I decori di forte impatto completano il progetto sottolineando la bellezza e l'esclusività della collezione.

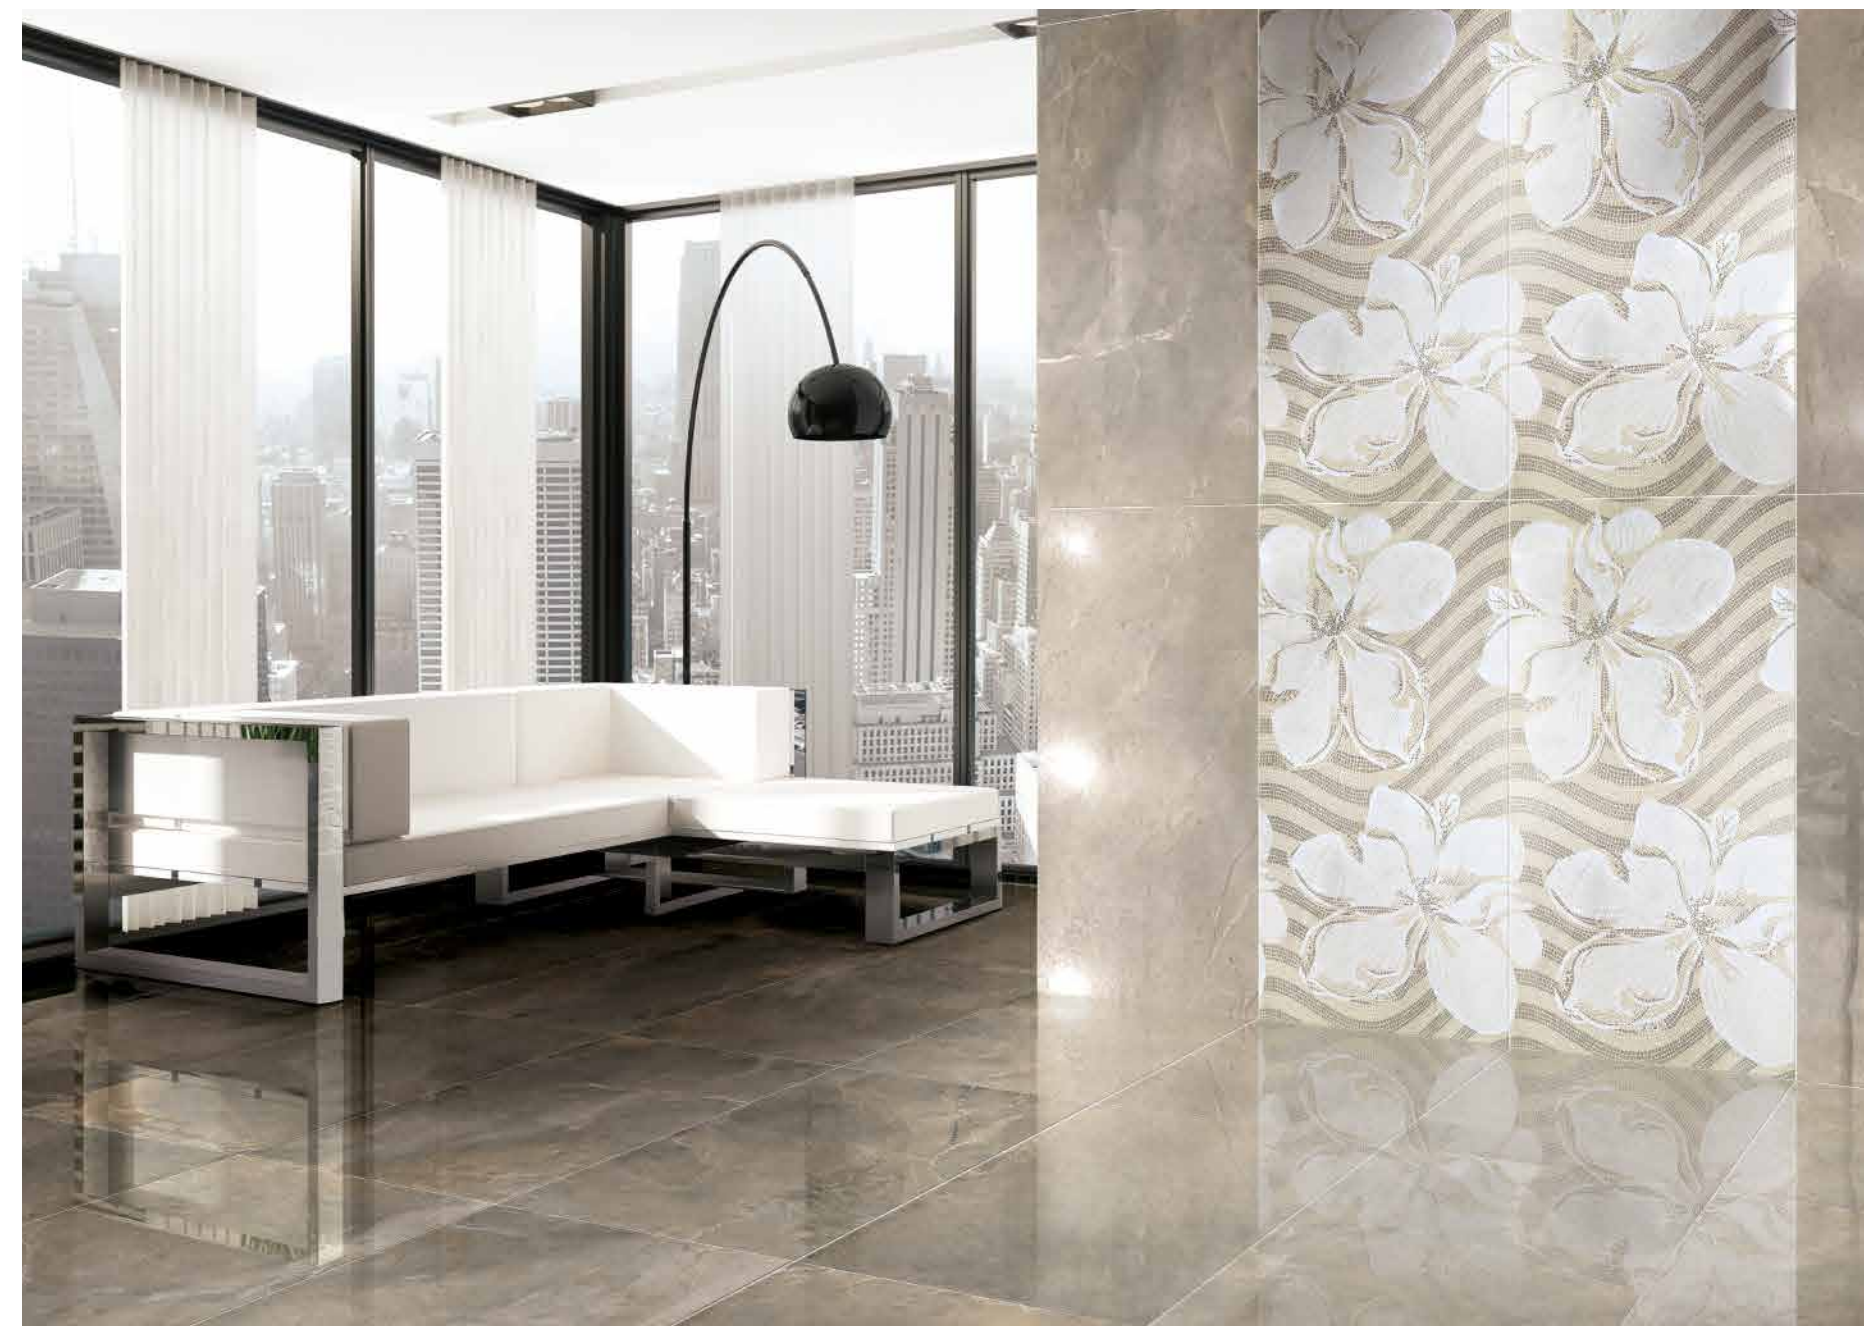

GEMS was born from the discovery of precious stones stacked in the outdoors, disregarded but preserved for many years and never abandoned. The severe weather and the sun have transformed and made them special, a unique work created by nature with truly unique colors and material effects. It has been the discovery of a real treasure, a precious gem seized and interpreted to become the beautiful GEMS collection. The new GEMS line is a marbled porcelain stoneware in the size 60x120 lapped version, suitable for both floors and walls for residential and light commercial contexts. The striking decorations complete the project emphasizing the beauty and exclusiveness of the collection.
