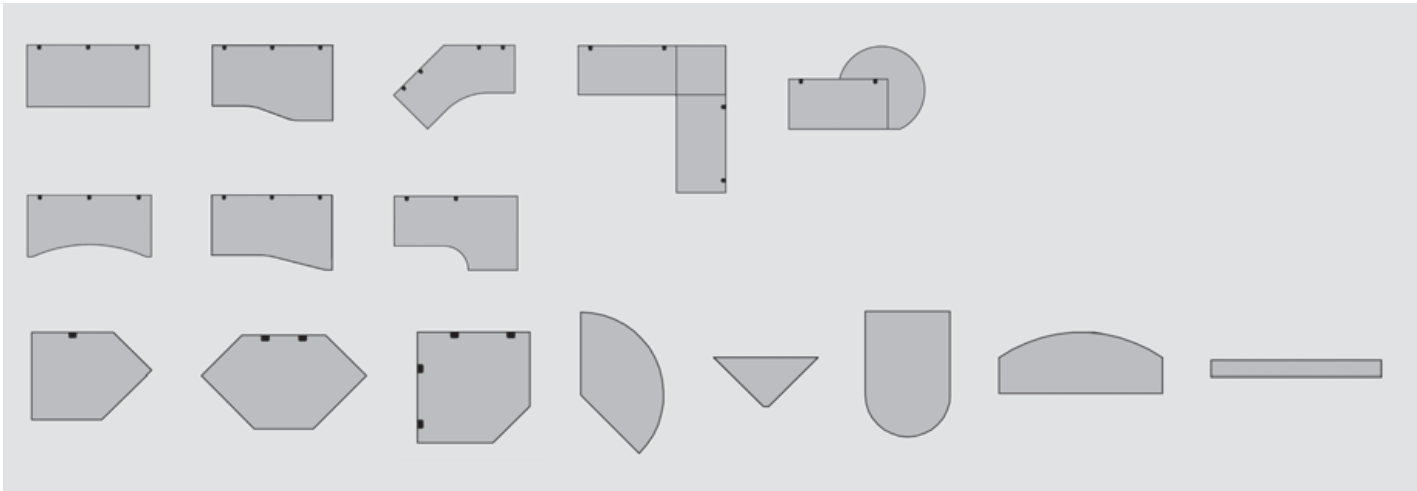

14 | Intelligent: the visitor table is also ideal for use as a sitting/standing solution at your workstation.

15 | Fills the space: BASIC.4 is linkable, and there is also a visitor extension available for the standard leg frame.

16 | Communication-orientated: perfect for meeting situations, seminars, trainings and also as a reception counter.

Product overview

Leg frame		
	Bolted four-legged frame, round or square tube, optionally on castors	•
	Bolted four-legged frame with square tube, mitred, with floating top	•
Dimensions		
Widths	2,200 mm (freeform only), 2,000 mm, 1,800 mm, 1,600 mm, 1,200 mm, 1,000 mm, 800 mm	•
Depths	1,000 mm, 900 mm, 800 mm, 600 mm	•
Height adjustment		
Fixed	720 mm	•
Incremental	Can be adjusted in 20 mm increments between 680 and 850 mm with the Allen key supplied	○
