SAUNA

La sauna finlandese è un rito che dal Nord Europa si è diffuso in tutto il mondo. Nella sauna il calore può raggiungere temperature fino ai 100°C, ma grazie alla bassa umidità (20-30%) si trasforma in un piacevole abbraccio che rilassa la muscolatura e favorisce la depurazione dell'organismo.

From its Scandinavian beginnings, the Finnish sauna has conquered the whole world. The heat in a sauna can reach temperatures up to 100°C but the low humidity (20-30%) transforms this into a pleasant embrace that relaxes the muscles and stimulates bodily purification.

20% > 30%

85°C > 100°C

BIOSAUNA

La Biosauna è una sauna con livelli di temperatura contenuti tra i 50 e i 60°C e un'umidità di circa 60-70%. Grazie al vaporizzatore integrato, impostando la temperatura preferita, la stufa Bio creerà l'equilibrio perfetto fra calore ed umidità.

The Bio-sauna is a sauna whose temperature ranges from 50 to 60°C with humidity between 60-70%. The built-in vaporiser allows you to set your preferred temperature and the Bio heater creates the perfect balance between heat and humidity.

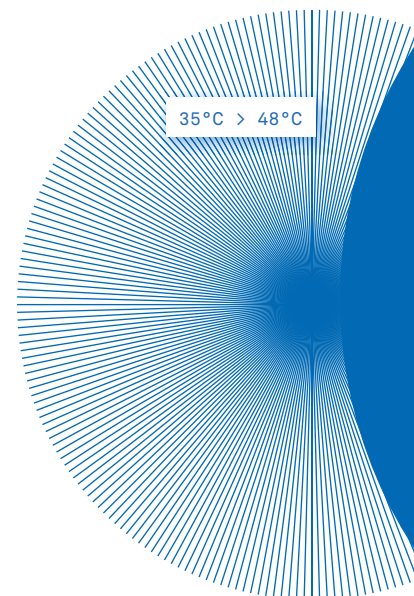

50°C > 60°C

60% > 70%

HAMMAM

Al contrario della sauna, nel bagno turco l'umidità raggiunge il 100% e le temperature non superano i 48°C. L'azione contemporanea del vapore e del calore controllato aiuta la circolazione sanguigna linfatica sciogliendo le tossine e favorendone l'espulsione.

In contrast to the sauna, in the steam bath the humidity reaches 100% and the temperature never exceeds 48°C. The combined action of the steam and the controlled heat assists the blood and lymph circulation system, dissolving toxins and favouring their expulsion.

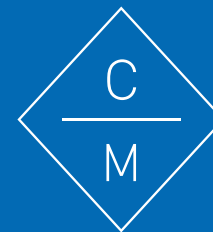

90% > 100%

35°C > 48°C

I prodotti Effe - by Effegibi - possono essere adattati a qualunque spazio: costruisci la tua personale area di benessere, ideata su misura per sfruttare al meglio ogni ambiente disponibile. Effe è in grado di realizzare progetti che prevedono la combinazione di saune, hammam, zone relax, bagno e doccia: il centro benessere ideale.

Effe - by Effegibi - products can be adapted to fit any space: create your own personal wellbeing area, tailor-made to make the very best use of the environment. Effe can produce designs combining saunas, Hammams, relaxation zones, baths and showers to create the perfect spa.

BodyLove H

Design: _____ Rodolfo Dordoni,
Michele Angelini

BodyLove H fa parte del sistema modulare progettato da Rodolfo Dordoni e Michele Angelini: uno spazio hammam dalle linee pulite, realizzato con materiali di altissimo pregio, versatile e compatto. La cabina può essere applicata su pavimenti preesistenti, per una perfetta integrazione degli ambienti.

- › Per la generazione del vapore BodyLove H utilizza la tecnologia Nuvola Smart Power, ispezionabile dall'esterno.

- › Finiture interne totalmente piastrellabili anche con altri rivestimenti per realizzazioni su misura.

- › Componenti di eccezionale qualità: grès porcellanato Champagne oppure vetro a canne, panche bianche in Corian®, accessori in Teck.

BodyLove H is part of the modular system designed by Rodolfo Dordoni and Michele Angelini: it is a versatile, compact Hammam space with clean lines and top-quality materials.

The cubicle can be mounted on existing floors, blending in perfectly with the room.

- › Hammam technology equipped with Nuvola Smart Power steam generator, accessible from outside.

- › Internal walls available to be tiled with other materials for made to measure projects.

- › Materials of outstanding quality: laminated grès porcelain Champagne or cane glass, Corian® white benches, teak accessories.

A panel of Botticino marble contains the taps and the spring and shower controls plus a copper-finish stainless steel bowl to douse yourself with cool water as you take your steam bath.

Finishes: Corian® benches and fluted glass painted on the back

BodyLove H
BodyLove H fait partie du système modulaire conçu par Rodolfo Dordoni et Michele Angelini : un espace hammam aux lignes épurées, réalisé avec des matériaux de la plus haute qualité, polyvalent et compact. La cabine peut être appliquée sur des sols préexistants, pour une intégration parfaite des environnements.

Caractéristiques :

Pour la production de vapeur, BodyLove H utilise la technologie Nuvola Smart Power (contrôlable depuis l'extérieur). Composants hammam de qualité exceptionnelle : grès porcelainé Champagne ou verre à flutes, banquettes blanches en Corian®, accessoires en Teck. Finitions internes à carreler entièrement même avec d'autres revêtements pour des réalisations sur mesure.

DEUTSCH

BodyLove H
BodyLove H ist Teil des von Rodolfo Dordoni und Michele Angelini entworfenen modularen Systems. Dieser vielseitige und kompakte Hamam-Bereich mit klaren Linien wird aus höchstwertigen Materialien hergestellt. Die Kabine kann auf vorhandenen Böden positioniert und damit perfekt in den Raum integriert werden.

Beschreibung:

Für die Dampferzeugung nutzt BodyLove H die Nuvola Smart Power-Technologie (von außen inspizierbar). Hamam-Elemente von außergewöhnlicher Qualität: Steinzeug Champagne oder Ornamentglas, weiße Bänke aus Corian®, Zubehör aus Teak. Innenausführungen gänzlich und für Projekte nach Maß auch mit anderen Verkleidungen verfliesbar.

ESPAÑOL

BodyLove H
BodyLove H forma parte del sistema modular diseñado por Rodolfo Dordoni y Michele Angelini. Se trata de un espacio hammam de líneas limpias, realizado con materiales de gran valor, versátil y compacto. La cabina se puede colocar sobre suelos preexistentes, de forma que se integre perfectamente con los demás ambientes.

Características:

Para la generación del vapor, BodyLove H utiliza la tecnología Nuvola Smart Power (inspeccionable desde el exterior). Componentes hammam de gran calidad: gres porcelánico Champagne o bien vidrio ondulado, bancos blancos en Corian® y accesorios en Teca. Acabados internos completamente embaldosables también con otros revestimientos para proyectos a medida.

РУССКИЙ

BodyLove H
BodyLove H являются частью модульной системы, спроектированной Родольфо Дордони и Микеле Анджелини: это хаммам, изготовленный из материалов высочайшего качества и характеризующийся универсальным, компактным и лаконичным дизайном. Кабина идеально интегрируется в любой интерьер и может быть установлена на уже имеющийся пол.

Характеристики:

В системе BodyLove H используется парогенератор Nuvola Smart Power (устанавливается снаружи и позволяет легко осуществлять осмотр и техобслуживание). Материалы высочайшего качества для хаммама: керамогранит оттенка Champagne или трубчатое стекло, белые скамейки из Corian®, аксессуары из тика. Все внутренние поверхности могут быть облицованы другими материалами по индивидуальному проекту.

中文

BodyLove H
BodyLove H 属于 Rodolfo Dordoni 和 Michele Angelini 设计的模块化系统: 这款功能全面、外形紧凑的土耳其浴室采用简洁的线条和优质的材料。该隔间可以直接安装地板上, 与房间完美融合。

特点:

在蒸汽生成方面, Body Love H 采用 Nuvola Smart Power 技术(可从外部进行检测)。土耳其浴室采用优质材料: 香槟色炻瓷或槽纹玻璃、Corian® 材质的白色板凳, 以及柚木配件。内部可以采用全瓷砖设计或其他类型的定制墙面覆层。

Mid

Design: _____ Talocci Design

In soli 3 metri Mid abbina sauna e hammam in un unico e prezioso oggetto di design. La trasparenza fra gli ambienti rende l'impatto estetico leggero e piacevole.

- › Aquasteam per la generazione del vapore: il meglio della tecnologia per il bagno turco.

- › Materiali di eccezionale qualità: legno Hemlock canadese, rivestimenti in grès laminato Slimtech® da 3,5 mm, porte in vetro temperato da 8 mm.

- › Disponibile in sette finiture standard, o con cromie personalizzate.

- › Spazio doccia comodo e funzionale, con miscelatore termostatico, doccia a mano e soffione doccia a soffitto 42x42 cm con funzioni pioggia e nebulizzazione.

Mid combines a sauna and a Hammam in a space of just 3 metres, a triumph of design. The clear glass dividing the two environments creates a pleasant light and airy look.

- › The Aquasteam steam generator runs on the best technology for the steam bath.

- › Top quality materials: Canadian hemlock wood, tiling in 3.5 mm Slimtech® laminated grès porcelain, 8mm toughened glass doors.

- › Available in seven standard finishes or personalised colour schemes.

- › Comfortable, practical shower space, with thermostatic mixer tap, hand-held and ceiling-mounted (42x42 cm) shower head, with rain and nebuliser functions.

Sauna: natural Canadian hemlock.

Mid / sauna + hammam + shower /

Sauna:
natural Canadian hemlock.

