

GRUPPOCASTIGLIONI
ENERGIA - PREFABBRICATI IN C.A. - INFRASTRUTTURE

COMPANY
PROFILE

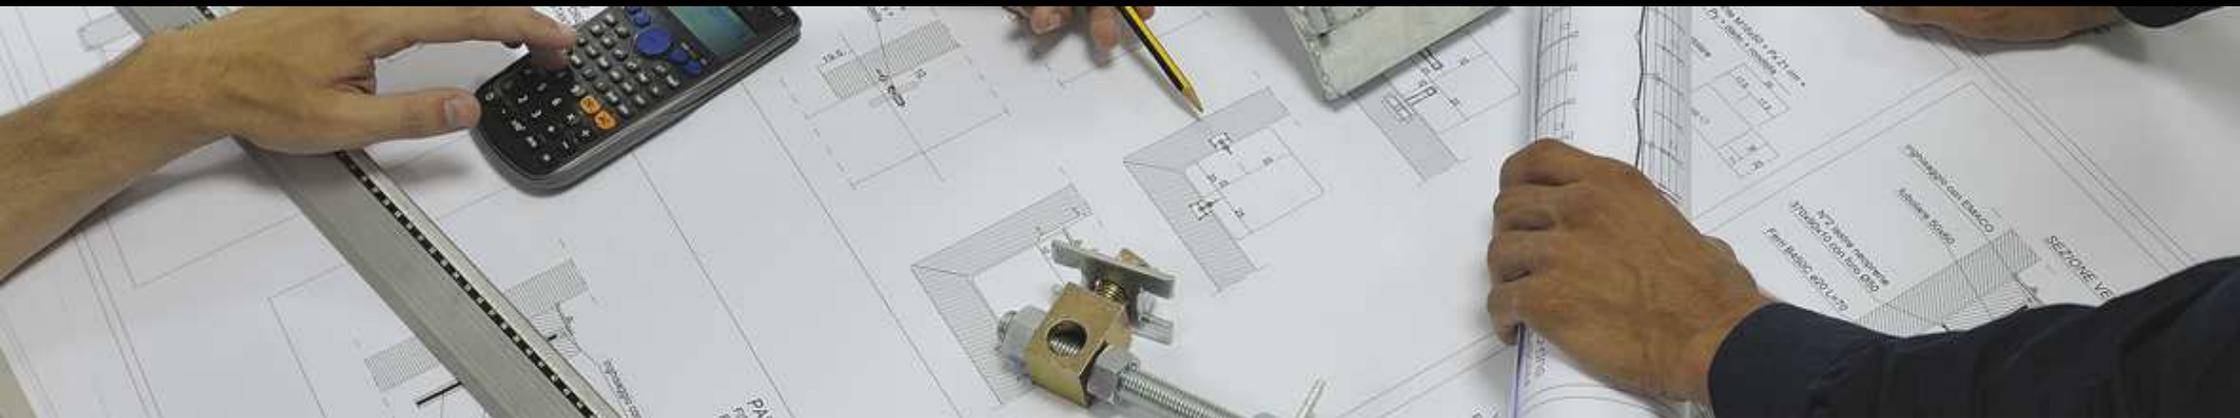

The **Castiglioni Group** is actively operative for over 60 years in the electrical, infrastructural, prefabrication in c.a and water treatments' sectors.

With a work force of more than 80 qualified and specialized employees and over 30.000 square meters of warehouses and facilities, the Group works stably both in Italy and abroad.

Its decades of experience, expertise, passion and dynamism among its collaborators and the operative synergy among the companies that are part of, has led the Group the opportunity to propose to its clients innovative and sustainable solutions, elevated qualitative and technical standards', in addition to the guarantee and respect of all the social security, environmental and safety legislation.

4 BUSINESS SECTORS

THE CASTIGLIONI GROUP OPERATES IN 4 DIFFERENT BUSINESS SECTORS

ENERGY

The Castiglioni Group operates in the sector of production and distribution of electrical energy with specific reference to the construction and maintenance of plans and electrical distribution powerlines with MV and LV mainly for Enel Distribuzione S.p.A

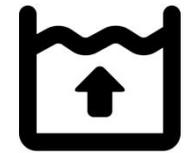

INFRASTRUCTURES

The Group participates in the building of many infrastructures and major Italian works thanks to its qualified staff, to the modern and advanced calculation programmes and process and product management systems and the new and efficient facility for the production of prefabricated structural components that made it able to provide a wide range of prefabricated structural components in pre-tensioned reinforced concrete and not.

