

Agape Proposals Outdoor. 05/2020

In a world where the conventional environments tend to escape from the traditionally functional definitions and become spatial opportunities with many different uses, the new Agape Outdoor Collection blurs the boundaries even further becoming ideal extension of the bathroom experience.

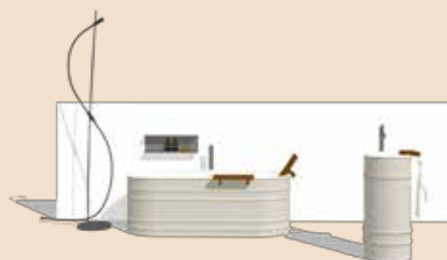

The Collection includes a selection of products, which, due to the nature of their materials, use or innovation, represent the first elements of a new project that Agape faces with its traditional care and passion.

A photograph of a glass vase with a plant branch and a glass pitcher on a dark, ribbed surface. The vase is filled with water and has a thin, dark branch with small, light-colored buds or leaves inside. The pitcher is also filled with water and has a handle. The background is a dark, textured surface, possibly a table or a wall, with a concrete ledge visible in the upper right corner. The lighting is soft and directional, creating highlights on the glass and the surface.
