ASPIRAZIONE / SUCTION

**CONNECTIVITY**

Con la crescente diffusione del mondo IoT, è diventata ormai prassi comune governare i propri dispositivi grazie alla connessione wi-fi. Oggi possiamo comandare la nostra cappa tramite l'app Elica dedicata o attraverso il controllo vocale per avviarla o spegnerla, regolarne la potenza aspirante o l'intensità e il colore della luce, semplicemente con un clic o con il supporto dei più diffusi vocal assistant. L'app diventa inoltre un utile strumento per la manutenzione del prodotto, grazie a periodiche notifiche che ne segnalano lo stato, eventuali operazioni di pulizia necessarie o l'esigenza di sostituire i filtri.

With the increasing widespread diffusion of the IoT world, it has become common practice to manage all your devices with a wi-fi connection. We can now control our extraction hood with the dedicated Elica app or through voice control to turn it on or off, adjust the extraction speed or intensity and the colour of the light, simply with a click or the help of the most popular vocal assistants. The app also becomes a useful tool for maintaining the product, thanks to periodic notifications which report on its status, any cleaning operations required or filters that need replacing.

**SPECIAL MATERIAL**

Nella ricerca di prodotti belli da esibire ma funzionali nell'utilizzo quotidiano, i materiali giocano un ruolo chiave. Possono fare la differenza sia in termini di estetica, diventando protagonisti o scomparendo tra i mobili, che di facilità di manutenzione nel tempo. Fondamentali nel processo di innovazione, sono alla base di un look accattivante e di un'esperienza d'uso appagante. Elica seleziona materiali in cui durevolezza, facilità di pulizia e impatto estetico sono combinati in perfetto equilibrio. L'ampia selezione di finiture disponibili offre la massima libertà di scelta per ogni tipo di ambiente.

In the quest for attractive products to show off but which have a functional, everyday use, materials play a key role. They can make the difference by becoming an attractive signature feature or by disappearing into the background and by being easy to maintain in the long term. They are fundamental in the process of innovation, forming the basis of an attractive look and a fulfilling user experience. Elica selects materials in which sturdiness, easy cleaning and aesthetic impact are combined in a perfect balance. The wide selection of finishes available offers maximum freedom of choice whatever the setting.

**BACK ASPIRATION**

Si ampliano le possibilità di installazione della tua cappa. Sui modelli dotati di questa funzione, è possibile ruotare il convogliatore e collegare direttamente la cappa con l'uscita nel muro posteriore oppure in altri modelli la particolare architettura del prodotto consente di realizzare l'uscita a muro tramite una curva a 90 gradi del tubo. In questo modo si può contare sulla massima aspirazione, preservando l'estetica originale del prodotto, che non verrà modificata da tubi o camini aggiuntivi a vista.

There are now more ways of installing your extraction hood. On models with this function, it is possible to rotate the conveyor and directly connected the hood with the outlet in the wall behind it or in other models, the special architecture of the product allows the wall outlet to be created with a 90-degree elbow pipe. Thus, you can rely on maximum extraction while preserving the original outward appearance of the product which will not be modified by pipes or additional visible flues.

**TOTAL INTEGRATION**

Sempre più diffusa nelle cucine di oggi, la tendenza del total look garantisce un design omogeneo, uniforme e lineare rispetto allo spazio. I prodotti contrassegnati con Total Integration sono stati disegnati per essere integrati perfettamente nella cucina, mantenendo l'armonia dell'ambiente circostante.

The total look trend is becoming increasingly popular in kitchens now, guaranteeing a uniform, linear design with respect to the space. The Total Integration products have been designed to be seamlessly integrated into the kitchen whilst maintaining harmony with the surroundings.

ASPIRAZIONE / SUCTION

**COMFORT SILENCE**

Con la diffusa tendenza di progettare la cucina a vista sul living, diventa importante poter contare su cappe che abbiano una grande capacità aspirante e che non siano rumorose, per non risultare invasive nell'ambiente circostante. Grazie alla tecnologia Comfort Silence il livello acustico delle cappe Elica alla massima velocità di aspirazione non disturba né interferisce con la conversazione tra i presenti.

With the widespread tendency to design open-plan kitchens joined to the living room, it has become important to be able to rely on hoods with a greater extraction capability which are quieter, so they do not intrude on the surroundings. Thanks to Comfort Silence, the sound level of Elica extraction hoods at maximum extraction speed does not disturb or interfere with the conversation of those present.

**SUPER EASY INSTALLATION**

Con l'esclusivo sistema Elica, il montaggio avviene in totale sicurezza e in pochissimi passaggi, salvaguardando l'estetica del prodotto e dello spazio in cui viene posizionato. Dopo il bloccaggio automatico del prodotto in sede, è possibile regolare al millimetro i punti di fissaggio, preservando il design lineare della cucina e assicurando la perfetta integrazione della cappa nell'ambiente. Una soluzione facile, robusta e sicura.

With the exclusive Elica system, installation can be done in total safety in just a few steps, safeguarding the look of the product and the space in which it is positioned. After the hood is automatically locked in position, the fastening points can be finely adjusted to preserve the linear design of the kitchen and ensure perfect integration of the hood in the room. A simple, hard-wearing and safe solution.

**LONG LIFE FILTER**

Per assicurare una resa ottimale della cappa e la sua durabilità nel tempo bisogna sostituire i filtri tradizionali ogni 3/6 mesi. Per semplificare le attività di manutenzione Elica ha progettato l'innovativo filtro odore rigenerabile Long Life che consente una durata fino a 3 anni. È sufficiente lavarlo in acqua calda e sapone neutro o in lavastoviglie a 65° e asciugarlo in forno a 100° per 10 minuti ogni 2 mesi, per averlo sempre come nuovo. Il livello di efficienza si aggira intorno a 60%.

To ensure the best performance and long-term duration of your hood, the traditional filters must be replaced every 3-6 months. To simplify the maintenance operations, Elica has designed the innovative, regenerable Long Life odour filter which lasts up to three years. Just wash it with hot water and neutral soap or in the dishwasher at 65° and dry it in the oven at 100° for ten minutes every two months to keeping it looking good as new. The level of efficiency is about 60%.

