**PIETRA**

Roccia da costruzione o decorazione. La composizione mineralogica molto varia di questo gruppo di materiali viene classificata in due grandi categorie: Rocce tenere o poco compatte, tra le quali le sedimentarie [calcareni, arenarie a cemento calcareo ecc.] e le piroclastiche come i tufi e i peperini; Rocce dure o compatte, tra le quali le pietre a spacco naturale [quarziti, micascisti, gneiss, lastroidi, ardesie ecc.] e alcune vulcaniti, come i basalti, le trachiti e i leucititi.

STONE

Rock used for building or decorating purposes. The extremely varied mineralogical composition of this group of materials is divided into two large categories: Soft rocks or not very compact, including sedimentary rock [calcarenes, limy cement type sandstones, etc.] and pyroclastic materials like tuffs and peperino rocks; Hard rocks or compact ones, such as naturally split stones [quartzites, mica schists, gneiss, slab-structured rocks, slates, etc.] and certain volcanites, such as basalts, trachytes and leukocytes.
