**The design  
benchmark.**  
Systematic  
and functional.

---

DO IT.4

**4 legs, a single thought:** DO IT.4, the system for desking, benching and storage solutions. With a clear design and practical functions.

**The idea:** an office furniture system which radiates lightness thanks to its modern, minimalist design. And which is both versatile and functional. The realisation: the main design feature is a top with a shadow gap, which seems to float – above a T-section or rectangular frame on desks and benches, and above the carcass on storage. Accessories and cable management ensure functionality.

**Concentrating on the essentials.** The 75 x 30 mm rectangular frame has mitred welds, and the top with its shadow-gap appears light and elegant. Thanks to its restrained look, DO IT.4 fits into any office design – but is by no means inconspicuous. The DO IT caddy, a mobile filing and storage unit, is the perfect complement, in both appearance and function.

**All clear in open space.** It is not just the look of DO IT.4 that works well in an open-plan office, but also its versatility. Today structures are flexible: in one place meeting space is needed, in another desks. The DO IT.4 bench can be used and networked for different applications: it is just as suitable for meetings, brainstorming and teamwork as it is for desk work.

**Privacy included.** Individual workstations in an open office, even in a restricted space? No problem with a DO IT.4 bench. Central and lateral screens are quick to fit, and they define the individual workstations – but without harming the appearance or the team spirit. Everyone and everything has its place, for agreeable working in a cooperative atmosphere.

**1 | Tidy:** the screen with tool-rails keeps the workspace clear.

**2 | Simple:** the clamp-on side screens are easy to fit.

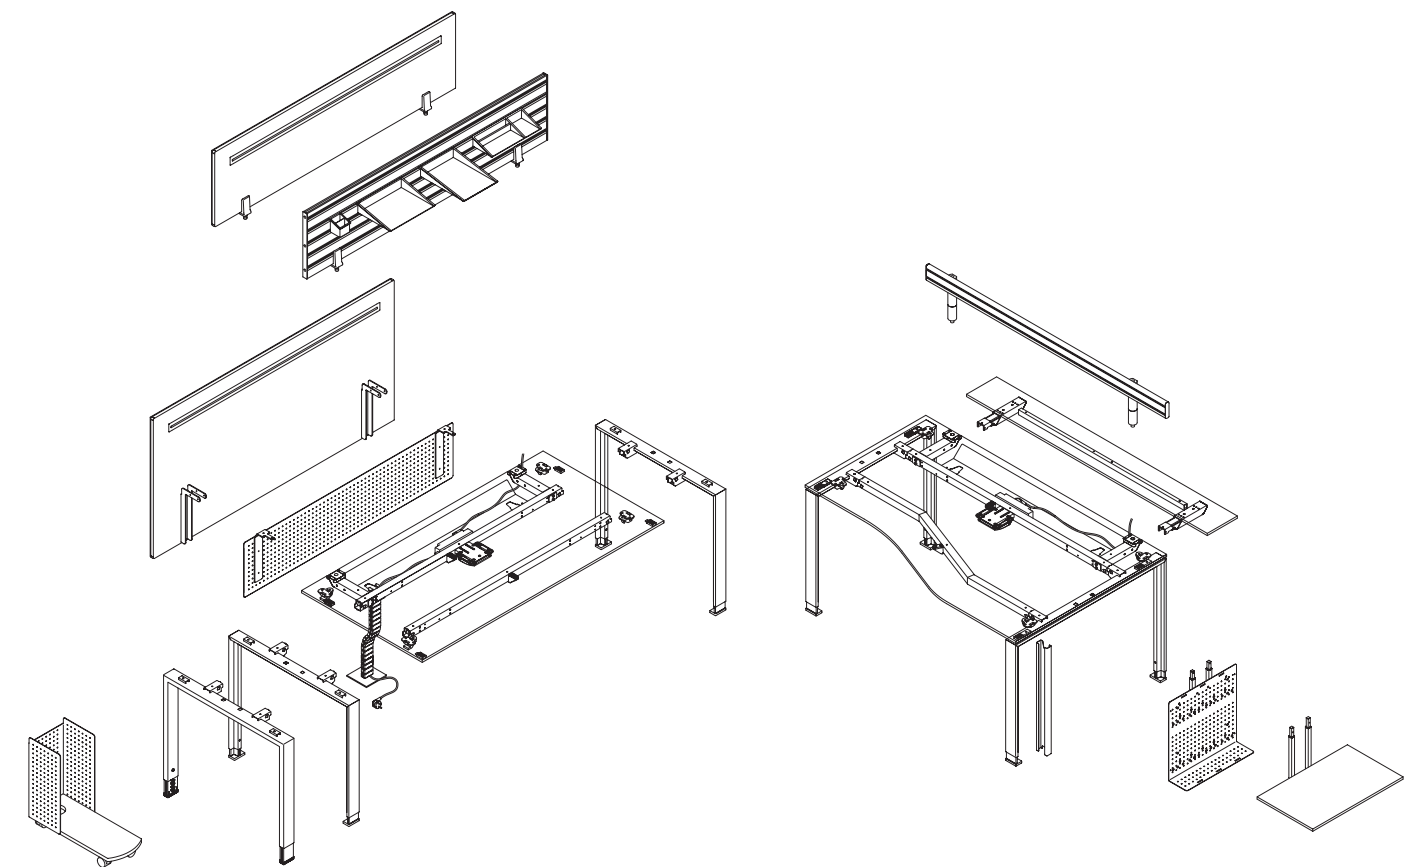

**One desk, many possibilities.** Simply everything an office could need.

Overview of tops

**There is always room for concentrated work.** The individual workstations can be linked together, e.g. against the wall of an open-plan space: efficient use is therefore made of all the space available, and the consistent design is maintained. The individual workstations also have the choice of both frame options: T-profile and 75 x 30 mm rectangular tube.