**LONG LIFE FILTER ++**

Long Life Filter ++ è l'innovativo filtro studiato da Elica per la massima prestazione. Questo filtro garantisce un'efficienza di filtraggio che supera l'80%, rispetto a una media del mercato che si ferma al 60%. Quest tipo di filtro odori ha la capacità di rigenerarsi e di durare fino ad un massimo di 3 anni, evitando così frequenti sostituzioni e sprechi. Per mantenere tali caratteristiche, il filtro deve essere rigenerato ogni 2 o 3 mesi, seguendo una semplice procedura per averlo sempre come nuovo. La soluzione perfetta per chi si cimenta in cottura impegnative e prolungate.

Long Life Filter ++ is the innovative filter studied by Elica for maximum performance. This filter guarantees a filtering efficiency of more than 80%, as compared to the market average, which only reaches 60%. This type of odour filter can be regenerated and lasts for up to a maximum of three years, thus avoiding frequent and wasteful replacements. In order to preserve these characteristics, the filter must be regenerated every 2 or 3 months according to a simple procedure, which maintains it good as new. The perfect solution if you like trying out challenging dishes which take a long time to cook.

ASPIRAZIONE / SUCTION

**MULTI-D CAPTURE**

Per chi in cucina si cimenta in preparazioni importanti e ha bisogno di un'aspirazione altamente efficiente, Elica ha studiato la soluzione Multi-d capture. L'aspirazione è distribuita in più aree per garantire una migliore captazione dei fumi. Il sistema fluidodinamico permette di incrementare la velocità di aspirazione grazie ad un opportuno dimensionamento delle superfici di passaggio dell'aria. Ciò garantisce un'alta efficienza di captazione dei fumi di cottura attraverso un aumento della depressione lungo tutto il perimetro del prodotto.

If you like a challenge when cooking and need highly efficient extraction capabilities, Elica has developed the Multi-d capture solution. The extraction is divided over multiple areas to guarantee the best fume capture capability. The fluid dynamic system allows you to increase the extraction speed by suitably sizing the surfaces through which the air passes. This guarantees a high cooking fume-capture efficiency through an increase in the negative pressure along the outside of the product.

**DIM LIGHT**

La luce in cucina, così come in ogni ambiente domestico, rappresenta una leva progettuale importante per vivere al meglio i propri spazi. Modulare la giusta intensità diventa fondamentale per ricreare l'atmosfera desiderata. Ecco perché Elica ha progettato la funzione Dim Light, che permette di regolare la potenza luminosa della propria cappa attraverso un semplice comando. Luce al massimo per avere la migliore visibilità sul piano da lavoro, o soffusa per goderci momenti di relax.

The light in the kitchen, as in any room, is a key design feature for improving the home living experience. Achieving the right intensity becomes fundamental in creating the desired atmosphere. Which is why Elica has designed the Dim light function which allows you to adjust the intensity of your extraction hood light with a simple control. Maximum light for the best visibility on the worktop or dimmed when relaxing.

**TUNE WHITE**

L'illuminazione in casa non può essere statica, perché a seconda dei momenti della giornata, abbiamo bisogno di toni di luce differenti: una luce fredda è ottimale per cucinare, così come una calda ricrea un mood più rilassato. La funzione Tune White permette di regolare il colore dei led dal bianco caldo (2400 k) fino al bianco freddo (5000 k). Con Tune White è possibile allineare il colore della luce proveniente dalla cappa con il resto delle luci presenti nell'ambiente, per una atmosfera uniforme in tutta la stanza.

Lighting in the home should not be static because different tones of light are called for depending on the time of day: cool light is excellent for cooking while warm light creates a more relaxing mood. The Tune White function allows you adjust the LED colour from warm white (2400 k) up to cool white (5000 k). With Tune White, you can also align the colour of the light from the hood with the rest of the lights in the room for a uniform atmosphere throughout.

ASPIRAZIONE / SUCTION

**EASY MAINTENANCE**

Mantenere la propria cappa pulita non solo garantisce la massima igiene in cucina, ma assicura una vita più lunga al prodotto. I modelli Elica sono progettati con materiali e finiture che rendono le operazioni di manutenzione immediate. Tutte le componenti, come i filtri grassi e odori, sono facilmente raggiungibili e rimovibili, per poterli lavare o sostituire velocemente.

Keeping your hood clean not only ensures maximum hygiene in the kitchen but also long life for the product. The Elica models are designed with materials and finishes for instant maintenance operations. All the components, such as the grease and odour filters, can be easily accessed and removed so they can be washed or rapidly replaced.

**AIRMATIC**

Oggi grazie a Airmatic il tuo piano aspirante è completamente automatico. Il suo sensore intelligente è in grado di distinguere la qualità dei fumi e i tipi di cottura e di abbinare queste informazioni al numero e alla potenza delle zone a induzione utilizzate. Anche quando la cottura è terminata il sistema si adatta autonomamente diminuendo gradualmente l'aspirazione e eliminando i vapori e gli odori residui. Questa tecnologia avanzata rappresenta un'eccellenza nel mondo dei piani cottura aspiranti e consente di ottenere il miglior equilibrio tra silenzio, potenza ed efficienza energetica.

Now, thanks to Airmatic, your extraction hob area is completely automatic. The smart sensor can distinguish between the quality of the fumes and type of cooking and combine this information with the number and power of the induction hob areas being used. Even when the hob is switched off, the system automatically adapts by gradually decreasing extraction and eliminating any residual fumes and odours. This advanced technology is top of the range in the world of extractor hobs and allows you to obtain the best balance between silence, power and energy efficiency.

**AUTOCAPTURE**

Con Autocapture non dovrai preoccuparti di regolare l'aspirazione in base alle cotture avviate, ma sarà la cappa stessa a indentificare le zone cottura attive e impostare di conseguenza la potenza, tenendo in considerazione il miglior equilibrio tra silenzio, potenza ed efficienza energetica. E a cottura ultimata, il sistema diminuirà gradualmente la velocità, in modo da eliminare i vapori e gli odori residui. Il piano cottura aspirante diventa ancora più funzionale e pratico, per cotture perfette e aspirazione ottimale.

