Come viaggiatori si è arrivati ad apprezzare i benefici delle valigie di plastica. Sono estremamente leggeri e flessibili, ma allo stesso tempo resistenti e di bell'aspetto. Le valigie realizzate in lastre sottili di plastica termoformate hanno rivoluzionato un'intera specie di prodotto.

Come progettista sono rimasto colpito dall'ingegnosità di questa tecnologia pensando a quanto fosse appropriato all'applicazione nella produzione e funzione delle moderne scocche per sedie. Il potenziale creativo sembrava ovvio. Tuttavia, tradurlo in una formula di successo per una sedia necessitava tempo e sperimentazione. Con CUP abbiamo sviluppato un'elegante geometria per il guscio, che combina la resistenza strutturale con un alto grado di flessibilità e leggerezza. L'imbottitura interna della scocca aggiunge un'ergonomia equilibrata alla seduta che la rende una scelta perfetta per le situazioni di conferenza, aree di attesa e ristoranti. La scocca di plastica nera o bianca può essere combinata con una scelta infinita di tessuti e colori a seconda che si debba fondere con l'ambiente o essere una protagonista.

La collezione CUP si declina in una poltroncina, poltroncina lounge e dei tavolini impilabili.

As a traveller one has come to appreciate the benefits of plastic shell suitcases. They are extremely light and flexible, yet strong and good looking. Suitcases made of thin vacuum-formed plastic sheets have revolutionised an entire product species.

As a furniture designer I was struck by the ingenuity of this technology, considering how appropriate it was to the production and performance of modern chair shells. The creative potential seemed obvious. However, translating it into a successful formula for a chair took time and learning. With CUP we have developed an elegant geometry for the shell, which combines structural strength with a high degree of flexibility and lightness. The upholstered inside of the shell adds a well-balanced ergonomic quality to the chair, making it a perfect choice for conference situations, waiting and dining areas. The shell in black or white plastic can be combined with an infinite range of fabrics and colours, depending on whether it has to blend with the environment or to be the protagonist.

The CUP collection consists of a small armchair, lounge chair and stackable tables.
