abetterplace

2018

Nola use design innovation to challenge the senses, adding tactile textures, eye-catching colours and soft contours to the urban environment. Our products are found in places where urban design matters, where bold shapes and striking colours make a difference to a bleak backdrop. We go to places where public design can stir emotions, spark new dialogues and make individuals feel part of the surroundings. In places like these, Nola's products bring diverse communities together as one.

In 2018, as in previous years, Nola showcase designs by young creatives alongside new products (and fresh versions of existing products) from established designers. Functional, durable and completely contemporary, these products can make public spaces more beautiful. As we join forces with architects, contractors, urban planners and designers, we hope to inspire A BETTER PLACE for all.

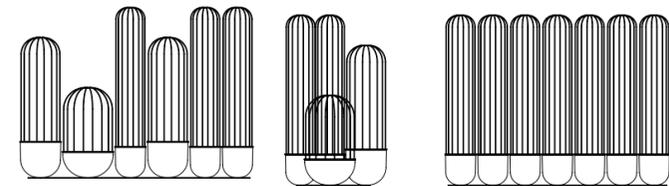

For almost 40 years, Nola Industrier has developed and honed ideas, products and visions for urban spaces. Nola collaborates with Sweden's leading designers and architects from concept to manufacture, with sustainable production taking place exclusively in Sweden.

CACTI

Design: Anki Gneib

Mexican artist Frida Kahlo planted cacti in the garden to create a living barrier. Inspired by Kahlo's approach, Nola's new planters are made with metal trellises that mimic the shapes and proportions of cacti. The planters bring nature indoors, adding decorative features or dividing the space as they dampen noise and improve air quality. The planters are available in three different sizes with trellises made in three different heights. Cacti planters can refresh everyday environments with plant life and vivid colours.

Cacti group 1
Width: 231 cm
Height: 171 cm
Depth: 51 cm

Cacti group 2
Width: 101 cm
Height: 171 cm
Depth: 83 cm

Cacti group 3
Width: 223 cm
Height: 171 cm
Depth: 31 cm

SMALL/BIG BASKET

Design: Ola Gillgren

Basket's open, mesh-like structure provides the supersize comfort of a generous armchair, while being lighter and brighter than a solid seat. The sides slope upwards from the seat to form a spacious backrest that makes it comfortable to recline in. Rain and water run off without leaving any lasting marks, making the seat virtually maintenance-free. Light in weight and contemporary in style.

Basket
Width: 134 cm
Height: 121 cm
Depth: 116 cm

GARD

Design: Odin Brange Sollie

With its open construction and contemporary profile, few would guess that this sleek bench has a long history. Based on the Swedish spindle-back bench, Gard transforms an iconic shape into a statement-making design. The traditional wooden parts have been replaced by robust metal wires that form the backrest and legs. The wooden seat is crafted from smooth lengths of Accoya. Gard is an all-weather design suited to a wide variety of indoor and outdoor settings.

Gard backed bench
Width: 125 cm
Height: 142 cm
Depth: 60 cm

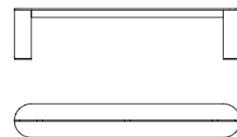

URBAN PLAY

Design: Henrik Sørig Thomsen

Urban play represents the idea of an flexible setting for spending time together in the urban space, little breaks to check our phones, sit together, or play. Urban furniture has to live up to certain key requirements, being able to weather both winter and summer, being strong and sturdy and in high quality design. Urban play is a family of furnitures that can be joined together in ways that match the infrastructure. Easy to pass with the round edges and contemporary style to slide into the urban space.

Height: 45 cm
Depth: 30 cm

Urban Play table
Width: 200 cm
Height: 75 cm
Depth: 30 cm

HIGH SWIVEL CHAIR

Design: Mats Aldén

This swivel chair strikes a perfect balance between functionality and form. The seat and backrest are crafted in a single expression that extends from the base to the full height of the chair. The seat is created by slats of oiled oak attached to side panels made from laser-cut steel. The chair's slatted construction and robust structure create an all-weather ergonomic seat accessible to a wide range of body types and abilities. The High swivel chair is a new addition to the Low/High furniture group and comes with our without armrests.

Width: 68 cm
Height: 104 cm
Depth: 67 cm

LOJ
Design: Thomas Bernstrand

Designed with relaxation in mind, this lounge is designed with comfort and flexibility rarely seen in public seating. The armchair's seat and backrest are crafted from flexible wooden slats that cradle the body. Loj's backrest is fully adjustable, alternating between three reclining positions. The lounge provides a perfect place to soak up the summer sunshine, and is robust enough to remain outdoors year-round.

Loj sunchair
Width: 70cm
Height: 96 cm
Depth: 88 cm

PLOY
Design: Thomas Bernstrand

Slick work surfaces and smooth seats come together spectacularly in this innovative design, which combines them in a single product. Power chargers are conveniently pre-installed on the desktop for charging mobiles and computers. Ploy forms a practical seating arrangement suitable for work, meetings, coffee breaks and everyday interactions.

Ploy bench/table
Width: 150 cm
Height: 72/43 cm
Depth: 88 cm

GRILL

Design: Emma Hanell & Johan Hoof

Community grills bring people together to enjoy mealtimes in the open air. This heavy-duty grill is made for year-round use. The holder in the fire-resistant worktop is sized to safely contain a disposable charcoal grill. The base contains a fireproof receptacle where the disposable grill can be discarded. A unique design with barbecue facilities on the surface and fireproof waste disposal in the base, this community grill can transform any park or quayside into the ultimate picnic destination.