With Autocapture, you will not have to worry about adjusting extraction based on what you are cooking. The hood will identify the cooking areas that are active and set the power accordingly, finding the best balance between silence, power and energy efficiency. And when you have finished cooking, the system gradually decreases the speed, eliminating any residual fumes and odours. The extraction hob becomes even more functional and practical for perfect cooking and excellent extraction.

COTTURA / COOKING

**MULTI FLEXI SPACE**

Tante pentole grandi sul fuoco insieme? Con il sistema Multi Flexi Space puoi contare su un maggiore spazio in lunghezza e in larghezza per i tuoi tegami. Puoi far scivolare le padelle da un fuoco all'altro senza sollevarle, grazie alle griglie a croce chiusa che ricreano una superficie piatta e continua. Un pratico piano di appoggio in ghisa consente di avere sempre a portata di mano tutto quello di cui hai bisogno.

Lots of large pans on the stove together? With the Multi Flex Space system, you have more space available both in length and width when using large pots. You can slide the pans from one ring to another without lifting them thanks to the closed cross grids which create a flat, continuous surface. A practical cast iron worktop ensures that everything you need is always at hand.

**DUAL BURNER**

Con Dual Burner, che la tua pentola sia mini o maxi, non sarà più un problema. L'innovativo bruciatore è dotato di due corone concentriche indipendenti tra loro, risultando così perfetto sia per una piccola moka che per un ampio tegame.

With Dual Burner, having small or large pans is not a problem. The innovative burner features a double crown with independent ignition of both burners, so perfect for both a small mocha coffee and a big pan.

**BRIDGE ZONE**

Quando si cucina utilizzando pentole allungate o di grande dimensioni, il rischio è che si disperda progressivamente il calore sulla loro superficie, dal centro verso l'esterno. La funzione Bridge Zone risolve il problema, collegando due aree di cottura in un'unica zona dalle dimensioni più grandi. Stesso livello di potenza, temperatura uniforme e costante per la migliore resa dei tuoi piatti.

When you cook using longer or large pans, there is a risk that the heat is progressively dispersed on the surface of the pan from the centre outwards. The Bridge Zone function solves the problem by joining two cooking areas into one single larger area. With the same power, uniform and constant temperature for the best result of your dishes.

**CHILD LOCK**

Per chi ha bambini in casa la funzione Child Lock è preziosa per evitare accensioni accidentali delle zone cottura o dell'aspirazione. La funzione può essere attivata a prodotto acceso, ma con le aree cottura e l'aspirazione spente.

If you have children in your home, the Child Lock function is invaluable for ensuring the cooking or extraction areas are not accidentally switched on. The function can be enabled when the product is switched on but the cooking areas and extraction are switched off.

**TEMPERATURE MANAGER**

Nella nostra quotidianità realizziamo spesso ricette che caratterizzano la nostra cucina e che prevedono tipologie di cottura standard. La funzione Temperature Manager è un'alleata preziosa per ottimizzare i tempi: sarà sufficiente avviare uno dei 3 programmi preimpostati (42,72, 92 gradi) con un semplice e intuitivo tasto e avviare la cottura dei tuoi piatti più delicati, come salse o mousse, riscaldare piatti già pronti, o bollire l'acqua. Nessuno spreco di tempo e massima resa.

On a daily basis, we often prepare our own signature recipes as well as standard dishes. The Temperature Manager function is an excellent tool for optimising times. Just start one of the three pre-set programs (42, 72 or 92 degrees) with a simple, intuitive button and start cooking your more delicate dishes, such as mousses or sauces, reheating dishes or boiling water. No wasting of time and maximum efficiency.

COTTURA / COOKING

**KEEP WARM**

Per chi prepara pranzo e cena in un'unica volta, per chi trova invece il piatto già pronto solo da riscaldare o per chi ha un imprevisto e ritarda il rientro a casa, Elica propone la pratica funzione Keep Warm, che mantiene in caldo le pietanze appena cucinate. È possibile attivare Keep Warm su ogni zona di cottura.

If you make lunch and dinner in one go, if you just need to reheat a dish or if an unexpected event means you are late getting home, Elica offers the practical Keep Warm function which keeps dishes that have just been cooked warm. The Keep Warm function can be enabled for any cooking area.

**TIMER**

Dimenticati del tempo di cottura dei piatti attivando il timer. Basterà impostare i minuti e far partire il countdown, al termine del quale la zona cottura si spegnerà automaticamente avvisandoti con un segnale acustico. È possibile impostare timer indipendenti su più zone contemporaneamente tramite il telecomando touch.

Forget about cooking times by turning on the timer. Just set the minutes and start the countdown. At the end, the cooking area will be automatically switched off and a beeper will sound. You can set independent timers on more than one area at the same time with the touch remote control.

**POWER LIMITATION**

Con Power Limitation imposti, in fase di installazione, il limite di potenza massima assorbita dal prodotto, assicurandoti così di non superare mai la soglia scelta. Cucinare al meglio senza interruzioni e in totale sicurezza.

If Power Limitation is set during installation, the maximum power absorbed by the product is limited, thus ensuring that you never exceed the pre-set limit. So you can cook efficiently with no interruptions in total safety.

**STOP&GO**

Capita a volte che ci si debba allontanare improvvisamente dalla cucina proprio nel bel mezzo della preparazione di una ricetta, interrompendo la cottura dei cibi. In questo caso attivando la funzione Stop&Go si spegneranno tutte le zone in un unico gesto, salvaguardando le ricette in corso.

Sometimes you need to unexpectedly leave the kitchen in the middle of preparing a recipe, interrupting the cooking. In this case, if you enable the Stop&Go function, all the active areas can be switched off with a single gesture, saving whatever is being cooked.

**PAUSE**

Con Pause&Recall potrai spegnere in un solo gesto tutte le zone cottura in funzione, per poi riattivarle con un semplice tasto alla stessa potenza precedentemente impostata, coniugando sicurezza, risultato di cottura e gestione multi-tasking.

With Pause&Recall, you can switch off all the cooking areas with one single gesture and then, restart them with a simple press of a button at the same previously set power, combining safety, cooking result and multi-tasking management.

**POT DETECTOR**

Sulla superficie del piano a induzione non sempre è facile individuare dove posizionare la pentola. Con la funzione Pot Detector il piano rileva automaticamente la presenza del tegame sulla zona di cottura e eroga la potenza solo in presenza di pentole posizionate correttamente.

