

# StableTable<sup>®</sup>

*"No more wobbly tables!"*

# STABLE TABLES, A PROFITABLE CONCEPT.

Wobbly tables, folded napkins under table legs, difficult adjustment screws and irritated guests are all but a memory. StableTable® is a new, patented, solution which automatically adjusts the table to any uneven surface. Regardless of where you place a table from StableTable®, it will always find a steady position.

No added weight is needed. On the contrary, the light tables can easily be moved around to create extra or differently arranged seating. Make the best use of the seating area, while reducing both the number of working hours and broken glasses!

StableTable® is a fully mechanical patented system with two self-adjusting legs.

The unique self-stabilizing system sits well protected inside the centre pillar away from dirt, rain, snow and other external influence. No need for service or maintenance.

The legs automatically adjust to both grooves and bumps and manage height differences up to 25 mm and works equally well on cobble stone, tiled or uneven floors, indoors and outdoors

The problem with wobbly tables exists everywhere, both indoors and outdoors. It is obvious on cobble stones or paved areas, but can be equally frustrating on tiles or wooden floors.

Having to adjust wobbly tables and not being able to freely arrange the seating area, is a waste of valuable time and reduces efficiency. StableTable® is a flexible solution which offers benefits in all environments, doing so with style and flair. The classic design of the patented base can be combined with any choice of table top to create a welcoming and unique atmosphere.

**PROBLEM SOLVING.**  
**EVERYWHERE!**

StableTable® opens a world of possibilities when it comes to furnishing, design and ambience.

The unique solution is hidden inside the pillar and the table base comes in several heights, sizes and colours. Every StableTable® has the same unique stability and flexibility, whether you choose a bar table, coffee shop table, dining table or lounge table. Extra sturdy designs are available for use in particularly demanding environments.

**SMART SOLUTIONS,**  
**INCREASED FLEXIBILITY.**

## TABLE BASES

**StableTable® Classic** is suitable for both indoor and outdoor use. The table base is available in three different heights (bar/poseur, dinner/café and lounge) and a number of different sizes for maximum flexibility. **StableTable® Extreme** in stainless steel is created especially for tough and exposed environments. **StableTable® Classic FlipTop™** is fitted with a folding mechanism for easy handling and minimum storage space. **StableTable® Nouveau™** is a modern design bistro table base. All bases are available in a number of colours. For a complete overview of the product portfolio, please visit our website [www.stabletable.se](http://www.stabletable.se)

## TABLE TOPS

The unique, patented StableTable® base can be fitted with any type of table top irrespective of type, shape or quality to create a unique design and atmosphere. There is an unlimited choice of new table tops – or buy the stand on its own for use with existing tops. **StableTable® OnTop™ Compact Laminate** is our range of high quality compact laminate (HPL) table tops for in- and outdoor use. For more information on the OnTop™ collection, please visit our website [www.stabletable.se](http://www.stabletable.se)

## PROFITABLE

StableTable® is a simple and smart investment which quickly pays for itself. More seats generate more income. With StableTable® it becomes easy to optimise the use of your seating area in a flexible manner. You will attract and satisfy more customers at a lower cost, and free up time to care for them.

## ENVIRONMENTALLY SMART

StableTable® bases are manufactured in a certified factory in Sweden. This makes for short transport distances and efficient deliveries all across Europe. StableTable® products are fully recyclable and produced to the highest quality standards, according to the Scandinavian design tradition. ISO 14001 and 9001.

## EASY TO WORK WITH

The smart solution, with its self-adjusting system, makes StableTable® easy to work with. Re-arrange a table for four, into two tables for two, in seconds. Add or move a table without ever having to adjust it. Levelling screws, folded napkins, wobbly tables and complaining customers are all history!

## UNIQUE FUNCTIONALITY

The StableTable® base has one fixed and one movable pair of legs. The mechanical system, placed in the pillar, regulates the movement of the legs. As soon as the table stands in a stable position, the legs will automatically lock. Every time the table is lifted, the legs will unlock and the table automatically adjusts to its new position.

- WOBBLE-FREE TABLES
- 100% SELF-ADJUSTING
- MANAGES BOTH BUMPS AND GROOVES UP TO 25MM
- FOR IN- AND OUTDOOR USE
- ROBUST MECHANICAL SYSTEM - PROTECTED INSIDE THE BASE
- FULLY LOCKING SYSTEM
- PRODUCED IN A CERTIFIED FACTORY IN SWEDEN
- FULLY RECYCLABLE
- SATISFIED CUSTOMERS
