Eivissa. I materiali.

The materials. Les matériaux.

Eivissa — design by Ludovica + Roberto Palomba

it / La collezione Eivissa è un programma di strutture realizzate in alluminio verniciato a polveri, che può assumere molteplici configurazioni attraverso la selezione delle dimensioni, dei colori, dei pavimenti, delle coperture, dei soffitti interni, dei pannelli perimetrali. La particolarità del design dei pali, delle travi e degli angolari, insieme alla gamma molto ampia dei componenti e alla ricercatezza dei dettagli estetici, danno vita ad un progetto fortemente caratterizzato e molto ampio che offre a ciascuno la possibilità di personalizzare il prodotto secondo le proprie esigenze.

La struttura, in nove varianti di colore, è disponibile in tre dimensioni, con o senza il perimetro di base contenente il pavimento.

en / The Eivissa collection is a series of structures in powder-coated aluminium that offers a wide variety of configurations thanks to all its different sizes, colours, floors, roofs, ceilings and perimeter panels. The design features of the posts, rafters and corners, together with a very wide range of components and fine aesthetic details make this a highly characteristic, widely diverse project that allows total freedom of personalisation. In nine different colours, the structure is available in three sizes, with or without the base perimeter that supports the flooring.

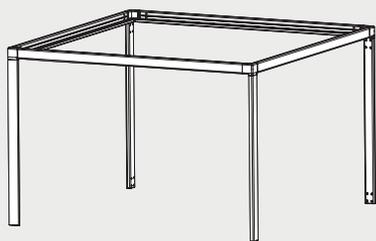

fr / La collection Eivissa regroupe des structures en aluminium laqué par poudre aux multiples possibilités de configuration grâce au vaste choix de dimensions, couleurs, sols, toitures, plafonds intérieurs et panneaux de protection latéraux. La particularité du design des poteaux, des poutres et des charnières, le large éventail d'accessoires et le soin minutieux apporté aux détails esthétiques ont donné vie à un vaste projet très caractéristique qui offre à chacun la possibilité de le personnaliser en fonction de ses propres besoins. La structure est disponible en neuf coloris, trois dimensions, avec ou sans le périmètre de base dans lequel est inséré le sol.

Eivissa. Base e pavimenti. Base and flooring. Base et sols.

it / Nella versione senza basamento, è possibile fissare il gazebo direttamente a terra.

en / The version without foundations can be fixed directly to the ground.

fr / Dans la version sans sol, le pavillon peut être fixé directement par terre.

Padiglioni con pavimento/ Pavilions with flooring / Pavillons avec sol**Doghe in teak / Teak decking / Lattes en teck**

it / Il padiglione Eivissa può essere configurato con pavimento in legno massello di teak o in gres. Nel caso del teak, viene utilizzato un legno di qualità Premium. Le doghe hanno spessore 190 mm, sono larghe 177 mm e lunghe 1200 mm e sono preventivamente trattate contro macchie e sporco. Il sistema di fissaggio è semplice e veloce e sfrutta un'orditura di barre in alluminio appoggiata a supporti regolabili in altezza.

en / The Eivissa pavilion can have either solid teak wood decking or tiles. Premium quality wood is used for the teak version. The decking planks are 190 mm thick, 177 mm wide and 1200 mm long and are pre-treated against stains and dirt. The simple, rapid fixing system entails a frame of aluminium bars resting on supports of adjustable height.

fr / Le pavillon Eivissa est disponible avec un sol en grès ou en teck avec un bois massif de qualité Premium. Les lattes de 190 mm d'épaisseur et 1 200 mm de longueur sont traitées au préalable contre les taches et la saleté. Le système de fixation simple et rapide se fait par une série de barres en aluminium posées sur des supports réglables en hauteur.

Materials**Solid Teak**

Eivissa. Roof/copertura esterna. Roof/external covering. Roof/ toiture extérieure.

it / Per proteggere e isolare l'ambiente interno di Eivissa dall'esterno, è possibile scegliere tra 3 tipi di roof.

en / The 3 different roofing options protect and insulate the space inside Eivissa from the outside.

fr / Pour protéger et isoler l'intérieur d'Eivissa de l'extérieur, 3 types de toitures sont disponibles.

Roof (copertura esterna) / Roof (external covering) / Roof (toiture extérieure)

Copertura Shade a lamelle orientabili / Shade roof with adjustable louvers / Toiture Shade à lames orientables

it / La copertura Shade risponde ad esigenze modulabili di luce, ombra, protezione, ventilazione. È formata da una serie di lamelle in alluminio (11x4 cm) che possono essere orientate fino a 90° con un radiocomando. Il tetto chiuso garantisce un'ottima impermeabilità, fino 10 mm/h di pioggia. Nella posizione di apertura delle lamelle, la copertura ha funzione di ombreggiatura e passaggio d'aria. La tenuta al carico di neve è pari 75 Kg/mq. Inoltre, il deflusso dell'acqua raccolta dalle lamelle è assicurato da un sistema di gronde che convoglia l'acqua all'interno del palo e che la scarica a terra.

en / Shade meets modular needs for light, shade, protection and ventilation. It comprises a series of aluminium louvers (11x4 cm) that can be adjusted to a maximum of 90°C via remote control. When closed, the roof guarantees excellent waterproofing, up to 10 mm/h of rain. When open, the louvers provide shade and ventilation. It has a snow load capacity of 75 kg/m². What's more, water caught by the louvers is guaranteed to run off smoothly thanks to a system of gutters and pipes that take the water down through the posts to the ground.

fr / La toiture Shade est parfaite pour tous ceux à la recherche d'un abri où pouvoir moduler la lumière, l'ombre, la protection et la ventilation. Elle est composée d'une série de lames en aluminium (11x4 cm) pouvant être orientées jusqu'à 90° au moyen d'une radiocommande. La toiture fermée garantit une excellente étanchéité, jusqu'à 10 mm/h de précipitations. Lorsque les lames sont ouvertes, la toiture permet de rester à l'ombre et de profiter du passage de l'air. Charge de neige : 75 kg/m². Par ailleurs, l'évacuation des eaux de pluie recueillies par les lames se fait par des gouttières qui acheminent l'eau dans les poteaux jusqu'au sol.

