sostituire un vecchio wc non è mai stato così semplice

PLUS è un sistema di scarico pensato per i vasi back to wall (fig.2) e progettato appositamente per essere adattato ad impianti di scarico esistenti, ottimo quindi per le ristrutturazioni del bagno. I wc filo muro di questa tipologia hanno caratteristiche che li rendono molto flessibili, particolarmente idonei per i vecchi impianti che prevedevano l'alloggiamento dei sanitari staccati dal muro, tipologia assai diffusa a partire dagli anni '50 (fig.1).

replacing an old pan has never been so simple

PLUS is a drainage system created for back to wall WCs (fig.2). Purposely designed to be easily adapted to existing drainage installations, it is an ideal solution for bathroom renovations. The Plus back to wall wcs have characteristics which make them very flexible. Particularly suitable for even the oldest plumbing installations where the sanitary ware was fixed away from the wall (fig.1); a very popular system starting from the 50's.

da/from 220 a/to 330 mm

Per usare i vasi con sistema **Plus** occorre misurare la distanza dal muro al centro dello scarico dell'impianto esistente. Per poi ordinare il modello di vaso scelto e l'articolo del set di scarico adatto alla misura rilevata.

To use the **Plus** system wcs you need to measure the distance from the wall to the center of the existing trap then order the pan of your choice and the drain pipe set suitable for the measurements taken.