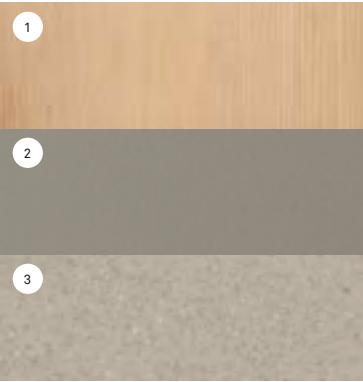

The bench seats are made of glass coupled with 3.5mm Slimtech® laminated grès porcelain, a material that is extremely resistant to temperature fluctuations and very pleasant to the touch.

Design: _____ Talocci Design

Il rito della sauna si completa con la zona doccia, accuratamente progettata nel pieno rispetto della tradizione finlandese.

› Tutta la zona sauna è rivestita in legno di Hemlock canadese, il materiale più pregiato utilizzato per le saune finlandesi.

› La struttura esterna alla sauna è disponibile in sette finiture standard, o con cromie personalizzate.

The sauna is completed with a shower area, carefully designed to be faithful to the Finnish tradition.

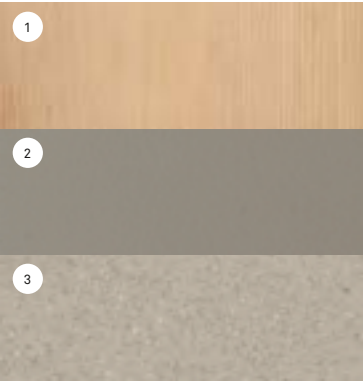

› The entire sauna area is clad in Canadian hemlock wood, the most highly prized material for Finnish saunas.

› The outside of the sauna is available in seven standard finishes or with personalised colour schemes.

One S

Design: _____ Talocci Design

One S è concepita per essere estremamente pratica e realizzata con materiali di eccezionale qualità: interni e arredi in Hemlock canadese, molto resistente nel tempo. Abbinata con One H, offre grande versatilità nelle applicazioni in centri benessere, palestre o in casa.

› Disponibili in sette finiture standard, o con cromie personalizzate.

› One H utilizza Aquasteam 45 per la generazione del vapore, per un controllo totale di densità e igiene.

› Grande versatilità nelle applicazioni, in centri benessere, palestre o in casa.

One S has been designed with practicality in mind and is made from top-quality materials: the interiors and fittings are in Canadian hemlock which is very long-lasting. Can be combined with One H, making it highly versatile and ideal for spas, gyms or private homes.

› Available in seven standard finishes or with a personalised colour scheme.

› One H uses an Aquasteam 45 steam generator, for total steam density and hygiene control.

› Extremely versatile, ideal for location in a spa, gym or a private home.

One H

Design: _____ Talocci Design

One H è un box hammam coordinabile con la sauna One S. I prodotti One offrono grande versatilità nelle applicazioni in centri benessere, palestre o in casa grazie alla pulizia formale del design, facilmente abbinabile a contesti differenti. One H può inoltre garantire una eccellente qualità di vapore grazie al generatore Aquasteam 45.

- › One H utilizza Aquasteam 45 per la generazione del vapore, per un controllo totale di densità e igiene.
- › Disponibili in sette finiture standard, o con cromie personalizzate.

One H is a Hammam cubicle which matches the One S sauna. One products are extremely versatile and ideal for spas, gyms or private homes, thanks to the clean lines of their design which compliments any room. One H also produces top-quality steam, thanks to the Aquasteam 45 generator.

- › One H uses an Aquasteam 45 steam generator, for total steam density and hygiene control.
- › Available in seven standard finishes or with a personalised colour scheme.

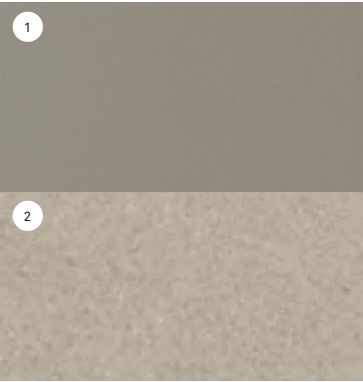

The interior of One H is tiled in carefully-crafted Slimtech® grès porcelain to ensure contact with bare skin creates a warm, natural sensation.

Topkapi

Design: _____ Rodolfo Dordoni
with Michele Angelini

Il vero lusso degli antichi hammam è rappresentata da Topkapi: rivestimenti in marmo Carrara, Marquina o Botticino e uno standard qualitativo senza uguali nella generazione del vapore.

- › Bagno turco completo di doccia, fonte, panche e cromoterapia.
- › Topkapi è dotato di una fonte rivestita in marmo di prima scelta, completa di ciotola in acciaio finitura ramata.
- › Pannello touch intuitivo e retroilluminato per gestire vapore, temperatura, luce e cromoterapia.

Topkapi represents the luxury of the traditional Hammam, its walls lined with Carrara, Marquina or Botticino marble and unequalled performance from the steam generator.

- › Steam bath complete with shower, spring, benches and colour therapy.
- › Topkapi comes with a spring clad in top quality marble, complete with a copper-finish steel bowl.
- › Intuitive, back-lit touch control panel operates the steam, temperature, lighting and colour therapy.

Finish: Marquina marble with rain-effect glass.

Topkapi La véritable essence des anciens hammams est représentée par Topkapi : des revêtements en marbre Carrare, Marquina ou Botticino et un standard qualitatif inégalé dans la production de vapeur. Caractéristiques : Bain turc équipé de douche, fontaine, banquettes et chromothérapie. Topkapi est équipé d’une fontaine revêtue en marbre de premier choix, avec bol en acier finition cuivrée. Tableau tactile intuitif et rétro-illuminé pour gérer la vapeur, les températures, la lumière et la chromothérapie.	Topkapi La auténtica esencia de los antiguos hammam está representada por Topkapi: revestimientos en mármol de Carrara, Marquina o Mármol Botticino y un estándar de calidad sin iguales en la generación del vapor. Características: Baño turco equipado con ducha, fuente, bancos y cromoterapia. Topkapi dispone de una fuente revestida en mármol de primera calidad, equipado con cuenco en acero con acabado de cobre. Panel touch intuitivo y retroiluminado para gestionar vapor, temperaturas, luz y cromoterapia.	Topkapi Topkapi 系列是古老的土耳其浴的纯粹代表：外饰面选用卡拉拉大理石、黑白根大理石或米黄大理石，配置了相同质量标准下外形各异的蒸汽发生器。 特点: 土耳其浴完整配置了淋浴、泉水、长椅以及彩色光谱疗法。 Topkapi 系列采用优等大理石，配置抛光铜漆面处理的不锈钢水钵。 带背光灯的碰触式控制面板，用来调节蒸汽、温度、灯光及彩色光谱疗法。

Yoku

Design: _____ Marco Williams Fagioli
(Zup Design)

Pur avendo un design essenziale, equilibrato e rigoroso, Yoku è accogliente, calda e naturale. L'ampia vetrata frontale è scandita all'esterno da elementi verticali in legno naturale che rendono lo spazio più intimo e diventano contemporaneamente elementi portanti di ripiani a giorno che dialogano con l'esterno.

› Tre diverse soluzioni estetiche declinabili in tre diverse essenze di legno rendono il progetto aperto a qualsiasi proposta progettuale.

› Il volume della stufa è integrato nella panca più bassa offrendo così un'immagine di grande linearità formale.

Yoku's essential, well-balanced minimalist design is also warm, welcoming and natural. The large glass panel at the front features vertical elements in natural wood on the outside, which make the space inside more private and provide shelving that is open to the external environment.

› Three different designs available in three different types of wood mean the sauna meets all aesthetic needs.

› The heater is built into the lowest bench thus displaying an uncluttered, linear effect.

FRANÇAIS
Yoku Malgré son design essentiel, équilibré et rigoureux, Yoku est accueillant, chaud et naturel. La grande cloison vitrée frontale est constituée à l'extérieur par des éléments verticaux en bois naturel qui rendent l'espace plus intime, devenant en même temps des éléments porteurs de surfaces d'appui visibles qui dialoguent avec l'extérieur.
Caractéristiques :
Trois diverses solutions esthétiques déclinables en trois diverses essences de bois permettent de réaliser toutes propositions conceptuelles. Le volume du poêle est intégré dans la banquette inférieure, offrant ainsi une image de grande linéarité formelle. La version Yoku S prévoit une bibliothèque externe qui la rend particulièrement adaptée à toute intégration avec le salon.

DEUTSCH

Yoku Trotz ihres essentiellen, ausgewogenen und strengen Designs ist Yoku einladend, warm und natürlich. Die große frontale Verglasung wird außen durch vertikale Elemente aus Naturholz belebt, die den Innenraum intimer machen und gleichzeitig zu tragenden, offenen Regalelementen werden, die eine Verbindung nach außen schaffen.
Beschreibung:
Drei verschiedene Lösungen mit drei verschiedenen Holzarten machen den Weg frei für vielerlei Projektvorschläge. Der Ofen ist in die untere Bank integriert, wodurch ein formales lineares Bild entsteht. Die Ausführung Yoku S ist mit einem Außenregal ausgestattet, wodurch sie sich besonders gut in den Living-Bereich einfügen lässt.

ESPAÑOL
Yoku A pesar de tener un diseño esencial, equilibrado y riguroso, Yoku es acogedora, cálida y natural. La amplia pared de vidrio frontal cuenta en el exterior con elementos verticales de madera natural que proporcionan intimidad al espacio y se convierten al mismo tiempo en elementos de soporte para estantes que se relacionan con el exterior.
Características:
Tres soluciones estéticas diferentes declinables en tres esencias de madera distintas hacen que el proyecto esté abierto a cualquier propuesta proyectual. El volumen de la estufa está integrado en el banco más bajo ofreciendo de esta forma una imagen de gran linealidad formal. La versión Yoku S prevé una librería externa que hace que sea especialmente adecuada para integrarla en la zona de día.

РУССКИЙ

Yoku Несмотря на свой лаконичный, уравновешенный и строгий дизайн, сауна Yoku вносит в интерьер уютную, теплую и натуральную нотку. Большое переднее окно снаружи отделано вертикальными элементами из натуральной древесины, которые создают внутри сауны атмосферу уединения и одновременно выполняют функцию стеллажа, облагораживая интерьер всего помещения.
Характеристики:
Возможность выбора из трех вариантов дизайна и трех видов древесины позволяет максимально персонализировать проект сауны. Каменка, интегрированная в самый низкий полоч, усиливает строгую линейность дизайна. В версии Yoku S возможна установка внешнего стеллажа, который прекрасно впишется в интерьер гостиной.