It is easy to see where to position the pot on the induction hob. With Pot Detector, the hob automatically detects the presence of the pot on the cooking area and provides heat only when it is correctly positioned.

NIKOLATESLA

NIKOLATESLA SWITCH

DESIGN FABRIZIO CRISÀ

83x51x21 cm
80,7x49,2 cm (cut)
Aspirante/Filtrante Duct-out/Filtering
Vetro nero, vetro bianco "ICE GREY"
Black glass, white glass "ICE GREY"

L'elemento estetico centrale, in vetro nero ed alluminio effetto ghisa o vetro bianco e acciaio, nasconde il cuore aspirante che può essere attivato con un semplice gesto anche in modalità completamente automatica, possibile grazie ai sensori intelligenti di cui il prodotto è dotato.

L'interfaccia del prodotto Direct Slider permette di azionare le varie zone di cottura e aspirazione in modo semplice ed intuitivo.
The central aesthetic element in black glass and cast iron-look aluminium or white glass and steel, conceals the heart of the extraction unit which can be activated with a simple touch even in fully automatic mode, thanks to the integrated smart sensors.
The Direct Slider interface allows the various cooking and extraction areas to be controlled simply and intuitively.

NIKOLATESLA FLAME

DESIGN FABRIZIO CRISÀ

88x51x21 cm
84x48,7 cm (cut)
Aspirante/Filtrante Duct-out/Filtering
Vetro nero + ghisa, vetro grigio + ghisa
Black glass + cast iron, grey glass + cast iron

Il primo piano aspirante gas. Gli elementi in ghisa del piano sono disegnati per coniugare estetica e funzionalità, nella massima sicurezza. Le griglie a croce chiuse e piatte garantiscono stabilità con pentole di tutte le dimensioni e facilità nello spostamento sul piano cottura. La copertura della zona filtri in ghisa diventa un pratico piano di appoggio. Il supporto wok, disponibile come accessorio, aumenta le varianti di cottura su NikolaTesla Flame.

The first gas down-draft extraction top. The cast iron elements of the top are designed to combine aesthetic appeal and functionality with the utmost safety. The closed cross and flat grid supports guarantee stability with pans of any size and ease when moving on the cooking area. The cast iron filter cover doubles as a practical work surface. The wok support, available as an accessory, increases the cooking variations on NikolaTesla Flame.

* Dimensioni consigliate filotop: per tolleranze differenti, attenersi alla reale dimensione del vetro.
 * Recommended filotop dimensions: for different tolerances, respect the actual dimensions of the glass.
 PER ULTERIORI APPROFONDIMENTI CONSULTARE IL MANUALE DI INSTALLAZIONE DEL PRODOTTO.
 FOR FURTHER INFORMATION, CONSULT THE PRODUCT INSTALLATION MANUAL.

Aprendo il coperchio si ha la possibilità di rimuovere le tre batterie di filtro ceramico (rigenerabile) ad altissime prestazioni e di svuotare il vano di sicurezza raccolta liquidi, che protegge il motore in caso di fuoriuscita di liquidi derivanti dalla cottura.

By opening the cove, you can remove the three batteries of the high performance ceramic filter (regenerable) and empty the liquid collection safety compartment, which is the only component that can protect the motor in case of leakage of cooking liquids.

L'ECCELLENZA IN PICCOLI SPAZI EXCELLENCE IN SMALL SPACES

Oggi i piccoli ambienti in casa sono sempre più diffusi, per questo prodotti multifunzionali e in grado di ottimizzare gli spazi sono elementi risolutivi.

Studiato per soddisfare le esigenze di chi, anche in ambienti ridotti, non vuole rinunciare all'eccellenza, NikolaTesla Fit è il primo piano a induzione con aspirazione integrata che può essere installato anche nelle basi da 60 cm, con un ingombro in superficie di 60 o 72 cm.

DESIGN ELEGANTE E FUNZIONALE

ELEGANT AND FUNCTIONAL DESIGN

Un ritorno alle origini del piano cottura a induzione essenziale in cui la superficie è continua in modalità standby. Con una piccola pressione sulla parte centrale si attiva l'aspirazione in una perfetta combinazione tra stile, ergonomia e funzionalità. Le dimensioni e la forma compatte sono studiate per lasciare spazio nel cabinet e massima libertà di movimento sul piano cottura, con qualsiasi tipo di pentola. Il cuore aspirante, efficace e silenzioso, è completamente nascosto dalla copertura in vetro che veste il prodotto in modo discreto ed elegante.

Small spaces are becoming more and more widespread in homes now which is why multifunctional products, capable of optimising space, are excellent solutions.

Designed to meet the exacting needs of those unwilling to renounce excellence even in small spaces, NikolaTesla Fit is the first induction hob with integrated extraction that can also be installed in 60-cm wide base units with an overall surface area of 60 or 72 cm.

A return to the origins of the essential induction hob where the surface is continuous and in standby mode. A slight pressure on the central part activates the extraction in a perfect combination of style, comfort and functionality. The compact dimensions and shape have been designed to leave space in the cabinet and total freedom of movement on the hob with pans of any kind. The heart of this efficient and silent extraction unit is totally concealed by the glass top which covers the product discretely and elegantly.

SEMPLICITÀ DI PULIZIA E MANUTENZIONE

SIMPLE CLEANING AND MAINTENANCE

NikolaTesla Fit è progettato per essere davvero facile da pulire e da mantenere. La superficie completamente lineare in vetro ceramico rende le operazioni di pulizia estremamente semplici e veloci. L'elemento estetico centrale è rimovibile e lavabile e diventa il punto di accesso per l'estrazione dei filtri e la manutenzione del prodotto. È possibile accedere al vano interno in totale sicurezza e rimuovere l'eventuale liquido in eccesso grazie ad una speciale valvola di scarico posta sul fondo.

NikolaTesla Fit is designed to be really easy to clean and maintain. The fully linear ceramic glass surface makes cleaning very quick and easy. The central aesthetic element can be removed and washed. It is also the access point for extracting the filters and carrying out maintenance. The inner compartment can be accessed in complete safety and any excess liquid can be removed thanks to a special drain valve underneath.

