A well-rested world

is a nicer world

When well rested, you can feel it: you are relaxed, energetic, alert, and friendly. You are awake.

We've been working on providing tomorrow's ultimate sleeping comfort for over 130 years.

Every bed and mattress is made with care and attention to detail, the environment, and the future.

A good night's rest with a good mattress

By looking and listening carefully to your personal characteristics and preferences, we make mattresses for the best possible night's sleep. Reliable, durable, and personal. Because we're all a little different. All Auping mattresses are available in all the common dimensions and are suitable for all beds and box springs.

You turn over in your sleep around 30 times a night, and you rarely notice it, so it is important that you are well supported while you sleep. The pocket springs in our mattresses ensure you can turn over effortlessly while providing you with the right amount of support you need in every sleeping position.

You lose 350 ml of moisture every night. This is why it is important that your mattress is well-ventilated. It keeps your bed clean and fresh.

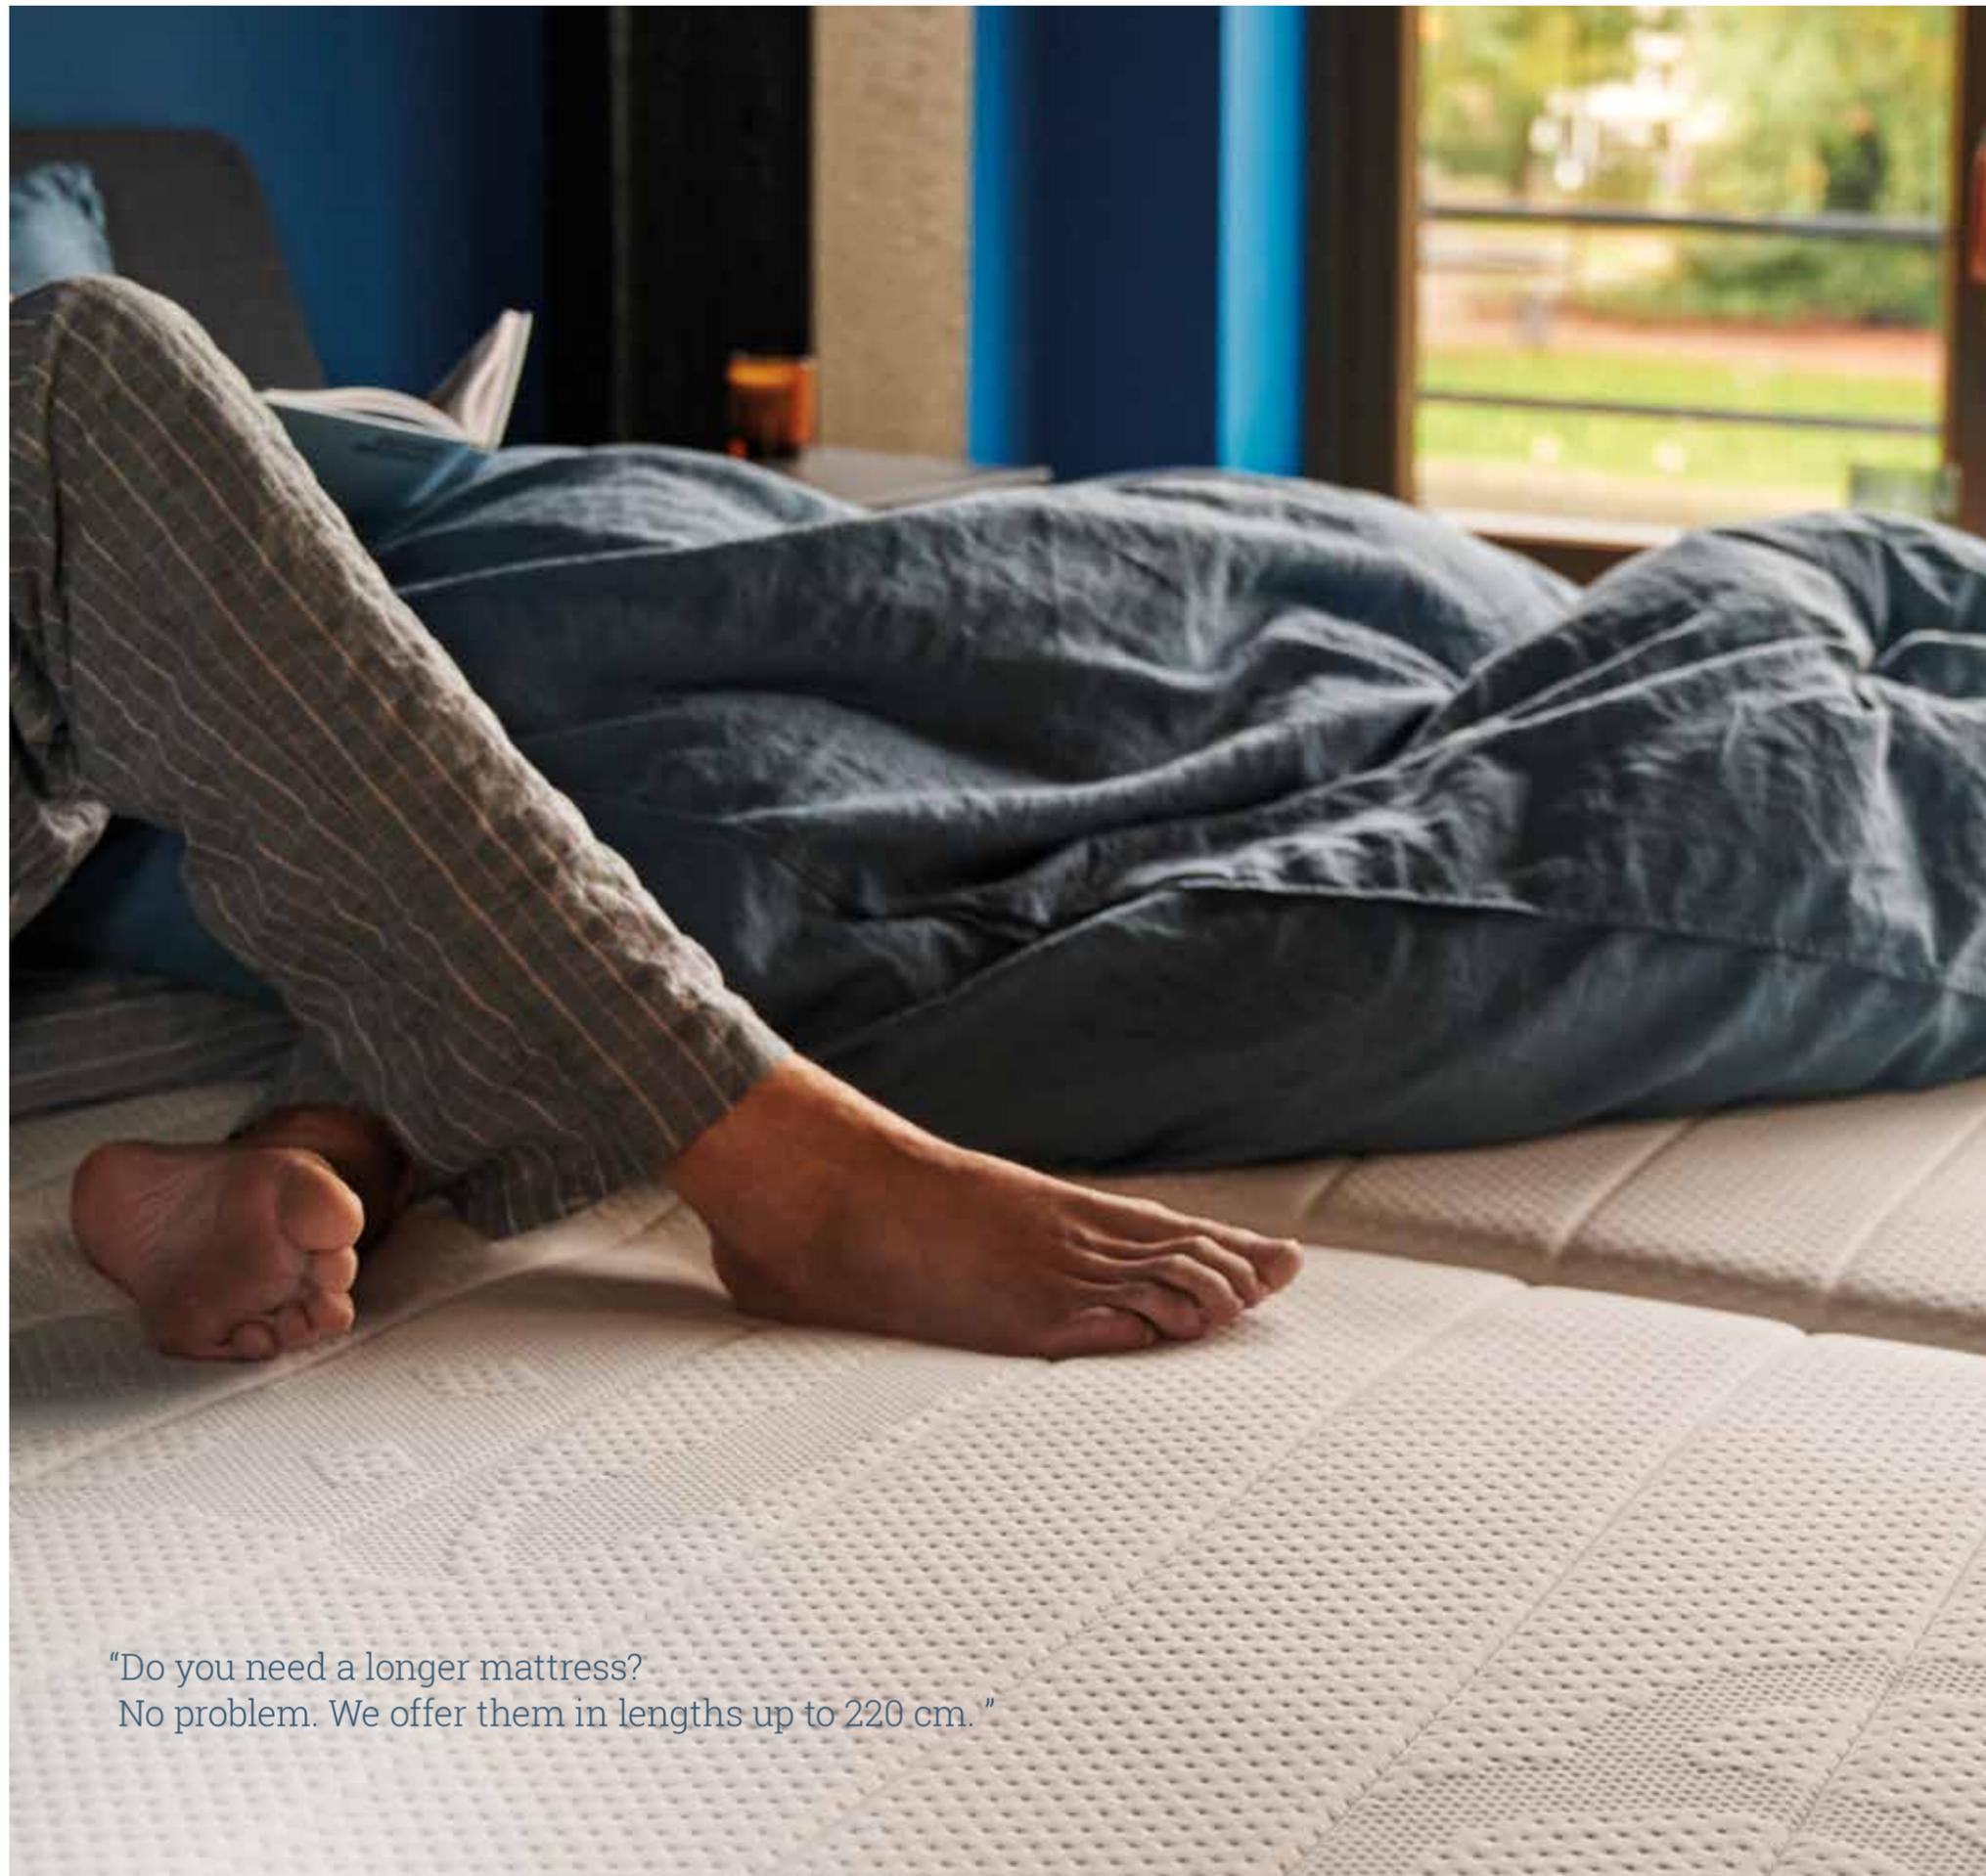

Auping mattresses consist of carefully developed layers, each of which has a specific purpose. Everything is in the right place and made of high-quality materials – the additional benefit is that you never need to turn your mattress ever again.