Air

Design: _____ Talocci Design

Air è una sauna dal design originale e contemporaneo, caratterizzata dalla sospensione delle sedute e dalla simmetria delle linee, con la stufa in posizione centrale: la leggerezza diventa il carattere dominante.

- › Le panche sospese alleggeriscono il design e consentono l'installazione sul pavimento esistente.
- › La stufa in posizione centrale fa di Air un luogo di incontro, dove rilassarsi in compagnia.
- › I piani delle panche diventano all'esterno un portasciugamani e un funzionale piano di appoggio.
- › Arredamenti realizzati in pregiato legno Aspen al naturale o termotrattato, molto resistente nel tempo.
- › Ampie superfici vetrate a tutta altezza in cristallo temperato da 10 mm.

The Air sauna is an original, contemporary design which, as the name implies, features a light and airy feel created by the suspended seating and symmetrical lines with the heater in a central position.

- › The suspended benches create a lightweight design enabling the sauna to be installed on existing flooring.
- › The centrally placed heater makes Air the ideal meeting place to relax in company.
- › The bench seats project outside, creating a handy towel holder and shelf.
- › The fittings are made of luxurious aspen wood, either natural or heat-treated for a long life.
- › Ample glass surfaces in 10mm toughened glass.

FRANÇAIS	ESPAÑOL	
Air Air est un sauna au design original et contemporain, caractérisé par la suspension des banquettes et par la symétrie des lignes, avec le poêle positionné au centre : la légèreté devient le caractère dominant.	Air Air es una sauna de diseño original y contemporáneo, caracterizada por la suspensión de los asientos y por la simetría de las líneas, con la estufa en posición central: la ligereza se convierte en su característica dominante.	Внутренняя отделка и стены выполнены из ценной и долговечной древесины литовской осины (с термообработкой или в натуральном виде). Наружные торцы лежаков выполняют функцию держателей для полотенец и практичных полок. Обширная площадь остекления во всю высоту фасада: закаленное стекло 10 мм.
Caractéristiques : Les banquettes suspendues rendent le design plus léger et permettent l'installation sur le sol existant. Le poêle positionné au centre fait d'Air un lieu de rencontre, où se détendre en compagnie. Les mobiliers sont réalisées en bois précieux Aspen au naturel ou thermo-traité, très résistant dans le temps. Les plans des banquettes deviennent à l'extérieur un porte-serviettes et un plan d'appui fonctionnel. De grandes surfaces vitrées sur toute la hauteur en cristal trempé de 10 mm.	Características: Los bancos suspendidos aligeran el diseño y permiten la instalación en el suelo existente. La estufa en posición central convierte Air en un lugar de encuentro, dónde relajarse en compañía. La parte interna y las paredes están realizadas en madera Aspen de calidad, al natural o tratada térmicamente, muy resistente en el tiempo. Las superficies de los bancos se convierten, en la parte externa, en un toallero y una funcional base de apoyo. Amplias superficies de vidrio hasta el techo en cristal templado de 10 mm. Las fuentes luminosas de Led colocadas debajo de los bancos destacan la ligereza del ambiente.	中文 Air Air 系列桑拿浴为原创现代设计，悬空式座椅，对称式结构线条，居中式桑拿炉：简洁轻便是一款桑拿房的主要特点。 特点: 悬空长椅使得设计更显轻巧，并且桑拿房可以安装在已经铺好地板的地面上。居中式桑拿炉使得Air系列桑拿房成为相聚的休闲场所，人们可以在相互陪伴下休息放松。 内部及墙板选用产自立陶宛的天然或热恒温处理的白杨木材，使得此款桑拿房长久耐用。 长凳的层次在桑拿房外成为搭放毛巾或可用的背靠。 桑拿房表面大范围采用经过高温淬火处理的钢化玻璃，厚度为10mm。
DEUTSCH	РУССКИЙ	
Air Air ist eine Sauna im originalen und modernen Design. Sie zeichnet sich durch schwebend wirkende Sitzflächen und symmetrische Linien sowie den mittig positionierten Ofen aus: Leichtigkeit wird zum dominierenden Charakterzug.	Air Air – это сауна с оригинальным современным дизайном, в котором доминирует концепция воздушной легкости, выраженная подвешенной конструкцией лежаков, симметричными линиями и центральным расположением каменки.	
Beschreibung: Die schwebenden Bänke erleichtern das Design und ermöglichen die Installation auf existierenden Böden. Der mittig positionierte Ofen macht Air zu einem Ort der Begegnung, um sich in Gesellschaft zu entspannen. Das Ausstattung bestehen aus hochwertigem dauerhaft sehr resistentem Espenholz, naturbelassen oder thermisch behandelt. Die Bankflächen werden außerhalb zu einem Handtuchhalter und einer praktischen Ablage. Große Glasflächen bis zur Decke aus gehärtetem 10-mm-Glas.	Характеристики: Подвешенные лежаки делают конструкцию более легкой и позволяют установить сауну на существующий пол. Каменка, расположенная по центру кабины, делает Air местом встречи и релаксации в компании.

Sky Corner

Design: ————— Talocci Design

Nuovo modello della linea Sky, con una superficie vetrata ancora più ampia: un vero e proprio angolo trasparente di luce e benessere.

- › Sauna certificata, realizzata in pregiato legno canadese Hemlock e vetri temperati 10 mm.

- › Superficie vetrata estremamente ampia: parete frontale, porta, soffitto e parete laterale.

- › Grande versatilità, ideale per realizzazioni su misura.

A new addition to the Sky line, with more generous glass surfaces, a corner radiating light and wellbeing.

- › Certified sauna made of prized Canadian hemlock wood and 10mm toughened glass panels.

- › Extremely generous glass surfaces: front wall, door, ceiling and side wall.

- › Extremely versatile, ideal for made-to-measure solutions.

The Sky Corner interior can be enhanced with colour therapy and under-bench LED lighting (optional)

The larger glass surfaces emphasise the design features of this line.

Illuminazione a parete con luce bianca a Led.
Stufa con pietre.
Pannello di controllo, finitura acciaio spazzolato.
Funzione Energy Saver automatica.
Impianto elettrico canalizzato.
Panche.
Griglia protezione stufa.
Mastellino e mestolo in legno.
Clessidra.

Optional
Biosauna.
Cromoterapia a Led.
Mood Light (Led sottopanca).
ECC - Effe Comfort Control.
ESS - Effe Sound System.
Pedane a pavimento.

Materials
Outside, Inside and Fitting:
Canadian Hemlock;
Swedish Fir Wood.
8 mm clear tempered glass.

Features/Components
Wall lighting with Led white light.
Heater with stones.
Control panel with brushed steel finish.
Automatic energy saver function.
Electrical system with protected cable ducts.
Benches.
Protective grille for heater.
Wooden bucket and ladle.
Hourglass.

Optional
Bio-sauna.
Colour Therapy Led RGB.
Mood Light (Led under the bench).
ECC - Effe Comfort Control.
ESS - Effe Sound System.
Floor platforms.

Auki

Design: _____ Talocci Design

Costruita totalmente in legno pregiato di Abete di Svezia oppure Hemlock canadese senza nodi, Auki combina l'antica tradizione delle saune nordeuropee con un design moderno.

- › Sauna certificata IMQ, realizzata in legni pregiati e vetrate in cristalli temperati da 8 mm.
- › Pareti interne e esterne caratterizzate da doghe di larghezze variabili.
- › Auki si adatta facilmente alle necessità dello spazio a disposizione, anche per applicazioni su misura.

Built entirely from highly-prized Swedish pine or knot-free Canadian hemlock, Auki is the perfect blend of the ancient Scandinavian sauna tradition and up-to-the-minute design.

- › IMQ certified sauna made of highly-prized wood and 8mm toughened glass panels.
- › Inner and outer walls feature slats of variable width.
- › Auki can easily be adapted to fit the available space, also for made-to-measure solutions.

Finish: Canadian hemlock
Optional: side glass panel

Finish: Swedish pine

FRANÇAIS

Auki
Fabriqué entièrement en bois précieux de Pin finlandais ou Hemlock canadien sans nœuds, Auki combine l'ancienne tradition des saunas nord-européens avec un design moderne.

Caractéristiques :

Sauna certifié IMQ, réalisé en bois précieux et cloisons vitrées en cristal trempé à basse émission de 8 mm. Parois internes et externes caractérisées par des lattes de largeurs variables. Auki s'adapte facilement aux exigences de l'espace à disposition, également pour des applications sur mesure.

DEUTSCH

Auki
Die gänzlich aus hochwertigem schwedische Fichtenholz oder astfreiem kanadischen Hemlock-Holz gebaute Auki kombiniert die antike Tradition der nordeuropäischen Saunen mit modernem Design.

Beschreibung:

Sauna mit IMQ-Zertifikat, gefertigt aus hochwertigen Hölzern und Verglasungen aus gehärtetem Niederemissionsglas, 8 mm.

Die Innen und Außenwände zeichnen sich durch unterschiedlich große Dauben aus. Auki passt sich leicht dem zur Verfügung stehenden Raum an, auch für Anwendungen nach Maß.

ESPAÑOL

Auki
Construida completamente con madera de calidad de Abeto finlandés o bien Hemlock canadiense sin nudos, Auki combina la antigua tradición de las saunas del norte de Europa con un diseño moderno.

Características:

Sauna certificada IMQ, realizada en maderas de calidad y paredes de vidrio en cristal templado de baja emisión de 8 mm. Paredes internas y externas caracterizadas por tablas de anchuras variables. Auki se adapta fácilmente a las necesidades del espacio a disposición, incluso en aplicaciones a medida.

РУССКИЙ

Auki
Полностью выполненная из отборной финской ели или из канадского

хемлока без сучков, Auki являет собой гармоничное сочетание традиций финской сауны и современного дизайна.