**Plenty of function in a little space:**  
a combined meeting table and desking  
set-up, which always fits.

# The D0 IT.4 single workstation.

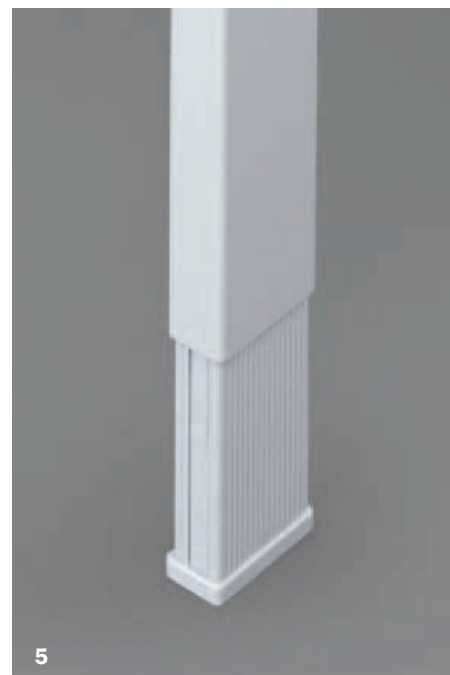

Individual, elegant and flexible.

**3 | Elegant:** the consistent use of the shadow gap gives the desks a light appearance.

**4 | Adjustable:** the height can be set anywhere between 680 and 820 mm.

**5 | Rectilinear:** the frame in 75 x 30 mm rectangular tube.

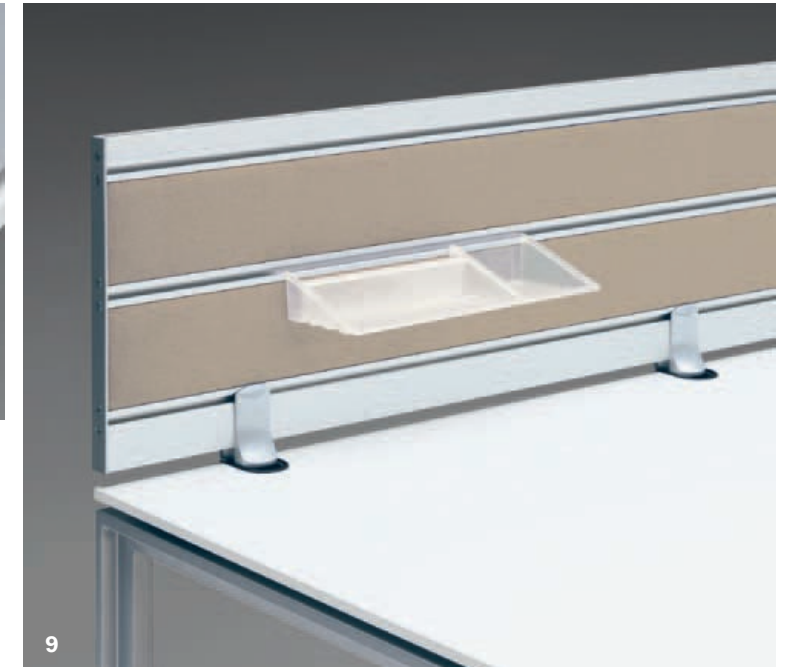

**6 | Functional:** the desk-top sockets for power and internet connections.

**7 | Practical:** sliding clips allow tops to be fitted without tools.

**8 | Accessible:** the sliding top gives good access to the adaptors and cable tray.

**9 | Simple:** the desk-mounted screen with a tool rail to hold a range of accessories.

**The DO IT.4 bench.** Clear design,  
and a functionality which has been  
well thought through.

**10 | Flexible:** delivered as a “flat pack”, simple to set up, quick to reconfigure.

- 11 | Space saving:** flat screens are easy to fit to the monitor arm.
- 12 | Tidy:** the umbilical keeps the wiring under control.
- 13 | Useful:** the desk-mounted printer tray saves the user from long walks.
- 14 | Variable:** the CPU holders can be fitted inside or outside the leg frame.
- 15 | Tough:** the 25 mm top in MFC.
- 16 | Calming:** the floor-mounted screens are quick to put in position when required.

# Product overview

		DO IT.4 BENCH	DO IT.4 SINGLE WORKSTATION
Base/frame			
	T-profile steel tube, bolted	●	○