The latest development in the evolution of sleep is called Auping Evolve. This is the world's very first circular mattress, developed by Auping. It is a mattress made without foam or glue, and the materials of which can be reused continuously to make new mattresses. A relief for you, and the world.

The Auping mattress range

	Inizio	Adagio	Cresto	Maestro	Vivo	Evolve
Height	18 cm	20 cm	20 cm	22 cm	24 cm	22 cm

Variants ticking			Breeze Nature	Breeze Nature	Breeze Nature	
Temperature regulation				Yes	Yes	

“Do you need a longer mattress?
No problem. We offer them in lengths up to 220 cm.”

Auping Inizio

If you are looking for Auping quality at an affordable price, Inizio is the ideal option. Enjoy better, super comfortable sleep on a ventilated mattress with three comfort zones that can be used on any bed base.

Auping Adagio

Enjoy superior sleep thanks to Adagio. Five zones and a ventilated comfort layer create a highly resilient mattress that follows the contours of your body.

Auping Take Back System*

When you buy a new mattress from Auping, we will be happy to take your old mattress off your hands. Even if it is not an Auping mattress. Most of the components will then be recycled because we want to waste as few materials as possible. And of course, you save you a ride to the landfill.

* Where available

The ticking

The upper mattress cover, or ticking can be cleaned and is breathable and soft. The ticking is easily removable using a zip, and available in two variants for the Cresto, Maestro and Vivo.

The Breeze ticking for the Maestro and Vivo mattresses features Climawatt® for better ventilation and an extra soft feel. This ticking does not contain any wool and is washable in the washing machine at 60 °C. Ideal for people who suffer from wool or dust-mite allergies.

The Nature ticking is made of wool and feels incredibly soft. This ticking can be dry-cleaned.

The ticking of the Evolve mattress is easily removable using a zip, does not contain any wool, and can be washed in the washing machine at 40 °C.

Inizio and Adagio mattresses can be supplied with removable zipped ticking as an option.

Auping Cresto

The Cresto gives your sleep a quality boost thanks to its five zones, including flexible support for the shoulders. Durable Latex Pura gives this mattress an extra soft, resilient feel.

“Team Sunweb counts on the support of this Auping Cresto.”

Do you and your partner need different firmnesses, but you still want a double mattress? No problem. At Auping, we make double mattresses with two different firmness types built in. This means you can both enjoy the correct support in one double mattress.