Характеристики:

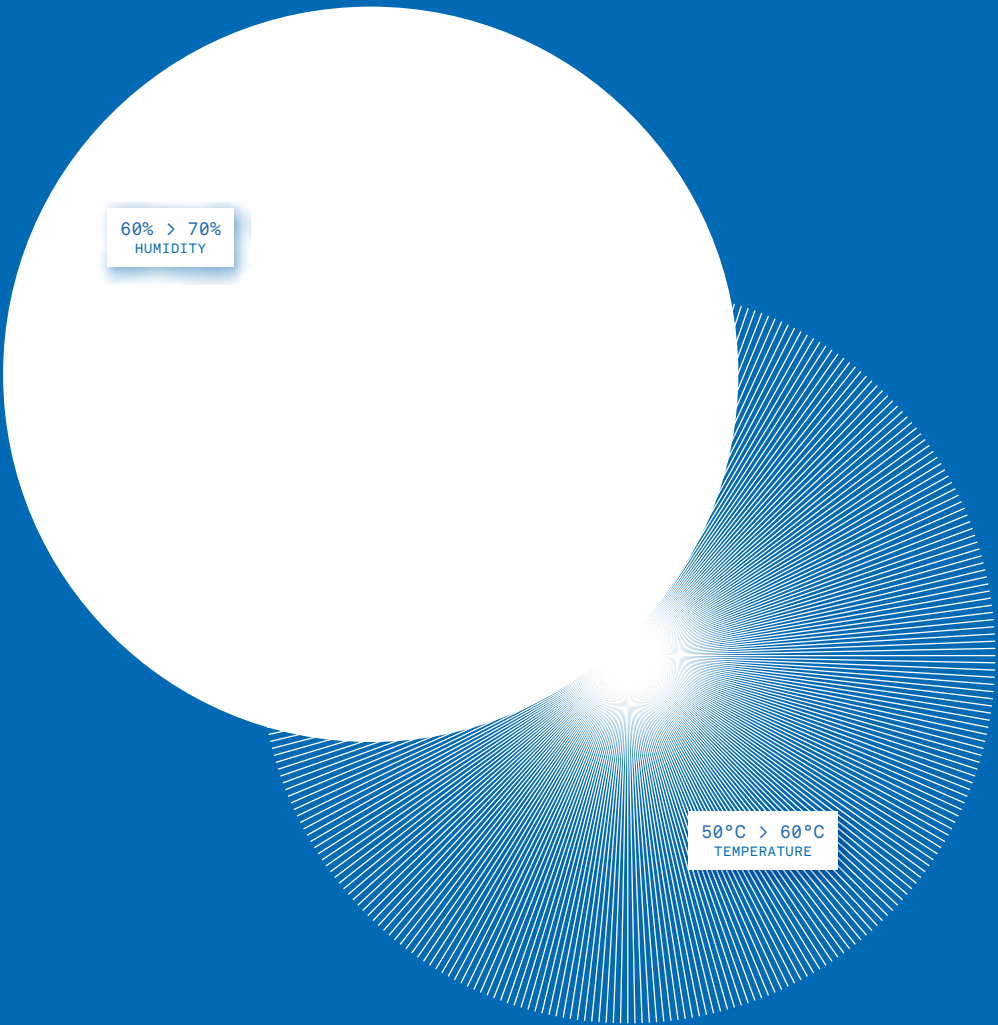

Сауна сертифицирована IMQ, она изготовлена из лучших сортов древесины и закаленного стекла 8 мм с низкой эмиссионной способностью. Внутренние и внешние стены обшиты деревянными панелями различной ширины. Auki легко подстраивается под имеющееся пространство, а также подлежит персонализации.

中文

Auki
完全采用芬兰珍贵的云杉木或加拿大无结铁杉木制成，Auki系列展现了北欧传统古老的桑拿浴与现代设计的完美结合。

特点:

通过IMQ认证的整体桑拿房，使用珍贵的木材及经过淬火处理的低排放钢化玻璃，厚度为8mm。内部及外部墙体可由不同宽度的木条组成，极具特色。Auki 适用于已有空间的需求，也可根据实际情况提供尺寸定制。

La Biosauna è una sauna con livelli di temperatura contenuti tra i 50 e i 60°C e un’umidità di circa 60-70%. Grazie al vaporizzatore integrato, impostando la temperatura preferita, la stufa Bio creerà l’equilibrio perfetto fra calore ed umidità. Il sistema combinato Effe consente la scelta tra Biosauna, un percorso a metà strada fra la sauna finlandese e la natura mediterranea del bagno di vapore, o sauna tradizionale, caratterizzata da temperature fino a 100°C con bassa umidità. Il sistema combinato può essere applicato a tutte le saune di Effe.

The Bio-sauna is a sauna whose temperature ranges from 50 to 60°C with humidity between 60-70%. The built-in vaporiser allows you to set your preferred temperature and the Bio heater creates the perfect balance between heat and humidity. The combined Effe system allows you to choose between a Bio-sauna, a halfway house between the Finnish sauna and the Mediterranean nature of the steam bath, or a traditional sauna with low humidity and a temperature of up to 100°C. This combined system can be installed in all Effe saunas.

Touch&Steam

Inseribile in ogni doccia o ambiente hammam
Touch&steam è un generatore professionale dal design elegante e leggero. Il massimo della tecnologia nella produzione di vapore.

- › Pannello di controllo touch con icone retroilluminate e indicatore del livello di temperatura.

- › Manutenzione ridotta grazie al sistema automatico di lavaggio della caldaia che minimizza l'accumulo di calcare.

- › Design elegante e compatto costituito da una lastra di vetro temperato serigrafato, spessore visibile: 3,7 cm.

- › PSF (Power Steam Function): innovativo sistema di ventilazione che minimizza la stratificazione delle temperature.

Touch&steam is a stylish, lightweight professional-standard generator that can be fitted to any shower or Hammam environment. State-of-the-art steam-generating technology.

- › Touch-screen control panel with backlit icons and temperature indicator.

- › Low maintenance thanks to the automatic boiler-cleaning system that minimises lime-scale build-up.

- › Stylish, compact design featuring a panel of silk-screen-printed toughened glass, visible thickness 3.7cm.

- › PSF (Power Steam Function): the innovative ventilation management system minimises temperature layering.

Aquasteam

Una lastra di vetro curvato con comandi digitali, una fonte e una ciotola rendono Aquasteam un generatore di vapore intuitivo nell'uso e perfettamente abbinabile a qualsiasi rivestimento.

- › Tecnologia Effe per la generazione del vapore: igiene, controllo del calcare e massima qualità del vapore.
- › Manutenzione ridotta e lunga durata grazie al sistema automatico di lavaggio della caldaia.
- › Design molto compatto costituito da una lastra di vetro curvato serigrafato, spessore visibile: 3,7 cm.
- › Predisposizione per collegamento a lampada con luce bianca o cromoterapia.
- › Pannello di controllo touch con icone retroilluminate e indicatore del livello di temperatura.

A curved glass panel with digital controls, a spring and a bowl make Aquasteam an intuitive steam generator to use that blends perfectly with any décor.

- › Effe steam generation technology gives you maximum control over hygiene, lime-scale build-up and steam quality.
- › Low maintenance and a long life thanks to the automatic boiler-cleaning system.
- › Extremely compact design featuring a curved panel of silk-screen-printed glass, visible thickness 3.7cm.
- › Set up for connection to a white or chromotherapy light fitting.
- › Touch-screen control panel with backlit icons and temperature indicator.

Aquasteam is equipped with a cool water spring operated by a practical touch-screen control. The holder for essential oils at the bottom allows you to recreate your favourite aroma therapy experience.

Nuvola Smart Power

Generatore di vapore ad alta potenza, da collocare all'esterno dello spazio hammam: la più sofisticata tecnologia esistente e la pulizia formale fanno Nuvola Smart Power un prodotto senza rivali.

- › Generatore di vapore professionale esterno, adatto per ampie cubature.
- › È stato testato fino a 3.000 ore di funzionamento senza bisogno di manutenzione.
- › Nuvola Smart Power è adatto per applicazioni a scomparsa e si integra quindi facilmente con qualsiasi soluzione d'arredo.
- › Controllo automatico delle termoresistenze per una distribuzione di vapore uniforme nel tempo.
- › PSF (Power Steam Function): innovativo sistema di ventilazione che minimizza la stratificazione delle temperature.

A high-power steam generator, to be fitted outside the Hammam space. The most sophisticated technology in existence and its clean lines make Nuvola Smart Power an unrivalled product.

- › External professional-standard steam generator suitable for large spaces.
- › Tested for up to 3,000 maintenance-free operating hours.
- › Nuvola Smart Power has been developed for hidden installation, to blend perfectly with any interior design solution.
- › Automatic heating element control for even steam distribution over time.
- › PSF (Power Steam Function): the innovative ventilation management system minimises temperature layering.

Nuvola Smart Power Hochleistungsdampfgenerator, der außerhalb des Hamams montiert wird: modernste Technologie und klare Linien machen aus Nuvola Smart Power ein konkurrenzloses Produkt. Beschreibung: Professioneller außenseitiger Dampfgenerator für große Volumen. Garantierte 3000 Betriebsstunden ohne Wartungsbedarf. Funktion ODS (Open Door Sensor): bei offenstehender Tür sperrt der Generator die Dampferzeugung. Automatische Ansteuerung der Heizwiderstände für eine dauerhaft gleichmäßige Dampfverteilung. Nuvola Smart Power eignet sich für Einbaulösungen und kann daher in nach Maß gefertigten Räumen eingesetzt werden.	Nuvola Smart Power Парогенератор, которому нет равных. Предназначенный для размещения вне кабины хаммама, парогенератор Nuvola Smart Power – это самая мощная и изощренная на сегодняшний день технология парогенерации в элегантном и лаконичном облачении. Характеристики: Профессиональный парогенератор для установки за пределами хаммама, пригодный для просторных помещений. Гарантия 3000 часов работы без техобслуживания. Функция ODS (Open Door Sensor): парогенератор останавливает выработку пара при открытой двери. Автоматический контроль ТЭНов для равномерного распределения пара во времени. Nuvola Smart Power идеально подходит для встроенных решений и для разработки индивидуальных проектов.	

