OUR DESIGNERS

The design of a product determines its DNA, and is therefore the most important step in its conception. With this in mind, we engage the talents of carefully selected external designers to complement the work of our in-house design team. The result is a wide range of characterful products, rich in variety and always stylish and refined.

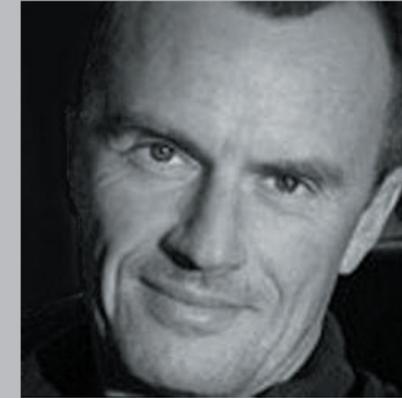

FRANK BOSCHMAN

Le design d'un produit définit son ADN. C'est donc l'étape cruciale de sa conception. Bien conscients de cela, nous faisons appel aux compétences de designers extérieurs soigneusement sélectionnés qui travaillent en complément de notre équipe interne de création. Il en résulte une importante collection de créations pleine de caractère, variée, toujours élégante et raffinée.

“GOOD DESIGN IS A LANGUAGE, NOT A STYLE”

Massimo Vignelli
1931-2014

Het ontwerp van een product bepaalt het DNA ervan, en is daarom de meest belangrijke stap in zijn totstandkoming. Met dit in gedachten, vragen we aan nauwkeurig gekozen externe ontwerpers, om samen met ons intern ontwerpersteam het ontwerp verder op punt te stellen. Dit resulteert in een uitgebreid gamma van karakteristieke producten, zeer gevarieerd en immer stijlvol en verfijnd.

PIERRE STELMAZYK

Il design di un prodotto determina il suo DNA ed è quindi il passo più importante nella sua concezione. Per questo motivo integriamo i talenti di designers esterni, attentamente selezionati, al lavoro del nostro team di progettazione interno. Il risultato è una vasta gamma di prodotti caratteristici, variegati e sempre eleganti e raffinati.

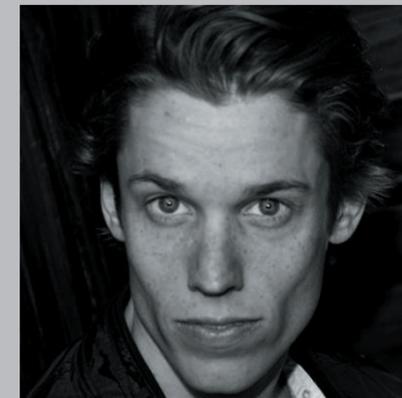

KRIS VAN PUYVELDE

Das Design eines Produktes bestimmt seine DAN, und ist deshalb der wichtigste Schritt in dessen Entwicklungsprozess. Mit diesem Hintergedanken engagieren wir talentierte und sorgfältig ausgewählte externe Designer, um die Projekte unseres IN-House-Designteams zu ergänzen. Dadurch haben wir eine Reihe von aufregenden Produkten und eine sehr große Varietät von unterschiedlichen Stilen, die jedoch immer sehr geschmackvoll und raffiniert sind.

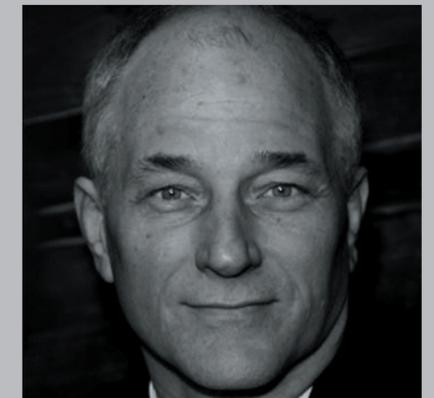

MATHIAS DE FERM

GUSTAV STÖRM

El diseño de un producto determina su ADN, por lo tanto, es el paso más importante en su creación. Con esto en mente, contratamos los talentos de diseñadores externos cuidadosamente seleccionados para complementar el trabajo de nuestro equipo de diseño interno. El resultado se traduce en una amplia gama de productos característicos, ricos en variedad y siempre elegantes y refinados.

The table tops are made from natural material which means small color gradations can occur. This is typical to ceramic which makes each table unique.

ENAMELED LAVA STONES

Lava stones coated with an enamel glaze, and heated at a very high temperature. The advantage of this material are a wide range of colour opportunities. The enameled lava stones are waterproof and easy to clean. Also very resistant to all weather conditions.

STAINLESS STEEL

Stainless steel is a ferrous alloy with increased corrosion resistance due to the addition of chrome and nickel. Chlorine, the greatest enemy of RFS, can cause a type of corrosion known as "pitting". For this reason, it is recommended that in coastal locations the metal be given a surface as smooth as possible in order to further increase its resistance to corrosion. The furniture frames of the Wave is supplied with an electropolished finish as standard. For the Ninix and O-Zon ranges we recommend the optional electropolishing treatment of the frame if it is to be used in a corrosive environment.

TEAK

As Royal Botania never compromises on quality, only carefully selected mature teakwood is used in our products. All of it harvested in strict accordance with our environmental policies. Teak wood is produced by the Tectona Grandis and the wood's renowned durability is due to its high content of natural oils. The limited absorption of moisture protects the wood from warping and gives it enormous stability. In addition, the wood is highly resistant to attacks by pests. It is because of these qualities, as well as its exceptionally attractive hue and structure, that teak is widely considered "the noblest of all wood types". Soil and climate conditions have a significant impact on the quality of the wood, and as such, only the Indonesian plantation wood has the same superior qualities as wood harvested from the Golden Triangle: the Laos, Myanmar and Thailand region. Only wood that has fully matured possesses the much valued qualities of great stability and moisture resistance. Mature wood is ready to be felled after 75 to 80 years.

The slings on metal framed chairs and loungers are made of Batyline® fabrics, a woven polyester fibre protected by a PVC coating. This coating guarantees exceptional resistance to climatic conditions and UV exposure. The fact that there is no moisture absorption results in quick-drying action, little sensitivity to staining, and simplicity in cleaning.
