URBAN SMART LIVING

PUBLIC SPACES FURNITURE

FOR A NEW VISION OF THE CITY

LAB23 offre alla clientela pubblica e privata un'ampia gamma di prodotti per l'arredo urbano: panchine, pensiline, cestini, dissuasori, fioriere, portabici, salva piante, per un totale di circa trecento articoli a catalogo. Tutti i prodotti sono caratterizzati da un design di gusto contemporaneo in grado di coniugare forme rigorose ed essenziali ma anche morbide e sinuose con materiali e soluzioni costruttive in grado di garantire un'elevata qualità in termini di solidità e di minimizzare i costi di manutenzione.

Come **Urban Smart Living**, la nuova linea di prodotti di arredo urbano interamente disegnata da Gibillero Design. La Collezione nasce come nuovo modo di pensare la città contemporanea. Una città fatta di oggetti semplici, colorati, curati nei dettagli. Per ottenere tali risultati LAB23 predilige per tutti i suoi prodotti materiali come acciaio inox, acciaio corten, e legno massello. L'azienda veneta mette anche a disposizione dei progettisti la possibilità di sviluppare e produrre in esclusiva sistemi di arredo urbano destinati a interventi specifici. Ogni prodotto è seguito dallo studio alla produzione, all'assemblaggio fino alla messa in opera direttamente dai tecnici interni che garantiscono la massima qualità del risultato finale.

*LAB23 offers to public administrations and private companies a wide range of products: benches, litter bins, bollards, planters, bike racks and tree guards for a total of more than 300 products. Every product is characterised by a design with a contemporary touch that combines rigorous and essential shapes but also soft and sinuous ones, the chosen materials and construction solutions guarantee high quality and low maintenance costs. **Urban Smart Living**, the brand new collection of street furniture designed entirely by Gibillero Design, is an example of that. This collection represents a new, different interpretation of the contemporary city. A city made of simple, colorful and well designed objects, and that's why LAB23 chooses materials such as stainless steel, corten steel and wood. the Venetian Company also provides designers with the possibility to create and develop exclusive systems of urban design, meant for specific interventions. Every phase the product goes through, from the design to its production, from its assembly to its delivery, is carefully managed by a team of experts who are a guarantee in terms of high quality.*

*LAB23 offre aux clients publics et privés une large gamme de produits – bancs, abris, corbeilles, bornes, jardinières, vélos, protections d'arbres – pour une collection d'un total de 300 produits. Tous les produits sont caractérisés par un design contemporain, qui conjugue formes rigides et essentielles avec formes moelleuses, matériels et solutions constructrices valides pour assurer une qualité élevée, solidité et bas coûts de maintenance. Comme **Urban Smart Living**, la nouvelle collection de mobiliers urbains entièrement dessinée par Gibillero Design. La Collection représente une nouvelle façon de penser la ville contemporaine. Une ville faite d'objets simples, colorés, avec attention aux détails. Pour obtenir ces résultats, LAB23 choisit des matériaux tels que l'acier galvanisé, l'acier inoxydable, l'acier corten, et le bois massif. L'entreprise Vénitienne collabore avec des designers de renommée internationale comme Zaha Hadid, Stéphane Chapelet, Roberto Semprini, Fuksas et Karim Rashid. Lab23 offre aux designers la possibilité de développer et de produire des mobiliers urbains exclusifs pour des projets spécifiques. Chaque produit est suivi depuis son étude jusqu'à la production, de l'assemblage à la mise en œuvre par nos techniciens internes, qui offrent la meilleure qualité et un résultat final correspondant aux attentes de nos clients.*