Caratteristiche generatore di vapore
RWF Regulating Water Flow: autoregolazione alla pressione dell'impianto idrico.
SWF Smart Water Filling: gestione ottimizzata di riempimento caldaia.
SBC Smart Boiler Cleaning: diluizioni e risciacqui intermedi sul reale fabbisogno.
Pannello di controllo touch con icone retroilluminate e indicatore del livello di temperatura.

Caratteristiche diffusore di vapore
Contentore per essenze.

Steam generator features
RWF Regulating water flow: can work on a wide range of water systems with different pressures.
SWF Smart Water Filling: optimised management of boiler filling.
SBC Smart Boiler Cleaning: dilution and intermediate rinsing processes not time controlled but based on real need.
Panel with backlit icons and temperature gauge.

Steam diffuser features
Essential oils container.

FitBox

Design: _____ Giovanna Talocci,
Marco Pallocca

FitBox combina in un unico spazio la doccia con la funzione hammam. Il design sobrio e versatile consente un facile inserimento in ogni contesto di arredo.

FitBox è caratterizzato da prestazioni professionali e materiali di altissima qualità, elementi indispensabili per fare di acqua e vapore strumenti di benessere e piacere.

- › Profili in alluminio disponibili in due finiture: spazzolato e anodizzato nero opaco.
- › Personalizzazione delle dimensioni e delle configurazioni di apertura.
- › Applicazione anche direttamente a pavimento, eliminando qualsiasi barriera architettonica per l'ingresso in doccia.

FitBox combines a shower cubicle with Hammam in a single space. Its understated yet versatile design means it blends into any environment. Its professional features and top quality materials combine to make water and steam real vehicles of wellbeing and pleasure.

- › Aluminium frames available in two finishes: brushed and matte black anodised.
- › Infinite personalisation options as regards sizes and opening configurations.
- › Can be fitted directly on the floor, removing any architectural barriers when entering the shower.

WaterDream

Design: _____ Giovanna Talocci,
Marco Pallocca

La mini piscina è uno spazio di relax totale dedicato al rapporto tra acqua e corpo. Varie modalità di idromassaggio uniti a movimenti di luce colorata creano piacevoli atmosfere dedicate al benessere.

- › La mini piscina consente di mantenere l'acqua al suo interno per lunghi periodi di tempo, senza svuotarla ad ogni utilizzo.
- › Funzione Source: leggero flusso dell'acqua che parte dal fondo della vasca e genera un movimento circolare.
- › WaterDream è facilmente integrabile in qualsiasi contesto di arredo bagno grazie alla personalizzazione del pannello che nasconde il quadro comandi, posto al lato della vasca.

The mini pool is a space for total relaxation, for celebrating the water-body relationship. Its different whirlpool modes, combined with the moving coloured lights, create a pleasant atmosphere conducive to wellbeing.

- › Water can be kept in the mini pool for long periods of time, without having to empty it every time.
- › Source function: gentle water flow from the bottom of the bath which generates circular movement.
- › WaterDream can be installed in any bathroom, thanks to the customisable panel on the side of the bath which conceals the controls underneath.

WaterSuite

Design: _____ Giovanna Talocci,
Marco Pallocca

Con WaterSuite, l'acqua ritorna ad assumere un ruolo centrale nel benessere di tutti i giorni. La funzione di serie Source genera un movimento leggero dal fondo della vasca che rilassa profondamente il corpo e stimola la circolazione. Giochi di luce sommersa completano questo prodotto elegante e versatile.

- › Vasca dotata di varie tipologie di idromassaggio e funzione di cromoterapia Blade Light a Led RGB.

- › WaterSuite è facilmente integrabile in qualsiasi contesto di arredo bagno grazie alla personalizzazione del pannello che nasconde il quadro comandi, posto al lato della vasca.

Thanks to WaterSuite, water becomes a key part of our everyday wellbeing once more. The Source function, one of its standard features, generates gentle movement from the bottom of the bath, lulling the body into a deeply relaxed state and stimulating circulation. Underwater light effects add the finishing touch to this elegant and versatile product.

- › Bath fitted with whirlpool modes and Blade Light colour therapy with RGB Led lighting.

- › WaterSuite can be installed in any bathroom, thanks to the customisable panel on the side of the bath which conceals the controls underneath.

WaterSuite легко интегрируется в любой интерьер благодаря возможности персонализации боковой панели, скрывающей панель управления.	

È possibile ascoltare la propria musica preferita all'interno della sauna o dell'hammam utilizzando la connessione Bluetooth del proprio Tablet o Smartphone. Dotata di due casse stereo, Effe Sound System si collega automaticamente agli altoparlanti interni senza dover installare software o predisporre collegamenti specifici.

You can listen to your favourite music inside the sauna or hammam using a Bluetooth connection and your own device. The Effe Sound System, which has two stereo speakers, connects automatically to the internal speaker with no need to install any software or make special connections.

ESS
EFFE SOUND
SYSTEM

Sistema che consente di gestire a distanza il bagno turco o la sauna, scaricando l'apposita App Effegibi Experience (disponibile su ambiente iOS) sul proprio Tablet o Smartphone. È possibile personalizzare la propria esperienza comodamente da altri ambienti della casa ed eseguire funzioni quali impostazione dell'ora di accensione, della temperatura e selezione della luce preferita. La copertura Wi-Fi nell'ambiente in cui sono inseriti il bagno turco o la sauna permette una programmazione remota da qualsiasi luogo (ufficio, auto, ecc.). Infine l'App Effegibi Experience permette di avere informazioni utili sull'utilizzo del prodotto: da come utilizzarli al meglio a quali sono i suoi benefici.

This system can control remotely the sauna or the steam bath. To enable it, just download the Effegibi Experience App (available on iOS) to your Tablet or Smartphone. This makes it possible to personalise your own experience conveniently from other places in your home and pre-set such functions as switch-on time, temperature and your preferred light selection. The Wi-Fi cover in the sauna or hammam area enables you to program it remotely from almost any other location, such as your office or car. Last but not least, the Effegibi Experience App provides you with useful information about the product, such as how to get the best out of your sauna or your hammam and its health benefits.

PORTE E VETRATE

DOORS AND GLASS PANELS

Le speciali porte Effe per hammam sono progettate per ottenere una tenuta perfetta alla fuoriuscita del vapore, garantendo il giusto ricircolo d'aria. L'acciaio inox, l'alluminio e il vetro temperato di 8 mm di spessore rendono ogni modello molto durevole e facilmente abbinabile allo stile di ogni arredamento. Grazie alle porte Effe, anche la semplice doccia di casa può essere trasformata in un perfetto bagno turco.

The special doors created by Effe for Hammams are designed to ensure a perfect seal against the escape of steam thus ensuring proper air circulation. Stainless steel and 8mm-thick toughened glass make each model tough and long-lasting and easily adaptable to any furnishing style. Effe's special doors also enable any ordinary home shower to be transformed into the perfect steam bath.

Effe presenta in collaborazione con Remedia, azienda che utilizza prodotti naturali e biologici coltivati e lavorati secondo antiche tradizioni di erboristeria alchemica, una linea di fragranze per sauna e hammam che ampliano i benefici di questi antichi rituali con una dimensione olfattiva e onirica.

Effe has come together with Remedia, which uses natural organic products that are grown and processed according to ancient traditions of alchemical herbalism, to create a range of fragrances for saunas and Hammams which heighten the benefits of these ancient rituals thanks to their olfactory and almost dreamlike effect.

PERFECT
WELLNESS
FRAGRANCES

Acqua.	Fuoco.	Terra.	Aria.
Fluidità, Equilibrio, Armonia.	Passione, Forza vitale, Sistema immunitario.	Radicamento, Corpo fisico, Centratura, Presenza.	Pensiero, Spaziosità, Respiro, Leggerezza.
Nella gioia si esprime il sorriso di Arancio dolce che culla il piacere di vivere. Le note profumate ritmano il canto dell'acqua, semplice e puro come Lavanda, pulito e cristallino come Eucalipto. Acqua ci coccola, si prende cura di noi, ci avvicina alle emozioni più incantate, lascia spazio al bambino interiore. Ci accompagna a trovare serenità ed armonia. Il rituale diventa un momento di pace profonda.	Note agrumate danno spazio e ardore al caldo Cardamomo attorno al quale danza l'intrepido Ginepro dalle note suadenti e fortificanti. Nulla può resistere all'ingresso di Cannella dolce, calda e curativa come il sole. Fuoco è energia, pura vita celebrata nell'ardore e nella forza. Tutto il corpo si riallinea e si appassiona. Il rituale ci ricarica e stimola la nostra forza vitale agendo sul sistema immunitario.	Note intense e profonde di Vetiver e Cedro avvolgono il corpo e celebrano la sua sacralità. Il suadente Patchouli acquieta la mente e dona sensualità accompagnato alla dolcezza da Benzoino e Coriandolo. Terra ci accompagna alla sacralità del Corpo e esalta il rituale della Sauna o del Bagno Turco quando ci siamo dimenticati della nostra presenza fisica. Aiuta a riconnetterci con le esigenze del corpo e dei suoi veritieri messaggi.	Il suono di Litsea arriva da lontano e si annuncia fresco e rigenerante come il vento che spazza nubi nere. Il balsamico Alloro ne amplia il respiro e riconduce la mente alla purezza sul tintinnio della Menta. Aria purifica la mente sovraccarica, la libera, la alleggerisce. Dilegua il peso del mentale e sostiene il respiro. Il rituale ci rigenera e ci apre a nuovi vedute.
			