MASSIMA FLESSIBILITÀ DI INSTALLAZIONE FULL INSTALLATION FLEXIBILITY

Aspirante Duct-out
Vetro nero, Krion bianco, acciaio inox
Black glass, white Krion, stainless steel

Il KRION® è una superficie solida di nuova generazione, un materiale caldo al tatto e simile alla pietra naturale. È composto da due terzi di minerali naturali e da una piccola percentuale di resine ad alta resistenza. Tale composizione conferisce al KRION® alcune particolarità esclusive: proprietà antibatteriche, durezza, resistenza, durezza e manutenzione ridotta.
KRION® is a solid, latest generation surface, a material that's warm to the touch and similar to natural stone. It is comprised of two thirds natural minerals and a small percentage of high-resistance resins. This composition offers KRION® a number of exclusive characteristics: antibacterial properties, hardness, resistance, durability and minimal maintenance.

reddot award 2017
winner

90 cm
Aspirante Duct-out
Rovere naturale + bianco effetto soft touch
Natural oak + white soft touch effect

La cornice è un multistrato con rivestimento di 10 mm di rovere massello per evitare il fenomeno della dilatazione dovuta allo shock termico. Nella sua parte superiore è presente un supporto per tablet e smartphone e una presa USB a doppia porta. Bio è altamente versatile grazie alla mensola da 60 cm che permette di completare esteticamente il prodotto a proprio piacimento come estensione del corpo cappa o come elemento di arredo indipendente. The frame is made from plywood with a 10 mm solid oak finish to prevent expansion phenomena caused by thermal shock. The top part features a support for tablets and smartphones, along with a double USB port. Bio is highly versatile thanks to its 60 cm shelf, allowing the product to be aesthetically completed however one prefers, whether as an extension of the hood body or independent furnishing element.

In linea con i nuovi trend delle cucine, che vede sempre più presente un design industrial e Urban, Elica ha ideato nuove combinazioni di finiture che permettono alla cappa di integrarsi perfettamente con questo stile. Massima libertà e comfort con l'aiuto dell'assistente vocale o del telecomando tramite APP nella gestione del flusso d'aria, dell'intensità della luce e della manutenzione del prodotto. In line with latest kitchen trends, where industrial and urban design is continuously gaining ground, Elica has developed new combinations of finishes allowing the hood to be perfectly integrated with this style. Full freedom and comfort with the help of the voice assistant or remote control via the app to manage the air flow, light intensity and product maintenance

Il Delay switch off di Aplomb è una funzione timer intelligente che consente all'utente di impostare lo spegnimento automatico delle velocità selezionata dopo un tempo prestabilito. Inoltre, la cappa è dotata di un sistema di sostegno del pannello frontale che permette di mantenerlo aperto per facilitare la manutenzione ordinaria e straordinaria del prodotto.

The Aplomb Switch Off Delay is a smart timer function allowing the user to programme the automatic shut-down of the selected speed after a pre-set time. Moreover, the hood features a front panel support system, which means it can be kept open when performing routine or corrective maintenance on the product.

La cappa è dotata di un sistema di resistenze che permette al vetro di riscaldarsi, riducendo così la formazione della condensa. Un suo eventuale residuo viene raccolto in un apposito collettore.

The hood features a heating element system that allows the glass to heat up, thus reducing the formation of condensate. Any residual condensate is then collected in a dedicated manifold.

ISLAND

 Il KRION® è una superficie solida di nuova generazione, un materiale caldo al tatto e simile alla pietra naturale. È composto da due terzi di minerali naturali e da una piccola percentuale di resine ad alta resistenza. Tale composizione conferisce al KRION® alcune particolarità esclusive: proprietà antibatteriche, durezza, resistenza, durevolezza e manutenzione ridotta. KRION® is a solid, latest generation surface, a material that's warm to the touch and similar to natural stone. It is comprised of two thirds natural minerals and a small percentage of high-resistance resins. This composition offers KRION® a number of exclusive characteristics: antibacterial properties, hardness, resistance, durability and minimal maintenance.

 Lane è la cappa invisibile che si integra perfettamente con la linearità della cucina. Ha un design moderno, prestazioni eccellenti e un ottimo rapporto qualità-prezzo. Il prodotto, inoltre, ha un sistema di ancoraggio brevettato composto da 2 clip laterali che consente di fissare con solo 2 viti dal basso la cappa al mobile in meno di un minuto. Lane is the invisible hood that blends perfectly into the kitchen's linearity. It features a modern design, high performance and offers excellent value for money. Moreover, it comes with a patented fastening system made up of 2 side clips, allowing the hood to be secured to the cabinet with only 2 screws from below, in less than one minute.

La prima cappa incasso di Elica per risolvere il problema della condensa con sistemi meccanici ed elettrici capaci di garantire una soluzione a 360 °. Il sistema è studiato per evitare la caduta delle gocce sul piano cottura e per salvare i pensili dal vapore.

Elica's first built-in hood that solves the problem of condensate with mechanical and electrical systems able to guarantee an all-round solution. The system has been designed to prevent dripping on the hob, as well as protect wall units from steam.

GOOD TO KNOW

Per te, che sei sempre attento alle nuove tendenze e non ti accontenti dell'estetica ma vuoi approfondire la funzionalità, abbiamo sviluppato una sezione in cui troverai tutti i dettagli su accessori, informazioni utili, consigli su come scegliere la tua cappa, garanzie e etichetta energetica.

For those of you, who like to keep up with the latest trends and are not just looking for an attractive finish, but also want detailed information about functionality, we have created a section in which you can source all the details on accessories, useful information, advice on how to choose your hood, warranties and energy labels.

ATTENZIONE AL PESO DELLA CAPP LEARN MORE ABOUT WEIGHT

Nei casi in cui il nostro progetto cucina preveda una cappa di tipo a isola, sospesa o inserita in un controsoffitto (ceiling), è buona norma fare attenzione nel realizzare una struttura in cartongesso che possa sostenere il peso della cappa stessa.

Il peso varia a seconda dei modelli e degli ingombri e la tabella seguente è un valido aiuto per costruire un sostegno adeguato senza dover rinunciare ad un open space pratico e di tendenza.