Auping Maestro

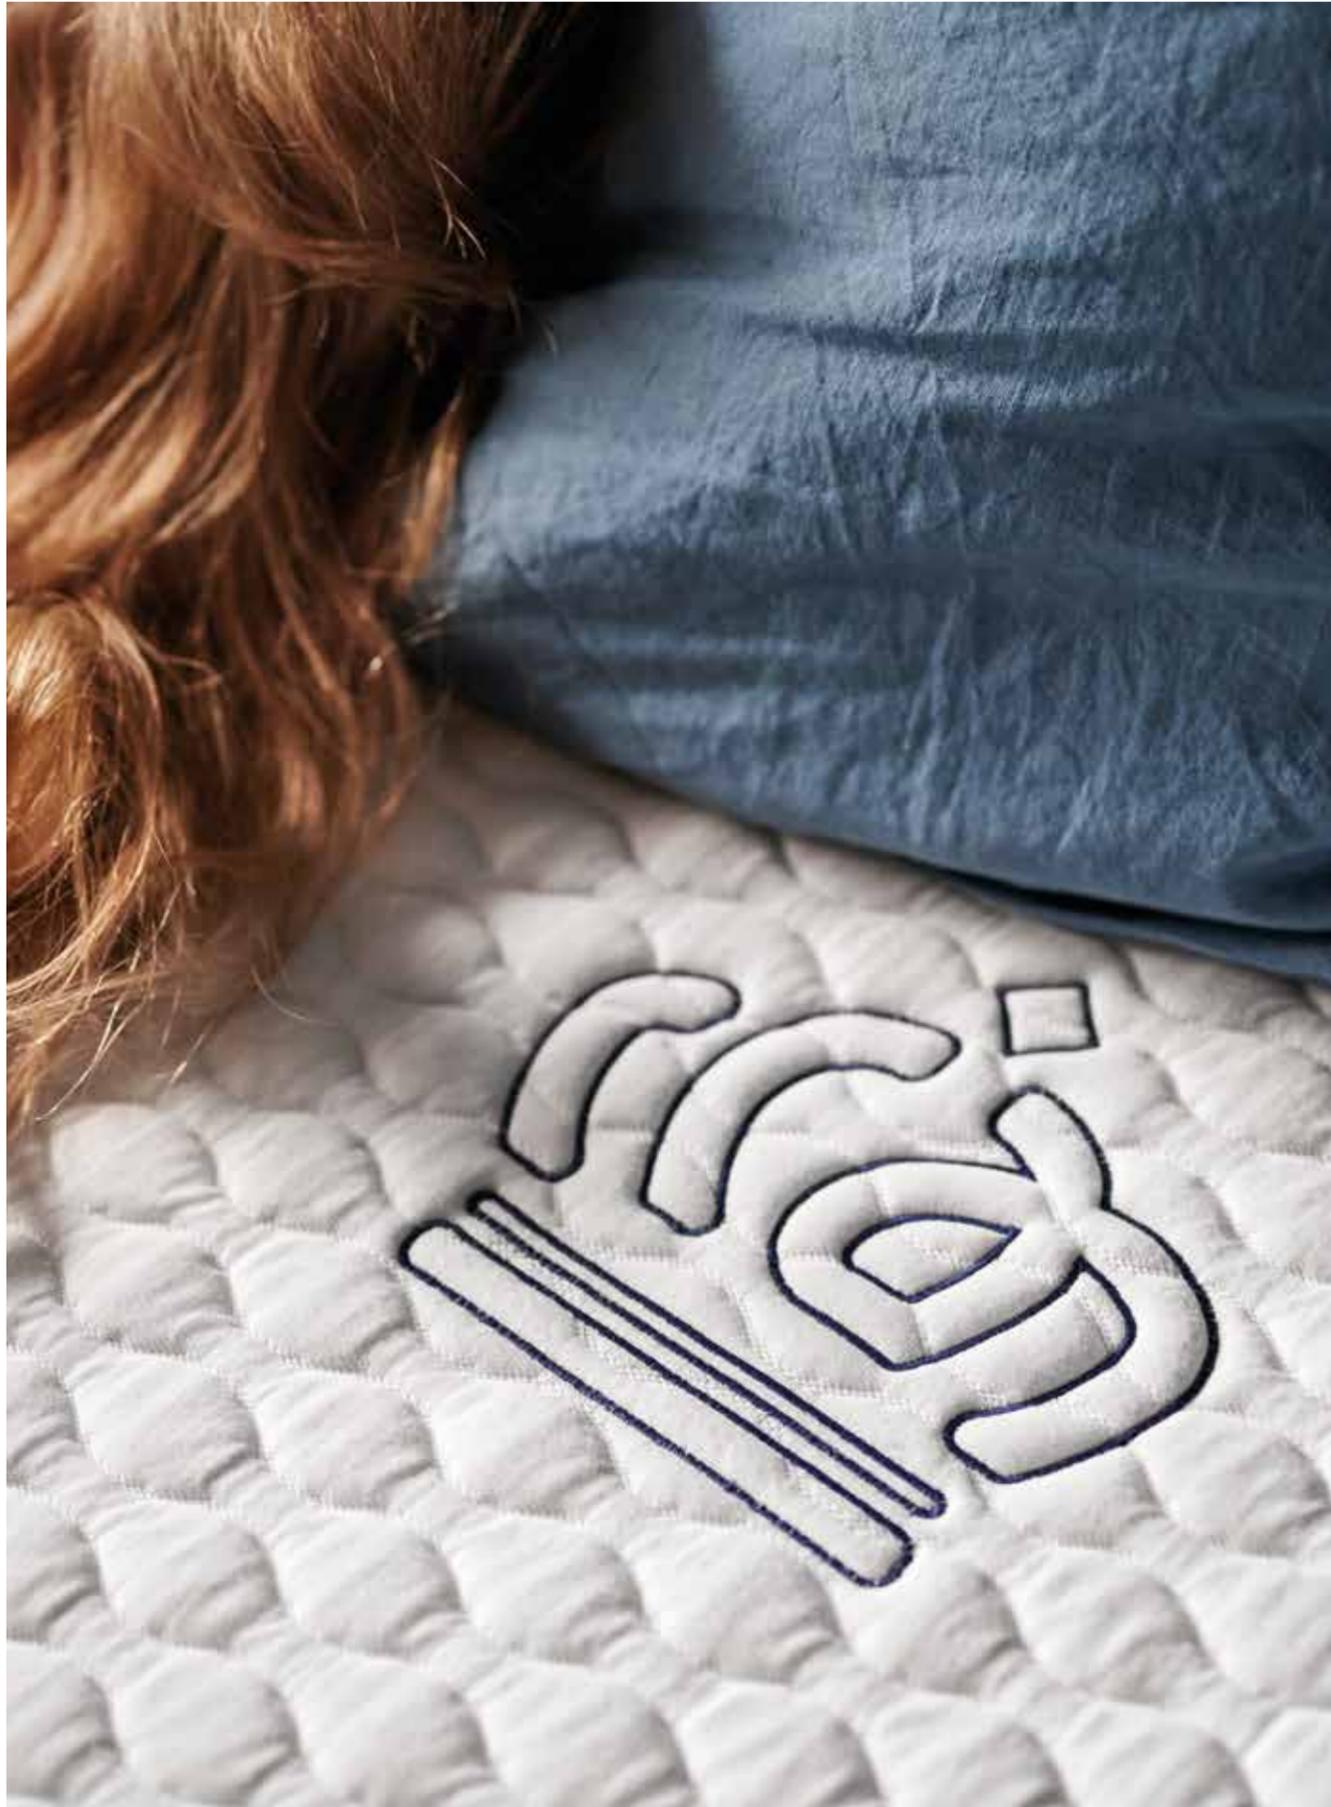

Maestro guarantees extremely comfortable sleep with optimal support. The extra high DPPS® pocket springs and the Visco material in the shoulder zone of this quality mattress relieve pressure and let your shoulders sink in comfortably.

Auping Vivo

The top-of-the-range, full-option Vivo is the ultimate choice for anyone who sets the highest of standards. Ventilation and sleeping comfort are optimised. This mattress boasts five zones in its core, as well as a supportive shoulder zone and a separate, flexible hip zone.

Auping Evolve, a relief for you and for the world

Evolve is the first circular mattress in the world. Auping has developed a mattress made without foam or glue, the materials of which can be reused continuously to make new mattresses: Auping Evolve. This mattress is not only good for the environment, but also very good for your sleep. Because we leave out the foam, the mattress is very soft with great ventilation. That is a bonus because it means you will lie comfortably, perspire less and sleep more soundly.

Know the materials on which you sleep

Auping Evolve only consists of two materials: steel and polyester. We believe it is important to manufacture as locally as possible and to know exactly where all the components come from. This is the only way we can guarantee that Auping Evolve is fully circular. We gathered all the information in a "Circularity Passport". Use your smartphone to scan the Niaga label on the side of the mattress to find out precisely what the Auping Evolve is made of. Objective, honest and transparent.

The Auping mesh base

In 1888, Johannes Albertus Auping was a hard-working blacksmith from Deventer who did not shy away from a challenge. When the director of a hospital asked him for a bed that provided ventilation, Auping made a braided mesh mattress. He did this by attaching iron threads to the cutting plate of a string bean grinder and then turning it around an axle. This created a beautiful braid. To this day, the ventilating mesh base is still the basis of all our beds and box springs.