Water.	Fire.	Earth.	Air.
Fluidity, Balance, Harmony.	Passion, Life force, Immune system.	Roots, Physical body, Centring, Presence.	Thought, Spaciousness, Breath, Lightness.
Joy brings the smile of sweet orange which nurtures life's pleasures. The scented notes bring rhythm to the sound of water, simple and pure like lavender, crisp and clear like eucalyptus. Water pampers us, it takes care of us, it puts us in touch with magical feelings, it brings out the child in us. It helps us find peace and harmony. The ritual becomes a moment of profound peace.	Citrus notes give space and passion to warm cardamom, accompanied by fearless juniper with its mellow, fortifying notes. Sweet cinnamon is irresistible, warming and healing us like the sun. Fire is energy, pure life celebrated with passion and strength. The whole body is realigned and energised. The ritual gives us renewed energy and stimulates our life force, with benefits for the immune system.	Intense, profound notes of vetiver and citron envelop the body and celebrate its sacred being. Persuasive patchouli calms the mind and conveys sensuality, with benzoin and coriander adding to the sweetness. Earth accompanies us as we explore the sacred nature of the body and enhances the ritual of the sauna or steam bath when we have forgotten our physical presence. It helps reconnect us with the needs of our body and its true messages.	The scent of litsea comes from afar, fresh and regenerating like the wind that chases away dark storm clouds. The balsamic effect of bay accentuates these notes and restores purity to the mind, accompanied by refreshing mint. Air purifies our troubled mind, frees it, unburdens it. It lightens the weight of our thoughts and supports out breath. The ritual regenerates us and opens our mind to new horizons.

Effe è al centro di una storia che parte dalla tradizione e arriva nel futuro più innovativo. La storia è quella del benessere, di antichi riti come la sauna e il bagno turco che oggi assumono una veste contemporanea grazie a tecnologie avanzate e raffinato design. Dietro a questa evoluzione c'è un'azienda che dal 1987 ha dedicato la sua attività unicamente a questo settore, orgogliosa di offrire una produzione di bagni turchi e saune interamente italiana, dalla progettazione alla produzione.

Con questa filosofia Effe è divenuta meritatamente leader nel suo campo, conquistando la fiducia di clienti in tutto il mondo. Un punto di forza è dato dall'eccellenza delle soluzioni tecnologiche, sempre all'avanguardia che garantiscono prodotti di qualità certificata, di lunga durata, con manutenzione ridottissima e risparmio energetico.

Oltre a ricercare elevate prestazioni e funzionalità, Effe sa bene che l'armonia dello spazio influenza il nostro benessere fisico e quindi pone uguale attenzione anche all'estetica. Saune e bagni turchi sono disegnati con linee pulite, tracciate da illustri designer, spesso con grandi aperture vetrate che le trasformano in eleganti oggetti di arredamento.

I materiali sono ecocompatibili, non viene utilizzata plastica, i tipi di legno sono di prima scelta e non provengono da deforestazione o da alberi in estinzione. Lo straordinario know-how di Effe si traduce in accurate soluzioni su misura.

Effe is central to a story that starts with tradition and stretches right into the most innovative future. This is a story of wellbeing, of the ancient traditions of the sauna and the steam bath that today's advanced technology and design excellence have clothed in a new guise. This evolution has been made possible by our company that, since 1987, has focused entirely on this sector and we are proud to offer saunas and steam baths that are 100% Italian, from design to manufacture.

This philosophy has enabled Effe to become the well-deserved leader in our field, winning the trust of our customers the world over. One of our strong points is the excellence of our high-tech solutions, always in the vanguard of progress with long-lasting, energy-saving products of certified quality, requiring very little maintenance.

In addition to our constant quest for high performance and practicality, we at Effe are fully aware that feeling good equates to looking good and so we take just as much care over aesthetics.

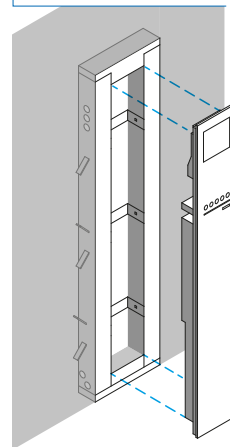

Our saunas and steam baths feature clean lines traced by such famous designers, often with generous expanses of glass that transform them into stylish items of furniture. We use only eco-friendly materials, with no plastic and the wood is always top quality from reliable sources that do not cause deforestation or endanger rare trees under threat. Effe's extraordinary know-how translates into precise made-to-measure solutions.

GENERATORE DI VAPORE INTERNO

INTERNAL STEAM GENERATOR

Touch-screen control panel
Pannello di controllo touch

Built-in steam generator
Generatore ad incasso

Built-in steam diffuser
Diffusore di vapore integrato

ELEGANTE

I generatori di vapore Effe sono compatti ed eleganti: il design razionale li rende adatti all'applicazione in qualsiasi ambiente.

STYLISH

Effe steam generators are compact and stylish, designed to adapt perfectly to almost any environment and décor.

FACILE DA INSTALLARE

Effe fornisce una controcassa perfettamente organizzata, per un veloce collegamento alle tubature e alla rete elettrica.

EASY TO INSTALL

Effe supplies a perfectly designed outer casing for quick connection to the water and electrical mains.

GENERATORE DI VAPORE ESTERNO

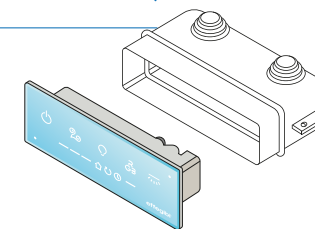

EXTERNAL STEAM GENERATOR

External steam generator
Generatore di vapore esterno

Chromotherapy lamp
Lampada per cromoterapia

Steam diffuser
Diffusore di vapore

Touch-screen control panel
(internal and/or external)
Pannello di controllo touch
(interno e/o esterno)

POTENTE

Il generatore di vapore esterno Nuvola Smart Power permette l'utilizzo di motori più potenti e quindi l'utilizzo per spazi molto ampi.

POWERFUL

The external Nuvola Smart Power steam generator enables more powerful motors to be fitted for use in much larger spaces.

PULIZIA FORMALE

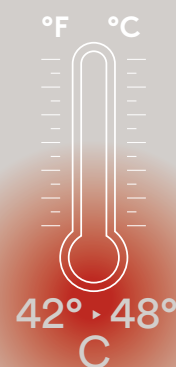

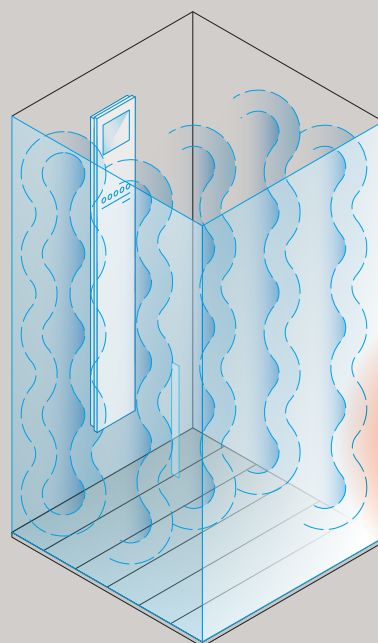

Il generatore esterno può essere installato in un vano nascosto, lasciando completa libertà nel design dell'hammam.

DESIGN FREEDOM

The external generator can be installed in a hidden space, for total Hammam design freedom.

ELEMENTI INDISPENSABILI PER UN HAMMAM DI QUALITÀ

ESSENTIAL ELEMENTS FOR A QUALITY HAMMAM

1

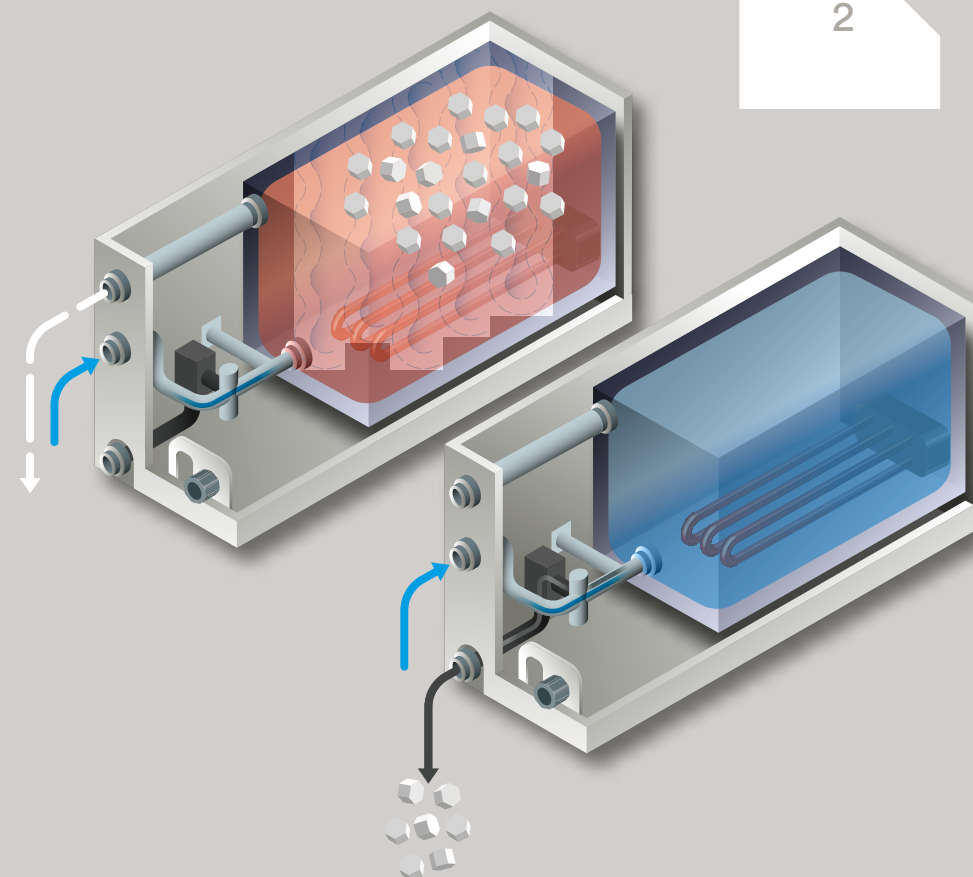

DENSITÀ E TEMPERATURA DEL VAPORE

Un perfetto hammam si ottiene quando il vapore consente di raggiungere una temperatura superiore ai 40°C. Nei prodotti Effe la temperatura è programmabile in una scala che va dai 42 ai 48°C. La sapiente gestione del vapore, frutto di anni di ricerca, ottimizza l'omogeneità e la densità del calore all'interno del bagno turco.

