

StableTable® Extreme

When nature meets innovation

StableTable® Extreme is an edgy table created for durability in all conditions.

With its square shaped cross-legs and rugged, unpolished marine quality stainless steel the Extreme stands out in any setting.

The table is perfect for use where nature is close, but works just as well in a heritage site or around the latest high-tech architecture in the city.

Built to last, the table is produced in Sweden in 316L quality stainless steel, and with its unpolished finish there is no shine or glare only a hint of history.

As all StableTable tables, functionality is key and the table has our own patented self-stabilising technology inside to ensure the table never wobbles.

StableTable® Extreme automatically adjusts to both bumps and grooves and manages height difference up to 25 mm.

StableTable 

No wobbly tables!

StableTable® Extreme at Giant's Causeway, Bushmills UK
When Swedish innovation meets Ireland's raw unspoilt nature, something mythical happens and long-lasting furniture - solving real problems - is created.

Design concept and benefits

StableTable Extreme is a versatile range of table bases fit for use in difficult external conditions but works equally well in high tech design areas. Produced in 316L Stainless steel the bases can be used next to salt water. And with its rugged and confident design the StableTable Extreme fits just as well in historic environments as in modern designs.