PREFABRICATES

The Group has been working in the pre-tensioned prefabricated reinforced concrete sector since the second half of the '50s. Initially with the electrical cabins and going on increasing the products proposing as a specialized operator for the design and construction of prefabricated buildings, reinforced concrete tanks and water treatment systems, car garages and multi-storey car parks, sports centres, automated outdoor self-cleaning public toilets and small technological products.

WATER TREATMENT

The Group offers a wide range of plants and equipment for managing and treating rainwater, civil waste water and for managing sewer systems. This resourcefulness, together with its decades of prefabrication engineering and business experience in on-site work, electrical and mechanical assemblies and maintenance, has led the Group to understand the needs of the customer and market and to provide detailed, quick, precise and innovative answers.

LE SOCIETÀ DEL GRUPPO

IL GRUPPO CASTIGLIONI OPERA ATTRAVERSO 4 SOCIETÀ A CUI FANNO CAPO LE 4 DIVISIONI DI BUSINESS

Parent company that collects the single companies participations. It also performs real estate activities and services for the other operative companies of the Group.

- Ethical Code ex Lege 231/2001
- CE Mark for prefabricated products in compliance with UNI EN: 13225; 13747; 14843; 14991; 14492.

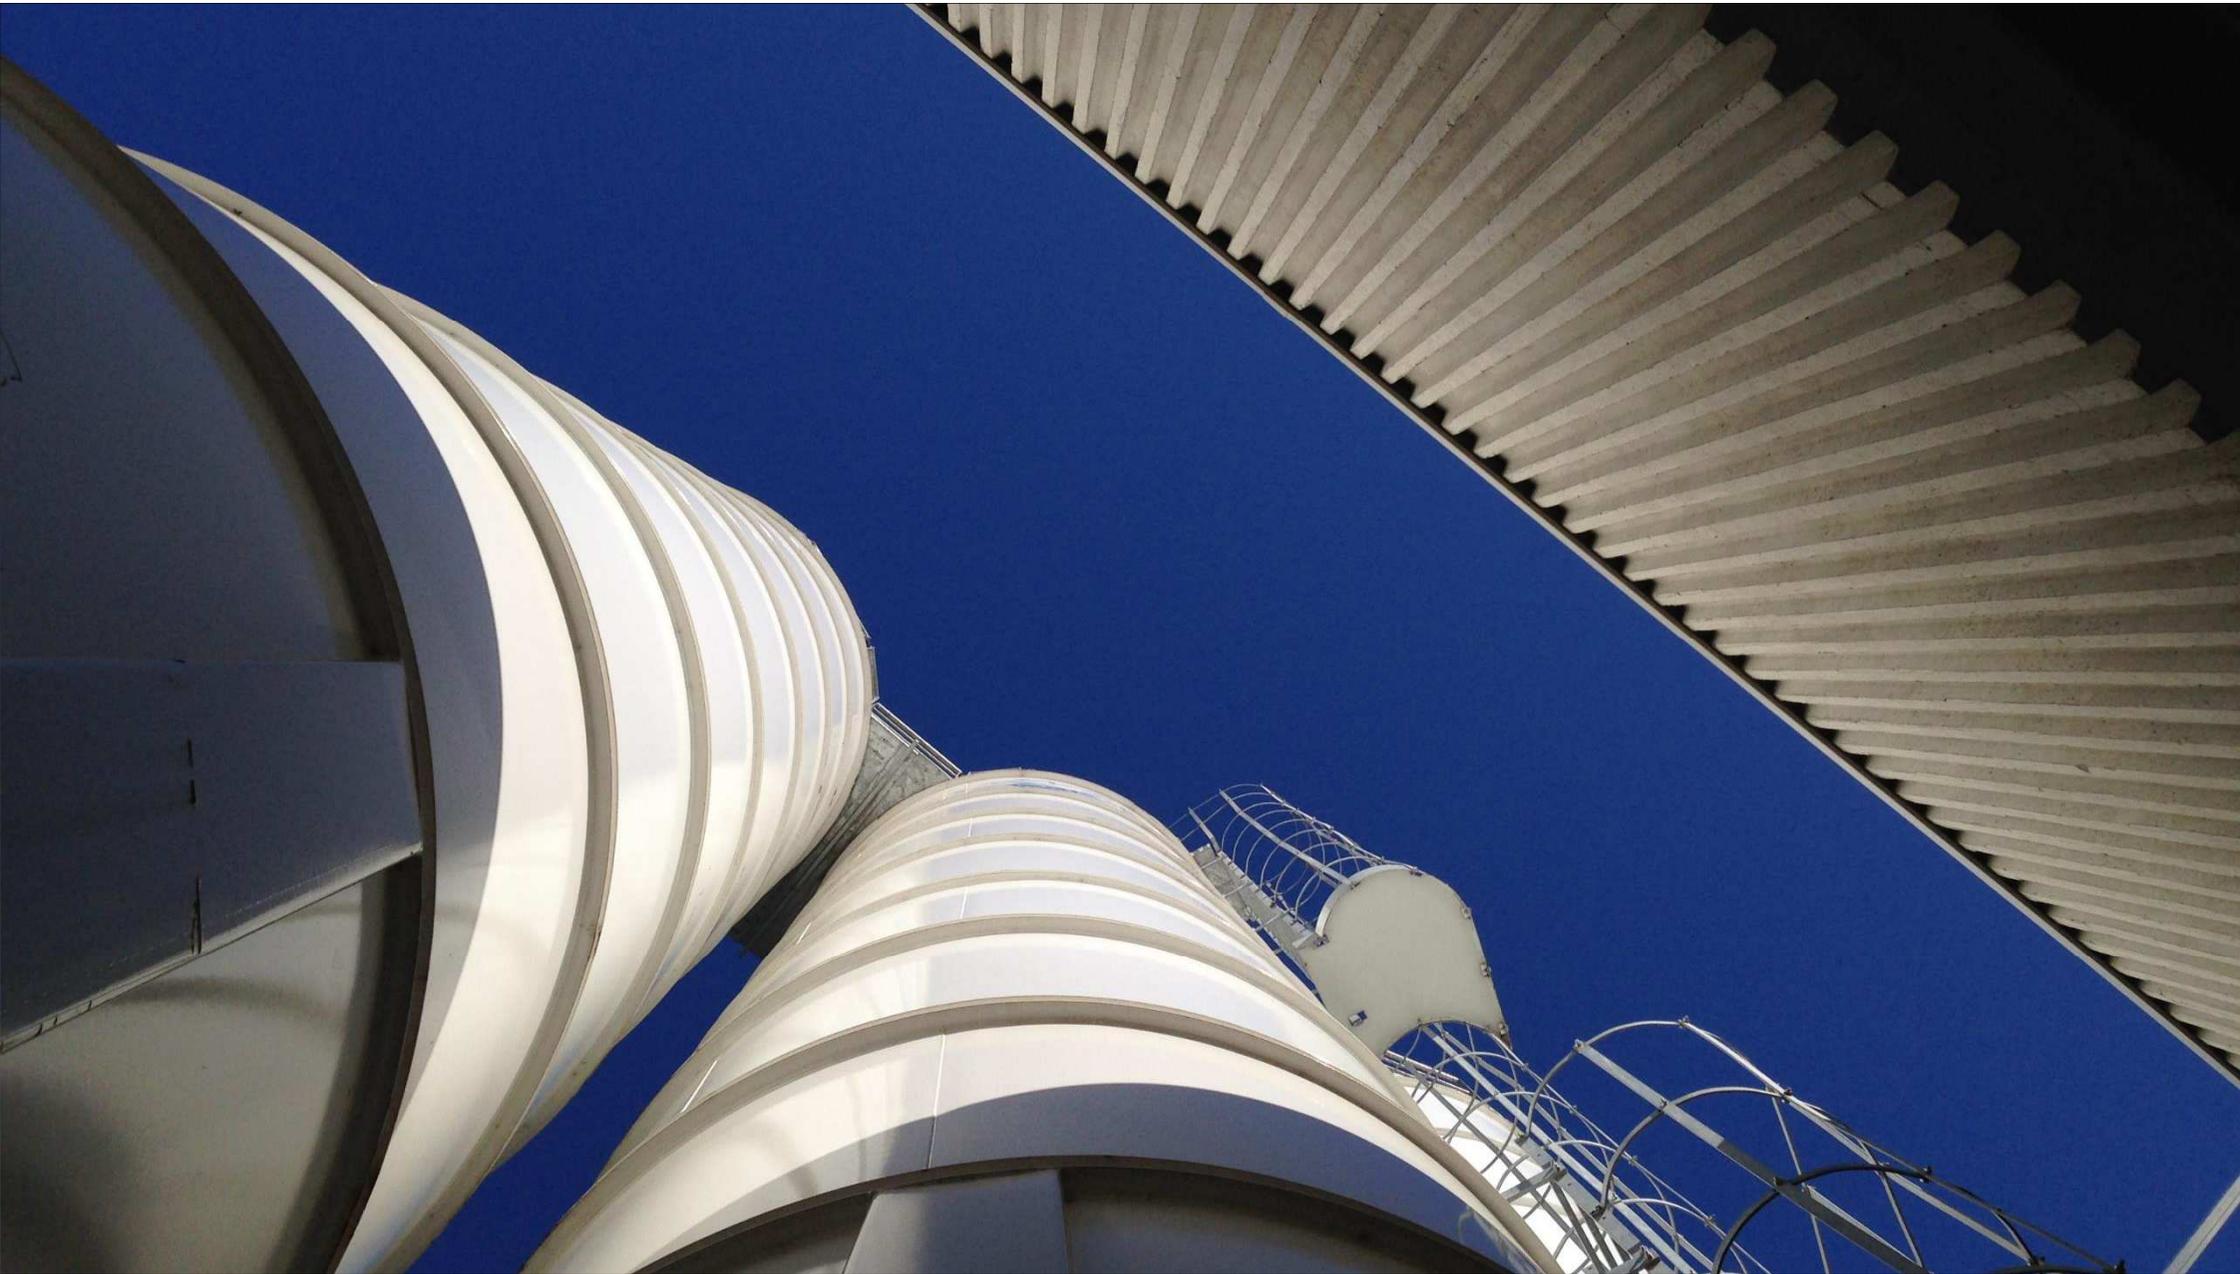

Finire di tradurre

SOA certificates issued by SOA RINA Spa in 2011/06/04 endind date 2021/04/17 in the following classes: (SOA 061 class. V; SOA 063 class. IV; SOA 066 class. IV ; SOA 069 class. I ; SOA 0610 class. IV bis ; SOA 053 class. I; SOA 056 class. I; SOA 057 class. I; SOA 0513 class. III bis ; SOA 0528 class. I; SOA 0530 class. II).

Betoncablo ows the following Enel Distribuzione S.p.a. qualification:

- LELE05 "Lavori su impianti MT/BT" con classe di interpello VI – capacità produttiva annua 6 Milioni di euro per soli lavori esclusa fornitura materiali;
- LELE08 "Lavori su impianti di telecomunicazione realizzati in fibra ottica con classe di interpello III – capacità produttiva annual Milioni di euro per soli lavori esclusa fornitura materiali – associata a qualifica Enel consortile Consorzio Cielo con classe di interpello VI – capacità produttiva annua 6 Milioni di euro;
- LEILO8 "Lavori da eseguire per l'attività di illuminazione pubblica ed artistica" con classe di interpello III – capacità produttiva annual Milioni di euro per soli lavori esclusa fornitura materiali;