Materials

Roof (copertura esterna) / Roof (external covering) / Roof (toiture extérieure)

Copertura View / View Roof / Toiture View

it / Il tetto View è una copertura in polycarbonato compatto che garantisce una perfetta impermeabilità alla struttura. Le lastre di polycarbonato sono di spessore 3 mm e hanno una larghezza di circa 60 cm. La tenuta della lastra è di circa 15 Kg/mq. Il polycarbonato è disponibile nella versione trasparente o fumè. Le lastre sono inserite all'interno di profili in alluminio calandrati in modo da conferire al tetto una curvatura e permettere all'acqua di defluire lateralmente all'interno di apposite gronde per poi essere canalizzata all'interno dei pali della struttura e scaricata a terra.

en/ View is a roof in compact polycarbonate that makes the structure perfectly waterproof. The sheets of polycarbonate are 3 mm thick and about 60 cm wide. Each sheet has a load capacity of about 15 kg/m². The polycarbonate comes in either a clear or smoky version. The sheets slide into calendered aluminium guides that force the roof to curve, ensuring water runs off laterally into dedicated gutters and then down through the structure posts to the ground.

fr/ La toiture View en plaques de polycarbonate de 3 mm d'épaisseur et environ 60 cm de largeur, garantit à la structure une parfaite étanchéité. La résistance des plaques est d'environ 15 kg/m². Le polycarbonate est disponible en version transparente ou fumé. Les plaques sont montées à l'intérieur de profilés extrudés en aluminium pour donner au toit la courbure nécessaire permettant à l'eau de s'écouler par les gouttières latérales et être ensuite acheminée jusqu'au sol à travers les poteaux.

Materials

Ceiling (Soffitto interno) / Ceiling (Roof lining) / Ceiling (Plafond intérieur)

Tenda Flow / Flow Curtain / Rideau Flow

it / Flow è una tenda in tessuto dalla funzione decorativa ed ombreggiante. Pratica e funzionale, può essere aperta e chiusa per avere maggiore o minore luce o ombreggiatura.

Flow può anche essere inserita insieme ad uno dei tetti superiori View o Shade.

en / Flow is a fabric curtain that provides both decoration and shade. Practical and functional, it can be opened or closed to adjust light and shade.

Flow can also be inserted together with one of the external roofs, View or Shade.

fr / Flow est un rideau en tissu à la fois décoratif et utile pour profiter de l'ombre. Pratique et fonctionnel, il peut être ouvert ou fermé pour avoir plus ou moins de lumière et d'ombre.

Flow peut également être intégré dans l'une des toitures View ou Shade.

Eivissa. Pannelli.
Panels. Panneaux.

Pannelli / Panels / Panneaux

Pareti vetrate / Glass walls / Panneaux vitrés

it / Con l'utilizzo dei pannelli perimetrali in vetro, Eivissa può diventare un ambiente completamente chiuso e isolato dall'esterno. I pannelli vetrati possono essere montati su ciascun lato, indipendentemente, e si muovono scorrendo e impacchettandosi l'uno sull'altro. La dimensione 3745 mm viene coperta da 4 ante vetrate, mentre per quella di 4951 mm sono necessarie 5 ante vetrate. Le ante sono in cristallo temperato dello spessore di 10 mm ed hanno una larghezza di circa 90 cm. Sono dotate di maniglia incassata per facilitare l'apertura e la chiusura, e di un sistema di blocco in chiusura comandato tramite la pressione del piede. Le vetrate possono essere installate sia nel modello di padiglione con il pavimento che nel modello fissato direttamente a terra.

en / Fitted with perimeter glass panels, Eivissa becomes a completely closed space, insulated from its surroundings. The separate glass panels can be fitted to each side and fold as they open. The 3745 mm version requires 4 glass panels; the 4951 mm one 5. Each tempered glass panels is 10 mm thick and about 90 cm wide. They have a built-in handle for easy opening and closing, and a foot-activated locking system. The panels can be installed both on the pavilion version with flooring and on the version fixed directly to the ground.

fr / Des panneaux latéraux vitrés permettent de transformer Eivissa en une solution entièrement fermée et isolée de l'extérieur. Les panneaux vitrés peuvent être montés sur chaque côté, indépendamment et se déplacent en coulissant et en se repliant l'un sur l'autre. Un pavillon de 3 745 mm est couvert par 4 panneaux vitrés alors que 5 panneaux sont nécessaires pour un pavillon de 4 951 mm. Réalisés en verre trempé de 10 mm d'épaisseur et environ 90 cm de largeur, ils sont équipés d'une poignée pour en faciliter l'ouverture et la fermeture et d'un système de verrouillage à la fermeture, actionné par pression du pied. Les panneaux vitrés peuvent être montés sur le modèle de pavillon avec sol et sur le modèle de pavillon directement posé à terre.
