CONCEPT 1

mobili a terra

— *floor-standing units*

La peculiarità dei mobili bagno a terra è la struttura solida e robusta che si traduce in funzionalità e capacità di contenimento. I volumi dei mobili a terra, per qualche tempo abbandonati nell'ambiente bagno, ritornano oggi alla ribalta con una rivisitazione contemporanea di linee, finiture e attrezzatura interna all'avanguardia.

—
The peculiarity of the floor-standing units is the solid and strong structure, which results in functionality and storage capacity.

The volumes of the floor-standing units, which have been set aside in bathroom environment for a while, are now returning to the fore with a contemporary reinterpretation of lines, finishes and innovative internal equipment.

Lavabo Amoyo in finitura Stonematt con tappo piletta in finitura. Disponibile anche in finitura Stonelight o in finitura Stone nei 41 colori opachi Edoné.

—
Amoyo basin in Stonematt with waste in the same finish. Also available in Stonelight and Stone with the 41 matt colours Edoné.

CONCEPT 2

console

— *console*

Uno dei vantaggi pratici offerto dalle console con lavabi integrati o ad appoggio è il minor impatto visivo che si traduce nella reale possibilità di avere centimetri liberi a terra, eventualmente anche per aggiungere basi e accessori.

—
One of the advantages of the consoles with integrated or countertop basins is the smaller visual impact, which results in the real possibility of having free space on the underside, to possibly put vanity units or accessories.

CONCEPT 3

contenimento

— *storage*

I mobili compatti ma capienti permettono in ambienti dalle dimensioni contenute, di organizzare al meglio gli oggetti e i prodotti per la cura della persona o la biancheria da bagno.

—
The compact yet spacious vanity units allow you to better organise objects and personal care products or bathroom linen also in spaces of small dimensions.

nobilitato melaminico
melamine faced chipboard

Il melaminico viene utilizzato per nobilitare un pannello di conglomerato ecologico di legno idrorepellente su ambo i lati, il lato a vista ha un doppio strato di melaminico. Questa lavorazione lo rende adatto all'utilizzo nell'ambiente bagno dove sono presenti vapori e umidità.

—
Melamine is used on both of the sides of water-repellent panels of ecological wood; the outer side is constituted by a double layer melamine. This process makes it suitable for bathroom environment, characterized by high density of humidity and vapors.

finiture HPL
HPL finishes

L'HPL ad alta pressione è costituito da numerosi strati di carta impregnati con resine termoindurenti e compattati attraverso l'azione combinata di calore (140/150 °C) e alta pressione (<7Mpa) per circa 40/50 minuti. Grazie al trattamento ad alta temperatura e pressione cui è sottoposto, l'HPL è un materiale estremamente robusto: resistente a graffi, urti, abrasioni, sostanze chimiche e calore; caratteristiche che rendono il materiale ideale per una vasta gamma di applicazioni. L'HPL non richiede alcuna manutenzione particolare al di là della normale pulizia. La sua superficie compatta e non porosa può essere facilmente pulita e disinfettata con acqua calda, vapore e tutti i tipi dei più comuni detergenti e disinfettanti per uso domestico, purché non alcalini. L'HPL è antistatico, quindi non attira la polvere. Non richiede alcun trattamento con cere o prodotti che la contengono anzi, questi prodotti tendono a formare sulla sua superficie uno strato appiccicoso che trattiene lo sporco.

—
HPL is made of numerous layers of paper saturated with thermosetting resins and bonded through the combined action of heat (140/150°C) and high pressure (<7Mpa) for about 40/50 minutes. Thanks to the heat and high-pressure treatment it undergoes, HPL is an exceptionally rugged material resistant to scratching, impact, abrasions, chemicals and heat, making it ideal for a wide range of applications. It does not require any specific maintenance other than normal cleaning. Its compact, non-porous surface can be easily cleaned and disinfected with hot water, steam and all kind of common nonabrasive household detergent and disinfectant, if not highly alkaline. It is antistatic therefore, it does not attract dust. It does not require any treatment with furniture cleaners containing waxes as these kind of product tend to form on its surface a sticky layer which attracts dirt.

CONCEPT 5

fianchi di chiusura

— *finishing sides*

Il mobile bagno con fianchi di chiusura permette di personalizzare l'ambiente grazie all'accostamento di materiali e finiture differenti. Sospesi o con il sostegno del nuovo sistema di gambe Gru, godono di una piacevole leggerezza estetica pur mantenendo inalterata la loro capacità di contenimento.

The vanity units with finishing sides allows the customisation of the bathroom environment thanks to the combination of different finishes and materials. Both suspended or with the support of the new "Gru" legs, the vanities benefit of an aesthetic lightness, still maintaining unchanged their storage capacity.

CONCEPT 7

i piccoli e i lavamani

— *small size and wash-hand basins*

Per sfruttare al massimo lo spazio disponibile nei bagni dalle dimensioni ridotte, proponiamo composizioni dalle dimensioni contenute.

Soprattutto se gli ambienti sono piccoli, bisogna puntare a non perdere lo spazio sottolavabo, attrezzandolo con cassetti o ante e personalizzandolo con attrezzatura interna.

—

To make maximum use of the available space also in bathrooms of reduced size, we propose some compositions with small dimensions.

Especially in narrow environments, it is fundamental not to lose the space under the basin, by taking advantage of it with drawers or doors and customising it with internal equipment.
