GRANITO

Roccia fanero cristallina da costruzione e decorazione, compatta e lucidabile, prevalentemente costituita da minerali di durezza Mohs da 6 a 7, come i quarzi, i feldspati e i feldspatoidi. In funzione della loro composizione possono essere distinti: i graniti propriamente detti [rocce magmatiche intrusive acide fanero-cristalline, costituite da quarzo, feldspati sodico potassici e miche]; altre rocce magmatiche intrusive (dioriti, granodioriti, sieniti, gabbri eccetera); rocce magmatiche effusive a struttura porfirica; alcune rocce metamorfiche di analoga composizione come gneiss e serizzi.

GRANITE

Crystalline phaneritic rock for decorative and building purposes. It is compact, can be polished and mainly consists of minerals with 6 to 7 Mohs hardness such as quartzes, feldspars and feldspathoids. Depending on their composition, granites include: granite in the strict sense of the term [phaneritic-crystalline intrusive magmatic acid rocks consisting of quartz, soda potash feldspars and micas]; other intrusive magmatic rocks (diorites, granodiorites, syenites, gabbros, etc); magmatic effusive rock with a porphyritic structure; certain metamorphic rocks of similar composition, such as gneiss and paragneiss.
