

COCOON
THE COLLECTIONS.

A photograph of a modern bathroom. In the foreground, a dark, minimalist bathtub is partially visible. The background features a dark, textured wall and a brick wall. A white circle is superimposed on the image, containing the text "PASSION FOR TIMELESS DESIGN." The lighting is dramatic, with strong shadows and highlights.

We believe in future classics, not temporary whims. Therefore, our designers also take the next generations into account. By always trying to use sustainable materials, our products will even make the difference after decades of use.

Our products are designed to make people happy, bring comfort and embrace personal identity. The idea is so pure that "COCOONING" is a true lifestyle. Nowadays, people have more need to be able to escape from the hectic and fast world we are living in and that is why home really should feel like home. A safe and warm place. A place where you come to rest, but also get inspired. A space for Transformation. A COCOON...

WE ARE COCOON.

A dark, moody photograph of water with golden reflections, featuring a circular text overlay. The water is dark blue/black with shimmering golden highlights from a light source. A thin, light-colored circle is superimposed on the left side, containing the text.

INTO PIECES OF
USABLE ART.

PROJECT DIVISION.

SUPPORT WITH QUALITY, EXCELLENCE AND DEDICATION.

TEAM UP WITH COCOON.

Our project division consists of an international & dedicated team of COCOON educated architects and project managers. We can assist in project design, quotations and the production of customised products to turn the most creative plans into reality.

Throughout the years COCOON has proven to be the ideal partner for developments of (urban) villas, hotels, yachts and wellness resorts.

Today COCOON holds a position of excellence with a reference list of hundreds of projects, implemented all over the five continents. The fresh and flexible approach and unsurpassed quality positioning (All taps are fully made of AISI 316L marine grade stainless steel) are the key values to accomplish a successful project.

INSPIRED BY DREAMS.

FROM ROOM
TO COCOON.

Whether you are an architect, interior designer or builder: Tell us your plans and we will help you to realise them. We will set you up with a professional account and send you all info you need to easily make comprehensive quotations for your clients and order fast and safely while enjoying professional rates.

We will ensure that your project will really stand out and will save you a lot of time, thoughts and money in the end. Get in touch with us, we are happy to help you!

THE COCOON STANDARDS.

100% RECYCLABLE

The 316L stainless steel we use for our bathroom taps is 100% recyclable. When a product made of this special material finally reaches the end of its long service life, it remains a valuable source of its main alloying elements chromium, nickel and molybdenum. These can be easily recovered and returned to the production process. Stainless steel recycling is an economically viable, self-sustaining process.

ECO FRIENDLY PRODUCTS

Selected for their durability and quality, the materials we use for our taps, basins and baths, guarantee a long life span and are Eco-friendly. Not only because the material itself is recyclable and lead-free, but also because we use special water saving techniques to keep the carbon footprint as small as possible.

WATER SAVING

COCOON taps and showers can be ordered with a flow-limiting aerator, reducing water consumption without compromising experience. The result: a satisfying, voluminous flow that never exceeds

5 litres per minute, which is as kind to your pocket as it is to the environment. Using less water means less energy is required to heat the water. In addition to reducing your annual water consumption, installing a COCOON bathroom tap will help reduce your energy bills too.

LOW ENVIRONMENTAL IMPACT

COCOON is proud to only use cold working methods for our stainless steel and solid surface material and does not influence global warming. The energy that powers the production is certified clean, water is saved and waste is separated to be recycled, to reduce the impact of the company on the ecosystem.

LEAD FREE TAPS

COCOON cares for you and for the world. The internal and exposed parts are made of 316L stainless steel and are by nature LEAD FREE. For projects in California and Vermont where special requirements of the California Health and Safety Code (commonly known as AB 1953) and Vermont Act 193 concerning lead in potable water systems apply, COCOON can deliver 100% stainless steel build-in valves for the wall mounted basin mixers, to be fully compliant to these standards.

CERTIFICATIONS

COCOON became an important reference within the sector for sustainable design and production. The components of our stainless steel tap collections, which are machined by high-tech equipment, are certified for their performance and safety by the most renowned Certifying Institutes in the world.

ADVANCED COCOON INSTALLATION SYSTEM

New revolutionary build-in system for all COCOON taps will be available for both the Piet Boon as the MONO collection. The new system has some features which will enhance the ease of installation dramatically;

- Made in the highest grade AISI 316L stainless steel, in compliance with all major certifications.
- All components on one frame, for super fast installation.
- Handles can be installed with levers pointing up-or downwards.
- Ceramic cartridges to be installed with the exterior parts, so impossible to damage during installation.
- Possibility to change exterior parts and thus the colours even after years of use.
- Optional dry-wall frames for depth regulation and easy installation available.
- Optional NPT outlets for USA plumbing system.

