ELOA - UNIQUE LIGHTS

Founded by Simone Lüling
2015

Solitary or in constellation, the ELOA lights create individual light concepts and associate with star constellations. Each glass piece is named after a star or a planet. They exist as hanging, floor, standing and wall luminaries.

ELOA combines the craft of ancient glassblowing with a simple, yet distinct design. In order to achieve the large size of the glass objects and working without forms, it takes a high level of refined craftsmanship and skill performed by only a few master glassblowers.

We are delighted to have been invited - together with over 70 designers - to this museum exhibition which can be viewed on 2 floors until 5 April 2020.