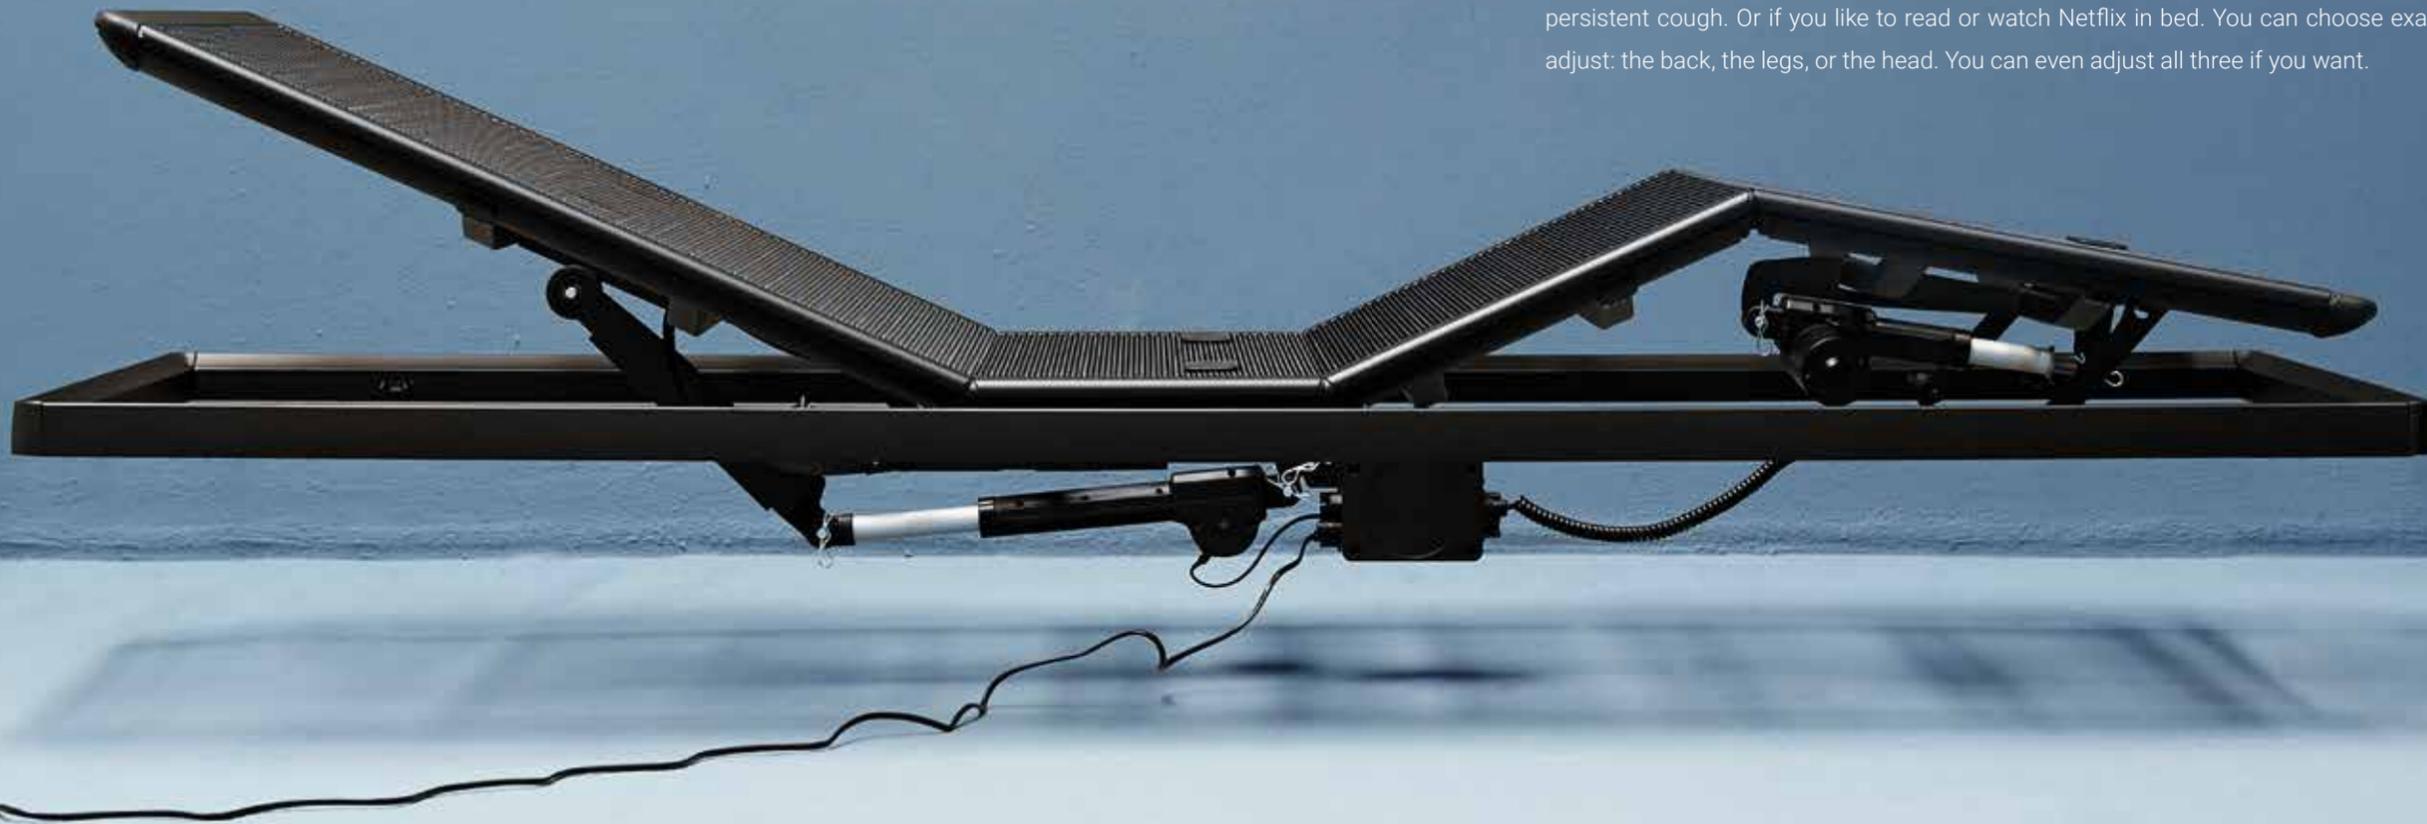

A good bed base is very important while sleeping. If you and your mattress get the best support, you can have wonderful dreams every night. And with the right bed base, your mattress can also breathe better and last longer.

Three benefits of an Auping mesh base:

- Because the mesh base has 80% open space for air, it ventilates better than every other bed base.
- The transversely stretched mesh, with its 10,000 support points, provides excellent support.
- The mesh base is made of hard-wearing steel so you can dream away on it for a lifetime.

Support for you back

Our mesh based also come adjustable. This is perfect for when you are suffering from back pain or a persistent cough. Or if you like to read or watch Netflix in bed. You can choose exactly what you want to adjust: the back, the legs, or the head. You can even adjust all three if you want.

Discover the advantages of the

Auping Smart base

It is really Smart

All our electrically-adjustable bases are "Smart". They do so much more than provide good ventilation and support. For example, say goodbye to those restless nights lying awake next to your snoring partner thanks to the anti-snoring function.

There is also a smart alarm clock that will wake you up quietly when you are in the lightest phase of your sleep, and you can connect the bed to all other smart devices in the home.

Never lie awake next to a snoring partner

As soon as the app detects you snoring, the mesh base moves momentarily, or the head end will move up slightly. This allows the sleeper to breathe freely again. And peace returns to the bedroom.

Wake up refreshed

Instead of that annoying alarm clock tune, your head is raised gently when you are in the lightest phase of your sleep. What a wonderful way to wake up.