- LEI10 "Sostituzione massiva Gruppi di Misura" con classe di interpello II – capacità produttiva annua 0,5 Milioni di euro per soli lavori esclusa fornitura materiali – associata a qualifica Enel consortile Consorzio Cielo con classe di interpello VI – capacità produttiva annua 6 Milioni di euro);
- FECE09 "Cabine secondarie in C.A.V. con apparecchiature elettriche";
- In riferimento alla categoria FECE09 la BetonCablo Spa risulta in possesso di Omologazione rilasciata da Enel Distribuzione Spa per la produzione di Cabine Prefabbricate in C.A.V. tipo BOX (Modello 062061) e Minibox (modello 062081).

SOME OF OUR CLIENTS

DURING THE YEARS THE GROUP HAS BEEN CHOSEN BY MANY AND IMPORTANT NATIONAL AND INTERNATIONAL CLIENTS AS

MILANO 2015

SOME OUR REFERENCES

MILANO 2015

EXPO 2015

Supply and installation of n. 34 electrical underground cabins omologated by Enel with concrete background into the Decumano's area.

TIGROS SPA

Realization of commercial prefabricated structure with 4.500 meters of roof surface with Planar system for Tigros S.p.A.

COMUNE DI LAVENO

Realization of the new public gym of Laveno Mombello with a prefabricated structure by Faldar system.

IMPIANTI DMS SPA

Realization of a new commercial building for DMS S.p.A by the constructive system Alar.

CABINE MT/BT

Supply and installation of electrical transformation cabins omologated by Enel form more than 1000 clients.