Community grill
Width: 70 cm
Height: 43 cm
Depth: 96x88

LISEBERG

Design: Nola

Originally designed to meet the needs of a busy amusement park, this classic litterbin is made with generous proportions and easy access for all. Liseberg's 180-litre container is sized for use in busy areas where crowds of people form and food and beverage waste accumulates. The openings are generously proportioned and positioned within easy reach of wheelchair users and small children. Made with an inner container that swings outwards to empty, removing litter and replacing bin liners couldn't be easier.

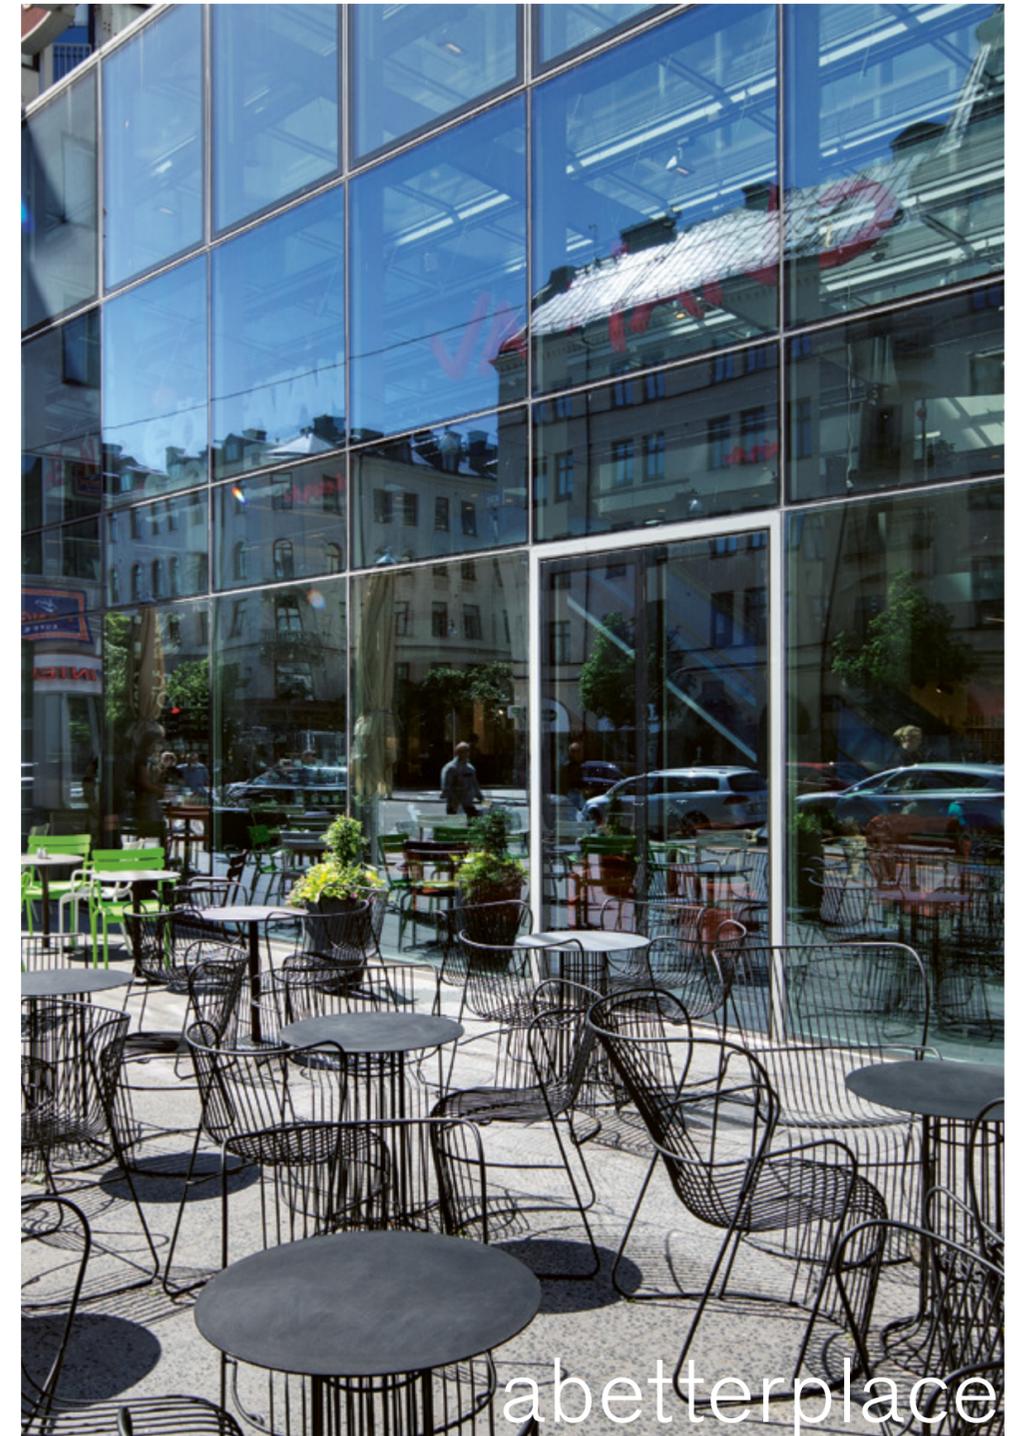

Liseberg litterbin
Height: 135 cm
Ø: 88 cm
