#### NEW FLUSH / handbasins

Twenty years ago, the first Flush. The success of this series proves that a balanced design provides timeless functionality and appearance. Compact balanced proportions, the pursuit of timeless simplicity, for the first time the oval plug, a design element, so recognizably Clou. This success story is extended with a second chapter by New Flush. With New Flush we celebrate this wonderful birthday. The same proven proportions with even greater attention to detail. Probably the most striking difference between Flush and New Flush is its wall thickness. Wafer-thin they are. Designed with utmost precision. Which one do you choose?

TOILETS & BIDET

#### HAMMOCK / rimless toilets

Rimless toilets have become the new standard. The idea of rimless, however, is often limited to a marketing concept. The design is commonly affected by the need for functionality. The Hammock toilet, however, made rimless a functional reality. Truly rimless, truly functional and truly well-designed. We are very proud to present this toilet.

#### KALDUR / freestanding bathtub mixer

The elegant Kaldur mixer tap stands out thanks to its gently curved form, symbiotically complementing the bathtub itself. Kaldur is made from polished chrome and features a coloured showerhead with soft-touch finish that attracts the eye, rests well in the hand and is particularly pleasing to the touch. The mixer tap thus emerges almost like a freestanding high-rise next to the bath. Clou's entry has elevated it to one of the best brands in the design industry this year.

ACCESSORIES

CLIFF / (shower) shelves

Inspired by the natural form of stones. Organic forms instead of the usual straight, angular shelves. Forms calling for a touch, in contrast with the straight lines and sleek designs in the bathroom or shower. The variety and natural movement in their shape makes Cliff shelves real eye-catchers in the bathroom. Made from ceramics, making them easy to clean and well appropriate for wet spaces.