In kitchen designs featuring an island, suspended or ceiling hood (built into a false ceiling), it is important that the plasterboard structure is able to support the weight of the hood itself.

The weight varies depending on the model and overall dimensions, and the following table is a useful aid in developing a suitable support without needing to forgo a practical and stylish open space.

	PESO NETTO WEIGHT
ADÉLE ISLAND	27,4 Kg
AUDREY	18,85 Kg
BIO ISLAND	32,80 Kg
CLOUD SEVEN (DUCT-OUT)	17,70 Kg
CLOUD SEVEN (FILTERING)	19,50 Kg

FILTRI GRASSI GREASE FILTERS

Filtro Grassi Alluminio
Aluminium Grease Filter
KIT0010805

Filtro grassi a strati in alluminio (GFA). Questo filtro è il più diffuso sul mercato anche perché grazie alla sua dimensione può essere facilmente lavato a mano e in lavastoviglie.

Layered aluminum grease filter (GFA). This filter is the most common on the market, also because, thanks to its size it can be easily washed by hand, or in the dishwasher.

Filtri Grassi Professionali Inox
Professional Stainless Steel Grease Filters
KIT0010806

Filtro grassi con primo strato in acciaio e lamiera microforata posteriore, facilmente lavabile e con un'elevata captazione dei grassi.

Grease filter with the first layer in steel and a microperforated back metal sheet, easily washable and with high grease capturing capacity.

Filtro Professionale Buffle
Buffle Professional Filter
KIT0010804

Filtro grassi completamente in acciaio che dà al prodotto un aspetto tipico delle cappe industriali. Grazie al labirinto degli strati in acciaio, questo filtro ha un'elevata captazione dei grassi.

All steel grease filter that gives the product a typical industrial hood look. Thanks to the labyrinth of steel layers, this filter has a high grease capturing capacity.

Filtro Grassi Inox
Stainless Steel Grease Filter

Filtro grassi a strati in alluminio (GFI). Il primo strato estetico in acciaio conferisce un aspetto professionale mantenendo il vantaggio di essere facilmente lavabile.

Layered aluminum grease filter (GFI). The first aesthetic steel layer gives it a professional look, while still maintaining its easy washability.

FILTRI ODORI ODOUR FILTERS

Filtro Carbone
Charcoal Filter

Il filtro odori tradizionale, composto da una miscela di carboni attivi, perde la sua efficacia attraverso il suo utilizzo ed ha una vita media di 3-6 mesi.

The traditional odour filter, made up of a mix of activated carbons, loses its efficiency through use and has an average life of 3-6 months.

Revolution Filter

Filtro Odori con elevatissimo livello di efficienza >82% capace di rigenerarsi e di durare fino ad un massimo di 3 anni rispetto a filtri standard. Per mantenere tali caratteristiche, il filtro deve essere lavato ogni 2 o 3 mesi con acqua calda e detergente delicato o nella lavastoviglie a 65°C. e poi asciugato in forno per 10 minuti a 100°.

Odour filter with very high efficiency level >82%. Capable of regenerating itself and of lasting up to a maximum of 3 years in comparison to standard filters. To maintain such characteristics, the filter must be washed every 2 or 3 months with hot water and mild soap, or in the dishwasher at 65°C. and can be dried in the oven for 10 minutes at 100°.

Filtro Carbone Rigenerabile
Regenerable Charcoal Filter

Il Filtro Carbone Rigenerabile ha le stesse caratteristiche del revolution filter ma con un'efficienza di filtraggio che si aggira tra il 40-60%.

The Regenerable Charcoal Filter has the same characteristics of the revolution filter, but with a filtering efficiency that ranges from 40-60 %.

Filtro Ceramico
Ceramic Filter

Il filtro ceramico è un filtro carbone modulare che si rigenera termicamente in forno ogni 2/3 mesi a 200° per 45 minuti, fino ad un massimo di 5 anni. Permette di raggiungere un'altissima efficienza di assorbimento odori ed un'elevata resistenza meccanica.

The ceramic filter is a modular charcoal filter that can be thermally regenerated in the oven every 2/3 months at 200° for 45 minutes, up to max 5 years. It allows for very high odour absorption efficiency and very high mechanical strength.

L'IMPORTANZA DELLA CAPPA IN CUCINA THE IMPORTANCE OF THE HOOD IN THE KITCHEN

La cappa è un alleato imprescindibile in cucina per migliorare la qualità dell'aria e mantenere un ambiente sano. I fumi della combustione, i cattivi odori, l'odore e i vapori della cottura sono infatti fastidiosi e dannosi non solo per le persone, ma possono deteriorare anche i mobili e le pareti. È quindi importante assicurare una aspirazione efficace, di facile utilizzo e silenziosa che possa rimuoverli lasciando l'ambiente più salubre e pulito.

Eclettica nelle funzioni, la cappa viene oggi utilizzata non solo come fondamentale **corpo aspirante**, ma anche come **fonte luminosa** in grado di illuminare al meglio il piano cottura o di creare atmosfere più soffuse, o come vero e proprio **complemento d'arredo**. I numerosi modelli e finiture disponibili sul mercato permettono di personalizzare l'ambiente in base al design della propria cucina e dei singoli gusti: che sia minimal e lineare o di grande impatto e protagonista, la cappa oggi è diventata un elemento centrale nelle nostre cucine.

The extractor hood is an essential tool in the kitchen, helping to improve air quality and maintain a healthy environment. Combustion fumes, unpleasant smells, odours and cooking vapours are, in fact, both annoying and harmful not only for people, but can also deteriorate furniture and walls. It is, therefore, important to ensure effective, easy-to-use and silent extraction that can eliminate them, leaving the kitchen more hygienic and cleaner. With its eclectic function, the hood is now used not only as a basic **extractor unit**, but also as a **light source** to illuminate the hob, to create softer atmospheres or as an authentic **furnishing accessory**. The numerous models and finishes available on the market allow you to customise the space according to the design of your kitchen and individual taste: whether it is minimal and linear or a statement, signature piece, the hood today has become a central element in our kitchens.

QUALE CAPPA SCEGLIERE? WHICH HOOD SHOULD I CHOOSE?