STEAM DENSITY AND TEMPERATURE

A perfect Hammam is achieved when the steam makes it possible to reach a temperature above 40°C. In Effe products the temperature can be set on a scale from 42 to 48°C. The smart steam management system, the fruit of many years of R&D, ensures even heat distribution and density inside the steam bath.

2

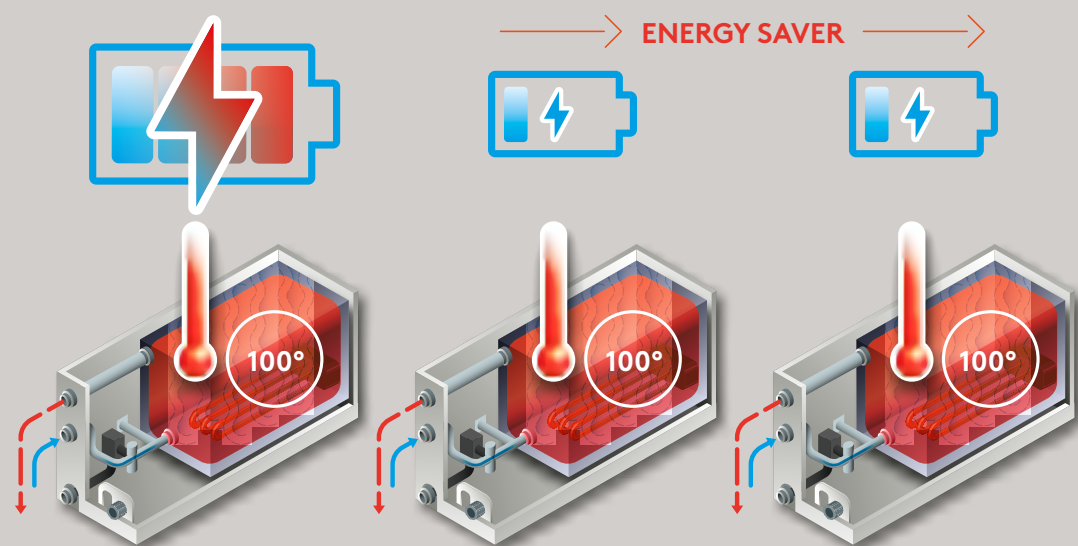

CALCARE E IGIENE

La tecnologia esclusiva Effe, unica al mondo, consente di evitare filtri meccanici sul generatore e manutenzioni frequenti. Grazie a sistemi sofisticati, la caldaia (rigorosamente in acciaio inox) viene caricata e scaricata con acqua fredda e pulita a ogni utilizzo. Questo riduce notevolmente la necessità di interventi di pulizia e manutenzione, oltre a garantire una perfetta igiene all'interno dell'ambiente.

LIME SCALE AND HYGIENE

Exclusive Effe technology has produced a unique system without mechanical filters on the generators and no need for frequent maintenance. All the boilers are stainless steel and a sophisticated system fills and empties the boiler with clean cold water every time it is used. This notably reduces the need for cleaning and maintenance, as well as ensuring the interior environment is perfectly hygienic.

GESTIONE OTTIMIZZATA DEL CONSUMO ENERGETICO

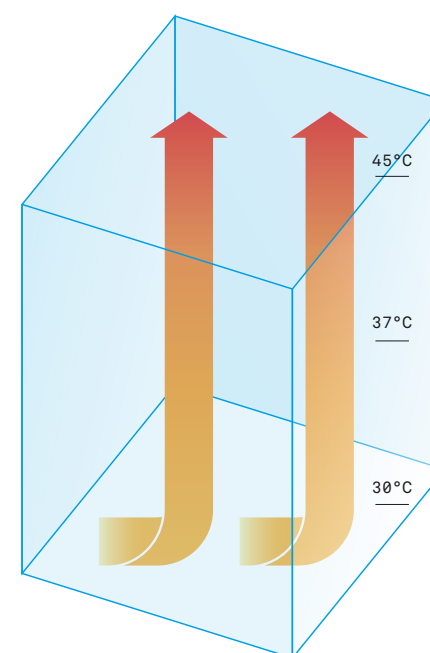

Ogni generatore di vapore Effe è dotato di una funzione Energy Saver. La potenza massima del generatore viene sfruttata per portare in ebollizione l'acqua e raggiungere la temperatura impostata. Durante il funzionamento l'assorbimento viene ridotto alla metà o anche a un terzo, a seconda del modello di prodotto, pur mantenendo costante il getto di vapore.

OPTIMISED MANAGEMENT OF ENERGY CONSUMPTION

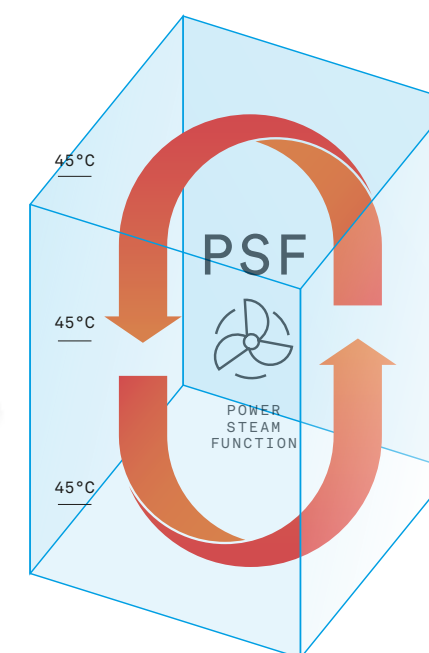

Each Effe steam generator has an Energy Saver function. The maximum power of the generator is used to bring the water to boiling point and reach the set temperature. While it is functioning the energy input is reduced to a half or a third, depending on the model, while keeping the steam flow constant.

PSF: POWER STEAM FUNCTION

TRADITIONAL HAMMAM

PSF: NEW TECHNOLOGY FROM EFFEGIBI

L'innovativo sistema di gestione della ventilazione minimizza la stratificazione delle temperature all'interno della cabina. In questo modo il calore dentro l'hammam sarà uniforme sia nella parte superiore che in quella inferiore dell'ambiente, condizione indispensabile per una salutare fruizione del bagno turco.

The innovative ventilation management system minimises temperature layering inside the cubicle. In this way the heat will be distributed evenly at the top and bottom of the Hammam, ensuring maximum benefits from the steam bath.

accensione e spegnimento
delle termoresistenze
in modo da ottenere
una diffusione di vapore
costante.

Diluizioni e risciacqui intermedi calcolati sul reale fabbisogno per ridurre l'accumulo di calcare e aumentare la durata della caldaia senza manutenzione.

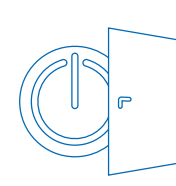

Gestione ottimizzata di riempimento caldaia, risciacqui intermedi e svuotamento. Le resistenze lavorano sempre in maniera ottimale.

Il sistema è integrato nel generatore di vapore Effe e consente di gestire a distanza il bagno turco tramite l'App Effegibi Experience su tablet o smartphone.

Il generatore può lavorare dentro un ampio range di pressione dell'impianto idrico del locale: da 0,2 bar a 10 bar.

Grazie alla sofisticata elettronica il generatore comprende quando la porta è aperta e blocca in automatico la produzione del vapore.

Se stai pensando di ristrutturare il bagno o devi ancora realizzarlo puoi trasformare molto facilmente il tuo box doccia in una cabina doccia con bagno turco.

Le dimensioni di un box doccia con bagno turco possono essere quelle standard; l'altezza invece non dovrebbe superare i 230 cm per non sprecare energia e perché il vapore dell'hammam tenderebbe a salire troppo. Se invece hai a disposizione più spazio, puoi progettare il tuo angolo di relax pensando al numero di persone che ne usufruiranno.

Il segreto per realizzare il bagno turco ideale a casa propria è l'utilizzo di una perfetta coibentazione della porta, in modo che il vapore sia isolato all'interno, mentre viene garantito il giusto ingresso di aria dall'esterno. Effe ha studiato una serie di porte professionali da applicare alla cabina doccia, per mantenere costante la densità del vapore e ridurre i consumi.

**TRASFORMA
LA TUA
DOCCIA
IN HAMMAM**

If you're thinking of refurbishing your bathroom, or about to build a new one, you can transform an ordinary shower cubicle into a luxury space complete with steam bath.

A shower cubicle incorporating a steam bath can still be a standard size, although the height must not exceed 230cm so as not to waste energy and because the steam in the Hammam will tend to rise too high.

**TRANSFORM
YOUR SHOWER
INTO A
HAMMAM**

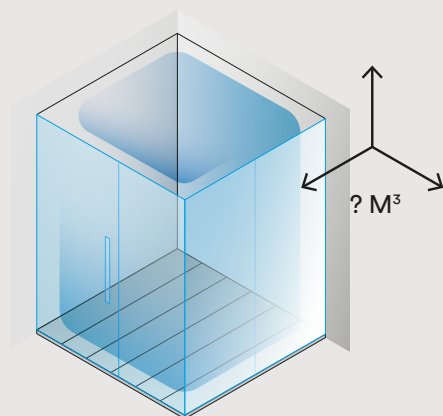

Hotel Rosa Alpina - San Cassiano - Bolzano - Italy

If you're lucky enough to have a bit more room, you can plan your chill-out space for more than one person.

The secret to creating your dream steam bath at home is perfect door insulation to ensure that the steam stays inside while the right amount of air flows in from outside. Effe has designed a range of professional-standard doors that can be fitted to your shower cubicle to keep steam density constant and reduce consumption.

