Materiale essenziale – Design essenziale

“L'acciaio è un materiale che trova applicazione in una moltitudine di prodotti, in particolare la sua elevata resistenza alla corrosione, la sua robustezza e la tendenza a non interagire con l'ambiente lo rendono un materiale dalle spiccate qualità igieniche e adatto anche per applicazioni di tipo professionale”

Queste qualità si trasferiscono ai prodotti non come semplice somma ma donando oggetti realizzati secondo forme essenziali, prive di eccessi di materia, libere di esprimere la purezza del design e l'essenza di un'idea.

Z316 è la nuova collezione di rubinetteria disegnata dall'Arch. Roberto Innocenti e il progetto con cui Zazzeri ha voluto cogliere l'anima essenziale di questo nuovo materiale declinandola in una proposta ampia e profonda di prodotti per il bagno e la cucina interamente realizzata in acciaio inox AISI 316/L nella finitura spazzolata.

Basic material – Basic design

“Steel is a material which is applicable to a vast number of items; in particular, given its high resistance to corrosion, its toughness and its tendency not to interact with the environment, it is a material with marked hygienical qualities and suitable to professional applications, too”

These qualities are transferred to the items not as a simple sum, but by providing items which are manufactured with essential forms, with no surplus of material, free to express a simple design and the essence of an idea.

Z316 is the new collection of bathroom fittings designed by Arch. Roberto Innocenti and it is the project through which Zazzeri wanted to seize the basic soul of this new material by converting it into a wide and thorough offer of items for your bathroom and your kitchen being completely made of AISI 316/L stainless steel in its brushed finishing.

Miscelatore lavabo
Single-lever washbasin mixer
Waschtisch-Einhebeatterie
Monomando para lavabo
Mitigeur lavabo