Tra i tanti modelli disponibili è difficile orientarsi sulla scelta migliore. Per trovare la cappa che più si adatta al proprio ambiente, gusto e stile di vita bisogna tenere in considerazione alcuni fattori principali: corretta potenza di aspirazione, tipologia di installazione, design della cucina. Per ripulire al meglio l'aria, la cappa deve avere la **giusta potenza** di aspirazione. Valuta le dimensioni della tua cucina e le tue abitudini culinarie. Con un semplice calcolo è possibile definire quale sia la portata ideale per ogni ambiente: basta moltiplicare per 10 il volume della stanza. **Facilità di utilizzo e silenziosità** sono altre due variabili importanti che ti aiuteranno a vivere una user experience appagante.

It can be difficult to find the best choice among the many models on offer. To find the hood that best suits your space, personal taste and lifestyle, you should consider several key factors: correct extraction power, type of installation and kitchen design. For the best air removal performance, the hood must offer the **right extraction power**. Take a look at the size of your kitchen and your cooking habits. With a simple calculation, it is possible to define the ideal flow rate for each room: just multiply the room volume by 10. **Ease-of-use and silence** are another two important variables that will help you achieve the best user experience.

La **tipologia di installazione** è fondamentale per restringere il campo e indirizzarsi sulla categoria necessaria per la propria cucina.

The **type of installation** is essential in narrowing the field and finding the category you need for your kitchen.

AD INCASSO BUILT-IN

La cappa è incassata all'interno del pensile, scomparendo alla vista.

The hood is built into the cabinet, disappearing from view.

A PARETE WALL-MOUNTED

La cucina è posizionata contro la parete con il piano cottura in adiacenza al muro. Cappa da installare a parete.

The kitchen is positioned against the wall with the hob adjacent to the wall. Wall-mounted hood.

A ISOLA ISLAND

La cucina è posizionata al centro della stanza con il piano cottura distante dal muro. Cappa da installare a soffitto.

The kitchen is positioned in the centre of the room with the hob away from the wall. Ceiling-mounted hood.

AD ANGOLO CORNER

La cucina è sviluppata tra due pareti della stanza e il piano cottura è posizionato a ridosso dell'angolo. Cappa da installare tra le pareti adiacenti.

The kitchen is laid out between two walls of the room and the hob is positioned close to the corner. Install the hood between adjacent walls.

CEILING

La cucina è posizionata o al centro della stanza o contro la parete. La cappa diventa luce e aspirazione e si installa nel controsoffitto.

The kitchen is positioned either in the centre of the room or against the wall. The hood acts as both a light and extractor and is installed in the false ceiling.

DOWNDRAFT

Il piano cottura è posizionato distante dal muro, su un bancone a penisola o al centro della stanza. Cappa da installare direttamente sul top.

The hob is positioned away from the wall, on a peninsula counter or in the centre of the room. Install the hood directly on the top.

SOSPESA SUSPENDED

Cappa da installare a soffitto, a sospensione come un lampadario.

Install the hood on the ceiling, suspended like a pendant light.

PIANO COTTURA ASPIRANTE
EXTRACTOR HOB

La cappa è integrata nel piano cottura. Aspirazione dal basso.

The hood is integrated into the hob. Extraction from below.

COME INSTALLARLA? HOW IS IT INSTALLED?

Il perfetto funzionamento della cappa è assicurato da una corretta installazione, garantita da personale specializzato. Il montaggio e la manutenzione variano in base alle due tipologie di cappa: aspirante e filtrante.

Molti i modelli Elica sono predisposti per lavorare in entrambe le versioni. Prima di procedere all'installazione della tua cappa, tieni a mente queste semplici regole di base:

- Segui tutte le fasi indicate nel libretto di istruzioni;
- Collega la cappa aspirante all'esterno con una tubazione dedicata dal diametro 120-150mm: una lunghezza ridotta e l'assenza di curvature garantiscono prestazioni ottimali.
- Rispetta la distanza minima dal piano cottura indicata nel libretto, al fine di evitare danni alle parti funzionali e salvaguardare la sicurezza delle persone;
- Controlla che la posizione della presa elettrica sia in prossimità del prodotto per il collegamento;
- In caso di difficoltà richiedi l'intervento di un tecnico specializzato di tua fiducia.

Perfect hood operation is ensured by correct installation, guaranteed by specialised personnel. Assembly and maintenance vary according to the two types of hood: extractor and filter. Many Elica models are designed to work in both versions. Before starting installation of your hood, bear in mind these simple, basic rules:

- Follow all the steps indicated in the instruction booklet;
- Connect the extractor hood to the outside using a dedicated pipe with a diameter of 120-150mm: a shorter length and the absence of bends guarantee the best performance.
- Respect the minimum distance from the hob indicated in the booklet to avoid damage to the operational parts and protect personal safety;
- Ensure that the location of the electrical outlet is close to the product for connection;
- In case of difficulty, request the intervention of a specialised technician.

CAPPA FILTRANTE FILTER HOOD

La cappa filtrante elimina fumi e cattivi odori attraverso i filtri dedicati e reimmette l'aria ripulita nell'ambiente cucina. Questa tipologia è adatta in situazioni prive del foro di evacuazione all'esterno.

The filter hood eliminates fumes and unpleasant odours via dedicated filters and returns clean air to the kitchen. This type of hood is suitable in situations without no external evacuation hole.

CAPPA ASPIRANTE EXTRACTOR HOOD

La cappa aspirante espelle l'aria all'esterno dell'abitazione. È la tipologia più diffusa in quanto garantisce elevate prestazioni, alta portata e bassa rumorosità.

The extractor hood expels the air outside the home. It is the most common type as it guarantees high performance, high flow rate and minimum noise.

MANUTENZIONE MAINTENANCE

Per assicurare una lunga durata e un corretto funzionamento della tua cappa, il primo passo è mantenere in ottimo stato il sistema di filtraggio.

To ensure that your hood lasts for a long time and continues to work correctly, the first step is to keep the filtering system in tip-top condition.

Le cappe filtranti prevedono due tipologie di filtro: il filtro grassi, che ripulisce l'aria dai grassi dispersi durante la cottura, e il filtro odori. Entrambi vanno regolarmente puliti e sostituiti per assicurare performance sempre alte.