TRASFORMA LA TUA DOCCIA IN HAMMAM

TRANSFORM YOUR SHOWER INTO A HAMMAM

Misura lo spazio che hai a disposizione

Ogni vano può essere trasformato in hammam, basta seguire alcune indicazioni su come coibentare pareti e porte. Molto importante è definire i metri cubi destinati ad ospitare l'hammam perchè esistono differenti generatori di vapore che variano in base alla potenza.

Measure your available space

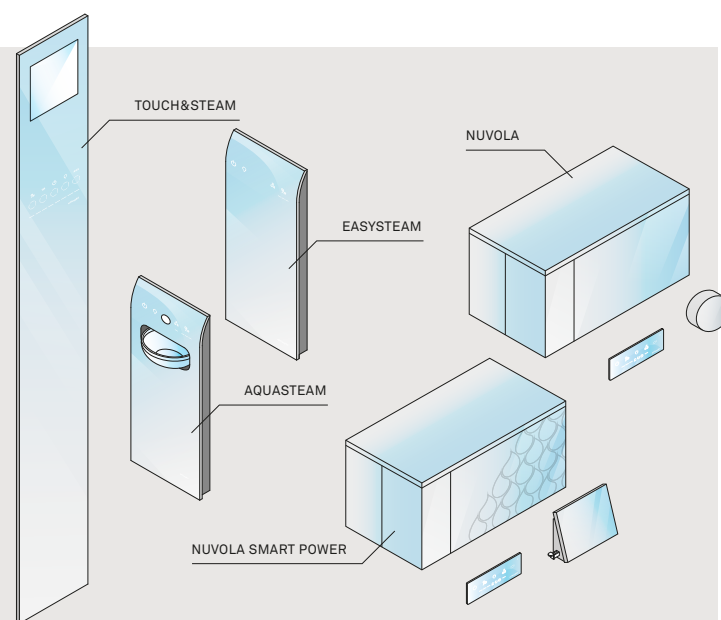

Any space can be transformed into a Hammam, just follow a few instructions for insulating walls and doors. It is very important to measure the volume that will play host to the Hammam so as to ensure the right steam generator is selected, based on its power.

Scegli il generatore di vapore

Steam generators can be placed inside or outside the Hammam cubicle. You can base your choice on the available volume and also on your design preferences: Touch&Steam, Easystem and Aquasteam are stylish and easily adaptable to your own interior décor. They also have different functions that you can find out about in more detail on Page 40

Choose the right steam generator

I generatori di vapore possono essere posizionati all'interno o all'esterno del vano hammam. Scegli in base ai metri cubi disponibili, oppure anche in base alle tue preferenze estetiche: Touch&Steam, Easystem e Aquasteam sono eleganti e adattabili facilmente allo stile del tuo arredo. Hanno anche funzioni differenti, che puoi scoprire nel dettaglio a pagina 40

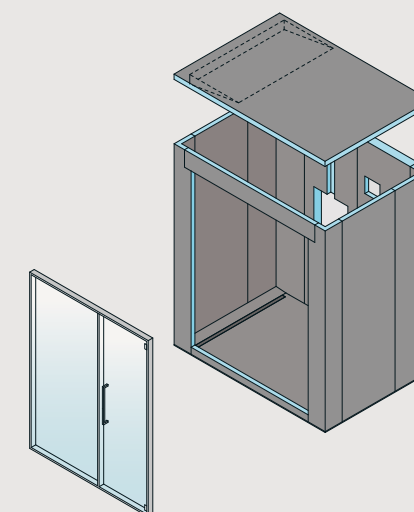

Aggiungi il kit coibentazione e scegli una porta Effe per hammam

Per realizzare il bagno turco ideale è consigliata una perfetta coibentazione del vano. Le porte Effe garantiscono tenuta al vapore e un corretto ingresso e ricambio di aria.

Add the insulation kit and choose an Effe Hammam door

Proper cubicle insulation is recommended for the perfect steam bath. Effe doors provide an efficient steam seal and correct air inflow and exchange.

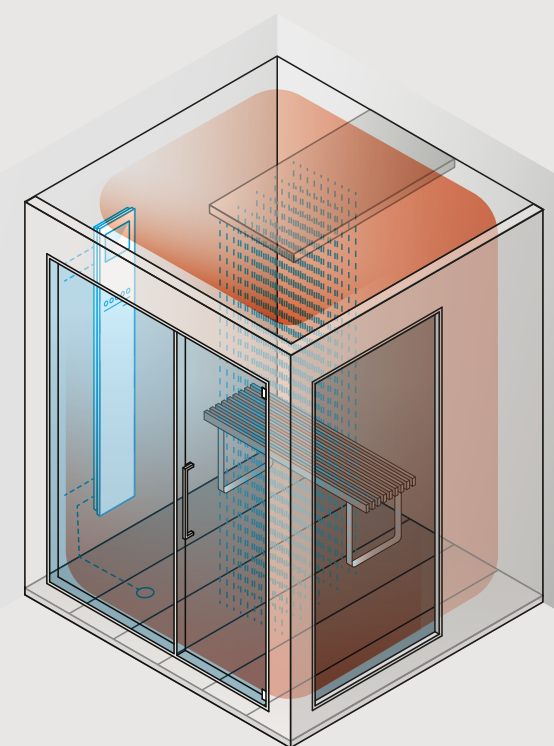

Completa con arredi e accessori

Effe makes it possible to personalise your shower-Hammam with a set of handy accessories: benches, seats, water springs, chromotherapy, the ESS - Effe Sound System for listening to music inside the Hammam.

Complete with furniture and accessories

Effe permette di personalizzare la tua doccia-hammam con una serie di utili accessori: panche, sedute, fonti per acqua, cromoterapia, ESS - Effe Sound System per l'ascolto della musica all'interno della cabina.

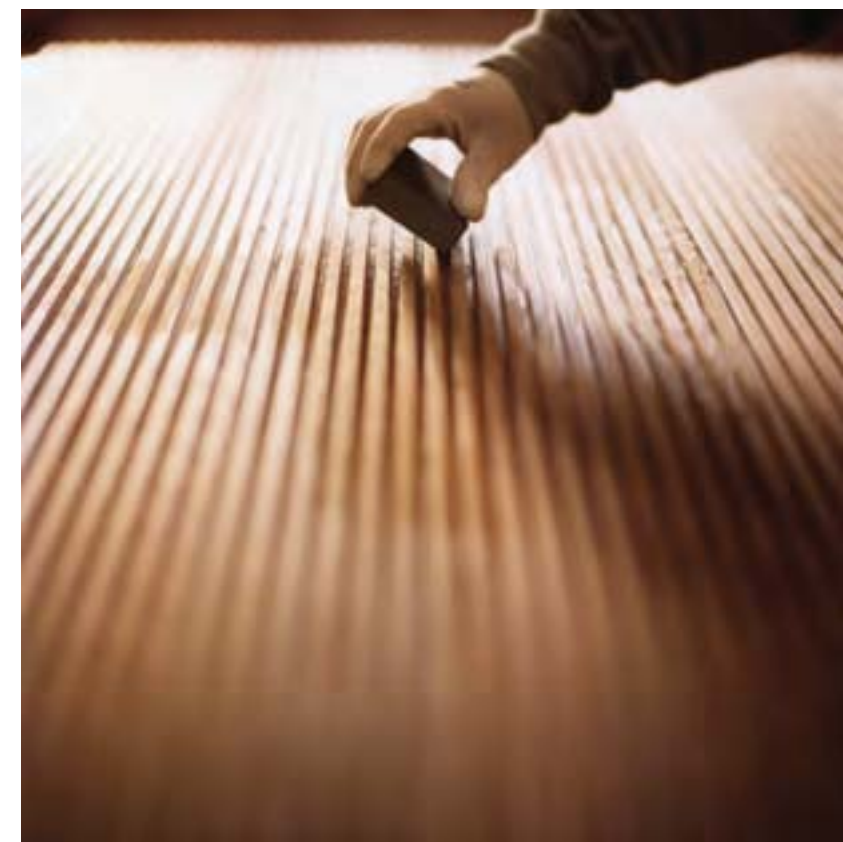

Il legno, per essere utilizzato nella sauna, deve avere precise caratteristiche di assorbimento del calore e di resistenza allo stress causato dagli sbalzi di temperatura. Effe effettua internamente tutti i test necessari per garantire che i materiali siano adeguati per durare nel tempo e che rispettino le caratteristiche estetiche necessarie a realizzare saune perfette. Dall'hemlock canadese al tradizionale abete di Svezia, più di dieci tipologie di legno esclusivamente di prima scelta vengono selezionate da Effe e sottoposte a rigorosi controlli di qualità per offrire uno standard di altissimo livello qualitativo.

Nelle saune Effe non vengono mai utilizzati componenti plastici, poiché a temperature elevate potrebbero rilasciare sostanze nocive. I legni naturali garantiscono un ambiente sano, piacevole al tatto, che resta a lungo inalterato.

Wood to be used in a sauna must have specific properties of heat absorption and resistance to stress caused by temperature fluctuations. Effe carries out all the necessary tests in-house to guarantee the materials are capable of long life and that they meet all the aesthetic needs of a perfect sauna.

LA SCELTA DEL LEGNO PER LE SAUNE EFFE

THE CHOICE OF WOOD IN EFFE SAUNAS

Canadian Hemlock wood

From Canadian hemlock to the traditional Swedish pine, over ten different types of wood, always of top quality, are selected by Effe and subjected to rigorous quality control to ensure the highest possible quality standard.

Plastic components are never used in Effe saunas because at high temperatures they can emit noxious substances. Natural wood guarantees a healthy environment, is pleasant to the touch and is not altered over time.

Ogni articolo Effe è sottoposto a verifiche qualitative sia sotto l'aspetto estetico che funzionale. La sicurezza dei prodotti Effe è certificata a livello internazionale dai principali marchi di qualità che garantiscono il rispetto delle più severe normative vigenti. I reparti interni Effe di produzione e di Ricerca&Sviluppo, garantiscono sempre una produzione personalizzata e di alto profilo professionale.