Connect to your favourite home appliances

Good sleep starts with a good bed and mattress, but there's more to it than that. For example, the right sleeping temperature and lighting are very important if you want to get a good night's sleep. Feel the difference by connecting your bed to your smart thermostat, Philips Hue lamp, or any other smart devices you may have in your room.

Memory function

The handy Smart base memory function remembers your favourite settings. This is handy because you only have to adjust your bed properly once.

This is how good sleeping can be

At Auping, we make all our duvet covers using the finest natural threads and fabrics. With loops on the inside of the cover, you can easily tie it to your Auping duvet. This way, your duvet always stays in place. The extra long tuck-in flap ensures our covers are also suitable for thick mattresses. And the packaging? Made from materials that are suitable for recycling. This allows you to put your mind (and body) at rest when you go to bed.

A pillow is essential for good support. A good pillow ensures your neck muscles can relax. We have different pillows in our range for those who sleep on their front, side or back. Your favourite sleeping position, in combination with your mattress, will determine the right choice.

The choice of duvet depends heavily on your personal preferences. What filling do you like? Do you like it warm in bed or a little cooler? You can choose between a Summer or All Year duvet. On very cold nights, you can easily tie them together to create a 4-season duvet.

Auping pillows and duvets provide optimal ventilation and feel light and airy.

All down products in the Auping range are certified according to the Responsible Down Standard.