- Il filtro grassi protegge la tua cappa trattenendo le particelle di grasso. Il filtro grassi può essere in versione alluminio o inox e richiede una pulizia periodica a mano con detergente neutro o in lavastoviglie a basse temperature (*), oppure in carta. In questo caso va sostituito ogni mese in base all'utilizzo.
- Il filtro odori, a carboni attivi, installato sulle cappe filtranti, cattura e trattiene le particelle odorose dell'aria. Ricorda di sostituirlo ogni 3-4 mesi. I filtri odori long life hanno invece una durata maggiore: sono infatti rigenerabili, possono essere lavati e asciugati e sostituiti ogni due anni. Bastano semplici e piccole accortezze per mantenere sana ed efficiente la tua cappa nel tempo.

(*) Verificare sempre come lavare il filtro sul libretto d'istruzione del prodotto

Filter hoods feature two types of filter: the grease filter which removes the grease from the air dispersed during cooking and the odour filter. Both must be regularly cleaned and replaced to ensure the very best performance.

- The grease filter protects your hood by trapping grease particles. The grease filter can be made of aluminium or stainless steel and requires periodic cleaning by hand with a neutral detergent or in the dishwasher at a low temperature (*), or alternatively in a paper version. In this case, it must be replaced every month based on use.
- The odour filter with activated carbon, installed on filter hoods, captures and traps odour particles in the air. Remember to replace it every 3-4 months. Long-life odour filters, on the other hand, last longer. They can, in fact, be regenerated and washed, dried and replaced every two years. A few simple, minor precautions are all it takes to keep your hood hygienic and working efficient over time.

(*) Always check how to wash the filter in the product instruction booklet

ETICHETTA ENERGETICA
ENERGY LABEL

L'Etichetta Energetica è uno strumento fondamentale per scegliere la cappa aspirante più idonea alle proprie esigenze. Dalla sua lettura è possibile ottenere immediatamente informazioni non solo in merito ai suoi consumi di energia, ma anche un quadro semplice e chiaro dell'efficienza con cui essa espleta le sue funzioni. In ciascuna pagina del catalogo trovate un simbolo che indica la Classe Energetica del prodotto presentato. Per ottenere informazioni dettagliate di ciascuna versione del modello di interesse, tra cui tutti i parametri riportati nell'etichetta energetica, procedere come segue:

- Identificare il **codice del prodotto** di interesse
- Nel sito web **www.elica.com** accedere alla sezione DOWNLOADS dell'area ASSISTENZA, inserire il codice del prodotto nell'apposito campo di ricerca e scaricare il documento PDF (Product Fiche) che riporta tutte le caratteristiche del prodotto, in accordo ai regolamenti EU n° 65/2014 e 66/2014.

The Energy Label constitutes a fundamental tool for choosing the most suitable extractor hood for the user's needs. The label provides instant information on energy consumption and the level of efficiency of the product's performances. Each page of our catalogue contains a symbol indicating the energy class of the product presented. For obtaining detailed information on each version of the desired model, including all the parameters appearing on the energy label, proceed as follows:

- Identify the **product code** of the relevant model
- Visit the website **www.elica.com** and go to the DOWNLOADS section of the ASSISTANCE page, insert the product code in the search field and download the PDF document (Product Fiche) listing all the product characteristics, as per EU regulations no. 65/2014 and 66/2014.

1	NOME O MARCHIO DEL FORNITORE	SUPPLIER NAME OR BRAND.
2	IDENTIFICATIVO DEL MODELLO	MODEL IDENTIFICATION CODE.

NUMERO ASSISTENZA
02.382.93.009

Un centro di supporto specializzato a disposizione dal lunedì al venerdì dalle 08:00 alle 20:00 e il sabato dalle 08:00 alle 14:00.

E-MAIL PER ASSISTENZA TECNICA
trade.italia@consumercare.elica.com

CENTRI ASSISTENZA
Il Service di Elica, attraverso un network composto da 180 service partnere selezionati, garantisce una copertura capillare del territorio nazionale.

SUPPORTO DEDICATO SU ELICA.COM
È possibile eseguire il download dei libretti di istruzioni direttamente su elica.com. Inoltre, per ulteriori approfondimenti, è disponibile un form di assistenza tecnica.

ACCESSORI E RICAMBI ORIGINALI
Una corretta manutenzione e la regolare sostituzione dei filtri carbone sono fondamentali per garantire il perfetto funzionamento dei nostri prodotti. I filtri carbone e grassi, gli accessori (es. tubazioni, telecomandi e lampade) e i prodotti per la pulizia sono disponibili su shop.elica.com

GARANZIA 24 MESI
Tutti i prodotti Elica godono della garanzia legale di 2 anni a partire dalla data di acquisto del prodotto.

PERCHÉ ACCONTENTARSI QUANDO PUOI AVERE DI PIÙ?
DEEP BREATHE ASSISTANCE
Acquistala per avere fino a **5 anni** di garanzia

- Estensione dell'assistenza a cinque anni
- Nessun costo aggiuntivo per intervento
- Ricambi originali Elica
- Centri assistenza selezionati

Chiama il numero assistenza o collegati al sito.

SERVICE NUMBER
02.382.93.009

A specialized support center available from Monday to Friday from 8 am to 8 pm and on Saturday from 8 am to 2 pm.

EMAIL FOR TECHNICAL SUPPORT
trade.italia@consumercare.elica.com

SERVICE CENTRES
Elica's service, through a network of 180 selected service partners, guaranteeing widespread coverage throughout Italy.

DEDICATED SUPPORT ON ELICA.COM
Instruction handbooks can be downloaded directly on elica.com. For further information, a technical support form is also available.

ACCESSORIES AND ORIGINAL SPARE PARTS
Proper maintenance and the regular replacement of the carbon filters is essential in guaranteeing the perfect operation of our products. Carbon and grease filters, accessories (ex. pipings, remote controls and lamps) and cleaning products are available on shop.elica.com.

24-MONTH WARRANTY
All Elica products enjoy a 2-year manufacturer's warranty, effective from the date of purchase.

WHY SETTLE FOR SECOND BEST WHEN YOU CAN HAVE SO MUCH MORE?

DEEP BREATH ASSISTANCE
Purchase it to enjoy up to **5 years'** warranty

- Warranty extension to five years
- No additional costs for intervention
