Pebble

d line

# About

d line is a heritage Danish design brand conceiving and hand crafting enduring architectural hardware, sanitary ware and solutions for barrier-free living. Launched in 1971, the brand's ambition is to be universally known, coveted and admired for the uncompromising endurance of its design, craftsmanship and quality.

Copenhagen, London and New York-based architecture firm Bjarke Ingels Group (BIG), founded by Danish architect Bjarke Ingels, is known worldwide for their innovative, sustainable and aesthetically modern approach to design. We are thrilled to collaborate with them on the Pebble series.

Bjarke Ingels

# Introduction

The Pebble series is a sanitary ware range that includes a toilet roll holder, towel rail, coat hook, soap dispenser, toilet brush and shower shelf. To complete the look the collection also includes a lever handle, key escutcheon, thumb turn and pull handle. The pieces are available in matt black, matt white and our signature satin stainless steel.

The collection is playful and luxurious, each piece interacting with the room in a fluid way. The diverse array of items balance elliptical shapes while staying grounded with the tactile nature of the material.

**“Just as we did in the 1970s, d line is making a bold statement with both colour and shape with our Bjarke Ingels Group collection. As we shift our gaze to a more international outlook, we are excited to include more privately-owned spaces into our portfolio, truly making us a brand for those wanting a Scandinavian and design-focused lifestyle.”**

**Hans Christian Petersen,  
Chairman of the Board d line**

# A modern classic

## **For residential use**

This collection is especially relevant for private homes. With our focus on top-quality products and clean, visually engaging design, d line's work with BIG is perfect for those looking to bring aesthetics and functionality into every aspect of their lives.

## **For commercial use**

d line has a wealth of experience in bringing high quality, designer hardware to commercial spaces such as hotels, restaurants, and other areas for public use. The Pebble series has an intimate and tactile quality that makes it a strong choice for locations that would like a unique feel, while retaining the top-level design for which all of d line's products are known.

## **Beauty and functionality in any space**

Whatever the space you use it, the Pebble series offers a special vibrancy that is at once subtle and unexpected. The long-lasting materials and enduring style will enrich any building. The Pebble series is part of a larger collection with BIG that includes a state-of-the-art smart lock system operated via mobile phone.

**“We are thrilled to follow in the footsteps of Arne Jacobsen and Knud Holscher in collaborating with d line. The new line of products are about giving form to each of the different functions. The balancing elliptical shapes interact playfully with each other and its environment, creating highly tactile and functional objects that complement any interior. The Pebble Collection extends our vision in architecture from the big picture to the small details.”**

**Jakob Lange, Partner in BIG  
and Director of BIG Ideas**

# Bjarke Ingels Group collection

The Pebble series is available in black and white, as well as stainless steel. The black RAL 9005 and white RAL 9003 items come in a matt finish, while the stainless steel comes in our signature satin finish.

As with all our products, this collection is sustainably-produced in our factory in Europe. Each item is hand-crafted with 50-70% recycled steel.

Today that commitment to sustainability exists as a 20-year guarantee on our stainless steel parts. This commitment extends to responsible sourcing of our steel, to low-emission hand assembly and to a lean factory that never produces more than what is needed.
