QM MATERIALS QM FOAM, QM TEX, QM PLUS

In 1999, the iconic PRIMARY collection kicked off the succes of QM FOAM™, a proprietary material originally developed and produced by Quinze & Milan. QM FOAM™ refers to the result of a chemical reaction between the polyurethane foam shape and different layers, with different compositions, sprayed on to it.

It is a flame-, water- and weather resistant compound that can be cleaned with soap and water—making these pieces suited for pool terraces, child-oriented areas, and health-care interiors. Offered in countless colors, the coating also contains a UV filter to prevent fading from the sun. **QM FOAM™** ensures easy cleaning, superior comfort and durability.

A STANDARD, QM PLUS™ COATING FOR ARCHITECTS & DESIGNERS

Next to the original QM FOAM™ we all appreciate, its new, extra-strong variant QM PLUS™ existing out of multiple layers of our QM Coating which results in a stronger resistance, especially for public spaces, schools, shopping malls, theatres, ... and other intensively used public interiors.

QM TEX™, COATED REINFORCED TEXTILE

To respond to the specific needs of our clients, we have developed and improved our coating so it can be applied (sprayed) on specific tissues. QM TEX™ is our QM Coating applied to textiles. The result is a stiff and stronger material, very resistant to attacks, virtually tear-proof.

The interest of this innovation is to meet the growing need of invulnerability associated with furniture solutions, walls, reception desks, while maintaining a soft touch. The soft and smooth surface appearance of our known QM Coating techniques are preserved, as well as antibacterial properties, easy to clean, sealing,...

OPTIONAL FINISHINGS

As an option we can provide your beloved Q&M furniture with feet suited for a specific flooring. We offer plastic feet, felt feet and even sticky feet. Therefore, we integrate a wooden plate into the furniture.