THERMOSTATIC MIXER FOR PIET BOON COLLECTION

We added a new item with a lot of significance to the Piet Boon Bathroom Collection: A thermostatic mixer with a diverter. This new product comes with the latest Easy Installation build in system and is totally made from 316L stainless steel. It features the minimalistic Piet Boon handles and can be used in numerous combinations as with a hand shower set, a wall mounted spout, a floor mounted bath spout or rain shower set. This item will become one of COCOON's flagship items as it will be the next big thing in terms of usability, safety, design and durability, all brought together in a hi-tech enclosure.

RAW MATERIALS
THAT GET MORE
BEAUTIFUL
WITH AGE.

COCOON and Studio Piet Boon® share passion for craftsmanship, timeless design and natural materials that beautify with age. This mutual passion is captured in an exclusive collection of contemporary taps & basins: Shape by Studio Piet Boon.

Shape by Studio Piet Boon brings industrial chic to any kitchen or bathroom.

GEOMETRIC
SHAPES
CLEAR
TO OPERATE.

Inspired by the simplicity and symmetry of geometric shapes, the tap collection consists of an unconventional shaped faucet and soft clear contoured mixer that comprises of two isolated components, intuitively instructing how to be operated.

The basin collection is available in sustainable materials; LG Himacs®, Corian® and Composite with colors ranging from Alpine white to Dark Concrete.

SIMPLICITY IS
THE ULTIMATE
SOPHISTICATION.

LEONARDO DA VINCI

Making timeless and sturdy design is only one side of the coin. By using real sustainable materials and having the right people shaping these into pieces of usable art, our products are engineered to last a lifetime.

In Italy near the idyllic Lago Maggiore, true craftsmen shape our taps and showers from noble stainless steel by hand and machine. New ideas from our designers offer a fresh look on tried and tested artisanal skills to make unique products according to traditional production values.

The production of our baths and made-to-measure basins takes place in our advanced workshop in the Netherlands.

We definitely believe that the decades of combined experience will reflect in every single product we make.

HAND- CRAFTED QUALITY WITH SOUL.

PIETBOON.

COCOON has the pleasure of working with Studio Piet Boon®, one of the most renowned Dutch design studios. Studio Piet Boon® creates bespoke contemporary architecture, interiors and product designs. Recognised worldwide for its exceptional craftsmanship, quality and vision, Studio Piet Boon® creates distinguished design.

Founded in 1983 by Dutch designer Piet Boon (1958), the Studio Piet Boon® philosophy is based on a balance between functionality, aesthetics and individuality. The ingredients that define the Piet Boon and COCOON experience. Suitable for every discipline, applicable to any industry.

Our PB SET 11 deck mounted basin tap is awarded 'Best of Category' at the prestigious Archiproducts Design Awards 2016 and has also won the RED DOT design award in 2017.

MAKE THE DIFFERENCE AFTER DECADES OF USE.

Stainless steel offers many advantages to the architectural and high demanding user, including its high corrosion resistance and durability. The aesthetic appearance of this ECO friendly and LEAD FREE material provides a modern and attractive base for our minimalistic tap collection designed by Piet Boon. Available in brushed stainless steel, and the exclusive 'Raw Copper' and 'Gunmetal Black' finishings.

PB SET 24

Add some refined sophistication to your bathroom with our new Raw Copper taps. Different from what is common in the market, the exclusive finishings by COCOON are applied on a 100% stainless steel base instead of a coating on brass. Due to patented PVD processes, our finishing is merged with the stainless steel surface retaining and even increasing all of the sustainable and durable properties COCOON taps are known for.

SOLID

BATHS, BASINS & CABINETS

SALINAS

BOWL 1.1

PB BASIN 2.2

COCOON baths and basins are casted from solid surface in our workshop in the Netherlands. Solid surface is a strong durable material with a stone-like appearance. Unlike stone, solid surface is non-porous. Making it easy to clean and resistant to stains, moisture and sunlight. This makes solid surface ideal for the bathroom environment.

Being a homogenous surface it is solid throughout. While being virtually scratchproof, if it does become scratched after years of use it can easily be refinished.

Our succesfull made-to-measure SOLD collection is available in 7 different colours.
